STATE OF MAINE

CENSUS OF MAINE MANUFACTURES

1952

DLI Bulletin No. 222

Department of Labor and Industry
Marion E. Martin
Commissioner

Division of Research and Statistics
T. T. Trott, Jr.
Director

STATE OF MAINE

DEPARTMENT OF LABOR AND INDUSTRY

AUGUSTA

AUTHORIZATION

Section 2 , Chapter 25 , Revised Statutes of Maine , 1944 as amended :
The department shall collect , assort and arrange statistical details
relating to ... industrial pursuits in the state. The Commissioner
... may ... cause to be printed and distributed bulletins ... that
shall be of public interest and benefit to the state .

CENSUS OF MAINE MANUFACTURES - 1952

RESUME¹VALUE OF MAINE MANUFACTURED GOODS TOPS ONE BILLION FOR SECOND YEAR

Despite a slight softening, the Value of Product in Maine manufacturing exceeded one billion dollars for the second year. The net decline from 1.195 billion in 1951 to 1.129 billion in 1952 was approximately 6 per cent. Gross Wages Paid increased by 2.4 per cent over the same period to a 1952 figure of 336 million dollars, while the total number of workers dropped from 130 thousand in 1951 to 126 thousand in 1952, a 3 per cent decline as reported by the 1764 establishments for the year. (see Charts A, B, and C.)

MAINE SHIPBUILDING HITS 1952 PEAK, APPAREL AND PRIMARY METALS UP

The major industry, Transportation Equipment, of which 99 per cent in this state is Ship and Boat Building, followed its national counterpart with peak production in the year 1952. Exclusive of Portsmouth Naval Shipyard, the Value of Product for this industry climbed 26.1 per cent to 46 million dollars in 1952. Gross Wages rose 26.4 per cent and employment went up 23.6 per cent, a gain of almost 2700 workers to the 1952 figure of approximately 15 thousand employees, Portsmouth being here included.

Other gains over 1951 were recorded in the Apparel industry, up 34.6 per cent; Primary Metals, up 23.5 per cent; and Fabricated Metals, up 10.5 per cent. Slight climbs were made by Furniture and Fixtures, Printing and Publishing, Stone, Clay, and Glass Products, and Miscellaneous Manufacturing, all based on Value of Product.

BOOT AND SHOE INDUSTRY IN THIRD PLACE, FOOD DROPS BACK TO FOURTH

Footwear ^{1/} (Leather and Leather Products) exchanged places with the Food and Kindred Products Industry which had supplanted it in third place last year with a product value gain of 3.5 per cent over 1951. Food product value dropped by 1.5 per cent, while Lumber and Wood Products remained in fifth place despite an 8.2 per cent increase in product value. (see Chart D.)

Even with respective drops of 13 and 17 per cent in Value of Product, Textiles and Paper retained their perennial first and second positions. The net overall drop of 6 per cent in product value for 1952 over 1951 was made with a range of 53.2 percentage points from the 36.2 increase in the Not Elsewhere Shown category to the 17 per cent decline in Paper and Allied Products.

^{1/} Production in Footwear for 1952 was reported in excess of 38 million pairs.

(more)

PENOBSCOT COUNTY JUMPS FROM FOURTH TO SECOND PLACE, CUMBERLAND STILL LEADS

Although Cumberland County leads the State by product value for 1952 with a figure of 182 million dollars, Penobscot at 157 million dollars leaped over York and Androscoggin with a 5.8 per cent increase compared with 15.8 and 9.3 per cent drops, respectively. Lincoln, Sagadahoc, and Hancock counties showed record gains for the year, with Lincoln up 56.3 per cent, Sagadahoc up 28.8 per cent, and Hancock climbing 14.3 per cent. The percentage change from 1951 to 1952 went downward from the 5.6 per cent decline for the State to the 47.5 drop in Oxford County, and upward to the 56.3 climb by Lincoln County; a range of 104 percentage points. (The leading five counties by product value are shown on Chart E.)

The top three counties in each of Maine's five major industries by per cent of total value of product for the industry are:

TEXTILE MILL PRODUCTS

1. York	31%
2. Androscoggin	20%
3. Kennebec	16%

PAPER AND ALLIED PRODUCTS

1. Penobscot	28%
2. Kennebec	17%
3. Cumberland	16%

FOOD AND KINDRED PRODUCTS

1. Cumberland	35%
2. Washington	13%
3. Penobscot	9%

LUMBER AND WOOD PRODUCTS

1. Penobscot	22%
2. Oxford	17%
3. Cumberland	10%

LEATHER AND LEATHER PRODUCTS

1. Androscoggin	35%
2. Somerset	14%
3. York	13%

(more)

LEWISTON-AUBURN RETAINS MANUFACTURING URBAN AREA LEADERSHIP

The leadership of the Lewiston-Auburn area was undisputed with a total product value of 115.6 million dollars for 1952, gross wages of 35.7 million, and total manufacturing employment of 13,825 workers. Portland-South Portland was second with value of production at 96.4 millions, and with product value of 62.1 millions, Biddeford-Saco was in third place.

In terms of product value the ten leading cities/towns in Maine for 1952 were:

1. Portland	84.1 million	6. Auburn	47.3 million
2. Lewiston	68.4 million	7. Millinocket	46.6 million
3. Sanford	55.4 million	8. Augusta	36.8 million
4. Biddeford	51.8 million	9. Cumberland	36.1 million
5. Bath	48.1 million	10. Waterville	33.3 million

Lewiston-Auburn has the further distinction of being the approximate geographic center of Maine's manufacturing population. 2/

AVERAGE ANNUAL INCOME STILL CLIMBING

The trend of average annual income in manufacturing is still upward. The average for 1952 reached a high of \$2660, a 5.4 per cent increase over the 1951 peak of \$2524. Industry-wise the major group, Transportation Equipment, was high at \$3911; Food and Kindred Products, due to its seasonal nature, in the cellar at \$1239, a range of \$2672. Reflecting the influence of Portsmouth Naval Shipyard, York County was high with \$3467 average income. The range on the county basis of \$1938 was terminated at the lower end by Washington county at \$1529. By civil division, the highest average annual incomes were found in Kittery, Winslow, and Madawaska, at \$4161, \$3855, and \$3831 for the year, respectively.

2/ Based on a density map of Maine manufacturing workers by plant location.

(more)

MAINE INDUSTRY FOLLOWS THE RIVERS

Manufacturing industries are traditionally heavy users of water for various plant and processing needs. Such industries, therefore, tend to locate near substantial water supplies; illustrative of this is the following analysis made of a 5 mile area on each side of three major waterways in Maine, the Androscoggin, Kennebec, and Penobscot rivers. The breakdown by individual river is shown below:

	Androscoggin	Kennebec	Penobscot	Total	Per cent of Amount State Total
Value of Product (millions of dollars)	181	171	116	468	41 %
Gross Wages Paid (millions of dollars)	52	43	27	122	36 %
Number of Workers (in thousands)	19	16	10	45	36 %
Number of Establishments	234	151	157	542	31 %

It is interesting to note that a little over one third of the Maine manufacturers are located on these three rivers (as defined above), whether by product value, gross wages, number of workers, or number of establishments.

CENSUS OF MAINE MANUFACTURES - 1952

CENSUS OF MAINE MANUFACTURES - 1952

Appendix A: Survey Coverage

This survey is of universal coverage for Maine manufacturing establishments. The laws of Maine require the filing of the annual Product and Employment Report from which this data is taken.

In December of 1952 the forms were mailed out; of the 1879 forms returned, 115 or 6.1 per cent were non-usables. Those not used represented firms that did not operate in 1952, firms whose reports were incorrectly filled out, and firms whose forms were not returned in time to be included in the tabulations. The figure 1764 is the usable number of establishments reporting an increase of 73 establishments over the 1691 reporting in 1951.

Taking into consideration the factors noted above, the data herein presented is a comprehensive and valid statistical picture of the status of Maine manufacturing for the year 1952.

The coverage of the survey is shown in the following tables I, II, III:

The Number of usable Establishments Reporting by Establishment Size, by County, and by Major Industry respectively.

T. T. Trott, Jr.
Director of Research

CENSUS OF MAINE MANUFACTURES - 1952

APPENDIX B: TECHNICAL NOTES AND DEFINITIONS

Industrial classification The Standard Industrial Classification system as compiled by the Executive Office of the President, Bureau of the Budget was used to determine the industry title applicable to each establishment. Descriptions of major industry groups may be found in Appendix C. Each establishment has been classified according to its principal activity during 1952. In a few instances, where separate records for each establishment were not kept, data have been included in the totals for the civil division in which the home office or principal place of business was located.

Value of Product is the net selling price of all goods manufactured or processed during the calendar year. If industrial operations were on a contract basis, the total of amounts received for contract work or services performed has been included.

Gross Wages Paid shows total earnings during the calendar year of all employees, except executives, before deductions for Old-Age and Survivors Insurance, group insurance, withholding tax, defense bonds, union dues, etc. Pay for sick leave, holidays, vacations and bonuses has been included. Owing to the exclusion of various welfare benefits, pay roll taxes paid by employers, etc., this data should not be interpreted as representing total labor costs on the part of the employer.

Average Annual Earnings is the figure obtained by dividing Gross Wages Paid by the Total Number of Workers.

Number of Workers is that reported as an average or representative for the calendar year. Workers engaged in fabricating, processing, assembling, inspection, receiving, storage, handling, packing, warehousing, shipping, maintenance, repair, janitorial, watchmen services and product development are included as are working foremen and all other employees below the executive level.

Establishment is defined as a single physical location where industrial operations are performed; it is, therefore, a place of business rather than a legal entity or company which may have units in many locations.

Civil Divisions are geographical units established for governmental purposes. Major civil divisions, in this bulletin, are counties; minor civil divisions are cities, towns, plantations and townships.

CENSUS OF MAINE MANUFACTURES - 1952

APPENDIX C: INDUSTRY DESCRIPTIONS

Food and Kindred Products This major group includes establishments manufacturing foods and beverages for human consumption, and certain related products such as manufactured ice, chewing gum, and prepared feeds for animals and fowls.

Textile Mill Products This major group includes establishments engaged in performing any of the following operations, regardless of the type of fiber used: (1) manufacturing yarn, thread, cordage, and twine; (2) manufacturing woven fabric, carpets, rugs, braids, laces, knit fabric, knit garments, and other products from yarn; (3) dyeing and finishing fibers, yarn and fabric; and (4) coating, waterproofing, and otherwise treating fabric. This classification makes no distinction between the two types of organizations which operate in the textile industry; namely, the "regular" or "inside" mill which purchases materials, produces textiles and related articles within the establishment, and sells the finished products, and the "contract" or "commission" mill which processes materials owned by others. Jobbers or converters who do no manufacturing but who assign materials to contract mills for processing are classified in non-manufacturing industries. Establishments primarily engaged in the sponging or shrinking of cloth for the trade, or in employing home workers for hand-knitting or hand-weaving of textile products are included in APPAREL AND OTHER FINISHED PRODUCTS. The rubberizing of fabrics is classified in the major group, RUBBER PRODUCTS.

Apparel and Other Finished Products Made From Fabrics and Similar Materials This major group, known as the cutting-up and needle trades, includes establishments producing clothing and related fabricated products by cutting and sewing purchased woven or knit fabrics. All types of textiles are utilized as well as leather, rubberized fabrics, fur, and other materials. This classification makes no distinction between the two types of organizations which operate in the apparel industry; namely, the "regular" or "inside" factory which purchases materials, manufactures clothing and related articles, and sells the finished products, and the "contract" factory which manufactures apparel from materials owned by others. Jobbers who do no manufacturing but assign materials to contract factories for fabrication, and custom tailors and dressmakers not operating on a factory basis are classified in non-manufacturing industries.

Lumber and Wood Products (except furniture) This major group includes logging camps engaged in cutting timber and pulpwood; merchant sawmills, veneer mills, lath mills, shingle mills, cooperage-stock mills, planing mills, and plywood mills engaged in producing lumber and wood basic materials; and establishments engaged in manufacturing finished articles made

APPENDIX C: (CONTINUED)

entirely or mainly of wood or wood substitutes. Certain types of establishments producing wood products are classified elsewhere. For example, furniture, and office and store fixtures are classified in the major group, FURNITURE AND FIXTURES; pianos, musical instruments, toys, and playground equipment, and caskets and coffins in MISCELLANEOUS MANUFACTURING INDUSTRIES. Woodworking in connection with construction, in the nature of reconditioning and repair, or performed to individual order, is classified in non-manufacturing industries.

Furniture and Fixtures This major group includes establishments engaged in manufacturing household, office, public-building, professional and restaurant furniture, office and store fixtures, and window and door screens and shades, regardless of the materials used. Establishments primarily engaged in the production of millwork are classified in the major group LUMBER AND WOOD PRODUCTS. Woodworking to individual order or in the nature of reconditioning and repair is classified in non-manufacturing industries.

Paper and Allied Products This major group includes the manufacture of pulp primarily from wood, and from rags and other fibers; the conversion of these pulps into any kind of paper or paperboard into converted paper products such as coated paper, paper bags, paper boxes, cards, and envelopes. Certain types of converted paper products are classified elsewhere, such as abrasive paper in STONE, CLAY, AND GLASS PRODUCTS, carbon paper in MISCELLANEOUS MANUFACTURING INDUSTRIES, and photosensitized and blue-print paper in PROFESSIONAL, SCIENTIFIC, AND CONTROLLING INSTRUMENTS; PHOTOGRAPHIC AND OPTICAL GOODS; WATCHES AND CLOCKS.

Printing, Publishing and Allied Industries This major group includes establishments engaged in printing, publishing, and lithographing; and those performing services for the printing trades such as bookbinding, typesetting, engraving, photoengraving, and electrotyping. This group also includes publishers regardless of whether or not they do their own printing. News syndicates are classified in service industries.

Chemicals and Allied Products This major group includes establishments producing basic chemicals, and establishments manufacturing products by predominantly chemical processes. Establishments classified in this major group manufacture three general classes of products: (1) basic chemicals such as acids, alkalies, salts, and organic chemicals; (2) chemical products to be used in further manufacture such as synthetic fibers, plastics materials, crude animal and vegetable oils, dry colors, and pigments; and (3) finished chemical products to be used for ultimate consumption

APPENDIX C: (CONTINUED)

such as drugs, cosmetics, and soaps; or to be used as materials or supplies in other industries such as paints, fertilizers, and explosives. The mining of natural rock salt is classified in mining industries. Establishments primarily engaged in manufacturing nonferrous metals and high percentage ferro-alloys are classified in the major group, PRIMARY METAL INDUSTRIES, silicon carbide in STONE, CLAY AND GLASS PRODUCTS, baking powder, and other leavening compounds, and starches in the major group FOOD AND KINDRED PRODUCTS, and embalming fluids and artists' colors in the major group MISCELLANEOUS MANUFACTURING INDUSTRIES. Establishments primarily engaged in packaging, repackaging, and bottling of purchased chemical products, but not engaged in manufacturing chemicals and allied products are classified in the trade industries.

Leather and Leather Products This major group includes establishments engaged in tanning, currying, and finishing hides and skins, and establishments manufacturing finished leather and artificial leather products and some similar products made of other materials.

Stone, Clay and Glass Products This major group includes establishments engaged in manufacturing flat glass and other glass products, cement, structural clay products, pottery, concrete and gypsum products, cut-stone products, abrasive and asbestos products, etc. from materials taken principally from the earth in the form of stone, clay and sand. When separate reports are available for mines and quarries operated by manufacturing establishments classified in this major group, the mining activities are classified in the mining industries; when separate reports are not available, the mining activities are classified with the manufacturing operations and classified herein.

Primary Metal Industries This major group includes establishments engaged in the smelting and refining of ferrous and nonferrous metals from ore, pig, or scrap; in the rolling, drawing, and alloying of ferrous and nonferrous metals; and in the manufacturing of castings, forgings, and other basic products of ferrous and nonferrous metals.

Fabricated Metal Products This major group includes establishments engaged in fabricating ferrous and nonferrous metal products such as tin cans and other tinware, hand tools, cutlery, general hardware, nonelectric heating apparatus, fabricated structural metal products, metal stampings, lighting fixtures, fabricated wire products, and a variety of metal products not elsewhere classified. Certain important segments of the metal fabricating industries are classified in other major groups

APPENDIX C: (CONTINUED)

such as ordnance in the major group ORDNANCE AND ACCESSORIES, machinery in major groups MACHINERY (EXCEPT ELECTRICAL) and ELECTRICAL MACHINERY, EQUIPMENT AND SUPPLIES, transportation equipment under its own major heading, professional, scientific, and controlling instruments, watches and clocks in their own group, and jewelry and silverware in MISCELLANEOUS MANUFACTURING INDUSTRIES. The production of ferrous and nonferrous metals and their alloys, and basic products made of metal, are classified in the major group PRIMARY METAL INDUSTRIES.

Machinery (except electrical) This major group includes establishments engaged in manufacturing machinery and prime movers other than electrical equipment. Machines powered by built-in or detachable electric motors ordinarily are included in this major group, with the exception of household electrical appliances. Portable tools, both electric and pneumatic powered, are included in this major group, but hand tools are classified in the major group FABRICATED METAL PRODUCTS.

Transportation Equipment This major group includes establishments engaged in manufacturing equipment for transportation of passengers and cargo by land, air and water. Important products produced by establishments classified in this group include motor vehicles, aircraft, ships, boats, railroad equipment, and miscellaneous transportation equipment such as motor-cycles, bicycles, and horse-drawn vehicles.

Professional, Scientific, and Controlling Instruments; Photographic and Optical Goods; Watches and Clocks This major group includes establishments engaged in manufacturing mechanical measuring, laboratory, and scientific instruments; optical instruments and lenses; surgical, medical, and dental instruments, equipment, and supplies; ophthalmic goods; photographic equipment and supplies; watches and clocks. Establishments primarily engaged in manufacturing instruments for indicating, measuring, and recording electrical quantities and characteristics are classified in the major group ELECTRICAL MACHINERY, EQUIPMENT AND SUPPLIES.

Miscellaneous Manufacturing Industries This major group includes establishments primarily engaged in manufacturing products not classified in any other manufacturing major group. Industries in this group fall into the following categories: jewelry, silverware, plated ware; musical instruments; toys, sporting and athletic goods; pens, pencils, and other office and artists' materials; buttons, costume novelties, miscellaneous notions, fabricated plastics products; brooms and brushes; morticians'

APPENDIX C: (CONTINUED)

goods; and other miscellaneous manufacturing industries.

Not Elsewhere Shown A policy of the Department of Labor and Industry is not to reveal information on an individual plant basis. Industry groups which do not meet our standard minimum of three establishments each have been grouped under the heading NOT ELSEWHERE SHOWN. This title is not a part of the Standard Industrial Classification system but was originated to meet the needs of this Department.
