Dear Census User;

An error has been discovered in Table 24 on page 12 of the 1977 Census of Maine Manufactures publication. A corrected version of this table is shown below. The revised table should be inserted in any copies of the Census you have.

If you need additional copies or have any questions concerning the Census program, please feel free to contact this office.

Very truly yours,

W. C. Weeks, Division Director
Research and Statistics Division

Maine Revised Statutes 1964, Title 26, § 42, 43, 46: "The bureau shall collect, assort and arrange statistical details relating to . . . industrial pursuits in the State. He (The Director) may . . . cause to be printed and distributed bulletins . . . that shall be of public interest and benefit to the State."

C O V E R A G E

This survey, insofar as possible, is of universal coverage for Maine manufacturing establishments ranging from the single proprietorships to the largest corporations. Reports covering 2381 establishments were received since the original mailing February 24, 1978. Of these 175 either did not operate or went out of business in 1977. Final tabulations, according to the major breakdown, will appear as usual in the next Census. These tabulations will include the late reports which are not included in this Census.

Taking into consideration the nature of the Maine economy and the extent of coverage in this survey, the data contained in this, The Census of Maine Manufactures 1977, represent a comprehensive and valid statistical analysis of the Maine manufacturing economy.

W. C. Weeks, Division Director
Research and Statistics

C E N S U S O F M A I N E M A N U F A C T U R E S - 1977

The 1977 Census of Maine Manufactures is the second year of the new statistical series. Modifications to the Census survey effected for the 1976 Census to reduce the reporting burden on manufacturers have caused a change in some of the definitions used in previous years. In summary these are:

Industrial Classification: Classification is based on the 1972 Standard Industrial Classification Manual as opposed to the 1967 version used in prior years. Rather than collect data on all significant manufacturing operations, only those firms which were primarily manufacturers were surveyed. As an example, the manufacturing data for an establishment which was primarily a wholesale distributor of fresh fish with substantial packing operations would have been included prior to 1976.

Employment and Wages: Until the 1976 Census survey, employment and wage data for non-executive employees was collected directly from the employer. Now this data is obtained by "matching" the Census records with detail data available within the Department. The major effect is to include a class of employees, executives, for which data was not previously collected.

Totals for Major Industry groups, the Counties', and the Economic Areas are shown only in the summary tables. To facilitate the production of this publication to save space, the detail tables show only those items which are publishable--neither the major totals nor the balance figure (sometimes designated NEC, NES, or All Others) are shown in the general tables. Also, industry titles are abbreviated or denoted by the first significant title item (e.g., Food = Food and Kindred Products).

This 1977 Census publication continues as an abbreviated version due to the lack of comparable data for back years. The 1978 Census may be published in an expanded format.
