STATE OF MAINE

FINANCIAL REPORT  
OF  
Bureau of Accounts and Control  
OF THE  
Department of Finance

For Period

JULY 1, 1942 to JUNE 30, 1943

# STATE OF MAINE

FINANCIAL REPORT  
OF  
Bureau of Accounts and Control  
OF THE  
Department of Finance

For Period  
JULY 1, 1942 to JUNE 30, 1943

December 22, 1943

To Governor Sumner Sewall and  
Members of the Governor's Council:

Gentlemen:

We submit herewith the Controller's Report showing the financial condition of the several funds of the State of Maine as of June 30, 1943 and their financial operations for the year ended June 30, 1943. This year completes the biennium provided for by the 90th Legislature.

This report is submitted in the same general form as last year's report which was so favorably received. The revenues of all funds are accounted for on an accrual basis; expenditures include all invoices applicable to the year's operations received through July 20. Known major commitments are provided for by carrying balances.

### GENERAL COMMENTS

#### *Combined Operations*

The year just ended has been one of substantial improvement financially. It produced the largest revenues ever received from the Employers Tax for Unemployment Compensation and the net profits from liquor and beer. The high revenues for Unemployment Compensation were accompanied by a continued falling off in claims for Unemployment Compensation with a resultant increase of over \$8,000,000 in the Unemployment Fund to a total of \$18,909,783. As anticipated, revenues from the gasoline tax and motor vehicle registrations declined substantially, but highway expenditures were curtailed accordingly and the condition of the Highway Fund improved during the year. The substantial decrease in expenditures for Protection of Persons and Property reflects the decrease of almost \$700,000 in expenditures of the proceeds of the \$2,000,000 issue of War Bonds. All State departments operated within available funds. Deficits of toll bridges and the Kennebec Bridge Sinking Fund are discussed under Public Service Enterprises.

#### *State Indebtedness*

There were no temporary loans during the year, and the only bonds issued were \$225,000 representing the balance of the \$450,000 authorization for the Eradication of Bangs Disease. \$2,089,000 of bonds outstanding were retired making a net reduction of \$1,864,000. Outstanding bonded indebtedness at June 30, 1943 of \$24,305,500 was the lowest of any year end since 1931. Net reduction of bonded debt in each of the last two fiscal years has been greater than in any previous year in the history of the State of Maine. Since the close of the fiscal year the Governor and Council have authorized the call in advance of maturity of \$1,000,000 par value of Maine Improvement Bonds resulting in a saving of \$133,000 over the next thirteen years. If no bonds are issued during the

current fiscal year, and none are now contemplated, the bonded debt will have been reduced approximately 25% in these three fiscal years as follows:

	Net Reduction in Bonded Debt
Year Ended June 30, 1942 .....	\$1,939,000
Year Ended June 30, 1943 .....	1,864,000
Year Ended June 30, 1944 (Estimated) .....	3,314,000
	\$7,117,000

The largest net reduction in any previous year was \$1,066,000 in the year ended June 30, 1940. All outstanding bonds which are callable at the present time have been called.

#### *Post War Program*

Through a statute effective July 9, 1943 the 91st Legislature set aside from the Unappropriated Surplus of the General Fund \$1,000,000 as a Maine Post War Public Works Reserve of which \$50,000 is available for cost of plans, specifications and surveys. A director of post war planning and an assistant are now engaged in gathering data as to post war plans of industry, municipalities and the State.

While this reserve will probably be inadequate to provide for all deferred construction and maintenance payable from the General Fund, it is encouraging that a start has been made in preparing for capital expenditures, reconstruction, and deferred maintenance known to be necessary, the amount of which is as yet undetermined.

Previous Legislatures had established a Maine State Office Building Authority and a Maine Turnpike Authority, both of which are authorized to issue their own bonds, not to be liabilities of the State, for the construction respectively of an office building to relieve present congestion in the State House and a toll highway. Plans are in progress for both of these undertakings.

As another phase of planning for the post war period the Legislature authorized the State Tax Assessor to make a study of possible means of relieving the tax burden on real estate. This study is under way and it is anticipated that recommendations will be presented to the next Legislature.

#### *Earmarked Revenues*

The practice of earmarking of revenues for specific purposes has been fairly common in the State of Maine. Of total revenues of \$42,108,678 in the past fiscal year only \$15,107,371 were available for general use. \$8,123,477 was earmarked for highway purposes, but subject to allocation to the various highway activities by the Legislature. In certain cases in which special taxes or licenses are levied on a certain group of persons to provide services for that group at no expense to the general taxpayer, this practice can be defended. In many cases, however, there is no relation between the revenues earmarked and the purposes for which they are spent. The expenditures of activities supported entirely from earmarked funds are not so closely scrutinized by the Legislature as are the expenditures of activities requiring appropriations. Economical planning of a department's operations is often impossible since commitments cannot be made until the amount of

revenues available are well established. It may result in one department having more than enough money available for its basic needs while another suffers from lack of funds.

When earmarked funds are ample for the operation of an activity appropriations by each Legislature are unnecessary. When funds are not sufficient, however, any possible advantage to the individual activity is lost as the revenues must be supplemented by an appropriation if the operation is to continue.

The cigarette tax, which is earmarked for old age assistance, is one example of revenue which has no relation to the expenditure for which it is earmarked. The State School Fund so-called, which is set up within the General Fund for the operations of the Department of Education is an outstanding example of earmarked revenues which have become insufficient. It was necessary for the last Legislature to appropriate over \$1,000,000 for Education in addition to amounts earmarked for the State School Fund.

It is urged that the trend in future legislation be away from the earmarking of revenues and that the Legislature consider discontinuing the earmarking of funds for the Department of Education and substitute direct appropriations by the Legislature.

Further details regarding the year's operations are discussed by individual funds.

## GENERAL FUND

### *Summary*

The year's operations for the General Fund resulted in a net gain from operations of \$3,207,174 (see Schedule III for analysis), an increase of \$1,136,246 over the previous year and \$2,893,314 more than the budget. Of this net gain \$582,832 was advanced to the Liquor Commission to provide additional working capital and the balance of the net gain, slightly over \$2,600,000 was reflected in the cash balance at the year end. Cash was also increased approximately \$310,000 by a corresponding increase over June 30, 1942 in unexpended appropriation balances carried forward at the end of the year. In addition to the new working capital advance of \$582,832, unappropriated surplus was reduced by transfers of \$100,000 to the 1936-37 Deficiency Account and \$812,168 to the Reserve for Working Capital Advances which did not affect cash. The working capital of \$100,000 advanced to finance the food stamp plan of commodity distribution was returned during the year.

The transfer of \$100,000 to the 1936-37 Deficiency Account represents that portion of the Deficiency Tax on Malt Beverages applicable by law to that account which as of June 30, 1943 has been reduced to \$692,111. This 1936-37 Deficiency Account is a book-keeping fiction as the account must be deducted from Unappropriated Surplus to determine the true available surplus. It is recommended that legislative action be taken to permit charging the remaining balance of this account to Unappropriated Surplus.

The transfer of \$812,168 to Reserve for Working Capital Advances removes from the surplus account amounts which had in previous years been advanced to the Liquor Commission and certain Working Capital Funds which since they are invested in liquor inventories, automobiles, etc., are not available for appropriation. This transfer leaves the balance of unappropriated surplus the "amount of free and unencumbered surplus according to generally accepted accounting principles" as required by Chapter 271 of the Public Laws of 1943.

The 91st Legislature made certain appropriations for unusual or non-recurring items direct from unappropriated surplus. These appropriations totalled \$3,405,256. The appropriations applicable to working capital advances were recorded as of June 30, 1943. The balance together with the provision for the Institutional Emergency Fund will be recorded July 1, 1943. The latter, therefore, are not reflected in this report, but should be considered in reading the financial statements. In addition to the \$200,000 Institutional Emergency Fund subject to allocation by the Governor and Council, the appropriations shown below which total \$2,110,256 will be charged against unappropriated surplus on July 1, 1943.

Restoration of certain sums to Indian Trust Funds .....	\$ 13,200
Payment to Maine Teachers Retirement Association for State's share to match members contributions for period from July 1, 1933 through June 30, 1943 .....	949,556
(Provision has been made in regular appropriations for the next two fiscal years).	
Post War Public Works Reserve .....	1,000,000
Capital Expenditures .....	147,500
	<hr/>
Total .....	\$2,110,256

In addition to these appropriations from Surplus, the Governor and Council since the close of the fiscal year have authorized the call in advance of maturity of \$1,000,000 of Maine Improvement Bonds. These charges will reduce the net surplus of \$4,001,476 at June 30, 1943.

The obligations for both teacher's contributory retirement and employee's contributory retirement are now being provided for on a current basis and all known legal and moral obligations of the State to Trust Funds or for any other purpose have been recognized. No disposition has been made of a loss on Trust Fund cash in closed banks estimated to total some \$80,000. Whether or not this will affect the General Fund is entirely a legislative matter.

The 91st Legislature enacted legislation changing the name of the old Sinking Fund Reserve to Unappropriated Surplus. Since this act is effective July 9, 1943 and the new name is more technically correct and more generally understood, the term Unappropriated Surplus is used throughout this report instead of Sinking Fund Reserve.

#### *Revenues*

Revenues of the General Fund totaled \$20,767,289 (see Schedule IV) of which \$15,107,371 was available for appropriation and \$5,659,918 was earmarked for departments. These revenues were \$1,405,155 more than last year and \$2,152,071 more than the budget estimate; of the latter increase \$2,112,826 applied to revenues available for appropriation. Net revenue from liquor and beer continued sharply upward and again produced the largest single increase in General Fund revenues, being \$1,066,578 over last year and \$1,534,966 over the budget. The substantial expansion of liquor sales and revenues in the past two years is emphasized by comparison with the previous two year period.

<u>Fiscal Year</u> <u>Ending June 30</u>	<u>Gross Sales</u> <u>(Liquor Only)</u>	<u>Net Profit</u> <u>(Includes Malt Beverage)</u>
1940	\$6,123,850	\$3,382,363
1941	7,100,589	3,615,181
1942	9,480,785	4,781,712
1943	13,685,739	5,848,290

Other major revenue increases over the budget were recorded in the taxes on public utilities and the cigarette tax. Taxes on public utilities exceeded budget estimates by \$634,368. This increase was largely in the tax on railroads reflecting their larger earnings. Cigarette tax revenues of \$1,440,369 were \$140,369 over the budget. Grants from the Federal Government remained at about the same level as the previous year but were approximately \$266,000 less than budgeted because of Federal funds carried forward at the beginning of the year and the rapid drop in administrative costs of the Unemployment Compensation Commission. Of the major changes mentioned the cigarette tax and grants from the Federal Government were earmarked, the others were available for appropriation.

### *Non-Revenues*

The only non-revenues available for expenditure of consequence were the amounts reserved for authorized expenditures at the start of the year. As adjusted these were \$224,514 more than last year and \$814,471 more than the budget. Unexpended balances in Emergency War appropriations, the Institutional Emergency Fund and Old Age Assistance, Aid to Dependent Children, and Aid to the Blind account for the larger part of these variations.

### *Expenditures*

Total expenditures of the General Fund of \$17,303,246 were \$185,469 more than last year and \$1,048,190 less than the budget. These expenditures classified by character were as follows:

	<u>This Year</u>	<u>%</u>	<u>Last Year</u>	<u>%</u>
Current Expenses:				
Personal Services .....	\$ 3,772,981	21.8	\$ 3,698,017	21.6
Other Current Expenses .....	2,841,895	16.4	2,809,999	16.4
Grants, Subsidies, and Pensions .....	10,295,914	59.5	10,069,777	58.8
Total Current Expenses .....	<u>\$16,910,790</u>	<u>97.7</u>	<u>\$16,577,793</u>	<u>96.8</u>
Capital Outlays .....	147,456	.9	179,984	1.1
Debt Retirement (Exclusive of Bonds called in advance of Maturity) .....	245,000	1.4	360,000	2.1
Total Expenditures .....	<u>\$17,303,246</u>	<u>100.0</u>	<u>\$17,117,777</u>	<u>100.0</u>

Further breakdowns of expenditures by departments and by object are included in Schedules VII and VIII.

The far reaching effect of the war is obvious in reviewing State expenditures at the end of the first fiscal year in which we have been at war all twelve months. It has been the dominant factor in almost all major increases or decreases.

Aside from the war, the fact that this was a legislative year and the first year in which the State has contributed to the Employees Retirement System accounts for increases of \$152,268 and \$253,805 respectively altho legislative expenses were less than the budget and less than the 1941 session. Reduced bonded debt and the calling of bonds before

maturity have reduced interest costs from the previous year and from budget estimates. Debt retirement was \$115,000 less than last year because the final maturities of the Maine State Pier bonds fell in the 1941-42 year. Large variations from the budget are reflected for the Emergency Payroll and Mileage appropriations since the expenditures were less than the provision made and these expenditures are scattered thru the various departments rather than appearing opposite the budget figures.

That the war economy has brought increased salaries, higher commodity prices, high employment levels, and scarcity of materials does not need repetition. These conditions are reflected in General Fund expenditures directly by increases for all departments of approximately \$150,000 in salary payments altho 187 fewer employees were being paid from the General Fund, and by increases of almost \$100,000 each for food and fuel. They are seen indirectly in larger payments for Aid to Dependent Children and Old Age Assistance reflecting higher costs of living altho the number of cases has declined. The same factors have brought savings of approximately \$50,000 in travel costs and larger savings in expenditures for general operating expenses, supplies, and capital outlays. The number of cases on general relief have dropped much more sharply than on Aid to Dependent Children and Old Age Assistance with resultant savings nearly equal to the increases in those programs.

In the expenditures by departments the same pattern is plain. Added expenditures by the Adjutant General's Department and from Emergency War Fund appropriations reflect greater activity and the first full year's operations of the State Guard and Civilian Defense. The Adjutant General's Department was substantially below the budget since the budget necessarily provided for the return of the National Guard. The increases in Aid to Dependent Children and Old Age Assistance have already been referred to. Statistics on the several assistance programs showing the case loads, pending cases and average grants are given on Schedule XIV. It will be noted that the average grants for Aid to Dependent Children and Old Age Assistance have increased 19% and 8% respectively over the start of the previous fiscal year, and that approximately one-half of these increases have occurred in the last six months. It was necessary to await action by the Legislature to ensure funds being available to continue increased grants. The Aid to Dependent Children category reached a peak case load in May 1942 of 1,823 cases and has dropped steadily since that date to a case load of 1,663 receiving average grants of \$47.35 per case or \$16.78 per child on June 30, 1943. The Old Age Assistance peak of 16,208 cases occurred in September 1942 and at June 30, 1943 had dropped to 15,742 receiving average grants of \$22.50 per month. The pending load for Old Age Assistance has been cut from 6,195 to 806 during the biennium. The grand total of State pauper cases has dropped from 2,070 to 829 during the biennium. The increased expenditures shown for Education are due largely to changes in normal school accounting to reflect for the first time the total expenditures for these schools.

Large decreases in Maine Development Commission and Inland Fish and Game expenditures are directly attributable to the war emergency which has made large expenditures for recreational advertising unprofitable and reduced revenues of the Fish and Game Department. Reductions in Aid to the Blind expenditures and Emergency Aid result principally from present employment levels altho some of the savings in blind aid must be credited to the new Services for the Blind division which conducts preventive and vocational programs. The largest single drop in expenditures was in the support of state paupers which was \$404,794 less than last year and \$457,132 less than the budget. Total expenditures for Welfare and Charities were \$57,485 more than last year and \$598,035

less than the budget. The large variation from budget estimates is due to the fact that the increased expenditures for Aid to Dependent Children and Old Age Assistance were foreseen and provided for while the pauper situation could not be accurately forecast or measured in January 1941. Expenditures for administration of Unemployment Compensation were sharply curtailed and the budget provision for rent of the new office building was not required when construction was postponed.

Total expenditures for State institutions remained about the same as last year and the budget despite variations in individual institutions. In general increased salaries and commodity prices were offset by the decline in inmate population at the Men's Reformatory and State Prison.

Unexpended departmental balances at June 30, 1943 were \$2,356,856, an increase of \$874,219. Of these balances \$1,214,049 was reserved for authorized expenditures in the next fiscal year (carried forward) and \$1,142,807 was lapsed to increase surplus. These amounts were \$310,111 and \$564,108 respectively more than the previous year. (See Schedule IX).

Noteworthy items contributing to the increase in carrying balances are increases of \$72,723 for the Maine Development Commission, \$61,206 for Inland Fish & Game, \$29,317 for Aid to the Blind, \$142,115 for Old Age Assistance and \$62,219 for Education and a decrease of \$91,006 for the Institutional Emergency Fund which was carried forward last year but lapsed at the end of the biennium. The major increases in lapsed balances were \$92,317 for Emergency Payroll and Mileage Funds, \$50,000 for Maine State Office Building Authority, \$356,335 for State Paupers and \$72,482 for the Institutional Emergency Fund. The changes in handling of the Institutional Emergency Fund balance and normal school accounting have been mentioned. All other large changes in year-end balances, except that for Old Age Assistance, are caused by decreases in expenditures already discussed. Cigarette tax revenues earmarked for Old Age Assistance exceeded estimates and this increase combined with the decreasing case load and the necessary lag in making increases in grants, accounts for this increase. This balance will be available in the next fiscal year for continuing increases to offset higher living costs.

#### *Future Outlook*

The current period remains one of many uncertainties, the greatest of which is the duration of the war. The effect of termination of the war and the time element involved are definitely unpredictable. The budget for the next biennium is necessarily based on continuation of a war economy. In the happy event of an abrupt end of the war a special session of the Legislature would probably follow within a short period and all estimates would be subject to review and revision. In addition, it is expected that recommendations for the post war period will be ready for presentation to the Legislature as previously outlined.

The budget for the next fiscal year estimates an increase in surplus of \$190,716. This estimate anticipates a drop in revenues of approximately \$1,700,000 and an increase in expenditures of approximately \$1,500,000 with no increase in reserves for authorized expenditures.

The estimated revenue drop is almost entirely due to the estimate of liquor revenues which have been estimated at \$4,270,500 as compared with revenues of approximately \$5,800,000 for the past fiscal year and \$4,800,000 for the previous year. Everyone is familiar with the growing scarcity of liquor. No decline in Maine liquor revenues has as

yet materialized, but when and if it does come, as it has in many other states, the falling off of revenues will be quick and severe. Prudence demands conservative estimates of liquor revenue. While it has been impossible to obtain sufficient stocks of many popular brands and prices are constantly rising, the Liquor Commission is to be commended on the inventory they have maintained in these difficult times.

The largest increases in estimated expenditures authorized by the Legislature are approximately \$520,000 more for Old Age Assistance, \$500,000 to the Department of Education to increase the subsidy to cities and towns for each teaching position from \$100 to \$190 to encourage increases in teachers' salaries, and \$143,373 to resume current provision for matching teachers retirement contributions.

## HIGHWAY FUND

### *Summary*

Highway Fund operations have perhaps been as radically affected by the war as any activity of State Government. In recognition of this fact, the special session of the 90th Legislature authorized the Highway Commission with the approval of the Governor and Council to curtail the Legislative budget as necessary to keep expenditures within available funds. Under this authorization the budget for the year ended June 30, 1943 was revised to eliminate practically all expenditures for new construction, and, after providing for retirement of bonds, payment of bond interest, and administrative costs, to carry on maintenance work at the minimum level compatible with protecting the State's investment in present highways. The revised budget anticipated a reduction in highway surplus of a little over \$1,000,000. Altho highway fund revenues dropped 16% from adjusted revenues of the previous year, this reduction was much less than anticipated and the year's operations of the Highway Fund resulted in a net gain from operations of \$1,931,157 (See Schedule III for analysis) an increase of \$2,841,721 over the previous year and \$2,973,905 over the budget, both of which showed losses. Altho the revised appropriations exceeded estimated revenues available for appropriation by \$1,047,143, actual revenues exceeded the estimates by \$2,914,406 accounting for most of the gain. This increase in surplus is reflected in the cash balance at the year end. The reduction of approximately \$460,000 in the reserves for authorized expenditures (carrying balances) at the year end reduced cash correspondingly.

Prior to this country's entry in the war, it was felt that if the Highway Fund could operate during the current period of high debt maturities with a minimum of new issues, the subsequent savings in debt service charges together with the use of a portion of the accumulated surplus would go far toward placing the Highway Department on a pay as you go basis. The peak of debt service charges was passed in the fiscal year ended June 30, 1942. The year ending June 30, 1944 is the second highest and the following year there will be a saving of over \$600,000 in debt service charges from the 1942 peak. In that year debt service charges will be the lowest since 1936. Highway Fund bonded debt reached its highest balance of \$26,144,500 at June 30, 1933 and has since been reduced to \$18,910,500. No highway bonds outstanding are callable. The ratio of payments on principal to total debt service has also improved substantially. From 1922 thru 1935 interest exceeded payments on principal. Currently payments on principal are approximately three times as great as interest payments. The following schedule starting with 1934, the year of highest interest costs, illustrates this trend.

HIGHWAY FUND  
DEBT SERVICE REQUIREMENTS

Fiscal Year Ended June 30	Reduction of Principal	Interest	Total Debt Service
1934	\$ 846,000	\$1,048,685	\$1,894,685
1935	946,000	1,017,095	1,963,095
1936	1,052,000	986,635	2,038,635
1937	1,401,000	960,925	2,361,925
1938	1,501,000	927,385	2,428,385
1939	1,601,000	891,095	2,492,095
1940	1,701,000	849,805	2,550,805
1941	1,853,000	901,405	2,654,405
1942	2,209,000	741,061	2,950,062
1943	1,824,000	679,018	2,503,018
1944	2,074,000	616,496	2,690,490
1945	1,774,000	552,723	2,326,723

The balance of Principal and Interest Maturities are shown on Schedule IX. If post war demands are not excessive, pay as you go should be attainable.

*Revenues*

Revenues of the Highway Fund totaled \$10,392,639 of which \$8,123,477 was available for appropriations and \$2,269,162 was earmarked. (See Schedule IV) These revenues were \$1,957,629 less than last year (after adjusting last year to a comparable basis) but \$4,007,993 more than the budget.

Due to a legislative change in reporting dates, last year's gas tax revenue figures included only eleven months revenues. After adjusting for this difference, gasoline tax revenues dropped approximately 30% which was less than had been anticipated. To date there has appeared little indication of relationship between gasoline tax revenues and motor vehicle registrations and drivers licenses as the latter were only 10% off from the previous year and provided the largest excess over budget estimates.

Since the only construction work now permitted must have Army or Navy approval as well as approval from the War Production Board and other Federal agencies, almost all construction work is financed 100% by the Federal government. Since the State has little control over these projects, only the nominal Federal grant to the Highway Planning Survey was budgeted. Actual grants from the Federal Government were \$1,775,970 which exceeded the previous year by over \$500,000.

*Expenditures*

Total expenditures of the Highway Fund of \$8,922,638 were \$3,626,751 less than last year and \$1,479,104 more than the budget. (See Schedule VII) The excess over the budget is almost entirely accounted for by Federal construction not budgeted. In round figures the major reductions from last year's expenditures were highway construction \$2,200,000, bridge construction \$420,000, highway maintenance \$780,000, interest \$62,000, debt retirement \$385,000. Snow removal expenditures increased approximately \$250,000. Since construction was Federally financed there was little change in the unexpended balances at the end of the year from the previous year except for highway main-

tenance. There the reduction in expenditures was not so great as the reduction in amounts available for expenditure and the reserve was used to the extent of approximately \$460,000.

### *Future Outlook*

Present estimates for the coming year anticipate a deficit of approximately \$1,000,000 in the Highway Fund. This operating deficit would reduce the Unappropriated Surplus of the Highway Fund to approximately \$3,400,000, an adequate margin of safety. This program allows for further substantial reductions in revenues from the gasoline tax and motor vehicle registration and is based on revenues of approximately \$4,000,000 less than last year. While of course subject to more stringent gasoline rationing or a drastic shortage of tires, there is some evidence that gasoline tax revenues may be levelling off at a minimum of approximately \$3,500,000 per year.

Budgeted expenditures are on the same basis as in the year just ended with construction confined to absolutely essential projects, largely Federal, and maintenance expenditures at about the same level.

While Highway Fund activities are very much dependent upon the vagaries of gasoline rationing, the production of tires, Federal release of materials and approval of projects, there is as yet no reason to believe that revenue estimates will not be met and expenditures kept at projected levels. Should such contingencies occur, the Legislature has authorized two issues of bonds, one for the purpose of matching such Federal funds as may become available with matching requirements, the other to refund bonds maturing in order to release funds for snow removal if revenues are not sufficient. It is not now contemplated that the issuance of these bonds will be necessary.

## UNEMPLOYMENT COMPENSATION FUND

The Unemployment Compensation Fund was created to accumulate funds during periods of high industrial activity to provide a cushion in less favorable periods. This accumulation has continued during the past year at a greatly accelerated rate. Revenues were the highest in the history of the Commission during the past year and claims were the lowest. The tremendous impetus of war industry on this fund is shown below:

<u>Fiscal Year Ended June 30</u>	<u>Tax on Employers</u>	<u>Benefit Payments</u>	<u>Surplus at End of Year</u>
1941	\$4,231,595	\$2,492,675	\$ 5,468,352
1942	6,081,476	1,340,071	10,408,536
1943	8,920,096	742,820	18,909,783

As shown above the balance of surplus at the year end was \$18,909,783 most of which was on deposit with the United States Treasury.

## OTHER SPECIAL REVENUE FUNDS

Other Special Revenue Funds are a combination of many independent funds each financed by individual revenues earmarked for that particular activity. More than half the revenues of these funds are from Federal grants. The largest revenues are earmarked

for education, especially vocational education. Vocational education expenditures are still abnormally high due to the war. This year's operations were approximately the same as the previous year.

Expenditures in general follow the revenue trends.

There were increases in the Federal grants for public health, emergency forest fire protection and education with roughly corresponding increases in expenditures for these activities with the exception of education where increased revenues and decreased expenditures were reflected in a larger balance at the close. A change in the law regarding aeronautical gasoline tax refunds more than doubled the revenues of the Maine Aeronautical Commission. Expenditures for snow removal at airports in the State increased the expenditures of this Commission and the unexpended balance also increased.

### PROCEEDS OF GENERAL BOND ISSUES

The programs financed by the \$2,000,000 issue of Maine War Bonds and the \$450,000 issue of Maine Agricultural Bonds are not yet completed.

#### *War Bonds*

From the proceeds of the Maine War Bonds, authorizations for expenditures in the amount of \$1,780,930 have been made leaving \$219,097 which has been reserved for contingencies by the Military Defense Commission. Of the amounts authorized together with such revenues as have been available \$1,403,630 has actually been expended leaving a balance committed but not yet spent of \$396,060.

The expenditures authorized from this bond issue, after providing for administrative expenses, have financed the building of, or major repairs to, armories, have assisted cities and towns in their share of land cost for airports constructed by the Federal government, and furnished equipment for armories and the State Guard. The armory program is practically completed and the larger contributions to airports authorized to date have been made. Expenditures have dropped sharply this year being only \$58,645 compared with \$755,234 last year. Contributions to airports are largely correlated to Federal regulations and requirements which cannot be foreseen, necessitating ample reserves for contingencies.

#### *Maine Agricultural Bonds*

The program for the eradication of Bang's disease financed by Maine agricultural bonds has continued during its second complete fiscal year. Both herd population and percentage of infection continue lower than anticipated. Aroostook, Franklin, Hancock, Piscataquis, and Washington Counties are now modified accredited areas, and it is expected that Oxford and Somerset will soon become accredited. One test has been completed in Penobscot County, and the infected herds are being retested. Eight counties remain to be area tested. However, 15% to 20% of the cattle in these counties have already been tested. The counties which have been tested are the largest livestock areas, and it is estimated that including tests in those counties not as yet area tested, 65% of the cattle in the State are now under the testing program.

This program is carried on in cooperation with the Federal government which supplies a portion of the indemnity money and furnishes personnel. The program was originally scheduled to be completed in 1945, but because of a shortage of veterinarians the

work has been hampered to such an extent that until the personnel shortage is corrected completion of the program cannot be scheduled. It is only through the cooperation of the Federal government in supplying personnel that it is possible to report any progress.

Because of the nature of the work speed is an essential factor in keeping costs low. The manpower shortage will have the effect of increasing the costs of eradicating this disease. Another factor which has tended to increase costs is the increased value of dairy cattle under present conditions which has increased the indemnity payments substantially.

At June 30, 1943, there remained an unexpended balance of the bond issue of \$181,411. Due to the factors mentioned above, there is a distinct possibility that this will not be sufficient to entirely complete the program.

## PUBLIC SERVICE ENTERPRISES

Liquor and cigarette tax revenues were referred to under the General Fund. Despite many difficulties and cancellation of several meets, racing revenues were slightly larger than in the previous year. The cigarette tax division and racing commission are primarily revenue producing agencies not public service enterprises. Since the laws provide that the cost of these operations be deducted from the revenues, they are carried as public service enterprises to simplify the accounting with net revenues only being transferred to the General Fund. It is recommended that these provisions be changed to permit crediting gross revenues to the General Fund with expenses being provided for by appropriation as in other similar cases.

### *Augusta State Airport*

The State airport whose operations have been severely curtailed by wartime restrictions continues to operate at a deficit. However, thru revenue from the Maine Aeronautical Fund for plowing snow and a small reduction in expenses, the operating deficit was reduced approximately \$1,800 to \$5,528.

### *Toll Bridges*

The effect of gasoline rationing has been much more severe in the case of toll bridge revenues than of the gasoline tax and motor vehicle registration.

The revenues of the Waldo-Hancock bridge which was successful financially from its opening until the present emergency were only 40% of the previous year. The operating loss for the year was \$37,796. However there remained at the year end a balance of surplus accumulated in prior years of \$138,584 which should be sufficient for all charges until revenues improve, unless the war should be prolonged further than now seems probable.

The revenues of the Richmond-Dresden bridge, which never has earned sufficient revenues to meet operating expenses, also declined. The operating loss this year was \$2,655. Provision has been made for meeting the losses of this bridge from the Highway Fund for the next two years.

The decrease in revenues of the Deer Isle-Sedgwick bridge together with increased maintenance costs used the surplus accumulated previously and left a deficit of \$1,119. Provision has been made for advancing money for needed major repairs and for operating deficits from the Highway Fund.

The Carlton bridge is now toll free, but there are still outstanding \$1,500,000 of bonds, the principal and interest of which are intended to be retired from payments to the State by the Maine Central Railroad. However, if the payments by the railroad under the terms of the agreement with them are to provide an adequate sinking fund for these bonds, the State must earn 4% on all amounts set aside in the sinking fund. Since it is impossible at present to earn this rate of interest, the present deficit in the sinking fund of \$2,069 may be expected to increase from year to year.

\$1,000,000 of these bonds are callable in 1947 and the balance in 1952. A bill was introduced in the last Legislature proposing a plan for the immediate refinancing of the outstanding bonds at a lower rate of interest. An advisory opinion of the Supreme Court ruled this bill unconstitutional. If present favorable interest rates exist at the call date, 1947, refunding of the bonds at that time at a rate less than 4% could eliminate the deficit in this fund.

### WORKING CAPITAL FUNDS

The various working capital funds are established primarily for the purpose of rendering certain services to other State departments at cost. This year it is possible for the first time to present operating statements for these activities. While there are still further refinements to be worked out in accounting for these activities, especially prison industries and the highway garage, it is believed that these statements are reasonably accurate.

Home industries is a relatively small revolving fund now in process of liquidation.

The prison industries show total sales of over \$70,000 (of which approximately one-third were to State departments) which returned a profit of \$5,701. Sales to State departments were at cost.

The highway garage had revenues, principally from rental of machinery and equipment, of approximately \$380,000. The operations for the year showed a loss of approximately \$69,000 which was largely offset by an adjustment of prior years transactions. Due to the fluctuation in the activity of garage equipment between years, the adjustment of rental rates to maintain this operation at cost will probably be over a period of years rather than in each individual year.

The departmental garage received rentals for use of cars by State departments totalling about \$50,000 at the rate of 3 cents a mile for the first eight months and 3½ cents for the last four months. The small profit offsets a loss in the previous year of approximately the same amount.

The food stamp revolving fund was liquidated during the year and its working capital returned to the General Fund.

Departmental supplies fund, which maintains an inventory of office supplies which are billed to departments at cost, and the post office fund, which controls meter postage machines and bills the departments, handled approximate volumes of business of \$25,000 and \$66,000 respectively. Operating expenses of these two activities are covered by appropriations from the General Fund.

## TRUST AND AGENCY FUNDS

The principal of the Trust and Agency Funds totaled \$4,585,911 at June 30, 1943, an increase of approximately \$500,000. This increase was principally in the new Employees' Contributory Retirement System and the Teachers' Retirement Association. The next fiscal year will produce a much larger increase with the contribution to the Teachers' Retirement Association from the General Fund of over \$1,000,000.

The last Legislature established a three man committee to approve recommendations of the Treasurer for investment of Trust Funds when other methods of investment are not prescribed by law.

Assets of the Trust and Agency Funds are entirely segregated from other State assets except for small amounts of current operating cash, which, altho not segregated, are definitely earmarked. There are no amounts due to or from other funds.

Legislative action is required to determine the disposition of the loss on cash in closed banks estimated at \$80,000. The income on several trust funds is distributed at rates established by law which are in excess of the earnings of the funds, the difference being made up by contributions from the General Fund.

A complete detail of investments of the Trust Funds is published in the biennial report of the Treasurer.

## FINANCIAL STATEMENTS

In the following pages are statements setting forth the financial condition of the various funds of the State as of June 30, 1943 and statements of their operations for the year ended June 30, 1943 accompanied by the certificate of the State Auditor.

These financial statements do not include the operations of the University of Maine, the Maine Maritime Academy or the Port of Portland Authority as these agencies maintain their own accounts. Grants to the University of Maine and the Maine Maritime Academy are included in State expenditures.

WILLIAM D. HAYES, C. P. A.  
STATE AUDITOR

HAROLD E. CRAWFORD  
MUNICIPAL AUDITOR  
CHARLES G. DUDLEY  
DEPARTMENTAL AUDITOR

STATE OF MAINE  
**State Department of Audit**  
Augusta

The Department of Audit has continued, throughout the year ended June 30, 1943, its post audit of the accounts, books, records, and other evidence of financial transactions summarized in the Bureau of Accounts and Control, in accordance with Article VI of Chapter 216 of the Public Laws of 1931, as amended. We have reviewed the closing entries as of June 30, 1943 on the general books of the State of Maine, and schedules prepared therefrom, by methods and to the extent we deemed appropriate.

In our opinion, the balance sheets and related financial schedules of revenue and expenditures, including all supplemental and supporting schedules forming the annual report of the State Controller, present the financial position of the State of Maine as of June 30, 1943, and summarize its financial transactions during the year then ended, without material error.

The above is exclusive of certain statistical data, as that in Schedules V under "Combined Statements of Unrelated Funds", and XV under "General Fund", which while obtained by the Controller from sources considered reliable, was not verified by the Department of Audit.

A handwritten signature in cursive script that reads "William D. Hayes".

B. No allowance is provided in Trust Funds for loss on impounded bank accounts estimated to total some \$80,000.

C. The following unusual or non-recurring appropriations, effective July 1, 1943, made by the Legislature from General Fund Unappropriated Surplus have not been reflected in the Balance Sheets.

Unappropriated Surplus and 1936-37 Deficiency June 30, 1943	\$4,001,476
Deduct Appropriations effective July 1, 1943	
Indian Trust Funds—to restore certain sums to these funds	\$ 13,200
Teachers' Retirement Annuity Fund—to pay the State's accrued liability to match members' contributions	949,556
Post War Public Works Reserve	1,000,000
Capital Expenditures	147,500
Total Appropriations	\$2,110,256

Balance of Unappropriated Surplus and 1936-37 Deficiency after special appropriations \$1,891,220  
The above balance is further reduced to \$1,691,220 by the \$200,000 available for allocation by the Governor and Council for Institutional Emergencies.

Bond Fund Surplus .....	11,446		32,605	
	<b>\$13,651,024</b>		<b>\$ 6,133,152</b>	

Revenues from Gasoline Tax for 1941-42 are for eleven months only. Due to a change in the law, the amount of the June assessment in the sum of \$459,990 was not available before the closing of the books.

Revenues for 1941-42 are inflated in the amount of \$685,281 due to the recording as of June 30, 1942 of certain accounts receivable not previously carried on the general books of the State, partially offset by a charge of \$172,716 in the expenditures to provide for the estimated loss in realization. This makes a net inflation of \$512,565 of which \$282,668 applies to the General Fund.

This schedule combines revenues and expenditures of the General Fund (including such net income from Public Service Enterprises as accrues to the General Fund), Highway Fund, Unemployment Fund, Other Special Revenue Funds and Proceeds of General Bond Issues with interfund revenues and expenditures eliminated. It does not include revenues and expenditures of Public Service Enterprises, Working Capital Funds or Trust and Agency Funds which are non-governmental activities.

\* The above bond maturities in the current year together with similar maturities of Public Service Enterprises not included in this statement in the amount of \$20,000 results in total debt retirement of \$2,089,000. Bonds called in advance of maturity during the year ended June 30, 1942 in the amount of \$325,000 are not included.

**ALL FUNDS**  
**SUMMARY OF BONDED DEBT**

## GENERAL FUND

The General Fund is used to account for all revenues not allocated to specific purposes by law. From the revenues accruing to the General Fund, appropriations are made by the Legislature for all governmental activities not financed by revenues received either from the Federal Government or from special groups and dedicated for specific purposes. Some of the appropriations are supplemented by revenues earmarked for specific purposes but in no case are these revenues sufficient to completely support the activity.

Total Available for Expenditure (See Schedule IV)	\$19,660,102	\$18,600,414

- (A) Revenues of approximately \$40,000 for Bureau of Accounts and Control were netted against expenditures in Budget.
- (B) Revenues of approximately \$26,000 for General Insurance Fund were netted against expenditures in This Year and Budget.
- (C) To avoid inflating revenues and expenditures the transfers from Emergency Payroll and Institutional Emergency Funds have been deducted from these appropriations and added to the appropriations for the department or institution receiving the transfers. The original appropriation is shown in the budget column.

Chapter 325, Public Laws 1941 providing 10% increase in salaries, effective February 2, 1942, for state employees earning less than \$30 a week, provided an Emergency Payroll Fund in the sum of \$80,000 for the fiscal year ended June 30, 1942 and \$200,000 for the fiscal year ended June 30, 1943; to be available where regular departmental appropriations were insufficient to carry the additional cost of this salary increase; from which transfers were to be as necessary by the Governor.

This fund was discontinued at the close of the year. Provision was made for necessary salary increases in the regular appropriations by the legislature.

An Emergency Mileage Fund, for which the Legislature provided \$30,000 for the fiscal year ended June 30, 1943 and \$12,500 for the fiscal year ended June 30, 1942, was set up by the same law to care for overdrafts caused by the increase of rates to be paid by the State for use of private automobiles. No transfers were made in either year and the entire fund was lapsed at each year end.

Chapter 305 of the Public Laws of 1942 enacted during the Special Session of the 90th Legislature is for the purpose of creating the Maine Civilian Defense Corps and providing for the safety of the state in time of war. This act empowers and directs the governor to provide for the security, health and welfare of the people of the state, including the civilian defense of the state, and authorizes the governor, with the advice and consent of the council, to transfer to the

## HIGHWAY FUND

Revenues from the gasoline tax, registration of motor vehicles and certain other revenues are restricted by law to use for highway and bridge construction and maintenance. From these revenues the Legislature makes appropriations for various activities of the Highway Commission. Any revenues not appropriated by the Legislature are available for allocation by the Highway Commission for certain limited purposes. Some highway appropriations are supplemented by revenues earmarked for specific purposes.

	\$ 1,931,157	\$ 2,841,721	\$2,973,905

The Special Session of the 90th Legislature authorized the Highway Commission, with the approval of the governor and council, to curtail the legislative budget as necessary to keep expenditures within available funds. Under this authorization the budget for the year ended June 30, 1943 was revised to eliminate practically all expenditures for new construction and to carry on maintenance work at minimum levels. The budget figures used on this and other schedules reflect the curtailed budget.

	<b>\$12,984,714</b>	<b>\$14,230,900</b>	<b>\$6,418,743</b>		

Revenues from Gasoline Tax for 1941-42 are for eleven months only. Due to a change in the law, the amount of the June assessment in the sum of \$459,990 was not available before the closing of the books.

Revenues for 1941-42 are inflated in the amount of \$200,428 due to the recording as of June 30, 1942 of certain accounts receivable not previously carried on the general books of the State, partially offset by a charge of \$13,042 in the expenditures to provide for the estimated loss in realization.

Gasoline tax figures represent gross assessments while the revenues shown on Schedule IV are net after refunds and do not include the June 1942 assessments.

Auto Registration and Drivers' Licenses represent gross receipts while the revenues shown on Schedule IV are net after refunds.

## UNEMPLOYMENT COMPENSATION FUND

Revenues accruing to the State from the tax on employers for Unemployment Compensation are credited to this fund. These revenues are for the purpose of paying benefits to eligible unemployed. Such current revenues as are not required for current benefits accumulate in a trust fund on deposit with the Federal Government to pay future benefits. This operation is closely co-ordinated with the Federal Government and the cost of administration is paid from Federal funds.

## OTHER SPECIAL REVENUE FUNDS

Under this caption are included many separate smaller funds, each of which operates from earmarked revenues which are available for no other purpose. The revenues of these funds are received principally from taxes or fees paid by special groups for activities carried on by the State for development or conservation of natural resources or protection of the public and from Federal grants for State-supervised projects.

Revenues for 1941-42 are inflated in the amount of \$73,770 due to the recording as of June 30, 1942 of certain accounts receivable not previously carried on the general books of the State, partially offset by a charge of \$31,260 to provide for the estimated loss in realization. This makes a net inflation of \$42,510.

## PROCEEDS OF GENERAL BOND ISSUES

Under this heading are grouped all expenditures financed solely by the proceeds of general bond issues. Bond funds are used only to handle the proceeds from the sale of bonds and have nothing whatever to do with bond retirements.

## PUBLIC SERVICE ENTERPRISES

Commercial enterprises of the State are classified under this fund. Such undertakings differ from the usual governmental functions in that they are business operations which are carried on by government only for the public good or as governmental revenue-producing agencies or a combination of both. This fund is made up of the following minor funds:

Liquor Commission  
 Racing Commission  
 Augusta State Airport  
 Waldo-Hancock Toll Bridge  
 Richmond-Dresden Toll Bridge  
 Deer Isle-Sedgwick Toll Bridge  
 Kennebec (Carlton) Bridge Bonds  
 Kennebec (Carlton) Bridge Sinking Fund  
 Cigarette Tax  
 Maine State Pier

## WORKING CAPITAL FUNDS

This account combines several similar funds, sometimes called revolving funds, representing non-profit but self-reimbursing activities conducted by the State either as service agencies for departments of the State or as financing agencies (similar to petty cash accounts) for activities authorized by law. This fund is made up of the following minor funds:

Home Industries Fund  
 Prison Industries  
 Highway Garage  
 Departmental Garage  
 Departmental Supplies  
 Post Office  
 Purchase of Cattle

## TRUST AND AGENCY FUNDS

These funds include many minor independent funds not directly associated with governmental functions, as listed below:

## EXPENDABLE FUNDS

## Public Trusts

Pension or Retirement Funds

Maine Teachers Retirement Assn.

Employees Retirement System

Revenue Receipts of Non Expendable Trusts

## Private Trusts

Guaranty Deposits

Public Administrators Funds

Receivers Funds for Defunct Banks

Financial Responsibility Deposits

Trustees, Cities and Towns

## Agency Funds

Due Other Governmental Units

Tax on Bank Stock

Dog Licenses

County Taxes

Road Repair Taxes

## NON EXPENDABLE FUNDS

## Public Trusts

Lands Reserved for Public Uses

Permanent School Fund

Other Trust Funds

Trust funds are composed of money held by the State as trustee or custodian, invested as endowment funds to produce revenues supplementing appropriations for specified governmental purposes, for the benefit of cities and towns of the State or other purposes. Agency funds are either temporary deposits to guarantee meeting of obligations to the State or the public, or amounts collected by or deposited with the State for the benefit of the general public or cities, counties and towns of the State.
