DEPARTMENT OF HEALTH AND WELFARE
BUREAU OF HEALTH

Augusta, Maine, May 9th, 1952

To His Excellency, Frederick G. Payne, Governor of Maine:

Through David H. Stevens, Commissioner of Health and Welfare

Sir:

Pursuant to Section 387, Chapter 22, Public Laws of 1944, I have caused a record to be kept of all returns to this office of births, marriages, divorces and deaths under the provisions of Sections 385 and 386 of the above named chapter; and transmit, herewith, a report of same for the calendar year ended December 31, 1950.

Respectfully,

PARKER B. STINSON
Registrar of Vital Statistics
Director, Division of
Vital Statistics

REPORT OF THE DIVISION OF VITAL STATISTICS
FOR THE CALENDAR YEAR, 1950

GENERAL STATISTICS FOR MAINE, 1950

Births to mothers resident in Maine numbered 21,239 (702 fewer than for 1949, but exceeded only in the years 1947, 1948 and 1949). In this number were 237 plural births in which at least one child was live born. There were two sets of triplets. There were 412 Stillbirths. There were 8,617 Marriages (532 more than for 1949). There were 9,962 resident deaths (211 fewer than for 1949 and at a crude rate of 9.4 per thousand of population, the lowest death rate in Maine's history). Of these deaths 663 were of children under one year of age, giving an Infant Death Rate of 31.2 per 1,000 Live Births, also a new low rate for Maine. Divorces and Annulments numbering 2,175 were exceeded only in the years 1944 through 1948.

POPULATION

The Seventeenth Decennial Census reckoned as of April 1st, 1950, gave Maine a population of 913,774, a 7.9% gain over the 1940 U. S. Census. For computation of rates in the tables following, the July 1st, 1950 population is reckoned as 915,438.

ALLOCATIONS, INTERPRETATION AND RATES

Beginning with 1935, births and deaths have been assigned to the place of residence rather than to the place of the event. In 1939 upon adoption of the Standard Certificates of Birth, Death, and Stillbirth, the arbitrary rule of one year of residence is replaced by the entry by the physician or funeral director of the "usual place of residence." (In the case of a birth or infant death, the residence is that of the mother). The numbers quoted in the following tables accordingly, regardless of the place of the event, deal only with residents of towns and cities of the state. It should be understood that among the states of the Union and with the several provinces of Canada there is interchange of the records of birth and death, and in the case of marriages of non-residents there is an exchange among the states of New England.

The general or "crude" rates of birth, death, and marriage are reckoned as so many to each 1,000 population. Infant death-rates and puerperal or maternal death-rates are the number of such rates to each 1,000 live births. Specific death-rates, those for separate death causes, are reckoned as so many to each 100,000 population.

NEW CONCEPT OF ASSIGNMENT OF CAUSES OF DEATH

With this year began the use of the Sixth Revision of the International Lists of Diseases and Causes of Death, fashioned by the World Health Organization at the Geneva Assembly in 1948. The Manual of its classification has been so broadened into detail that the costs of printing have forced a condensing into the "Intermediate List of 150 Causes for Tabulation of Morbidity and Mortality." This scheme, adequate for most purposes, obliges researchers in special fields to obtain their information by letter to this office. Now after five cause-of-death classifications but all using the same manner of determination, the Sixth Revision alters radically both the classification and determination of the cause-of-death assignment. As a consequence, certain death causes (notably diabetes mellitus, nephritic diseases and deaths by accident) from now on will not be comparable with assignments of years before 1949.

TABLE NO. 30
Table of Infant Mortality, 1950

Age-Periods	Number of Deaths	*Rate of Mortality
Under 1 day	216	10.2
1 day	78	3.7
2 days	63	3.0
3 days but less than 7 days	52	2.4
1 week but less than 2 weeks	24	1.1
2 weeks but less than 3 weeks	21	1.0
3 weeks but less than 1 month	14	0.7
1 month but less than 2 months	39	1.8
2 months but less than 3 months	31	1.5
3 months but less than 6 months	64	3.0
6 months but less than 9 months	39	1.8
9 months but less than 1 year	22	1.0
Total	663	31.2

*These rates are based on the number of live births, 21,239.

TABLE NO. 31

Important Causes of Infant Deaths by Time Periods, 1950

		Total under 1 year	Less than 1 day	1 day	2 days	3 days but less than 7	Total less than 1 week	1 week but less than 2	2 weeks but less than 3	3 weeks but less than 1 mo.	Total less than 1 month	1 month but less than 2	2 months but less than 3	3 months but less than 6	6 months but less than 9	9 months but less than 1 yr.
