REPORT OF THE MAINE STATE RETIREMENT SYSTEM

FOR THE BIENNIUM ENDED JUNE 30, 1950

The Report of the operation of the Maine State Retirement System for the biennium ended June 30, 1950 is hereby submitted in accordance with the provisions of Sec. 15. Chapter 38 of the Revised Statutes.

The State Retirement Law was originally enacted by a special session of the Legislature in January of 1942 and became effective as of July 1 of that year.

Since the enactment of the law various amendments have been enacted by succeeding Legislatures and in the Legislature of 1947 a general revision of the entire law was made, the main purpose of which was to include under the State Retirement plan all public school teachers.

Since the last report was published as of June 30, 1948 certain other amendments have been enacted by the Legislature. At the regular session of 1949 the name of the System was changed from "State Employees' Retirement System of the State of Maine" to the "Maine State Retirement System." This was done primarily because of the inclusion in the System of all public school teachers and the fact that city, town and county employees are also included under the plan if, as and when such governmental units elect to affiliate with the State System.

At the present time there are 38 of these "Participating Local Districts" in the State plan composed of 11 cities, 10 towns, 5 counties, 8 water districts, 3 public libraries, and the Maine-New Hampshire Bridge Authority. There are at the moment some 25 or 30 other local governmental units that have had initial valuation surveys made and are presently considering affiliation with the State System.

Of the other amendments which were enacted by the 1949 Legislature, the one of general interest is that which permitted what is known as "reciprocity of credits" as between employees of the various Local Participating Districts and/or the State and/or the teacher group. This in effect means that any employee may move from one covered agency to another so far as employment is concerned without losing accumulated retirement benefits.

At the special session in February of 1950 the only amendment made to the law was to provide for an increase of \$100 a year in the benefits payable to the older retired teachers known as the "1913" group, the said increase being confined to those teachers who had already retired under the provisions of the Retirement act prior to March 1, 1950 and who had never made any contributions to any retirement system during their years of teaching.

It is anticipated that several amendments to the Retirement Law will be offered to the current session of the Legislature. Some of these proposed amendments will be in the nature of clarification of administrative procedures under the law and others which will have to do with liberalizing benefits.

The System as presently constituted embraces approximately 15,000

members, roughly divided into the following groupings: 6,000 State employees, 7,000 teachers, 2,000 employees of Local Participating Districts.

The total invested funds of the System as of the end of the biennium June 30, 1950 amounted to something over \$11,000,000.00

The annual cost of the System to the State is at the present time approximately \$1,780,000.00 and the members of the System are contributing at the present time approximately \$1,500,000.00 per year.

The cost to the State will reduce to something less than half of the above indicated figure if, as and when the total liability for all years of "Prior Service" of all members of the System have been liquidated. This point will be reached, on the basis of actuarial computations, approximately 25 years hence.

The Maine State Retirement System is what is known as a legal reserve system and all computations made thereunder must be made on an actuarial basis in accordance with standard actuarial tables and formulas.

Responsibility for administration of the System is vested in a parttime Board of Trustees composed of 7 members, 4 ex officio and 3 lay members. The make-up of the Board includes the Chairman of the State Personnel Board, the Treasurer of State, the State Bank Commissioner, the State Controller, a representative of the Maine Teachers Association, a representative of the Maine Employees' Association, and a member appointed by the Governor.

The actual administration of the System is performed by an Executive Secretary, a Consulting Actuary, and 12 staff members.

The only amounts which the State and/or the Local Participating Districts and the members are required to pay into the System are those which are necessary to establish the reserves for the payment of all benefits at point of retirement. The cost of administration of the System is provided for by separate appropriation made by the Legislature and their pro rata share of the cost of administration is charged back to and collected from the various Local Participating Districts. At the present time the Maine State Retirement System is being administered at a cost of approximately 12% of its total annual business.

Following are tabulations reflecting the condition of the System on a cash basis and includes a comparative balance sheet, a listing of investments, an analysis of changes in reserve for the year ended June 30, 1950, a comparison of administrative costs for the two years of the biennium ended June 30, 1950, and a tabulation relative to pension pay rolls.

Following these listings and schedules will be found the report of the Consulting Actuary of the System which involves not only the condition of the System from an actuarial standpoint as of June 30, 1950, but also provides detailed information as to the operation and experience of the plan since its inception up to and including the year 1949.

Board of Trustees Maine State Retirement System Augusta, Maine

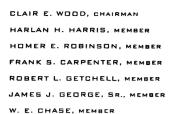

Gentlemen:

I submit herein the eighth valuation report of the actual and prospective Assets and Liabilities of the Maine State Retirement System as of June 30, 1950.

The total membership valued was 5772 which included 5236 active and 536 retired members.

This valuation covers State employees only. Valuation of each participating local district have been done separately and are not attached to this report. At the present time it is not possible to make a valuation of the teachers as their prior service has not yet been determined. Such prior service will be available in time to make the next valuation.

Following is the Actuarial Balance Sheet covering the members subject to valuation:

.

ANNUITY SAVINGS FUND

The Annuity Savings Fund is the fund in which is accumulated the amounts contributed by employees to pay part of their retirement benefits. Until they do retire the amount in this fund is shown both as an asset and as a liability.

ANNUITY RESERVE FUND

The Annuity Reserve Fund is the fund from which is paid all annuities and benefits in lieu of annuities. It is made up of reserves transferred from the Annuity Savings Fund upon retirement of members.

PENSION RESERVE FUND

The Pension Reserve Fund is the fund from which all membership service pensions are paid if no prior service pension is being paid to the retired member.

PENSION ACCUMULATION FUND

In this fund is accumulated all reserve for the payment of pensions and other benefits payable from contributions made by the State. From this fund is paid all pensions and other benefits on account of members with prior service credit payable from said contributions.

NORMAL CONTRIBUTIONS

Normal Contributions necessary to be made to the Pension Accumulation Fund from funds indicated below were obtained by multiplying total salaries of members of such funds by 3.71% in accordance with provisions of law:

Fund		Normal Contributions				
	Salaries	1951-52	1952-53			
General State Highway Liquor Commission M. E. S. C. Maine Port Authority	\$ 9,466,860.00 2,323,378.00 771,732.00 826,228.00 36,556.00	<pre>\$ 351,221.00 86,197.00 28,631.00 30,653.00 1,356.00</pre>	<pre>\$ 351,221.00 86,197.00 28,631.00 30,653.00 1,356.00</pre>			
Total	\$13,424,754.00	\$ 498,058.00	\$ 498,058.00			

ACCRUED LIABILITY PERCENTAGE

Accrued Liability contributions necessary to be made to the Pension Accumulation Fund for the Fiscal Year 1951 were obtained by multiplying the contributions for the Fiscal Year 1950 by 1.03%. Such contributions for the Fiscal Year 1952 were obtained in a like manner by multiplying the proposed 1951 contributions by 1.03%.

	Accrued Liability			
Fund	<u>1951–52</u>	<u> 1952-53</u>		
General State Highway Liquor Commission M. E. S. C. Maine Port Authority	\$236,933 83,972 26,313 32,107 	\$244,041 86,491 27,102 33,070 1,412		
Total	\$3 80 ,696	\$392,116		

INTEREST DEFICIT

During the Fiscal Year 1948 the State earned \$189,032.60 interest. This represented an earned interest rate of 2.566% on its funds. During the Fiscal Year 1949 the State earned \$231,771.81 interest. The earned interest rate on its Funds for this year being 2.578%.

mad Idahilita

The State has been guaranteeing 3% on Funds of this system. This results in the following deficits for the last two Fiscal years which should be provided by the 1951 Legislature:

	In		
Departments	1948-49	1949-50	Total
General Highway M. E. S. C. Liquor	\$10,102.01 2,479.26 881.66 823.51	\$11,327.65 2,780.06 988.63 923.42	\$21,429.66 5,259.32 1,870.29 1,746.93
Total	\$1 4,286.44	\$16,019.76	\$30,306.20

TEACHERS SYSTEMS

The 1947 Legislature combined the Teachers Pension Systems with the Maine State Retirement System. It provides minimum benefits for some teachers and certain guaranteed rights for all teachers which they did not have under their old law.

The Teachers plans may be divided into two parts. Those who were members of the Non-Contributory Teachers System and those who were members of the Maine Teachers Retirement System.

Non-Contributory Teachers System

This is the older system comprising those teachers in service prior to 1924. No contributions were required from this group until 1945. It was on a "pay as you go" basis; no provision for funding was made until 1947.

There are 3124 teachers in this group of which 2224 are active and 900 retired.

The state is currently paying \$592,578.60 to 872 of these retired members.

Because of the advanced age of many of these teachers I believe that shortly there will be a sizable increase in pension payments due to new retirements.

Maine Teachers Retirement System

This group is composed of all other teachers. There was some funding of this plan prior to its merging with the State System.

Minimum contributions were made by members of this group prior to 1947.

There are 4323 teachers in this group of which 4316 are active and 7 retired.

TOTAL MEMBERSHIP

Records are held on the following number of members:

Group	Active	Retired	Total
State Employees Teachers	5236 6540	536 907	5772 7447
Totals	11776	1443	13219

EXPERIENCE INVESTIGATION

Subsection XIII of Section 12, Chapter 60, Revised Statutes 1944 as amended provides that in the year 1950 the actuary shall make an investigation of the tables used to determine the costs and benefits of the State System.

Mortality Before Retirement

Table 1 traces the membership in the State System for state employees from July 1, 1942 through June 30, 1950.

The total number of lives at each age for each year was obtained so that the tabular rates of mortality could be applied to such total exposure in order to determine the tabular or expected deaths. Table 2 and 3 shows the total exposure for Males and Females respectively.

Applying the tabular rates of mortality to the total exposure at each age the expected deaths shown in Table 4 are obtained. Table 4 compares the actual and expected deaths prior to retirement for Males and Females. The combined experience under both is also shown.

The ratio of actual to expected would appear to develop a trend quite common today. Mortality in the early years is lighter than assumed in the valuation tables. The amount of experience is not yet significant but I believe we can assume that the mortality before retirement is considerably lighter than shown in the Mortality table now in current use by the Board of Trustees.

Withdrawals Before Retirement

The tabular withdrawal rates were applied to the total exposure

at each age developed in Tables 2 and 3.

Table 5 shows a comparison of actual to expected withdrawals for Males and Females. The combined experience is also shown.

The number of withdrawls has exceeded expectations to a considerable degree. This period included the war years when with-drawals were high.

Table 6 combines the results of Table 4 and 5 in order to determine if the combined decrements before retirement are as large as expected.

Even discounting withdrawal experience to a great degree it appears that the combination is still greater than 100% and the present tables used prior to retirement are adequate.

Mortality After Retirement

An exposure table for the years 1942-50 was developed to which was applied the tabular rates of Mortality. Table 7 shows a comparison of the Actual to Expected Deaths for Males, Females and combined.

For Males through age 75 the expected deaths are only one more than actual. There is not enough exposure to make any significant statement concerning Females.

Combined through age 75 shows actual to be 94.3% of expected, differing by less than 3 deaths.

Because of the small amount of experience the probable error is somewhat large.

It would appear that the experience has been satisfactory and the table adequate.

Governor and Council Retirements

Before adoption of State Retirement System in 1942 employees were retired by Council order. The State System absorbed this liability. Table 8 shows the experience from 1942-1950 for these pensioners.

Further Tables

Table 9 shows the experience of Members retired under the State System.

Table 10 shows the experience of those retired by Governor and Council.

Table 11 shows the experience of Active and retired members of the Teachers Non-Contributory System including retirement experience of those retired by the Board of Trustees. It also shows the experience of those members retired prior to the merging with the State Retirement System.

Table 12 shows the experience of all other active and retired teachers including those who were formally members of the Maine ^Teachers Retirement System.

CONCLUSION

The comparison of the actual experience with tabular revealed a total decrement prior to retirement from the System of well over 100%. Thus the tables used are conservative and the actuary recommends to the Board of Trustees that no change be made in present tables.

There has not been enough experience after retirement to indicate a trend. For the time being the table of Mortality appears to be adequate and the actuary recommends no change at the present time.

Respectfully submitted,
