Census  
of  
Maine  
Manufactures  
1997

## ***1997 Maine Manufacturing Highlights***

- ✓ \$13.7 billion total value of product, up 4.8% from 1996, up 36.4% from 1987
  - Paper Industry - \$4.3 billion, up 4.4% from 1996, 32.2% from 1987
  - Transportation Equipment - \$1.7 billion, up 13.1% from 1996, up 71.1% from 1987
  - Lumber & Wood Products - \$1.3 billion, up 5.8% from 1996, up 26.7% from 1987
  - Food - \$1.1 billion, up 0.7% from 1996, up 21.6% from 1987
  - Electronic Equipment (except computers) - down 0.5% from 1996, up 29.6% from 1987
- ✓ 85,443 total manufacturing employment, down 1.1% from 1996, down 18.1% from 1987
- ✓ 19,858 union employees, down 3.4% from 1996, down 28.9% from 1987
- ✓ \$31,724 average wage, up 4.8% from 1996, up 49.4% from 1987

## Introduction

The Census of Maine Manufactures provides economic data to track changes in the value of goods produced, foreign imports and exports, and capital expenditures by manufacturers in the State. The data is used by city and state planners, economic developers, economists, students, business owners and others. Special studies from Census data are available upon written request to the Director, Bureau of Labor Standards, 45 State House Station, Augusta, ME 04333-0045.

## Authorization

Maine Revised Statutes 1964, Title 26, §§ 42, 43, 46: "The Bureau shall collect, assort and arrange statistical details relating to .... industrial pursuits in the State. He (the Director) may .... cause to be printed and distributed bulletins .... that shall be of public interest and benefit to the State."

## Coverage

The annual survey covers all Maine manufacturing establishments. For the 1997 Census, reports were received from 2,425 establishments. Of these, 221 either did not operate or went out of business during 1997. Final tabulations, including late reports, which are not included in this Census, will appear in the next Census.

The data contained in the *Census of Maine Manufactures 1997* represent a comprehensive and valid statistical analysis of the Maine manufacturing economy.

In producing this publication, the Department of Labor appreciates assistance received from:

Maine manufacturing businesses for their cooperation in the collection of census data, which makes this publication possible.

Department of Human Services, Office of Data, Research and Vital Statistics which provided population estimates.

Alan C. Hinsey, Director  
Bureau of Labor Standards

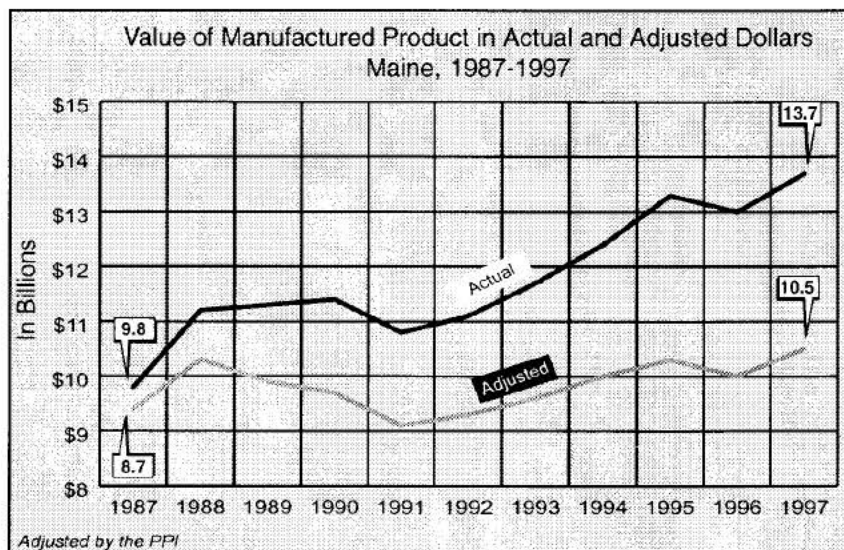

The contents of this publication are considered to be in the public domain and may be reproduced without permission. We do request, however, that appropriate citation be made.

## MAINE PRODUCTION VALUE

The product value is the primary measure of the state's manufacturing activity. It is the selling price of all goods manufactured or processed (including sales value of inventories) during a calendar year.

Maine manufacturing establishments increased the value of product from 1996 by 4.8% (\$626.8 million) to \$13.7 billion in 1997. Adjusting for inflation (using the Producer Price Index [PPI] as a deflator), the constant dollar value of Maine manufactured product increased by 4.6%. (See Appendix F for a discussion of actual and adjusted data.) See Figure 1.

Figure 1

## Durable Goods

Durable goods are manufactured products designed to withstand wear and decay over time such as appliances, transportation equipment, and furniture. The gross value of durable goods in 1997 rose 7.5% (\$377.4 million) over 1996. Notable increases occurred in Machinery (including computers) which increased 20.5% (\$105.9 million), Transportation Equipment, which increased 13.1% (\$198.8 million) and Lumber & Wood Products which increased 5.8% (\$71.3 million). There were only two decreases in durable goods for 1997; Fabricated Metals, which decreased 5.3% (\$21 million) and Electronic Equipment (excluding computers) which decreased 0.5% (\$5.4 million).

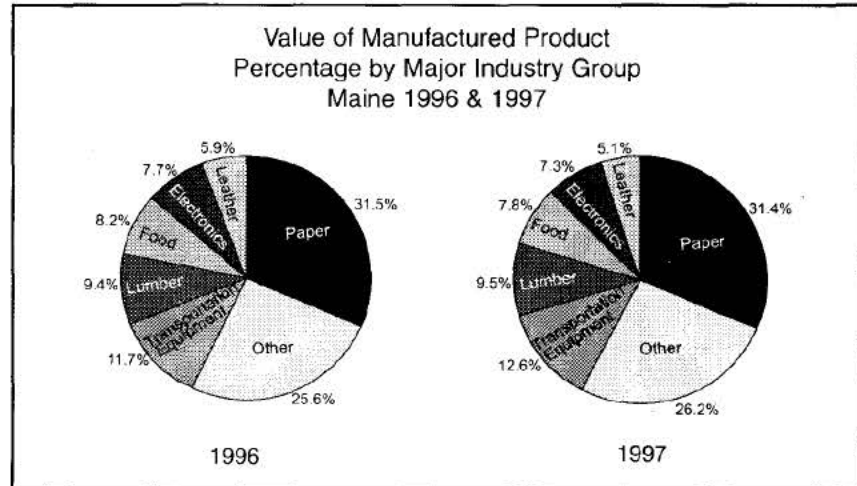

## Nondurable goods

Nondurable goods are manufactured products that generally have a shorter life expectancy than durable goods (e.g., food, textiles, and paper goods).

The gross value for nondurable goods in 1997 increased 3.1%, (\$249.4 million) from 1996. The largest percentage gains in product value were in the Petroleum & Coal Products group with a 24.7% increase (\$10 million) and the Rubber & Plastics industry with an 18.9% increase (\$85.0 million)

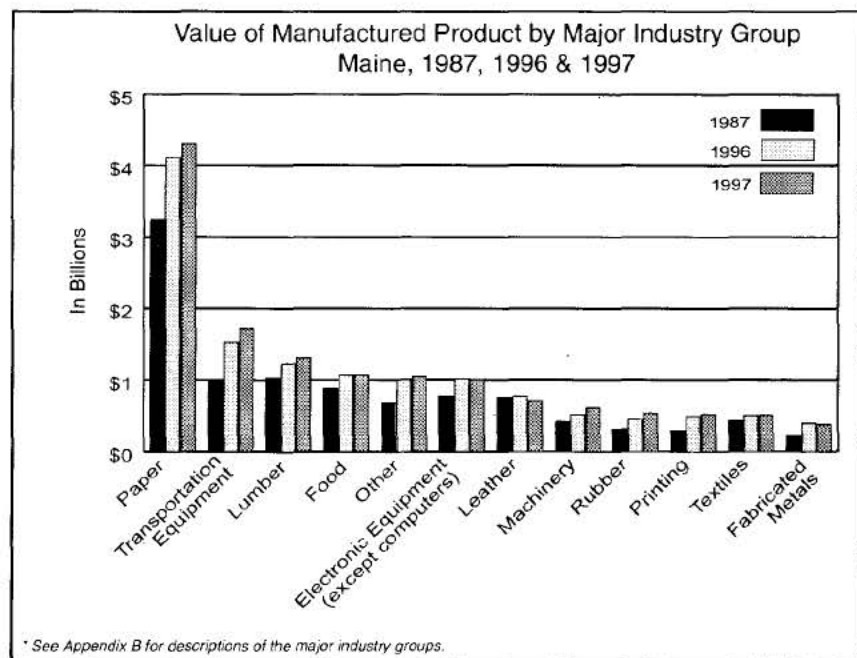

in 1997. The largest dollar gain in 1997 was in the Paper industry which increased by \$180.2 million (4.4%). On the other hand, the Leather industry was down \$77.1 million (10%). The only other decrease in this section was in the Miscellaneous group which was down \$.5 million (.8%). See Figure 2.

Figure 2

The Paper industry increased its value of product to \$4.3 billion in 1997. The Transportation Equipment group followed with a total product value of \$1.7 billion, an increase of \$198.8 million over 1996. The Lumber & Wood Products group was next with a \$1.3 billion value of product, an increase of \$71.3 million over 1996. Leather was the only major industry that dropped below its 1987 production value, by \$58.9 million. See Figure 3.

Figure 3

## MANUFACTURING EMPLOYMENT

Employment in the Maine manufacturing sector was down 1.1% from 1996 to 85,443 workers in 1997. Employment in the durable goods industries overall decreased by 141 workers (.4%) from 40,052 in 1996 to 39,911 in 1997. The Transportation Equipment group lost 677 workers (6.0%) and the Electronic Equipment industry was down 198 workers (2.7%). A gain of 272 (2.7%) employees occurred in Lumber & Wood Products and an increase of 221 (5.5%) in Machinery (including computers). Nondurable goods declined by 850 (1.8%) from 1996 to 45,532 workers in 1997. The largest decrease was in the Textiles industry which dropped by 664 workers (14.0%). The Leather group was down by 369 workers (4.8%) and the Paper industry lost 306 employees (2.2%). The largest increases were in Rubber & Plastics, Printing & Publishing, and Chemicals which were up by 171 (6.0%), 120 (2.1%), and 110 (6.6%) workers respectively. See Figures 4, 5 and 6.

Figure 4

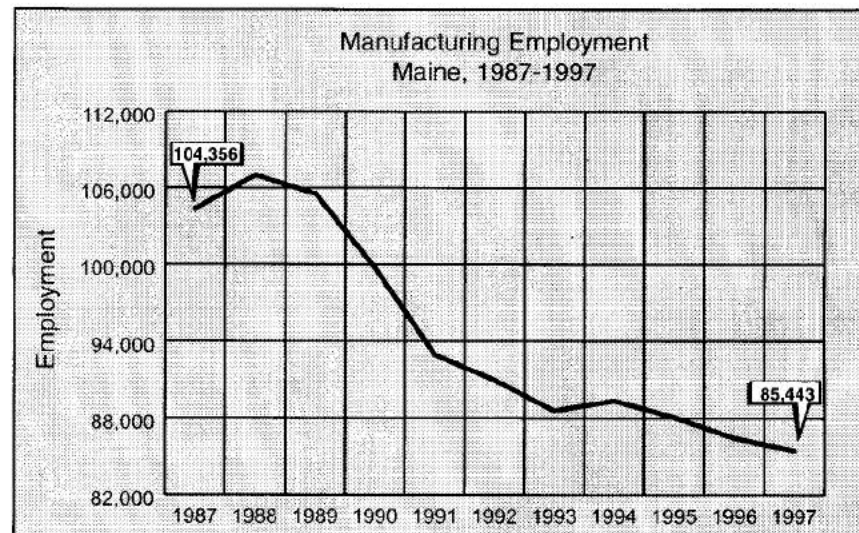

Figure 5

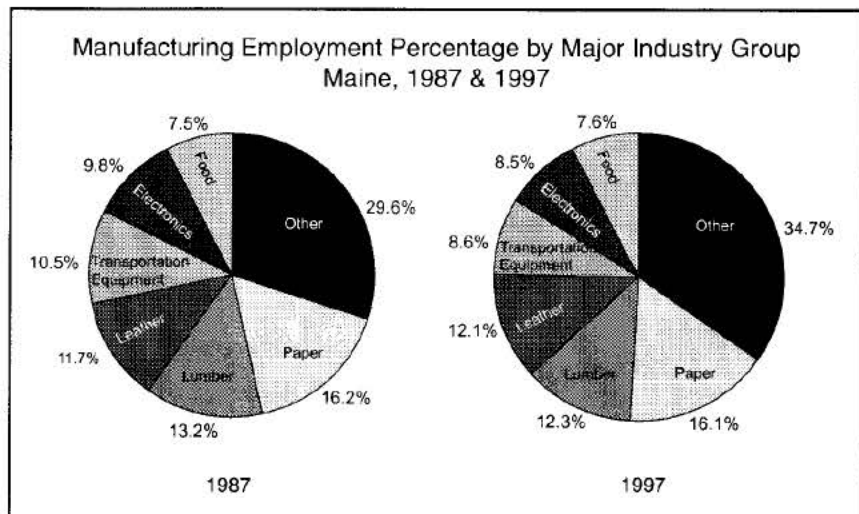

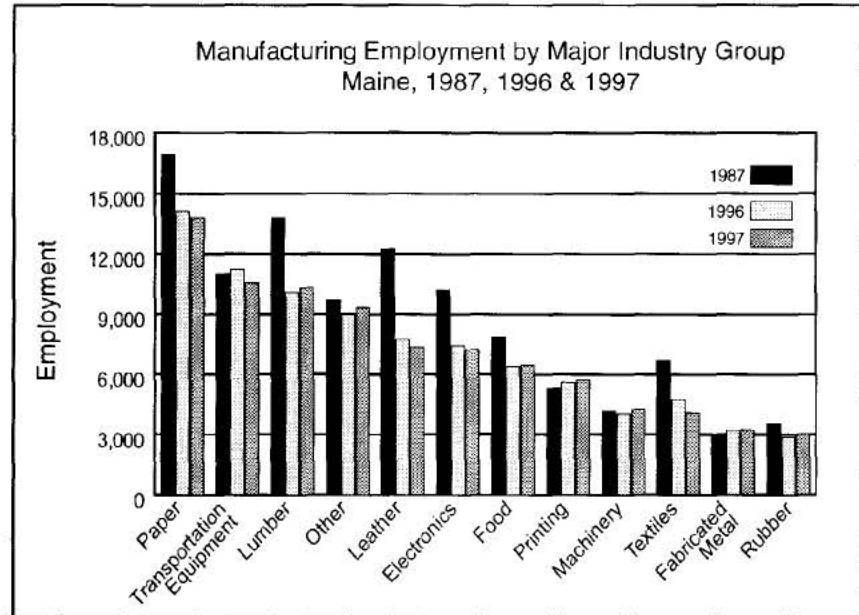

Figure 6

The paper industry continues to employ the largest percentage of manufacturing employees in the state with 16.1% of the workforce. Transportation Equipment is now the second largest employer (12.3% of the work force), and Lumber & Wood Products is right behind with 12.1%; Leather and Electronics have 8.6% and 8.5%, respectively.

There were 18,913 fewer employees overall in manufacturing in 1997 than in 1987; that was a decline of 18.1%. The largest decreases have been in the nondurable goods sector which was down 12,401 employees (21.4%). The most notable of these are: Leather - down 4,880 (39.9%), Paper - down 3,147 (18.6%); and Textiles - down 2,601 (38.9%). In the durable goods sector, the biggest employment decreases have been in the Lumber & Wood Products industry - down 3,451 (25.9%) and the Electronic Equipment industry - down 2,937 (28.8%). Increases from 1987 have been most notable in Chemicals - up 837 (89.0%) employees; Printing & Publishing - up 403 (7.6%); and Precision instruments, included in the Other category, increased 398 (60.1%).

#### UNION COVERAGE

In 1997 there were 19,858 union employees in the Maine manufacturing community; down 699 (3.4%) from 1996. The largest decline was in the Printing & Publishing industry which lost 547 union workers (41.9%) even though its total employment was up by 120. Transportation Equipment union membership was down by 343 (5.5%) and the Apparel industry lost 298 (37.4%) union workers. The largest increases were in the Paper industry which added 337 (4.1%) and the Textiles trade whose union

membership increased by 306 (23.8%) even though its overall employment was down by 664 workers.

Since 1987, with few exceptions, the percentage of union enrollees has continued to decline. Unionized employment made up 26.8% of the manufacturing work force in 1987. It was down to 23.8% in 1996 and 23.2% in 1997. The largest percentage decreases since 1987 have been in Food, down 71.1% (1,571 employees); Fabricated Metals, down 61.8% (498 employees); Lumber & Wood Products down 61.4% (1,285); Apparel down 60.0% (746 employees); Printing & Publishing down 31.3% (347 employees); and Paper down 25% (2,875 employees). See Figures 7 and 8.

Figure 7

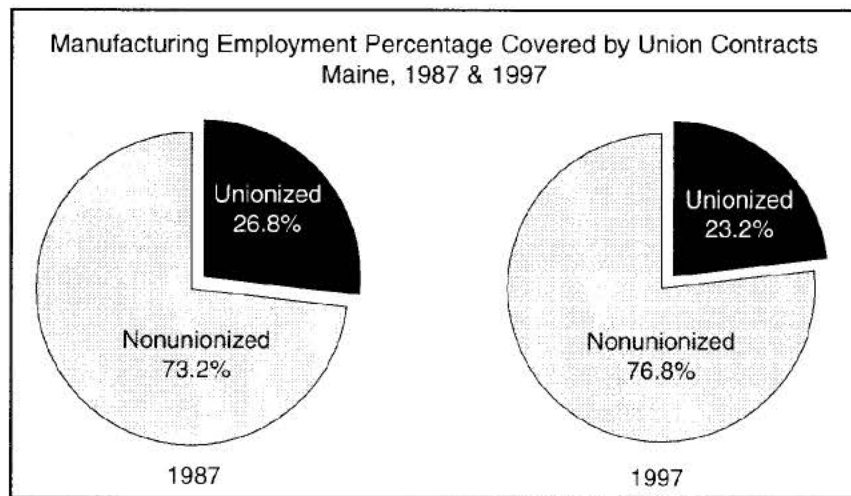

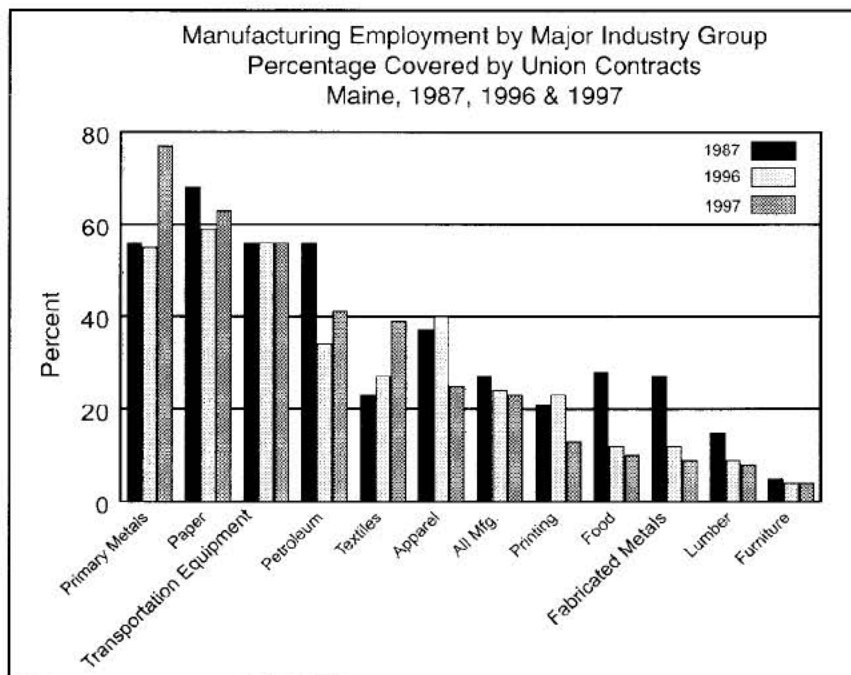

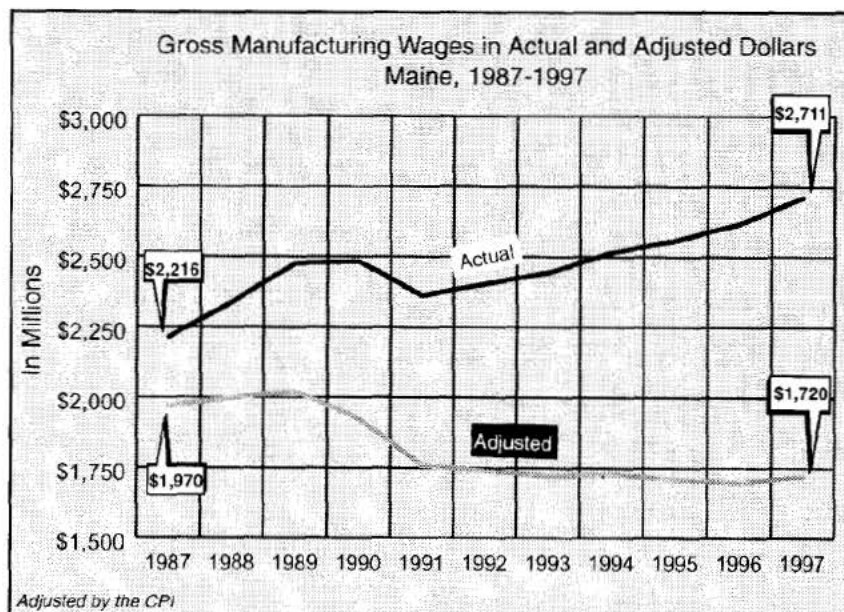

Figure 8

## GROSS WAGES

Gross wages in Maine manufacturing increased in 1997, up 3.6% (\$93.6 million) from 1996 to \$2.7 billion. At the same time the annual average of the Consumer Price Index (CPI) rose 2.3% to 157.6. Electronic Equipment, Lumber and Machinery made up 73.2% of the increase with gross wages up \$32 million (13.3%), \$19.6 million (5.3%) and \$16.9 million (12.5), respectively. See Figure 9.

Figure 9

The Paper industry accounted for 24.2% of all manufacturing wages in the state, paying out \$656.1 million in gross wages, which was 1% more than 1996. Electronic Equipment (except computers) paid \$270.1 million, an increase of 13.3% over 1996. Gross wages paid by the Lumber and Wood Products industry totaled \$252.6 million, up 5.3% from the previous year. There were only two industries with significantly lower gross wage totals for 1997: Transportation Equipment \$386.7 million (down 4.5%) and Textiles \$107.9 million, 7% less than 1996. Leather and Textiles were the only industries to have paid out less in gross wages in 1997 than in 1987, 10.8% and 6.1% less, respectively (1997 employment was down in both industries approximately 40%). See Figure 10.

## AVERAGE WAGES

The average yearly wage in 1997 for Maine manufacturing workers increased \$1,446 (4.8%) to \$31,724. In the same period the annual average Consumer Price Index, which measures the changes in the price of a fixed market basket of goods and services, rose 2.3% (3.5 points) giving Maine manufacturing workers a 2.5% increase in buying power. (See Appendix F.) See Figure 11.

Figure 10

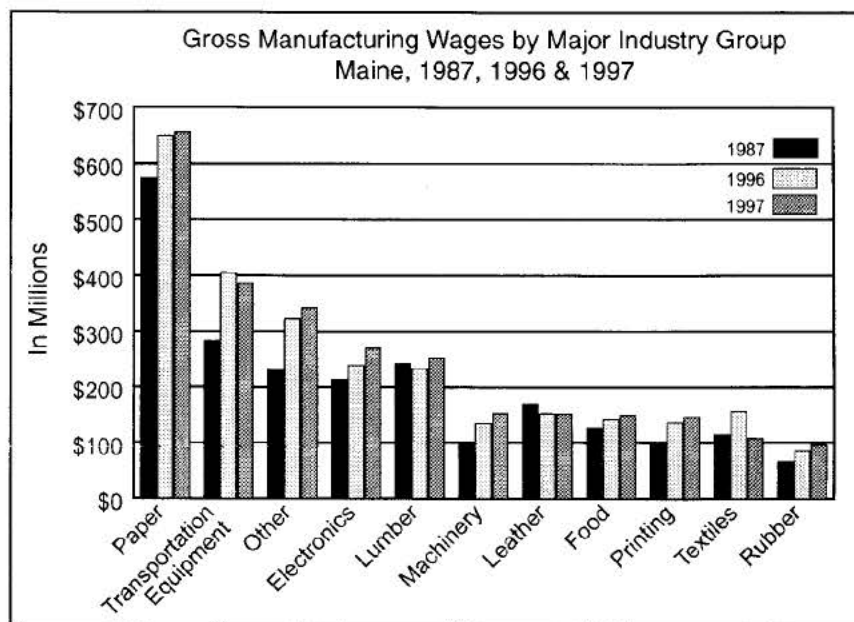

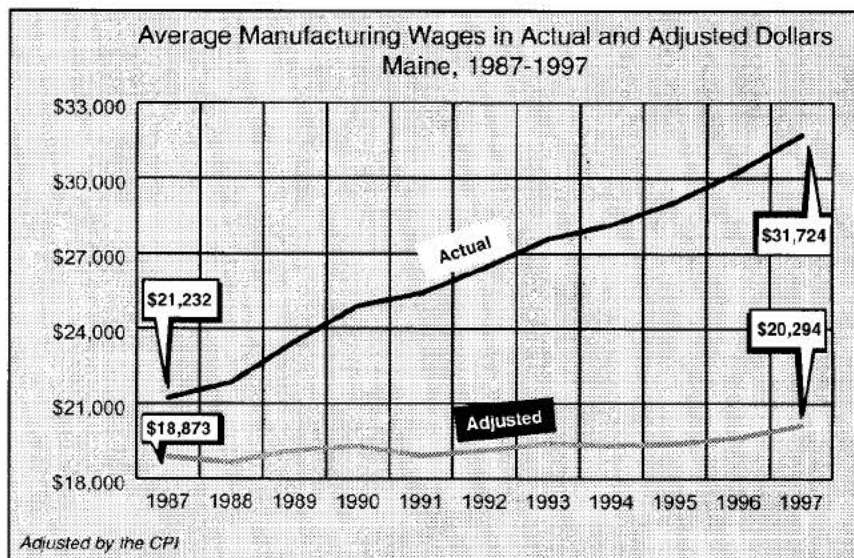

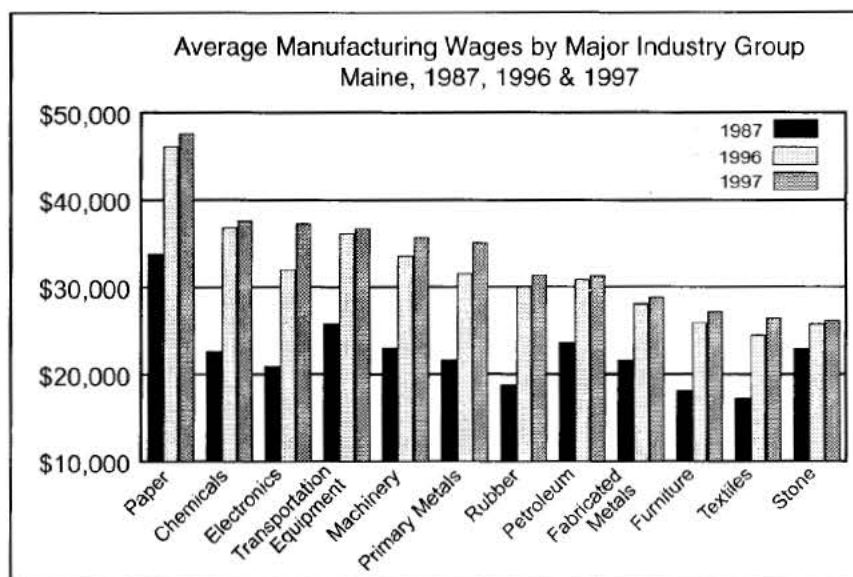

Figure 11

Paper industry workers continued to receive the highest reported average wage, \$47,586, which was 150% of the Maine manufacturing average for 1997. Miscellaneous industry workers (SIC 3999) received the lowest average wage among manufacturers in 1997, earning an average of \$18,499 for the year, it was a decrease of 1.2% from 1996.

The largest percentage as well as dollar increase in manufacturing wages was in the Electronic Equipment industry, 16.5% (\$5,280). Primary Metals increased 11.2% (\$3,530) and Textiles increased 8.1% (\$1,988). The only industry to experience a drop in average wage was the Miscellaneous group which was down 1.2% (\$222). See Figure 12.

Figure 12

#### CAPITAL EXPENDITURES

Capital expenditures are funds used for new structures or improvements to existing structures and money spent for new or used machinery and equipment. Capital expenditures in 1997 were \$659.2 million, down 7.2% from 1996.

Capital expenditures for durable goods industries increased 36.8% (\$76.1 million) with the Electronic Equipment group spending 98.8% (\$58.1 million) more than in 1996. Machinery, including computers, increased its spending by 57.9% (\$10.3 million). Primary Metals and Fabricated Metals both decreased their capital expenditures by 34.63% (\$1.0 million) and 18.8% (\$2.1 million), respectively.

Capital expenditures for the nondurable goods division decreased overall by 25.3% (\$127.1 million). The Paper industry accounted for most of this, with a decrease in capital spending of 44.4% (\$178.6 million). The largest increases in capital spending were in Textiles, up 98.8% (\$17.3 million) and Food, up 64.1% (\$16.4 million). See Figures 13 and 14.

#### FOREIGN IMPORTS

In 1997, imports used in Maine manufacturing process increased 11.0% (\$72.9 million) from 1996 levels. The largest increases in imported goods were in the Electronic Equipment industry, where spending was up \$33.4 million (259.1%); Paper, up \$31.1 million (9.4%); and Machinery, including computers, up \$16.5 million (189.8%). The largest decreases in import spending were in the Chemicals industry, down \$11.6 million (20.5%) and the Food group down \$7.8 million (15.9%). See Figure 15.

Figure 13

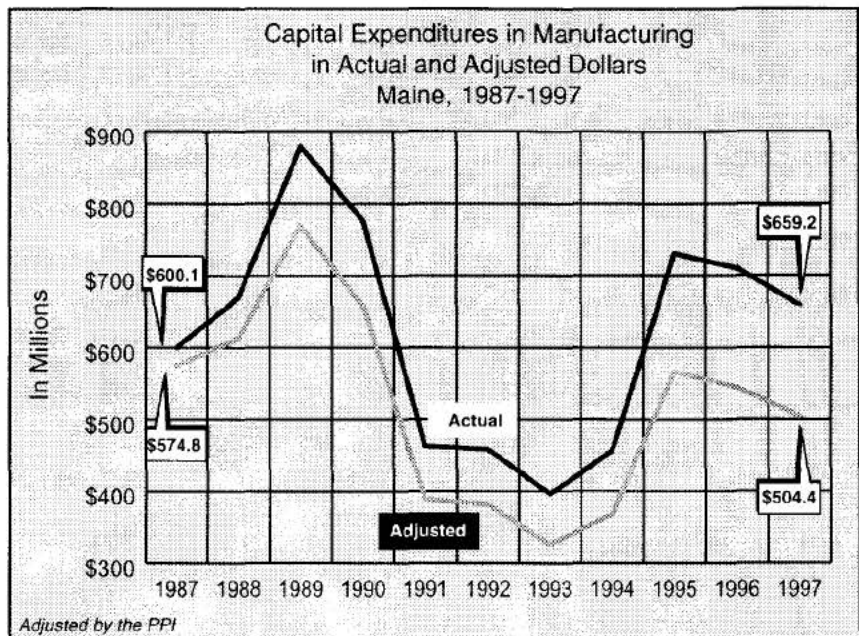

Figure 14

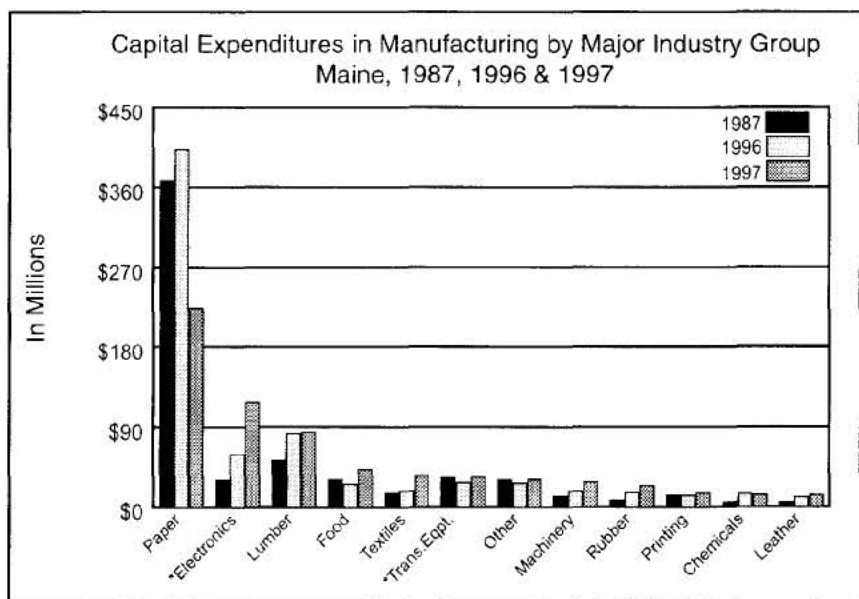

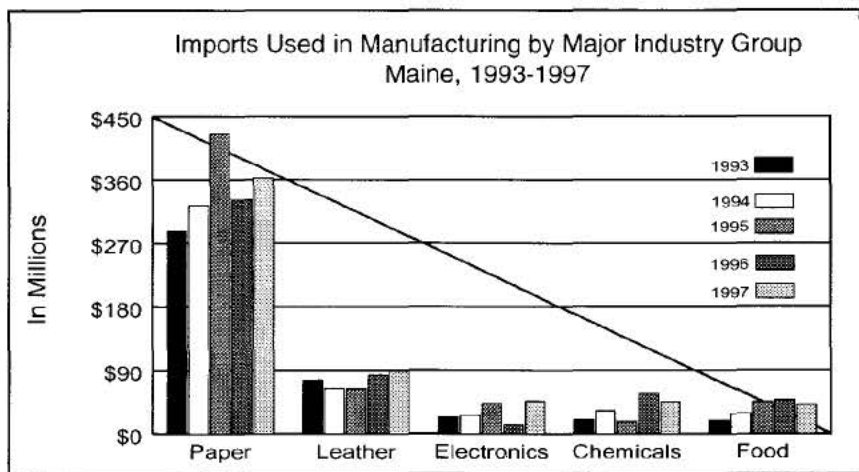

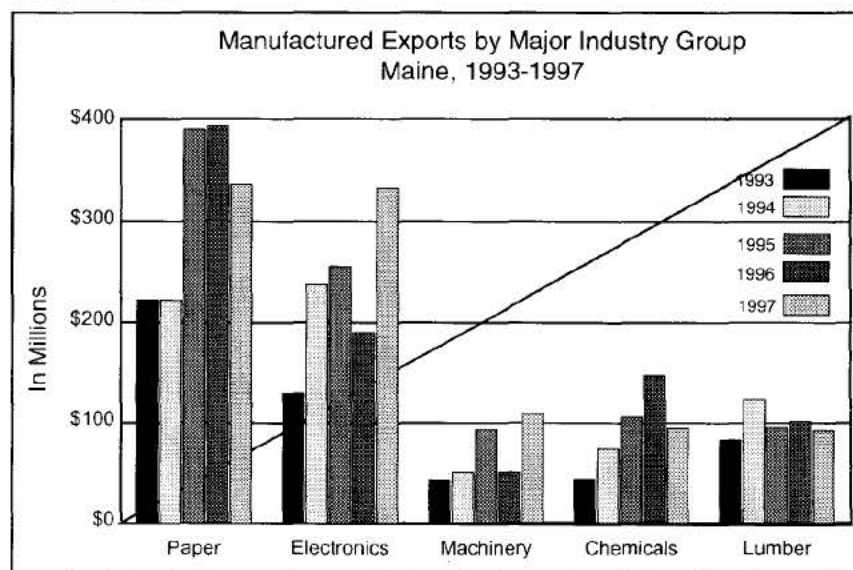

Figure 15

## FOREIGN EXPORTS

The value of manufactured goods exported in 1997 to countries outside the U.S. was down 3.4% (\$43.3 million) from 1996. The Leather industry had the greatest dollar decrease overall with \$143.1 million (63%) less than 1996. The Chemicals industry decreased its exports \$52.6 million (35.6%), and Paper decreased its exports \$52.2 million (14.7%) from 1996. Exports from the Lumber industry were down \$9 million (8.8%). The largest increases in exports were in the Electronic Equipment industry, which increased \$143.9 million (75.7%) from 1996; Machinery (including computers) which increased its exports by \$58.7 million (115.4%); Fabricated Metals up \$14.8 million (58.3%) and Textiles, up \$11.7 million (56.2%). See Figure 16.

Figure 16

## VALUE OF MANUFACTURING PRODUCT BY COUNTY GROUP

The State of Maine is divided into five county groups: I-95 Corridor, Eastern, Midcoast, Northern, and Western. (See Table 4 for listing.)

The I-95 Corridor continued to be the top producer with \$8.5 billion dollars of manufactured product in 1997. Cumberland County produced over \$2.1 billion dollars in manufactured product in 1997, an 11.5% increase over 1996. York County was right behind with almost \$2 billion; next was Penobscot with \$1.6 billion and Androscoggin County with \$1.2 billion of manufactured product. The Western group of counties had \$2.8 billion worth of manufactured product, which was \$112.3 million (4.1%) more than 1996. The largest dollar gains in this group were in Somerset and Oxford counties with increases of \$155.8 million (14.0%), and \$108.0 million (17.3%), respectively. The decreases were in Franklin County, which had a drop of \$139.4 million (17.0%) and Piscataquis County, which decreased \$12.2 million (6.8%). In the Eastern region, Washington County was down

\$24.3 million and Hancock was down \$22.4 million from 1996. The Midcoast region increased its overall value of product by 9.8%. Waldo county led with an increase of \$31.1 million, Lincoln county had a \$12.5 million increase and Knox county was up \$3.1 million from 1996. See Figures 17-18.

## APPENDIX A

### Technical Notes and Definitions

**ACTUAL DOLLARS** (Real) are dollars that have not been adjusted for inflation and reflect the actual value.

**ADJUSTED DOLLARS** (Constant) are a measure of the cost of goods or services with the effects of inflation removed.

**AVERAGE GROSS WAGES** is the figure obtained by dividing GROSS WAGES by the TOTAL EMPLOYMENT.

**DURABLE GOODS** are manufactured products designed to withstand wear and decay; e.g., furniture, metals, machinery, transportation equipment.

**EMPLOYMENT** is the number of employees reported in each month, as of the payroll period including the 12th of the month, averaged at the establishment level over the full twelve months.

**ESTABLISHMENT** is defined as a single physical location where industrial operations are performed; it is, therefore, a place of business rather than a legal entity or company which may have units in many locations. Where appropriate (e.g., logging operations) combined have been assigned to no specific civil division, merely to the county in which said principal location is found. A small number of multi-county operations report on a statewide basis.

**EXPENDITURES FOR PLANT MODERNIZATION AND EQUIPMENT** (or Capital Expenditures) is the actual amount spent during the survey year and planned for the two succeeding years for three categories: New Structures and/or Additions or Alterations to Existing Structures, Purchase of Existing Structures, and Purchase of New or Used Machinery or Equipment. Land costs are excluded.

**FOREIGN TRADE - EXPORTS** is the sales value of goods manufactured at an establishment that are shipped to foreign countries either directly or via out-of-state agents. **IMPORTS** is the cost of materials imported from foreign countries for use in the manufacturing process at an establishment.

**GROSS WAGES** shows total earnings during the calendar year of all employees before deductions, as reported to the Maine Bureau of Employment Security for Unemployment Insurance taxes. Before 1976, executives were excluded and wages were reported directly to the Bureau of Labor Standards. Because various fringe benefits such as payroll taxes, insurance, etc. paid by employers, are excluded, this data does not represent total labor costs on the part of the employer.

**NONDURABLE GOODS** are manufactured products that have a shorter life expectancy than durable goods; e.g., food, textiles, paper products, leather.

**STANDARD INDUSTRIAL CLASSIFICATION (SIC)**. The Standard Industrial Classification system as compiled by the Executive Office of the President, Office of Management and Budget, is used to determine the industry title applicable to each establishment. Descriptions of major industry groups may be found in Appendix B. Each establishment has been classified according to its principal activity.

**VALUE OF PRODUCT** is the selling price of all goods manufactured or processed (including inventories) during the calendar year. If industrial operations were on a contractual basis, the total of amounts received for contract work or services performed has been included.

**WORKERS UNDER UNION CONTRACT** is the number of workers organized under a union contract and/or a collective bargaining agreement. It represents the number from one representative payroll period; the comparative figure for NUMBER OF WORKERS is an average for the year.

## Appendix A (Continued)

Shown below is a copy of the 1997 Census of Maine Manufactures form mailed to Maine's manufacturing establishments in February, 1998.

Maine Department of Labor  
Bureau of Labor Standards  
45 State House Station  
Augusta, Maine 04333  
Telephone No. 207-624-6446

**IMPORTANT:** The filing of this report is required of all manufacturers and processors in the State of Maine under Title 26, Secs. 42, 43, 44, RS 1994. Penalties for failure or neglect to file are \$25 to \$100 fine, imprisonment up to 30 days or both. When, for any reason, it is impossible to furnish exact answers to any inquiry, make the best possible estimate and add the letter "E" to indicate so. Please read the instructions on the back of this report.

### CENSUS OF MAINE MANUFACTURES 1997

I. ESTABLISHMENTS COVERED IN THIS REPORT			
If this report covers two or more establishments in different locations, please give approximate percent of operation in each.			
(City or Town name if different from mailing address)	(County)	(Number of Units)	(Approximate % of Operation)

II. DESCRIPTION, QUANTITY, AND VALUE OF PRODUCT					
A. Description of Principal Products Produced (List Items Separately)	B. Principal Materials Used for Each Product Listed	C. Was Material used Produced in this Establishment?		D. Quantity Produced Indicate Unit Measure (e.g. tons, lbs, cords, cartons, etc.)	E. Gross Value of Product (Omit Cents)
		Yes	No		
1.					\$
2.					
3.					
4.					
5.					
6. All Other Products					
7. Receipts for work done by you on material owned by others, etc. (Contract or Job work)					
8. Receipts for custom work, repairing or installation of your own product (Sales of scrap, waste recovery)					
9. Re-sale of purchased products not manufactured or processed by you					
10. TOTAL OF LINES 1-9					

III. CAPITAL EXPENDITURES (excluding land costs)	Amount Actually Spent in 1997	Amount of Planned Expenditures for	
		1998	1999
A. New Structures, Additions, or Alterations to Existing Structures	\$	\$	\$
B. Purchase of Existing Structures			
C. Purchase of New or Used Machinery and Equipment			

IV. EXPORTS - IMPORTS (Foreign Trade)	
A. Estimated Value of Exports \$ _____	B. Estimated Value of Imports \$ _____

V. UNION STATUS	
Is this establishment organized under a union contract and/or collective bargaining agreement? <input type="checkbox"/> No <input type="checkbox"/> Yes	
If Yes, please fill in the following:	
Name of Union _____	
Number of workers covered by union contract _____	

VI. TEMPORARY CONTRACT LABOR												
The object of this question is to determine the number of temporary contract workers contracted through employment agencies used in manufacturing in a manner that is as close as possible to that used to report regular employees. The monthly number of workers should be for the week including the 12th of the month.												
Total cost of temporary contract labor purchased during the year: \$ _____												
	JAN	FEB	MAR	APRIL	MAY	JUNE	JULY	AUG	SEPT	OCT	NOV	DEC
Male												
Female												
Total												

## Appendix A (Continued)

### VII. DEFENSE RELATED ACTIVITIES

1. Does any of your production include work done for the defense industry? Yes ☐ No ☐
2. What percentage of your gross value of product is defense related? \_\_\_\_\_ %
  - a. Produced under contract with Defense Dept. Agencies? \_\_\_\_\_ %
  - b. Produced under subcontract with other defense contractors? \_\_\_\_\_ %
3. How does your company expect to respond to declining defense orders?
 

New products _____	Downsize _____	Not applicable _____
New markets _____	Other _____	

### VIII. PURCHASING AND SALES ACTIVITIES

1. What percentage of your total annual purchases are from companies located in Maine? \_\_\_\_\_ %
2. What percentage of your total annual sales are made to companies located in Maine? \_\_\_\_\_ %

### INSTRUCTIONS and EXPLANATION NOTES

**GENERAL:** If this establishment has been sold to others, or has gone out of business, return this form with the name and address of the successor, if any, and the date of such sale or discontinuance. This schedule must be filed to reflect manufacturing operations during the year even though address, discontinued business during or after that year. **PARTIAL YEAR REPORTS ARE REQUIRED.** New firms organized or beginning operations during the year must also file.

The purpose of this report is to determine the condition of industry in the state for the calendar year under consideration and it is clear that the inclusion in our tabulation of reports for establishments filed under a fiscal year basis which do not reflect calendar year data can only operate to defeat this purpose. It is necessary therefore that this report be prepared to reflect calendar year operations, subject to this consideration: If, in the considered judgment of the responsible authority in the reporting manufacturer's organization, the financial data called for in the schedule do not materially differ, whether on a calendar or fiscal basis, fiscal year figures will be accepted as representative of the calendar year operations. **HOWEVER, THE NUMBER OF CONTRACT WORKERS AND COSTS SHOULD BE REPORTED ON A CALENDAR YEAR BASIS IN EVERY CASE.**

**ITEM I:** List cities or towns in which the establishments are located. Also indicate the number of establishments or separate production units located at that city or town which are covered or included within this report. If any change has taken place in the name, address, or location please make the necessary changes on the address label.

**ITEM II:** Describe and list separately your products as fully as possible in column (A). In column (B) indicate the basic materials used to make each item, and in column (C) check whether the basic materials were produced in the same establishment. Indicate in column (D) the quantity produced and also the unit of measure (example: cubic feet, cords, thousand board feet, quarts, gallons, pounds). In column (E) state manufacturer's selling value at this establishment of all goods produced during the year whether sold or not. **DO NOT** consider your annual sales as representing your product value unless they are identical. Sub-Item 7 is found principally in the textile finishing, apparel, logging, and lumbering industries where certain operations are performed on materials owned by others - total receipts for such work should be reported.

**ITEM III:** The purpose of this inquiry is to determine the amounts invested or to be invested in the physical productive capacity of the State's manufacturing industries. It is highly important that we have an indication of the planned investment as well as that which has already been effected. The figures are confidential and released only in summary form.

**ITEM IV:** A. Enter the estimated sales value of goods manufactured at this establishment that were shipped to foreign countries, either directly or via out-of-state agents.

B. Enter the estimated cost of materials imported from foreign countries for use in the manufacturing process at this establishment.

**PLEASE READ INSTRUCTIONS -** If you have further questions, please contact this office.

## Appendix B

### Major Industry Descriptions, 1987 Standard Industrial Classification Manual

#### THE DIVISION AS A WHOLE

The manufacturing division includes establishments engaged in the mechanical or chemical transformation of materials or substances into new products. These establishments are usually described as plants, factories, or mills and characteristically use power driven machines and materials handling equipment. Establishments engaged in assembling component parts of manufactured products are also considered manufacturing if the new product is neither a structure nor other fixed improvement. Also included is the blending of materials, such as lubricating oils, plastics, resins, or liquors.

The materials processed by manufacturing establishments include products of agriculture, forestry, fishing, mining, and quarrying as well as products of other manufacturing establishments. The new product of a manufacturing establishment may be "finished" in the sense that it may be "semi-finished" to become a raw material for an establishment engaged in further manufacturing. For example, the product of the copper smelter is the raw material used in electrolytic refineries; refined copper is the raw material used by certain electrical equipment manufacturers.

The materials used by manufacturing establishments may be purchased directly from producers, obtained through customary trade channels, or secured without recourse to the market by transferring the product from one establishment to another which is under the same ownership. Manufacturing production is usually carried on for the wholesale market, for interplant transfer, or to order for industrial users, rather than for direct sale to the domestic consumer. (The two digits listed below, represent the major categories in the manufacturing division.)

**20 FOOD AND KINDRED PRODUCTS:** This major group includes establishments manufacturing or processing food and beverages for human consumption and certain related products, such as manufactured ice, chewing gum, vegetable and animal fats and oils, and prepared feeds for animals and fowls.

**22 TEXTILE MILL PRODUCTS:** This major group includes establishments engaged in performing any of the following operations: (1) preparation of fiber and subsequent manufacturing of yarn, thread, braids, twine, and cordage; (2) manufacturing broad woven fabric, narrow woven fabric, knit fabric, and carpets and rugs from yarn; (3) dyeing and finishing fiber, yarn, fabric, and knit apparel; (4) coating, waterproofing, or otherwise treated fabric; (5) the integrated manufacture of knit apparel and other finished articles from yarn; and (6) the manufacture of felt goods, lace goods, nonwoven fabrics, and miscellaneous textiles.

This classification makes no distinction between the two types of organizations which operate in the textile industry: (1) the "integrated" mill which purchases materials, produces textiles, and related articles within the establishment, and sells the finished products; and (2) the "contract" or "commission" mill which processes materials owned by others. Converters or other manufacturing industries; establishments which assign materials to contract mills for processing (other than knitting) are classified in nonmanufacturing industries; establishments which assign yarns to outside contractors or commission knitters for the production of knit products are also classified in this Group.

**23 APPAREL AND OTHER FINISHED PRODUCTS MADE FROM FABRICS AND SIMILAR MATERIALS:** This major group, known as the cutting-up and needle trades, includes establishments producing clothing and fabricating products by cutting and sewing purchased woven or knit textile fabrics and related materials, such as leather, rubberized fabrics, plastics, and furs.

Included in the apparel industries are three types of establishments: (1) the "regular" or insider factories, (2) contract factories, and (3) apparel jobbers. The regular factories perform all of the usual manufacturing functions within their own plant; the contract factories manufacturing apparel from materials owned by others; and apparel jobbers perform the entrepreneurial functions of a manufacturing company, such as buying raw materials, designing and preparing samples, arranging for the manufacture of the garments from their materials and selling of the finished apparel.

Custom tailors and dressmakers not operating on a factory basis are classified in Retail Trade; establishments which purchase and resell finished garments but do not perform the functions of the apparel jobbers are classified in Wholesale Trade.

**24 LUMBER AND WOOD PRODUCTS, EXCEPT FURNITURE:** This major group includes logging camps engaged in cutting timber and pulpwood; merchant sawmills, lath mills, shingle mills, cooperage stock mills, planing mills, and plywood mills and veneer mills engaged in producing lumber and wood basic materials; and establishments engaged in manufacturing finished articles made entirely or mainly of wood or wood substitutes. Certain types of establishments producing wood products are classified elsewhere. For example, furniture and office and store

## Appendix B (Continued)

fixtures are classified in Major Group 25; musical instruments, toys, and playground equipment, and caskets in Major Group 39. Woodworking in connection with construction, in the nature of reconditioning and repair, or performed to individual order, is classified in nonmanufacturing industries.

**25 FURNITURE AND FIXTURES:** This major group includes establishments engaged in manufacturing household, office, public building, and restaurant furniture; and office and store fixtures. Establishments primarily engaged in the production of millwork and wood kitchen cabinets are classified in Major Group 24; cut stone and concrete furniture in Major Group 32; laboratory and hospital furniture in Major Group 38; beauty and barber shop furniture in Major Group 39; and woodworking to individual order or in the nature of reconditioning and repair in nonmanufacturing industries.

**26 PAPER AND ALLIED PRODUCTS:** This major group includes the manufacture of pulps from wood and other cellulose fibers and from rags; the manufacture of paper and paperboard; and the manufacture of paper and paperboard into converted products, such as paper coated off the paper machine, paper bags, paper boxes, and envelopes. Certain types of converted paper products are classified elsewhere, such as abrasive paper in Major Group 32; carbon paper in Major Group 39; and photosensitized and blueprint paper in Major Group 38.

**27 PRINTING, PUBLISHING, AND ALLIED PRODUCTS:** This major group includes establishments engaged in printing by one or more of the common processes, such as letter press, lithography, gravure, or screen; and those establishments which perform services for the printing trade, such as bookbinding, typesetting, engraving, photoengraving, and electrotyping. This major group also includes establishments engaged in publishing newspapers, books, and periodicals, regardless of whether or not they do their own printing. News syndicates are classified in Service Industries, and textile printing and finishing in Major Group 22.

**28 CHEMICALS AND ALLIED PRODUCTS:** This major group includes establishments producing basic chemicals and establishments manufacturing products by predominantly chemical processes. Establishments classified in this major group manufacture three general classes of products: (1) basic chemicals, such as acids, alkalies, salts, and organic chemicals; (2) chemical products to be used in further manufacture, such as synthetic fibers, plastics materials, dry colors, and pigments; (3) finished chemical products to be used for ultimate consumption, such as drugs, cosmetics, and soaps; or to be used as materials or supplies in other industries, such as paints, fertilizers, and explosives. The mining of natural rock salt is classified in mining industries. Establishments primarily engaged in manufacturing nonferrous metals and high percentage ferrous alloys are classified in Major Group 33; silicon carbide in Major Group 32; baking powder, other leavening compounds, and starches in Major Group 20; and artists' colors in Major Group 39. Establishments primarily engaged in packaging, repackaging, and bottling of purchased chemical products, but not engaged in manufacturing chemicals and allied products, are classified in trade industries.

**29 PETROLEUM REFINING AND RELATED INDUSTRIES:** This major group includes establishments primarily engaged in petroleum refining, manufacturing paving and roofing materials, and compounding lubricating oils and greases from purchased materials. Establishments manufacturing and distributing gas to consumers are classified in public utilities industries, and those primarily engaged in producing coke and byproducts in Major Group 33.

**30 RUBBER AND MISCELLANEOUS PLASTICS PRODUCTS:** This major group includes establishments manufacturing from natural, synthetic, or reclaimed rubber, gutta-percha, balata, or gutta siak, rubber products such as tires, rubber footwear, mechanical rubber goods, heels and soles, flooring, and rubber sundries. This group also includes establishments primarily manufacturing tires, but establishments primarily recapping and retreading automobile tires are classified in Services. This group also includes establishments engaged in molding primary plastics for the trade, and manufacturing miscellaneous finished plastics products. The manufacture of elastic webbing is classified in Major Group 22; products made of elastic webbing and garments made from the rubberized fabrics in Major Group 23; and synthetic rubber in Major Group 28.

**31 LEATHER AND LEATHER PRODUCTS:** This major group includes establishments engaged in tanning, currying, and finishing hides and skins, and establishments manufacturing finished leather and artificial leather products and some similar products made of other materials. Leather converters are also included.

**32 STONE, CLAY, GLASS AND CONCRETE PRODUCTS:** This major group includes establishments engaged in manufacturing flat glass and other glass products, cement, structural clay products, pottery, concrete and gypsum products, cut stone, abrasive and asbestos products, etc., from materials taken principally from the earth in the form of stone, clay, and sand. When separate reports are available for mines and quarries operated by manufacturing establishments classified in this major group, the mining quarrying activities other than those of Minerals, ground or treated, are classified herein with the manufacturing operations.

## Appendix B (Continued)

If separate reports are not available for crushing, grinding, and other preparation activities of Minerals, ground or treated, these establishments are classified in Mining.

**33 PRIMARY METAL INDUSTRIES:** This major group includes establishments engaged in the smelting and refining of ferrous and nonferrous metals from ore, pig, or scrap; in the rolling, drawing, and alloying of ferrous and nonferrous metals; in the manufacture of castings and other basic products of ferrous and nonferrous metals; and in the manufacture of nails, spikes, and insulated wire and cable. This major group also includes the production of coke. Establishments primarily engaged in manufacturing metal forgings or stampings are classified in Major Group 34.

**34 FABRICATED METAL PRODUCTS, EXCEPT MACHINERY AND TRANSPORTATION EQUIPMENT:** This major group includes establishments engaged in fabricating ferrous and nonferrous metal products such as metal cans, tinware, hand tools, cutlery, general hardware, and nonelectric heating apparatus, fabricated structural metal products, metal forgings, metal stampings, ordnance (except vehicles and guided missiles), and a variety of metal and wire products not elsewhere classified. Certain important segments of the metal fabricating industries are classified in other major groups, such as machinery in Major Groups 35 and 36; transportation equipment, including tanks, in Major Group 37; professional scientific and controlling instruments, watches and clocks in Major Group 38; and jewelry and silverware in Major Group 39. Establishments primarily engaged in producing ferrous and nonferrous metals and their alloys are classified in Major Group 33.

**35 INDUSTRIAL AND COMMERCIAL MACHINERY AND COMPUTER EQUIPMENT:** This major group includes establishments engaged in manufacturing industrial and commercial machinery and equipment and computers. Included are the manufacture of engines and turbines; farm and garden machinery; construction, mining, and oil field machinery; elevators; metalworking machinery; special industry machinery; computer and peripheral equipment and office machinery; and refrigeration and service industry machinery. Machines powered by built-in or detachable motors ordinarily are included in this major group, with the exception of electrical household appliances.

**36 ELECTRONIC AND OTHER ELECTRICAL EQUIPMENT AND COMPONENTS, EXCEPT COMPUTER EQUIPMENT:** This major group includes establishments engaged in manufacturing machinery, apparatus, and supplies for the generation, storage, transmission, transformation, and utilization of electrical energy. The manufacture of household appliances is included in this group, but industrial machinery and equipment powered by built-in or detachable electric motors is classified in Major Group 35. Establishments primarily engaged in manufacturing instruments for indicating, measuring, and recording electrical quantities are classified in Major Group 38.

**37 TRANSPORTATION EQUIPMENT:** This major group includes establishments engaged in manufacturing equipment for transportation of passengers and cargo by land, air and water. Important products produced by establishments classified in this major group include motor vehicles, aircraft, guided missiles and space vehicles, ships, boats, railroad equipment, and miscellaneous transportation equipment such as motorcycles, bicycles, and snowmobiles. Establishments primarily engaged in manufacturing mobile homes are classified in Major Group 24.

**38 MEASURING, ANALYZING, AND CONTROLLING INSTRUMENTS, PHOTOGRAPHIC, MEDICAL, AND OPTICAL GOODS; WATCHES AND CLOCKS:** This major group includes establishments engaged in manufacturing instruments (including professional and scientific) for measuring, testing, analyzing, and controlling, and their associated sensors and accessories; optical instruments and lenses; surveying and drafting instruments; surgical, medical, and dental instruments, equipment, and supplies; ophthalmic goods; photographic equipment and supplies; and watches and clocks.

**39 MISCELLANEOUS MANUFACTURING INDUSTRIES:** This major group includes establishments primarily engaged in manufacturing products not classified in any other manufacturing major group. Industries in this group fall into the following categories: jewelry, silverware and plated ware; musical instruments; toys, sporting and athletic goods; pens, pencils, and other office and artists' materials; buttons, costume novelties, miscellaneous notions; brooms and brushes; caskets; and other miscellaneous manufacturing industries.

**NOTE:** More detailed definitions may be obtained directly from the Standard Industrial Classification Manual, 1987 Revision.

## Appendix C

### Geographic Definitions of Labor Market Areas

This publication has included a tabulation entitled "Economic Areas" (now called Labor Market Areas), since 1954. This series now consists of 35 areas which were delineated on the basis of commuting patterns and population density. Only those towns with manufacturing businesses are listed below. A complete listing of the Maine Labor Market Areas can be found in the *1996 Maine Employment Statistical Handbook*. It can be ordered by mailing a request to Maine Department of Labor, Labor Market Information Services, Attn.: Publications Unit Manager, 20 Union St., Augusta, ME 04330-6826. There is a charge for the publication. Effective January 1994, the metropolitan and nonmetropolitan areas were redefined. Care should be exercised in making comparisons of these 35 areas with the earlier areas as there have been changes made in many of the regions.

Civil divisions are geographical units of government. Major civil divisions are counties; minor civil divisions are cities, towns, plantations, and townships. The civil division with the largest populations is in bold letters, and the civil division with the most workers employed in manufacturing is underlined. The minor civil divisions contained in the areas are as follows:

Area No.	1996 Population	Town
1	37,915	<u>Berwick</u> , Eliot, Kittery, S. Berwick, <b>York</b>
2	43,803	Acton, Alfred, Lebanon, Limerick, Newfield, N. Berwick, <b>Sanford</b> , Shapleigh, Waterboro
3	64,580	Arundel, <b>Biddeford</b> , Dayton, Kennebunk, Kennebunkport, Lyman, Saco, Wells
4	221,800	Buxton, Cape Elizabeth, Casco, Cumberland, Falmouth, Gorham, Gray, Hollis, Limington, N. Yarmouth, Old Orchard Beach, <b>Portland</b> , Raymond, Scarborough, S. Portland, Standish, Westbrook, Windham, Yarmouth
5	73,480	<u>Bath</u> , Bowdoinham, <b>Brunswick</b> , Durham, Edgecomb, Freeport, Georgetown, New Gloucester, Phippsburg, Pownal, Richmond, Topsham, West Bath, Wiscasset, Woolwich
6	14,093	<b>Boothbay</b> , Boothbay Harbor, Bremen, <u>Bristol</u> , Damariscotta, Newcastle, Nobleboro, South Bristol, Southport
7	25,206	Baldwin, <b>Bridgton</b> , Brownfield, Cornish, Denmark, Fryeburg, Harrison, Hiram, Lovell, Naples, Parsonsfield, Porter, Sebago, Sweden, Waterford
8	88,316	Auburn, Greene, <b>Lewiston</b> , Lisbon, Mechanic Falls, Poland, Turner, Sabattus
9	39,987	Camden, Cushing, Friendship, North Haven, Owls Head, <b>Rockland</b> , Rockport, St. George, S. Thomaston, Thomaston, Union, Vinalhaven, Warren, Washington, Waldoboro
10	19,419	Buckfield, Hebron, Minot, <b>Norway</b> , <u>Oxford</u> , Paris, West Paris,
11	9,718	<b>Blue Hill</b> , <u>Brooklin</u> , Castine, Deer Isle, Penobscot, Sedgwick, Stonington, Swans Island
12	83,135	<b>Augusta</b> , Belgrade, Chelsea, China, Farmingdale, Hallowell, Jefferson, Leeds, Manchester, Monmouth, Mt. Vernon, Palermo, Pittsford, Randolph, Readfield, Sidney, Vassalboro, W. Gardiner, Whitefield, Windsor, Winthrop

## Appendix F

### Actual and Adjusted Data Comparisons, 1996-1997

The data on the following table has been adjusted using two major price indexes published by the U.S. Department of Labor, Bureau of Labor Statistics. The Value of Product data is adjusted by the Producer Price Index, (formerly the Wholesale Price Index) using a base year of 1982 = 100 unless noted. Wage data is adjusted by the Consumer Price Index for Urban Wage Earners and Clerical Workers and the base year is 1982-84 = 100. The adjustments made are based on the annual average for the respective index.

The Consumer Price Index is a monthly statistical measure of the average change in prices in a fixed market basket of goods and services. The CPI is based on prices of food, clothing, shelter, fuel, drugs, transportation fares, doctors' and dentists' fees, and other goods and services that people buy for day-to-day living. The quantity and quality of these items is kept essentially unchanged between major revisions so that only price changes will be measured. Prices are collected from over 18,000 tenants, 24,000 retail establishments, and 18,000 housing units for property taxes in 85 urban areas across the country. All taxes directly associated with the purchase and use of items are included in the index.

Though the CPI is often called the "Cost-of-Living Index", it measures only price change, which is just one of several important factors affecting living costs.

#### CPI-W

1996 Annual Average = 154.1

1997 Annual Average = 157.6

Producer Price Indexes measure average changes in prices received in primary markets of the United States by producers of commodities in all stages of processing. The sample used for calculating these indexes contains about 2,800 commodities produced in the manufacturing, agriculture, forestry, fishing, mining, gas and electricity, and public utilities sectors. The universe includes all commodities produced for sale in commercial transactions in primary markets in the United States.

To the extent possible, prices used in calculating Producer Price Indexes apply to the first significant commercial transaction in the United States, from the production or central marketing point. Price data are generally collected monthly, primarily by mail questionnaire. Most prices are obtained directly from producing companies on a voluntary and confidential basis. Prices generally are reported for the Tuesday of the week containing the 13th of the month.

#### PPI

	<u>Annual Average</u>			<u>Annual Average</u>	
	<u>1996</u>	<u>1997</u>		<u>1996</u>	<u>1997</u>
Total Manufactures	130.5	130.7			
Durable Goods	133.3	133.5	Nondurable Goods	127.4	127.6
