NON-DISCRIMINATION NOTICE

In accordance with Title VI of the Civil Rights Act of 1964, as amended by the Civil Rights Restoration Act of 1991 (42 U.S.C. Section 1981, 2000e et seq.) Section 504 of the Rehabilitation Act of 1973, as amended (29 U.S.C. Section 794, the Age Discrimination Act of 1975, as amended (42 U.S.C. Section 6101 et seq.), Title II of the Americans with Disabilities Act of 1990 (42 U.S.C. Section 12101 et seq.), and Title IX of the Education Amendments of 1972, the Maine Department of Human Services does not discriminate on the basis of sex, race, color, national origin, disability or age in admission or access to or treatment or employment in its programs and activities.

Kim Pierce, Affirmative Action Coordinator, has been designated to coordinate our efforts to comply with the U.S. Department of Health and Human Services regulation (45 C.F.R. Parts 80, 84, and 91) and the U.S. Department of Education regulations (34 C.F.R. Part 106) implementing these Federal laws. Inquiries concerning the application of these regulations and our grievance procedures for resolution of complaints alleging discrimination may be referred to Scott Johnson at 221 State Street, 11 State House Station, Augusta, Maine 04333-0011. Telephone number: (207) 287-1877 (Voice) or 1-800-332-1003 (TTD), or the Assistant Secretary of the Office of Civil Rights, Washington, D.C.

GUIDELINES FOR DATA USE

The Maine Office of Data, Research and Vital Statistics (ODRVS) requests that the following guidelines be followed in any further publication or release of data from this report:

- a. Any published material derived from the data should acknowledge the Office of Data, Research and Vital Statistics, Offices of Health Data and Program Management, Bureau of Health, Maine Department of Human Services, as the original source. It should also include a disclaimer which credits any further analyses, interpretations, or conclusions reached to the author, and not to the Office.
- b. Recipients who wish to publish a technical description of the data should make a reasonable effort to ensure that the description is not inconsistent with that published by the Office.

ACKNOWLEDGEMENTS

We wish to thank those individuals, organizations and agencies contributing to the development and production of Maine postcensal population estimates. Religious school enrollment data were provided by the individual schools; Lisa Collins, Clerk Typist III, and Kim Haggan, Planning and Research Associate, conducted the survey for the Office of Data, Research and Vital Statistics. Non-religious school enrollment data came from the Maine Department of Educational and Cultural Services, and were prepared for input to the estimation programs by Joyce Perry, Planning and Research Associate. Housing unit data were provided by the Institute for Real Estate Research and Education (University of Southern Maine). The county controls used in the development of these estimates were generated by the United States Census Bureau. This report was prepared by Donald R. Lemieux, under the general supervision of N. Warren Bartlett, Director of the Offices of Health Data and Program Management.

INTRODUCTION

This report contains postcensal estimates of Maine's population on July 1, 1998, for the State, counties and minor civil divisions (MCDs). Organized MCDs are arranged in alphabetical order within each county, and summaries of each county are displayed as well. Contiguous unorganized MCDs within the same county are clustered as a single unit of population. Within each table, the unorganized MCDs follow the organized minor civil divisions.

A component method was used to produce these estimates. The estimated population of each minor civil division is equal to the sum of the 1990 census count, the natural change (births minus deaths) and the estimated net migration from April 1, 1990 through June 30, 1998.

The first two components of these estimates were known data. The third component, net migration, was estimated using a regression line based on the experience of the previous censal decade (1980-1990). For each area, the dependent variable in the equation was the net migration rate. The independent variables were the ratios of the difference between the actual and expected values of given symptomatic indicators of net migration to the expected values. The expected values of these indicators were based on United States trends. After the estimated net migration rate of a given MCD was calculated, it was multiplied by the population base (the census count plus one-half of the natural change) to obtain the estimated net migration. The estimated net migration was added to the sum of the 1990 census count and the natural change to obtain an unadjusted estimate. The unadjusted estimates were then adjusted to sum to independently generated county-level estimates. For this report, county-level estimates prepared by the United States Census Bureau were used as controls.

Prior to publication, the estimates were reviewed by comparing them to trends in selected demographic indicators (passenger vehicle registrations, school enrollment, etc.). Revised estimates were then prepared, as needed.

The ten-year prediction equation used to estimate net migration rates was:

$$Y = 0.08552X_1 + 0.46512X_2 + 0.31857X_3 + 0.06219, \text{ where}$$

Y = the net migration rate, X_1 = the independent variable for births, X_2 = the independent variable for K-12 school enrollment, and X_3 = the independent variable for total housing units.

Using the new regression line to estimate net migration rates, two sets of test population estimates for April 1, 1990 were prepared. One set was adjusted to sum to the enumerated county totals from the 1990 census; while the other set was not. These data provide a measure of the expected accuracy of ODRVS postcensal estimates for the decade of the 1990s (Text Table I).
