Augusta

CENSUS OF MAINE MANUFACTURES - 1951

Value of Maine Manufactured Goods Tops 1 Billion Dollars

Value of goods produced or processed by Maine manufacturers during 1951 totaled more than 1 billion dollars. This figure, based upon returns from 1,691 manufacturing establishments in the State, represents an increase of approximately 246 million dollars over 1950 and about 350 million dollars over 1949 production. 130,095 workers, of which 91,553 were men and 38,542 women, received wages totaling more than 328 million dollars.

Product value during the 1941-1951 period was :

1951	\$ 1,195,462,216
1950	948,898,059
1949	844,042,776
1947	880,768,987
1945	759,801,221
1943	588,240,304
1941	438,717,089

Woolens and Worsteds Show Greatest Gains

Principal gains in 1951 product value occurred in the Textile Mill Products and Paper and Allied Products industries with textiles showing an over-all increase of 32 per cent. Woolen and worsted textiles advanced from 104 million dollars in 1950 to 170 million dollars in 1951. However, within the textile industry, three groups suffered losses. They were : 1. Rayon, Other Synthetic and Silk Textiles, 2. Knit Goods and 3. Carpets, Rugs and Other Floor Coverings. Machinery was up 31 per cent, Shipbuilding and Repairing up 27 per cent and Lumber and Wood Products up 23 per cent.

Boots and Shoes Give Way to Food Products

Textiles and paper and allied products continued to be the two leading indus-

(Continued on Page ii)

tries in Maine but Footwear which has occupied third place for many years dropped to fourth on the list and was supplanted by Food and Kindred Products. While Footwear registered a gain of 9 per cent over the previous year's production, Food and Kindred Products increased 23 per cent. Primarily responsible for the increase in foods were the exceptional gains in Wholesale Poultry Dressing and Packing.

Cumberland County Leads in Value of Production

Product value of all manufacturing in Cumberland County during 1951 was the highest of any Maine county - \$ 191,796,635, nearly one-sixth of the State total. Leading counties, in order of importance, were :

1. Cumberland County	16 %
2. York County	14 %
3. Androscoggin County	12 %
4. Penobscot County	12 %
5. Kennebec County	11 %

Leading counties, according to product value, in the principal Maine manufacturing industries were :

Textile Mill Products

1. York County	29 %
2. Androscoggin County	22 %
3. Kennebec County	16 %
4. Cumberland County	7 %
5. Penobscot County	7 %

Paper and Allied Products

1. Penobscot County	23 %
2. Oxford County	Restricted
3. Kennebec County	15 %
4. Cumberland County	15 %
5. Aroostook County	Restricted

Food and Kindred Products

1. Cumberland County	38 %
2. Washington County	12 %
3. Penobscot County	10 %
4. Waldo County	8 %
5. Aroostook County	7 %

(Continued on Page iii)

Footwear

1. Androscoggin County	34 %
2. Kennebec County	14 %
3. Somerset County	13 %
4. York County	11 %
5. Cumberland County	9 %

Lewiston-Auburn Is Maine's Largest Industrial Urban Area

Lewiston-Auburn led all other Maine industrial urban areas in the value of goods produced or processed in 1951. Product value in these urban places was \$ 116,630,116. In second place was the Portland-South Portland area and the Biddeford-Saco area was third. The number of workers employed in all manufacturing establishments in these areas substantiates these findings. There were 24,736 workers in the Lewiston-Auburn area; 8,551 in the Portland-South Portland area and 8,418 in the Biddeford-Saco area. The ten leading cities, in terms of production value, were :

1. Portland	\$ 82.1 million
2. Biddeford	71.6 million
3. Lewiston	71.1 million
4. Westbrook	56.1 million
5. Auburn	45.5 million
6. Waterville	38.8 million
7. Augusta	35.0 million
8. Bath	34.5 million
9. Old Town	23.0 million
10. Bangor	17.9 million

Average Annual Earnings Continue Upward

Maine's Furniture and Apparel industries were the only manufacturing groups where declines in average annual earnings were indicated. Average for all manufacturing employees was \$ 2,524 in 1951 as compared with \$ 2,269 in 1950 and \$ 2,106 in 1949. Workers in Ship and Boat Building and Repairing received the highest average annual earnings - \$ 3,837. Others :

Paper and Allied Products	\$ 3,559
Machinery	3,373
Fabricated Metal Products	2,872
Textile Mill Products	2,861
Printing and Publishing	2,828
Stone, Clay and Glass Products	2,696
Footwear	2,090
Lumber and Wood Products	2,009
Food and Kindred Products	1,066

(Continued on Page iv)

TECHNICAL NOTES AND DEFINITIONS

Industrial Classification The Standard Industrial Classification system as compiled by the Executive Office of the President, Bureau of the Budget was used to determine the industry title applicable to each establishment. Descriptions of major industry groups may be found on Page 85. Each establishment has been classified according to its principal activity during 1951. In a few instances, where separate records for each establishment were not kept, data have been included in the totals for the civil division in which the home office or principal place of business was located.

Value of Product is the net selling price of all goods manufactured or processed during the calendar year. If industrial operations were on a contract basis, the total of amounts received for contract work or services performed has been included.

Gross Wages Paid shows total earnings during the calendar year of all employees, except executives, before deductions for Old-Age and Survivors Insurance, group insurance, withholding tax, defense bonds, union dues, etc. Pay for sick leave, holidays, vacations and bonuses has been included. Owing to the exclusion of various welfare benefits, pay roll taxes paid by employers, etc., the average annual earnings data should not be interpreted as representing total labor costs on the part of the employer.

Number of Workers is that reported as an average or representative for the calendar year. Workers engaged in fabricating, processing, assembling, inspection, receiving, storage, handling, packing, warehousing, shipping, maintenance, repair, janitorial, watchmen services and product development are included as are working foremen and all other employees below the executive level.

Establishment is defined as a single physical location where industrial operations are performed; it is, therefore, a place of business rather than a legal entity or company which may have units in many locations.

Civil Divisions are geographical units established for governmental purposes. Major civil divisions, in this bulletin, are counties; minor civil divisions are cities, towns, plantations and townships.

ARRANGEMENT

Value of Product data are shown in Section A (cherry-colored pages) as follows:

Table	1	All manufacturing, major industry groups	Page	1
Tables	2-15	All manufacturing, subordinate industry groups	Pages	2- 9
Tables	16-31	Each county, by major industry groups	Pages	10-18
Tables	32-47	Each county, by minor civil division	Pages	19-27

I N D U S T R Y D E S C R I P T I O N S

Food and Kindred Products This major group includes establishments manufacturing foods and beverages for human consumption, and certain related products such as manufactured ice, chewing gum, and prepared feeds for animals and fowls.

Textile Mill Products This major group includes establishments engaged in performing any of the following operations, regardless of the type of fiber used: (1) manufacturing yarn, thread, cordage, and twine; (2) manufacturing woven fabric, carpets, rugs, braids, laces, knit fabric, knit garments, and other products from yarn; (3) dyeing and finishing fibers, yarn and fabric; and (4) coating, waterproofing, and otherwise treating fabric. This classification makes no distinction between the two types of organizations which operate in the textile industry; namely, the "regular" or "inside" mill which purchases materials, produces textiles and related articles within the establishment, and sells the finished products, and the "contract" or "commission" mill which processes materials owned by others. Jobbers or converters who do no manufacturing but who assign materials to contract mills for processing are classified in non-manufacturing industries. Establishments primarily engaged in the sponging or shrinking of cloth for the trade, or in employing home workers for hand-knitting or hand-weaving of textile products are included in APPAREL AND OTHER FINISHED PRODUCTS. The rubberizing of fabrics is classified in the major group, RUBBER PRODUCTS.

Apparel and Other Finished Products Made From Fabrics and Similar Materials This major group, known as the cutting-up and needle trades, includes establishments producing clothing and related fabricated products by cutting and sewing purchased woven or knit fabrics. All types of textiles are utilized as well as leather, rubberized fabrics, fur, and other materials. This classification makes no distinction between the two types of organizations which operate in the apparel industry; namely, the "regular" or "inside" factory which purchases materials, manufactures clothing and related articles, and sells the finished products, and the "contract" factory which manufactures apparel from materials owned by others. Jobbers who do no manufacturing but assign materials to contract factories for fabrication, and custom tailors and dressmakers not operating on a factory basis are classified in non-manufacturing industries.

Lumber and Wood Products (except furniture) This major group includes logging camps engaged in cutting timber and pulpwood; merchant sawmills, veneer mills, lath mills, shingle mills, cooperage-stock mills, planing mills, and plywood mills engaged in producing lumber and wood basic materials; and establishments engaged in manufacturing finished articles made

I N D U S T R Y D E S C R I P T I O N S

entirely or mainly of wood or wood substitutes. Certain types of establishments producing wood products are classified elsewhere. For example, furniture, and office and store fixtures are classified in the major group, FURNITURE AND FIXTURES; pianos, musical instruments, toys, and playground equipment, and caskets and coffins in MISCELLANEOUS MANUFACTURING INDUSTRIES. Woodworking in connection with construction, in the nature of reconditioning and repair, or performed to individual order, is classified in non-manufacturing industries.

Furniture and Fixtures This major group includes establishments engaged in manufacturing household, office, public-building, professional and restaurant furniture, office and store fixtures, and window and door screens and shades, regardless of the materials used. Establishments primarily engaged in the production of millwork are classified in the major group LUMBER AND WOOD PRODUCTS. Woodworking to individual order or in the nature of reconditioning and repair is classified in non-manufacturing industries.

Paper and Allied Products This major group includes the manufacture of pulp primarily from wood, and from rags and other fibers; the conversion of these pulps into any kind of paper or paperboard into converted paper products such as coated paper, paper bags, paper boxes, cards, and envelopes. Certain types of converted paper products are classified elsewhere, such as abrasive paper in STONE, CLAY, AND GLASS PRODUCTS, carbon paper in MISCELLANEOUS MANUFACTURING INDUSTRIES, and photosensitized and blue-print paper in PROFESSIONAL, SCIENTIFIC, AND CONTROLLING INSTRUMENTS; PHOTOGRAPHIC AND OPTICAL GOODS; WATCHES AND CLOCKS.

Printing, Publishing and Allied Industries This major group includes establishments engaged in printing, publishing, and lithographing; and those performing services for the printing trades such as bookbinding, typesetting, engraving, photoengraving, and electrotyping. This group also includes publishers regardless of whether or not they do their own printing. News syndicates are classified in service industries.

Chemicals and Allied Products This major group includes establishments producing basic chemicals, and establishments manufacturing products by predominantly chemical processes. Establishments classified in this major group manufacture three general classes of products: (1) basic chemicals such as acids, alkalies, salts, and organic chemicals; (2) chemical products to be used in further manufacture such as synthetic fibers, plastics materials, crude animal and vegetable oils, dry colors, and pigments; and (3) finished chemical products to be used for ultimate consumption

I N D U S T R Y D E S C R I P T I O N S

such as drugs, cosmetics, and soaps; or to be used as materials or supplies in other industries such as paints, fertilizers, and explosives. The mining of natural rock salt is classified in mining industries. Establishments primarily engaged in manufacturing nonferrous metals and high percentage ferro-alloys are classified in the major group, PRIMARY METAL INDUSTRIES, silicon carbide in STONE, CLAY AND GLASS PRODUCTS, baking powder, and other leavening compounds, and starches in the major group FOOD AND KINDRED PRODUCTS, and embalming fluids and artists' colors in the major group MISCELLANEOUS MANUFACTURING INDUSTRIES. Establishments primarily engaged in packaging, repackaging, and bottling of purchased chemical products, but not engaged in manufacturing chemicals and allied products are classified in the trade industries.

Leather and Leather Products This major group includes establishments engaged in tanning, currying, and finishing hides and skins, and establishments manufacturing finished leather and artificial leather products and some similar products made of other materials.

Stone, Clay and Glass Products This major group includes establishments engaged in manufacturing flat glass and other glass products, cement, structural clay products, pottery, concrete and gypsum products, cut-stone products, abrasive and asbestos products, etc. from materials taken principally from the earth in the form of stone, clay and sand. When separate reports are available for mines and quarries operated by manufacturing establishments classified in this major group, the mining activities are classified in the mining industries; when separate reports are not available, the mining activities are classified with the manufacturing operations and classified herein.

Primary Metal Industries This major group includes establishments engaged in the smelting and refining of ferrous and nonferrous metals from ore, pig, or scrap; in the rolling, drawing, and alloying of ferrous and nonferrous metals; and in the manufacturing of castings, forgings, and other basic products of ferrous and nonferrous metals.

Fabricated Metal Products This major group includes establishments engaged in fabricating ferrous and nonferrous metal products such as tin cans and other tinware, hand tools, cutlery, general hardware, nonelectric heating apparatus, fabricated structural metal products, metal stampings, lighting fixtures, fabricated wire products, and a variety of metal products not elsewhere classified. Certain important segments of the metal fabricating industries are classified in other major groups

I N D U S T R Y D E S C R I P T I O N S

such as ordnance in the major group ORDNANCE AND ACCESSORIES, machinery in major groups MACHINERY (EXCEPT ELECTRICAL) and ELECTRICAL MACHINERY, EQUIPMENT AND SUPPLIES, transportation equipment under its own major heading, professional, scientific, and controlling instruments, watches and clocks in their own group, and jewelry and silverware in MISCELLANEOUS MANUFACTURING INDUSTRIES. The production of ferrous and nonferrous metals and their alloys, and basic products made of metal, are classified in the major group PRIMARY METAL INDUSTRIES.

Machinery (except electrical) This major group includes establishments engaged in manufacturing machinery and prime movers other than electrical equipment. Machines powered by built-in or detachable electric motors ordinarily are included in this major group, with the exception of household electrical appliances. Portable tools, both electric and pneumatic powered, are included in this major group, but hand tools are classified in the major group FABRICATED METAL PRODUCTS.

Transportation Equipment This major group includes establishments engaged in manufacturing equipment for transportation of passengers and cargo by land, air and water. Important products produced by establishments classified in this group include motor vehicles, aircraft, ships, boats, railroad equipment, and miscellaneous transportation equipment such as motor-cycles, bicycles, and horse-drawn vehicles.

Professional, Scientific, and Controlling Instruments; Photographic and Optical Goods; Watches and Clocks This major group includes establishments engaged in manufacturing mechanical measuring, laboratory, and scientific instruments; optical instruments and lenses; surgical, medical, and dental instruments, equipment, and supplies; ophthalmic goods; photographic equipment and supplies; watches and clocks. Establishments primarily engaged in manufacturing instruments for indicating, measuring, and recording electrical quantities and characteristics are classified in the major group ELECTRICAL MACHINERY, EQUIPMENT AND SUPPLIES.

Miscellaneous Manufacturing Industries This major group includes establishments primarily engaged in manufacturing products not classified in any other manufacturing major group. Industries in this group fall into the following categories: jewelry, silverware, plated ware; musical instruments; toys, sporting and athletic goods; pens, pencils, and other office and artists' materials; buttons, costume novelties, miscellaneous notions, fabricated plastics products; brooms and brushes; morticians'

I N D U S T R Y D E S C R I P T I O N S

goods; and other miscellaneous manufacturing industries.

Not Elsewhere Shown A policy of the Department of Labor and Industry is not to reveal information on an individual plant basis. Industry groups which do not meet our standard minimum of three establishments each have been grouped under the heading NOT ELSEWHERE SHOWN. This title is not a part of the Standard Industrial Classification system but was originated to meet the needs of this Department.
