Maine Revised Statutes 1954, c30, s2, as amended: "The department shall collect, assort, and arrange statistical details relating to ... industrial pursuits in the state. The Commissioner ... may ... cause to be printed and distributed bulletins ... that shall be of public interest and benefit to the state."

C O V E R A G E

This survey, insofar as possible, is of universal coverage for Maine manufacturing establishments ranging from the single proprietorships to the largest corporation. The laws of Maine require the filing of the annual "Product and Employment" report from which these data are obtained.

Usable reports covering 2387 establishments were received since the original mailing December 31, 1958. Of these, 223 are in the combined reporting category and 227 either did not operate, went out of business, or began their operations during 1958. The coverage of 2387 establishments represents a 7.7 increase over the final number of establishments reporting for 1957. Included in that figure, however, are 122 establishments picked up under the 1957 revision of the Standard Industrial Classification.

Taking into consideration the nature of the Maine economy and the extent of coverage in this survey, the data contained in this, The Census of Maine Manufactures, 1958, represent a comprehensive and reliable statistical picture of the Maine manufacturing economy.

The data contained in these pages cover the year 1958.
The two different sets of figures represent the old
(1945) and the revised (1957) STANDARD INDUSTRIAL CLASSI-
FICATION (SIC) system. In the revision, there are some
intra-industry changes and some inter-industry shifts,
but the major difference in the two series is the transfer
from non-manufacturing activities to manufacturing under
the new codes of:

1. Milk processing (2026, 1957 SIC)
2. The processing and packing in non-sealed con-
tainers of fisheries products (2036, 1957 SIC)
3. The transit mixing of concrete (3273, 1957 SIC)

We plan to present both series each year for the next two
or three years in order to provide a linkage from the old
to the new system. (See NOTE--Appendix B, page g.)

CENSUS OF MAINE MANUFACTURES - 1958

SUMMARY

1.34 BILLION DOLLARS OF PRODUCT IN 1958--A 2.5% DECLINE

Maine manufactured product value in 1958 declined by 2.5% from 1957. The 1958 figure includes approximately 25 million dollars resulting from the inclusion of additional industries under the revision of the Standard Industrial Classification and totaled 1.34 billion dollars. The record of manufactured product was achieved in 1956 with product valued at 1.39 billion dollars.

LEATHER NOW IN 3rd POSITION AS PAPER LEADS, WITH FOOD SECOND

Excluding those additions from the SIC revision, 8 of the major industry groups reported gains in product value ranging from \$.2 to \$20.3 millions while the remaining 11 declined by \$.1 to \$35.3 millions. Of the five principal industries (in rank order by value) Paper, Food, Leather, Textiles and Lumber, gains were recorded in two. The net changes were: -\$17.2, +\$14.6, +\$.2, -\$35.3 and -\$27.3 millions, respectively. The totals for 1958 were: Paper, 364.3; Food, 222.3; Leather, 197.5; Textiles, 165.9; and Lumber, 109.6 (expressed in millions of dollars).

CUMBERLAND PRODUCES 17.8 PERCENT OF STATE TOTAL PRODUCT

Cumberland County produced 238.5 million dollars in 1958 of which Portland alone accounted for \$112.7 millions or 47.3%. Penobscot, Kennebec, Androscoggin and York counties were next with 179.8, 155.3, 154.0 and 106.1 million dollars in that order. Fifteen minor civil divisions reported value of product of 25 million dollars or more and were: (millions of dollars)

Portland	112.7	Augusta	52.4	Sanford	34.1
Lewiston	82.5	Rumford	48.4	Madawaska	29.1
Bath	65.1	Winslow	42.8	Belfast	28.1
Millinocket*	60.9	Auburn	40.5	South Portland	26.6
Westbrook	58.1	Biddeford	38.4	Jay	25.5

(*includes East Millinocket)

AVERAGE GROSS WAGES UP \$111 FROM 1957

Gross wages paid in Maine manufacturing during 1958 totaled 369.2 million dollars, 3.8 millions less than 1957 and the first such decline in total gross wages since 1954. With average annual employment at 100.8, the average gross wage in manufacturing was \$3,660 in 1958. Employment declined by 4.0% while the average wage increased by \$111 per worker or 3.1% over 1957. Union members accounted for 42.8% of total employment in 1958.

NINETEEN COMMUNITIES WITH AVERAGE MANUFACTURING WAGES OF OVER \$4,000

Of the 180 minor civil divisions reported in this issue of the Census, 5 reported average gross wages of over \$5,000 and 14 were between \$4,001 and \$4,999. Incomes from manufacturing of \$2,000 or less were reported in 17 civil divisions. Sagadahoc at \$4,742 and York at \$4,257 were the highest income areas while the lowest were Washington and Waldo counties at \$2,965 and \$2,980 in that order. Industrially, Transportation Equipment with \$5,237 and Paper with \$5,000 paid top wages while at \$2,349, Apparel was lowest.

PLANT MODERNIZATION EXPENDITURES DECLINE IN 1958

Plant investment in 1958 totaled \$39.5 millions, a decline of \$25.6 millions from the 1957 record of 65 million dollars which culminated a postwar modernization and expansion program in the Paper industry, a program which is expected to resume once demand has absorbed the excess of productive capacity. A special survey was conducted this year which indicated planned expenditures of \$36 millions in 1959 and \$22 million in 1960. (See Table F, Appendices F & I)

38 PERCENT IMPROVEMENT IN STRIKE IDLENESS

There were 15 work stoppages^{1/} reported during 1958 involving some 2,300 workers and a total time loss of approximately 28 thousand mandays^{2/}--38% lower than the 46 thousand mandays lost in 1957 and affecting some 1,500 fewer workers in 1958. Maine's stoppage record was considerably better than the national average in

which .22% of estimated working time was lost by strikes. Only five states, principally agricultural, had a percentage of time loss lower than Maine's .05%.

Manufacturing accounted for 65% of the time loss and 43% of the struck workers in 1958, however, the idle mandays in 1958 were 54% lower than the 1957 totals. In non-manufacturing, construction suffered the worst losses with 7 stoppages representing 70% of the total non-manufacturing time losses.

	Year	Number of Stoppages	Number of Workers Involved	Number of Idle Mandays
All Maine Industry	1958	15	2270	28200
	1957	16	3740	45800
	1956	16	1490	11900

	1954	22	2400	40800
Manufacturing	1958	3	970	18300
	1957	7	2810	39700
	1956	6	1020	7190
	1955	4	9780	259210
	1954	11	1670	33760
Maine Stoppages as a Percent of National	1958	--	.1%	.1%
	1957	--	.3%	.3%
	1956	--	.1%	A/
	1955	--	.4%	1.0%
	1954	--	.2%	.2%

1/ All work stoppages known to the Bureau of Labor Statistics and the Department of Labor and Industry involving six or more workers and lasting a full day or shift or longer are included. Figures on workers involved and mandays idle cover all workers made idle for as long as one shift in an establishment directly involved in the stoppage. They do not measure the indirect or secondary effects on other establishments or industries whose employees are made idle as a result of material or service shortages.

2/ Based on an estimated 30 days lost or charged per disabling work injury--manufacturing time lost from work injuries in 1958 would exceed 125 thousand mandays. The 18,000 mandays loss from stoppages is equivalent to only 14% of this.

A/ Less than .05%.

TWENTY-TWO MILLION DOLLARS OF MAINE-MADE PRODUCTS EXPORTED TO 52 NATIONS

Of the total goods manufactured in Maine in 1958, 22 million dollars or 1.6% were exported directly for foreign consumption in some 52 nations. Foreign sales were reported by 172 Maine firms, 87 of which did business totaling 5 million dollars

with our northern neighbor, Canada. Every major industry group reported some non-domestic sales which were sent to such far-flung places as China, Australia, Hong Kong, South Africa and others. (See Table H and Appendix J)

FRINGE BENEFITS MAKE SIGNIFICANT GAINS IN MAINE

According to reports filed for this Census, 718 establishments provide paid vacations for their workers, 140 establishments have pension plans and group insurances are in force in establishments as shown below:

Life Insurance	418
Hospitalization	474
Surgical and Medical	408

Of these 5 items studied there were percentage increases in the number of establishments granting such benefits (compared with a similar survey in 1954) ranging from 13.8% to 137.2%. (See Appendix K)

NOTE: Continuing data on certain studies undertaken in earlier editions of the Census may be found in the Appendices. Please see the Table of Contents.

To save space industry titles are abbreviated or denoted by the first significant title item (e.g., Food = Food and Kindred Products). Full titles are shown in Appendix A, Major Industry Group descriptions are in Appendix B.

In the tables showing the minor civil divisions of the state the following abbreviations are used:

C = city T = town Twp. = township P = plantation

Certain of the tables contained in this portion of the report present 1958 data for a series including earlier years. The data for those earlier years and a description of the study will be found in the appendix referred to.

32 STONE, CLAY, AND GLASS PRODUCTS

3241	Cement, hydraulic	3241	Cement, hydraulic
3251	Brick and hollow tile	3251	Brick and structural clay tile
3269	Pottery products, nec	3269	Pottery products, nec
3271	Concrete products	3271	Concrete brick and block
3274	Lime	3272	Concrete products, except block and brick
3281	Cut-stone and stone products	*3273	Ready mixed concrete
3293	Steam and other packing, and pipe and boiler covering	3274	Lime
3295	Minerals and earths: ground or otherwise treated	3281	Cut stone and stone products
		3295	Minerals and earths, ground or otherwise treated

33 PRIMARY METAL INDUSTRIES

3321	Gray-iron foundries	3321	Gray iron foundries
3361	Nonferrous foundries	3356	Rolling, drawing, and extruding of nonferrous metals, except copper and aluminum
3392	Wire drawing	3362	Brass, Bronze, copper, copper base alloy castings
		3391	Iron and steel forgings

34 FABRICATED METAL PRODUCTS (EXCEPT ORDNANCE, MACHINERY AND TRANSPORTATION EQUIPMENT)

3411	Tin cans and other tinware	3411	Metal cans
3422	Edge tools	3421	Cutlery
3423	Hand tools (except edge tools, machine tools, files, and saws)	3423	Hand and edge tools, except machine tools and hand saws
3425	Hand saws and saw blades	3425	Hand saws and saw blades
3429	Hardware, nec	3429	Hardware, nec
3439	Heating and cooking apparatus (except electric), nec	3433	Heating equipment, except electric
3441	Fabricated structural steel and ornamental metal work	3441	Fabricated structural steel
3442	Metal doors, sash, frames, molding, and trim	3442	Metal doors, sash, frames, molding, and trim
3443	Boiler shop products	3443	Fabricated plate work (boiler shops)
3444	Sheet-metal work	3444	Sheet metal work
3463	Stamped and pressed metal products (except automobile stampings)	3449	Architectural and miscellaneous metal work
3468	Electroplating, plating, and polishing	3461	Metal stampings
3499	Fabricated metal products, nec	3471	Electroplating, plating, polishing, anodizing and coloring
		3494	Valves and pipe fittings, except plumbers' brass goods
		3499	Fabricated metal products, nec

35 MACHINERY (EXCEPT ELECTRICAL)

3522	Agricultural machinery (except tractors)	3522	Farm machinery and equipment
3531	Construction, mining, and similar machinery (except oil-field machinery and tools)	3531	Construction machinery and equipment
3541	Machine tools	3534	Elevators and moving stairways
3542	Metalworking machinery (except machine tools)	3541	Machine tools, metal cutting types
3543	Machine-tool accessories, other metalworking-machinery accessories and machinists' precision tools	3542	Machine tools, metal forming types
3552	Textile machinery	3544	Special dies and tools, die sets, jigs and fixtures
3553	Woodworking machinery	3545	Machine tool accessories and measuring devices
3583	Sewing machines	3552	Textile machinery
3591	Valves and fittings (except plumbers' valves)	3553	Woodworking machinery

* Newly classified as manufacturing from non-manufacturing

APPENDIX B: Major Industry Descriptions (1957 edition)

- 19 ORDNANCE AND ACCESSORIES This major group includes establishments engaged in manufacturing artillery, small arms, and related equipment; ammunition; tanks and specialized tank parts; sighting and fire control equipment; and miscellaneous ordnance and accessories, nec.
- 20 FOOD AND KINDRED PRODUCTS This major group includes establishments manufacturing foods and beverages for human consumption, and certain related products, such as manufactured ice, chewing gum, vegetable and animal fats and oils, and prepared feeds for animals and fowls.
- 22 TEXTILE MILL PRODUCTS This major group includes establishments engaged in performing any of the following operations: (1) preparation of fiber and subsequent manufacturing of yarn, thread, braids, twine, and cordage; (2) manufacturing broad woven fabric, narrow woven fabric, knit fabric, and carpets and rugs from yarn; (3) dyeing and finishing fiber, yarn, fabric, and knit apparel; (4) coating, waterproofing, or otherwise treating fabric; (5) the integrated manufacture of knit apparel and other finished articles from yarn; and (6) the manufacture of felt goods, lace goods, bonded-fiber fabrics, and miscellaneous textiles. This classification makes no distinction between the two types of organizations which operate in the textile industry: (1) the "integrated" mill which purchases materials, produces textiles and related articles within the establishment, and sells the finished products; and (2) the "contract" or "commission" mill which processes materials owned by others. Converters or other nonmanufacturing establishments which assign materials to contract mills for processing (other than knitting) are classified in nonmanufacturing industries; establishments which assign yarns to outside contractors or commission knitters for the production of knit products are classified as Knitting Mills.
- 23 APPAREL AND OTHER FINISHED PRODUCTS MADE FROM FABRICS AND SIMILAR MATERIALS This major group, known as the cutting-up and needle trades, includes establishments producing clothing and fabricated products by cutting and sewing purchased woven or knit textile fabrics and related materials such as leather, rubberized fabrics, plastics and furs. Included in the apparel industries are three types of establishments, (1) the "regular" or inside factories, (2) contract factories, and (3) apparel jobbers. The regular factories perform all of the usual manufacturing functions within their own plant; the contract factories manufacture apparel from materials owned by
- 23 (continued) others; and apparel jobbers perform the entrepreneurial functions of a manufacturing company such as buying raw materials, designing and preparing samples, arranging for the manufacture of the garments from their materials and selling of the finished apparel
- Custom tailors and dressmakers not operating on a factory basis are classified in nonmanufacturing industries; establishments which purchase and resell finished garments but do not perform the functions of the apparel jobbers are classified in wholesale trade as wholesalers and dealers.
- 24 LUMBER AND WOOD PRODUCTS, EXCEPT FURNITURE This major group includes logging camps engaged in cutting timber and pulpwood; merchant sawmills, lath mills, shingle mills, cooperage stock mills, planing mills, and plywood mills and veneer mills engaged in producing lumber and wood basic materials; and establishments engaged in manufacturing finished articles made entirely or mainly of wood or wood substitutes. Certain types of establishments producing wood products are classified elsewhere. For example, furniture, and office and store fixtures are classified in FURNITURE; pianos, musical instruments, toys and playground equipment, and caskets and coffins in MISCELLANEOUS MANUFACTURING. Woodworking in connection with construction, in the nature of reconditioning and repair, or performed to individual order, is classified in nonmanufacturing industries.
- 25 FURNITURE AND FIXTURES This major group includes establishments engaged in manufacturing household, office, public building, and restaurant furniture; and office and store fixtures. Establishments primarily engaged in the production of millwork are classified in Millwork Plants, and woodworking to individual order or in the nature of reconditioning and repair in nonmanufacturing industries.
- 26 PAPER AND ALLIED PRODUCTS This major group includes the manufacture of pulps from wood and other cellulose fibers, and rags; the manufacture of paper and paperboard; and the manufacture of paper and paperboard into converted products such as paper coated off the paper machine, paper bags, paper boxes, and envelopes. Certain types of converted paper products are classified elsewhere, such as abrasive paper in Abrasive Products, carbon paper in Miscellaneous Manufacturing, and photosensitized and blueprint paper in Scientific Instruments.

- 27 PRINTING, PUBLISHING, AND ALLIED INDUSTRIES This major group includes establishments engaged in printing by one or more of the common processes, such as letterpress, lithography, gravure, or screen; and those establishments which perform services for the printing trade, such as bookbinding, typesetting, engraving, photoengraving, and electrotyping. This major group also includes establishments engaged in publishing newspapers, books, and periodicals, regardless of whether or not they do their own printing. News syndicates are classified in Service Industries, and textile printing and finishing in TEXTILE MILL PRODUCTS.
- 28 CHEMICALS AND ALLIED PRODUCTS This major group includes establishments producing basic chemicals and establishments manufacturing products by predominantly chemical processes. Establishments classified in this major group manufacture three general classes of products: (1) basic chemicals such as acids, alkalies, salts, and organic chemicals; (2) chemical products to be used in further manufacture such as synthetic fibers, plastics materials, dry colors, and pigments; (3) finished chemical products to be used for ultimate consumption such as drugs, cosmetics, and soaps; or to be used as materials or supplies in other industries such as paints, fertilizers, and explosives. The mining of natural rock salt is classified in mining industries. Establishments primarily engaged in manufacturing non-ferrous metals and high percentage ferroalloys are classified in PRIMARY METAL INDUSTRIES; silicon carbide in STONE, CLAY, AND GLASS PRODUCTS; baking powder, other leavening compounds, and starches in FOOD AND KINDRED PRODUCTS; and embalming fluids and artists' colors in MISCELLANEOUS MANUFACTURING. Establishments primarily engaged in packaging, repackaging, and bottling of purchased chemical products, but not engaged in manufacturing chemicals and allied products, are classified in trade industries.
- 29 PETROLEUM REFINING AND RELATED INDUSTRIES This major group includes establishments primarily engaged in petroleum refining, manufacturing paving and roofing materials, and compounding lubricating oils and greases from purchased materials. Establishments manufacturing and distributing gas to consumers are classified in public utilities industries, and those primarily engaged in producing coke and byproducts in PRIMARY METAL INDUSTRIES.
- 30 RUBBER AND MISCELLANEOUS PLASTICS PRODUCTS This major group includes establishments manufacturing from natural, synthetic, or reclaimed rubber, gutta percha, balata, or gutta siak, rubber products such as tires, rubber footwear, mechanical rubber goods, heels and soles, flooring, and rubber sundries. This group also includes establishments manufacturing or rebuilding retreaded tires, but automobile tire repair shops engaged in recapping and retreading automobile tires are classified in Services. This group also includes establishments engaged in molding primary plastics for the trade, and manufacturing miscellaneous finished plastic products. The manufacture of elastic webbing is classified in TEXTILE MILL PRODUCTS; products made of elastic webbing and garments made from rubberized fabrics in APPAREL; synthetic rubber, and plastics materials in the form of sheets, rods, tubes, granules, powders, or liquids in CHEMICALS.
- 31 LEATHER AND LEATHER PRODUCTS This major group includes establishments engaged in tanning, currying, and finishing hides and skins, and establishments manufacturing finished leather and artificial leather products and some similar products made of other materials. Leather converters are also included.
- 32 STONE, CLAY, AND GLASS PRODUCTS This major group includes establishments engaged in manufacturing flat glass and other glass products, cement, structural clay products, pottery, concrete and gypsum products, cut stone products, abrasive and asbestos products, etc., from materials taken principally from the earth in the form of stone, clay, and sand. When separate reports are available for mines and quarries operated by manufacturing establishments classified in this major group, the mining activities are classified in mining industries; when separate reports are not available, the mining activities are classified with the manufacturing operations and classified herein.
- 33 PRIMARY METAL INDUSTRIES This major group includes establishments engaged in the smelting and refining of ferrous and nonferrous metals from ore, pig, or scrap; in the rolling, drawing, and alloying of ferrous and nonferrous metals; in the manufacture of castings, forgings, and other basic products of ferrous and nonferrous metals; and in the manufacture of nails, spikes, and insulated wire and cable. This major group also includes the production of coke.
- 34 FABRICATED METAL PRODUCTS, EXCEPT ORDNANCE, MACHINERY, AND TRANSPORTATION EQUIPMENT This major group includes establishments engaged in fabricating ferrous and nonferrous metal products such as metal cans, tinware, hand tools, cutlery, general hardware, nonelectric heating apparatus, fabricated structural metal products, metal stampings, and a variety of metal and wire products not elsewhere classified. Certain important segments of the metal fabricating industries are classified in other major groups such as ORDNANCE; MACHINERY; TRANSPORTATION EQUIPMENT; PROFESSIONAL, SCIENTIFIC, AND CONTROLLING INSTRUMENTS, WATCHES AND CLOCKS; and jewelry and silverware in MISCELLANEOUS MANUFACTURING. Establishments primarily engaged in producing ferrous and nonferrous metals and their alloys are classified in PRIMARY METAL INDUSTRIES.
- 35 MACHINERY, EXCEPT ELECTRICAL This major group includes establishments engaged in manufacturing machinery and equipment, other than Electrical Equipment and Transportation Equipment. Machines powered by built-in or detachable motors ordinarily are included in this major group, with the exception of electrical household appliances (ELECTRICAL MACHINERY, EQUIPMENT, AND SUPPLIES). Portable tools, both electric and pneumatic powered, are included in this major group, but hand tools are classified in FABRICATED METAL PRODUCTS.
- 36 ELECTRICAL MACHINERY, EQUIPMENT, AND SUPPLIES This major group includes establishments engaged in manufacturing machinery, apparatus, and supplies for the generation, storage, transmission, transformation, and utilization of electrical energy. The manufacture of household appliances is included in this group, but industrial machinery and equipment powered by built-in or detachable electric motors is classified in MACHINERY, EXCEPT ELECTRICAL.
- 37 TRANSPORTATION EQUIPMENT This major group includes establishments engaged in manufacturing equipment for transportation of passengers and cargo by land, air, and water. Important products produced by establishments classified in this major group include motor vehicles, aircraft, ships, boats, railroad equipment, and miscellaneous transportation equipment such as motorcycles, bicycles, and horse drawn vehicles.

38 PROFESSIONAL, SCIENTIFIC, AND CONTROLLING INSTRUMENTS; PHOTOGRAPHIC AND OPTICAL GOODS; WATCHES AND CLOCKS This major group includes establishments engaged in manufacturing mechanical measuring, engineering, laboratory, and scientific research instruments; optical instruments and lenses; surgical, medical, and dental instruments, equipment, and supplies; ophthalmic goods; photographic equipment and supplies; and watches and clocks. Establishments primarily engaged in manufacturing instruments for indicating, measuring, and recording electrical quantities and characteristics are classified in ELECTRICAL MACHINERY, EQUIPMENT, AND SUPPLIES.

39 MISCELLANEOUS MANUFACTURING INDUSTRIES This major group includes establishments primarily engaged in manufacturing products not classified in any other manufacturing major group. Industries in this group fall into the following categories: jewelry, silverware and plated ware; musical instruments; toys, sporting and athletic goods; pens, pencils, and other office and artists' materials; buttons, costume novelties, miscellaneous notions; brooms and brushes; morticians' goods; and other miscellaneous manufacturing industries.

NES NOT ELSEWHERE SHOWN A policy of the Department of Labor and Industry is not to reveal information on an individual plant basis. Industry groups which do not meet our standard minimum of three establishments each, have been grouped under the heading NOT ELSEWHERE SHOWN. This title is not a part of the Standard Industrial Classification system, but was originated to meet the needs of this department.

nec Not Elsewhere Classified

Descriptions of subordinate industry groupings may be found in the Standard Industrial Classification Manual, 1945 and 1957, Manufacturing Industries.

NOTE: The Standard Industrial Classification Manual has been revised and the changes therein are incorporated in this Census of Maine Manufactures. All possible efforts are made to establish a linkage between the revisions and the existing classes; comparable data will be published for the five years, in order to maintain the continuity of data, beginning in 1957.

APPENDIX C: Technical Notes and Definitions

INDUSTRIAL CLASSIFICATION The Standard Industrial Classification system as compiled by the Executive Office of the President, Bureau of the Budget, was used to determine the industry title applicable to each establishment. Descriptions of major industry groups may be found in Appendix B. Each establishment has been classified according to its principal activity during 1958.

VALUE OF PRODUCT is the net selling price of all goods manufactured or processed during the calendar year. If industrial operations were on a contract basis, the total of amounts received for contract work or services performed has been included.

GROSS WAGES PAID shows total earnings during the calendar year of all employees, except executives, before deductions for Old-Age and Survivors Insurance, group

insurance, withholding tax, defense bonds, union dues, etc. Pay for sick leave, holidays, vacations, and bonuses has been included. Owing to the exclusion of various fringe benefits, payroll taxes paid by employers, etc., this data should not be interpreted as representing total labor costs on the part of the employer.

NUMBER OF WORKERS is that reported in each month operated as of the payroll period ending nearest the 15th of the month, and averaged over the full twelve months. Inasmuch as 1955 was the first year using this method of computation, much of the variations in employment between the earlier years and those after 1955 may be purely mathematical and not reflective of absolute changes. Workers engaged in fabricating, processing, assembling, inspection, receiving, storage, handling, packing, warehousing, shipping, maintenance, repair, janitorial, watchmen services and product development are included as are working foremen and all other employees below the executive level.

AVERAGE GROSS WAGES is the figure obtained by dividing GROSS WAGES PAID by the TOTAL NUMBER OF WORKERS.

ESTABLISHMENT is defined as a single physical location where industrial operations are performed; it is, therefore, a place of business rather than a legal entity or company which may have units in many locations. In instances where separate records for each establishment were not kept, data have been included in the totals for the civil division in which the home office or principal place of business was located. In these cases the establishment count is allocated by civil division and the entire report classified by size as "combined." This practice will, of course, inflate the values at the principal location. Where feasible (e.g., logging operations) such combined reports have been assigned to no specific civil division, merely to the county in which said principal location is found.

CIVIL DIVISIONS are geographical units established for governmental purposes. Major civil divisions are counties; minor divisions are cities, towns, plantations and townships.

SPECIAL STUDIES techniques of compiling data in the various special surveys included in the Census are generally covered in the texts of such surveys.

APPENDIX D: Maine River Analysis and Economic Areas

In the tables following are found two presentations of the census data. The first is tabulated according to the cities and towns falling within a five-mile area on each side of the Androscoggin, Kennebec and Penobscot rivers, and the second according to the cities and towns falling within twenty-seven regions of the state called, "Economic Areas." The cities and towns used in these analyses are as follows:

I. Rivers: Cities and towns within the five-mile area on each side of the streams--See Table D-1

ANDROSCOGGIN RIVER

Androscoggin County: Auburn, Durham, Greene, Lewiston, Lisbon, Livermore, Livermore Falls, Turner

I. Rivers (continued)

Oxford County: Bethel, Canton, Dixfield, Gilead, Hanover, Mexico, Milton, Newry, Peru, Rumford
 Franklin County: Jay
 Sagadahoc County: Topsham
 Cumberland County: Brunswick
KENNEBEC RIVER
 Somerset County: Anson, Bingham, Canaan, Caratunk, Cornville, Fairfield, The Forks, Madison, Mercer, Norridgewock, Skowhegan, Smithfield, Solon, Starks
 Kennebec County: Augusta, Belgrade, Benton, Clinton, Farmingdale, Gardiner, Hallowell, Manchester, Oakland, Pittston, Randolph, Sidney, Waterville, Winslow, Vassalboro
 Sagadahoc County: Bowdoinham, Richmond

PENOBSCT RIVER

Penobscot County: Alton, Argyle, Bangor, Bradley, Brewer, Chester, East Millinocket, Eddington, Enfield, Greenbush, Grindstone, Hampden, Howland, Lincoln, Mattawamkeag, Medway, Milford, Old Town, Orono, Orrington, Passadumkeag, Stacyville, Veazie, Winn, Woodville
 Hancock County: Bucksport, Orland, Penobscot
 Waldo County: Belfast, Frankfort, Searsport, Stockton Springs, Winterport

II. Economic Areas: Wishing to make a more meaningful tabulation than that of the "shopping" areas formerly published in the Census and which was based on a ten-mile radius about an arbitrarily fixed point, the thirteen areas were expanded to twenty-seven and the delineation based upon the 1950 population as plotted on a map of the state's minor civil divisions. The inclusion of cities and towns within the respective areas was perhaps even more arbitrary than before, but the selection was made on a more logical basis rather than by chance circumscription. It is not intended as the final answer in area analysis of the state, but merely as a beginning tool in the study of the economy. The applicable civil divisions included in the several areas are shown in the listing below; they are, however, subject to change as further data warrants. Table D-2 shows the census data tabulated according to these areas for the years 1954 through 1957; 1958 data is in the main body of this report. A map of the areas is reproduced on the back cover.

Area No.	1950 Population	Minor Civil Divisions included (Population center shown in capital letters. Center of manufacturing employment is underlined.)
1	25 382	Eagle Lakes, FORT KENT, Frenchville, Grand Isle, Madawaska, New Canada, St. Agatha, St. Francis, St. John, Van Buren, Wallagrass, T17 R 4, T 17 R 5
2	38 541	Caribou, Caswell, Connor, Easton, Ft. Fairfield, Limestone, Mapleton, Mars Hill, New Sweden, PRESQUE ISLE, Washburn, Woodland

APPENDIX F - Investment in Plant Modernization and Expansion, Maine Manufacturers

This is a tabulation of the values reported by Maine manufacturing establishments representing the amounts spent to expand or modernize their physical plant and/or the machinery and equipment therein.

The values are those reported by the individual firms or establishments and are classified according to industry, county, and size of establishment.

Certain values, however, must be used with care. The most questionable figure is that under lumber and wood products, which is separated into two groups: sawmills and logging establishments and wood products. The reason for this is the fact that the former group relocate and establish new mills and camps or purchase equipment on a basis that is not comparable to the more stationary type of industry, hence the separation so that the values for that group may be pulled out if desired.

APPENDIX G - Number of Workers under a Union Contract

Each year, in order to ascertain the extent of union organization in Maine manufacturing plants, the Census report asks for the number of workers covered by a labor-management contract. The figure furnished represents only one pay period (usually the final period of the year), while the comparative figure of total employment is the average for the year. 1955, 1956 and 1957 figures are shown below; the 1958 data will be found in the main body of this report.

APPENDIX H - Trends in Major Maine Industries, 1949-57

The fluctuations in product values in Maine's five major industry groups: paper, leather, food, lumber, and textiles have aroused considerable interest among economists and other students of the economy. In order to facilitate analysis by those interested in such data we are presenting here a tabular picture of those industrial groups, both the raw data and adjusted data are included. The applicable Wholesale Price Index (U. S. Department of Labor, Bureau of Labor Statistics, 1947-49 equals 100) is used for deflation by industry groups. Wage data is adjusted by the reciprocal series Purchasing Power Of The Dollar.

The data are here presented for the years 1949 through 1957; 1958 data is shown in the main body of this report.

1/ In order to eliminate any inconsistency resulting from the change in methodology of obtaining the annual average employment instituted in the Census of Maine Manufactures in 1955, we have used the Estimates of Nonagricultural Employment, Manufacturing, made by the Maine Employment Security Commission and the (U.S.) Bureau of Labor Statistics.

NOTE: The index "purchasing power of the dollar" is used to deflate the wage data. For the years 1949-57, the purchasing power index is 100.8, 97.0, 87.1, 89.6, 90.8, 90.7, 90.3, 87.5 and 83.4, respectively.

APPENDIX I: Capital outlay for Plant and Equipment (actual and planned) in Maine Manufacturing 1958, 1959 and 1960

In July of 1958, a special survey relative to the capital and employment plans for the current and ensuing two years was initiated by mail. These results, together with additional information gathered during the 1958 Census survey comprise the basis of the following report.

It is important to have some idea what industry plans to do in the immediate future as far as their plant and equipment. Judicious consideration of the trends evidenced in such data may well indicate the optimism or lack of optimism regarding the future of any one industry or all manufacturing in toto, however, no attempts will be made here to infer anything beyond the raw data reported by the respondent firms. It might be well to note also that these data may vary somewhat from the 1958 investment data in the main body as these data were tabulated before final corrections or additions were made.

A total of 1036 firms reported investment, actual or planned, in one or more of the three years 1958-60. These firms reported products valued at 1.18 billion dollars, and paid out 328 million dollars in wages to some 86 thousand workers in 1958. According to the survey data they invested in plant and equipment some 39 million dollars during 1958 and planned additional capital outlays of 36 million dollars and 22 million dollars in 1959 and 1960, respectively. (The original study in July, with approximately 100 respondents indicating capital plans ... and this during the height of the recent recession ... reported about 6 million dollars per year.)

The details of the survey according to industry, county, and size of establishment are shown in the table below.

APPENDIX J: Foreign Areas Purchasing Maine-made Products (1958)

Lack of space in the main body of the report precludes a listing of the countries or areas where Maine-made products were sold outside the United States. The list below is complete insofar as the reports from which they are derived are complete. The groupings shown may not strictly conform to the professional geographer's delineations, they are however used to simplify the listings.

EUROPE: Belgium, Denmark, England, France, Germany, Greece, Holland, Iceland, Italy, Norway, Poland, Portugal, Sweden, Switzerland

LATIN AMERICAS - WEST INDIES: Argentina, Bermuda, Brazil, Chile, Colombia, Costa Rica, Cuba, Dominican Republic Ecuador, El Salvador, Guatemala, Honduras, Jamaica, Mexico, Panama, Peru, Uruguay, Venezuela

APPENDIX J: Foreign Areas Purchasing Maine-made Products (1958) (continued)

NEAR EAST: Egypt, Iraq, Israel, Saudi Arabia, Syria

FAR EAST: China, Formosa, Hong Kong, India, Japan, Korea, Okinawa, Philippines, Thailand

MISCELLANEOUS: Australia, Canada, French Morocco, New Zealand, South Africa

Of the major manufacturing groups the following were the areas of principal export: FOOD--Europe and Latin America; TEXTILES--Latin America; PAPER--Europe and Latin America (and Australia) and LEATHER--Latin America and the Orient.

APPENDIX K: Fringe Benefits in Maine Manufacturing Establishments (1958)

In the 1954 Census of Maine Manufactures we presented an analysis showing the prevalence of Fringe Benefits among Maine manufacturing establishments; this study serves to update that analysis. A comparison of five major benefit items for the two periods studied is shown below together with a detailed tabulation by industry of the 1958 return.

If any change has taken place in the location or in the name of the individual, firm or corporation carrying on this business since the above address was adopted as correct, please make the necessary alterations.

If the establishment(s) has been sold to others, or has gone out of business, return this form with the name and address of the successor, if any, and the date of such sale or discontinuance. This schedule must be filed to reflect manufacturing operations in 1958 even though addressee discontinued business during or after that year. Partial reports are therefore required.

SECTION II: Value of Product—1958.

- A. Selling value f.o.b. plant of goods made by you during the year and the by-products thereof. (List principal products and give values to aid this office in proper industrial classification. Please furnish a complete list of your products and brand names, use a separate sheet if necessary.)

- B. What volume of your product (in dollars) was sold directly for export to foreign markets? \$.....

- C. What are the principal countries to which these products were exported?.....

The manufacturer's selling value at the plant of all goods produced during the year, whether sold or not, is the figure desired above. DO NOT consider your annual sales as representing your product value unless they are identical. Your sales in a given year may exceed your product for that year, or vice versa. However, if there was no significant difference in inventory of finished goods at between the beginning and ending of the period "sales" figures are acceptable as representing selling value of goods made. The principal products should be listed separately and the value of each given so that proper industrial classification may be assured. By-products should also be included, if any. Item 6 above refers generally to contract work and is found principally in the textile finishing, apparel and lumber and logging industry where you perform certain operations on the product of others—total receipts for this work should be reported.

The purpose of this report is to determine the condition of industry in the state for the calendar year under consideration and it is clear that the inclusion in our tabulations of reports for establishments, filed on a fiscal year basis, which do not reflect calendar year data can only operate to defeat this purpose. It is necessary therefore that this report be prepared to reflect calendar year operations subject only to this consideration. If, in the considered judgment of the responsible authority in the reporting manufacturer's organization, the financial data called for in the schedule do not differ materially, whether on a fiscal or calendar year basis, fiscal year figures will be accepted as representative of the calendar year operations. However, numbers of workers and amount of wages paid should be on a calendar year basis in every case.

SECTION III: Investment in Pla

A. Please furnish the net amount spent in 1958 to expand or modernize your physical plant and equipment.

\$.....

B. Do you plan to expand or modernize your physical facilities during: 1959—Yes No 1960—Yes No

If yes in either year, how much do you anticipate spending? 1959—\$..... 1960—\$.....

(The purpose of this inquiry is to ascertain the amounts invested or to be invested in the physical productive capacity of the state's manufacturing industries. We feel it highly important to have an indication of the planned investment as well as that which has already been effected. The figures received are confidential and will be used in summary tabulations only.)

According to law the Commissioner may furnish a written or printed list of interrogatories and require full and complete answers thereto under oath. Pursuant thereto: I, the undersigned, have examined this report and to the best of my knowledge and belief it is a true and correct and complete return.
