Maine Public Utilities Commission

Commission Staff GIS Analysis of existing gas transmission and distribution facilities, population density, broadband facilities, and other data sets.

December 16, 2013

Table of Contents

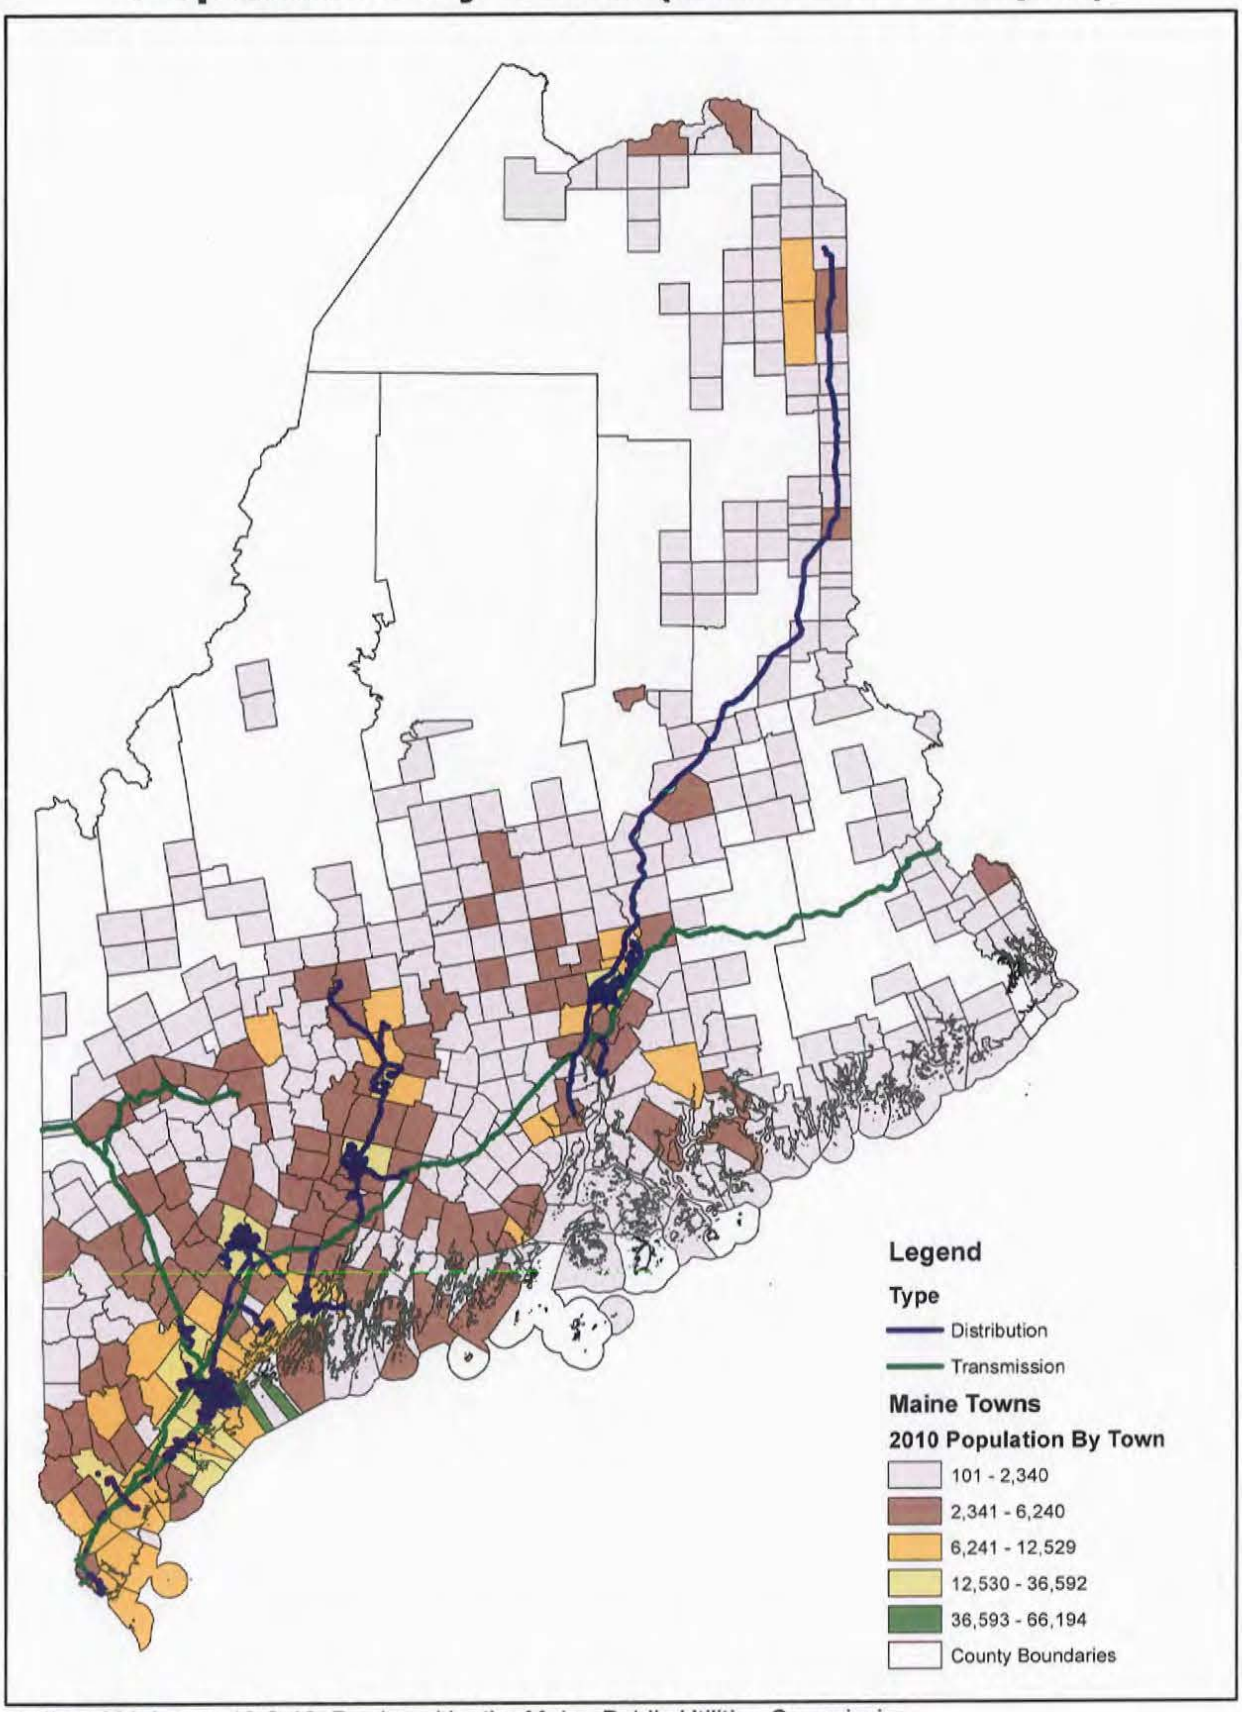
1. Population By Town (Over 100 People)
2. Population Density By Polygon Along Transmission and Distribution Gas Pipelines
3. Population Density By Centroid Point Along Transmission and Distribution Gas Pipelines
4. Population Density By Census Block Polygon (Over 200 People)
5. Population Density By Census Block Cluster (Over 200 People)
6. Census Block Population Density "People Passed" by Pipelines (With 5-Mile Buffer)
7. Existing Gas Line Infrastructure Compared to Cable Broadband
8. Existing Gas Distribution vs. Existing Cable Broadband
9. 2010 Census Data for Maine

Population By Town (Over 100 People)

This map pulls down 2010 Census Data by Town. It excludes populations with less than 100 people. Included in the map are layers that highlight the town populations, county boundaries, and the transmission and distribution network for the gas utilities.

This map may be useful to broadly identify where there are concentrations of people by town near gas facilities.

Population By Town (Over 100 People)



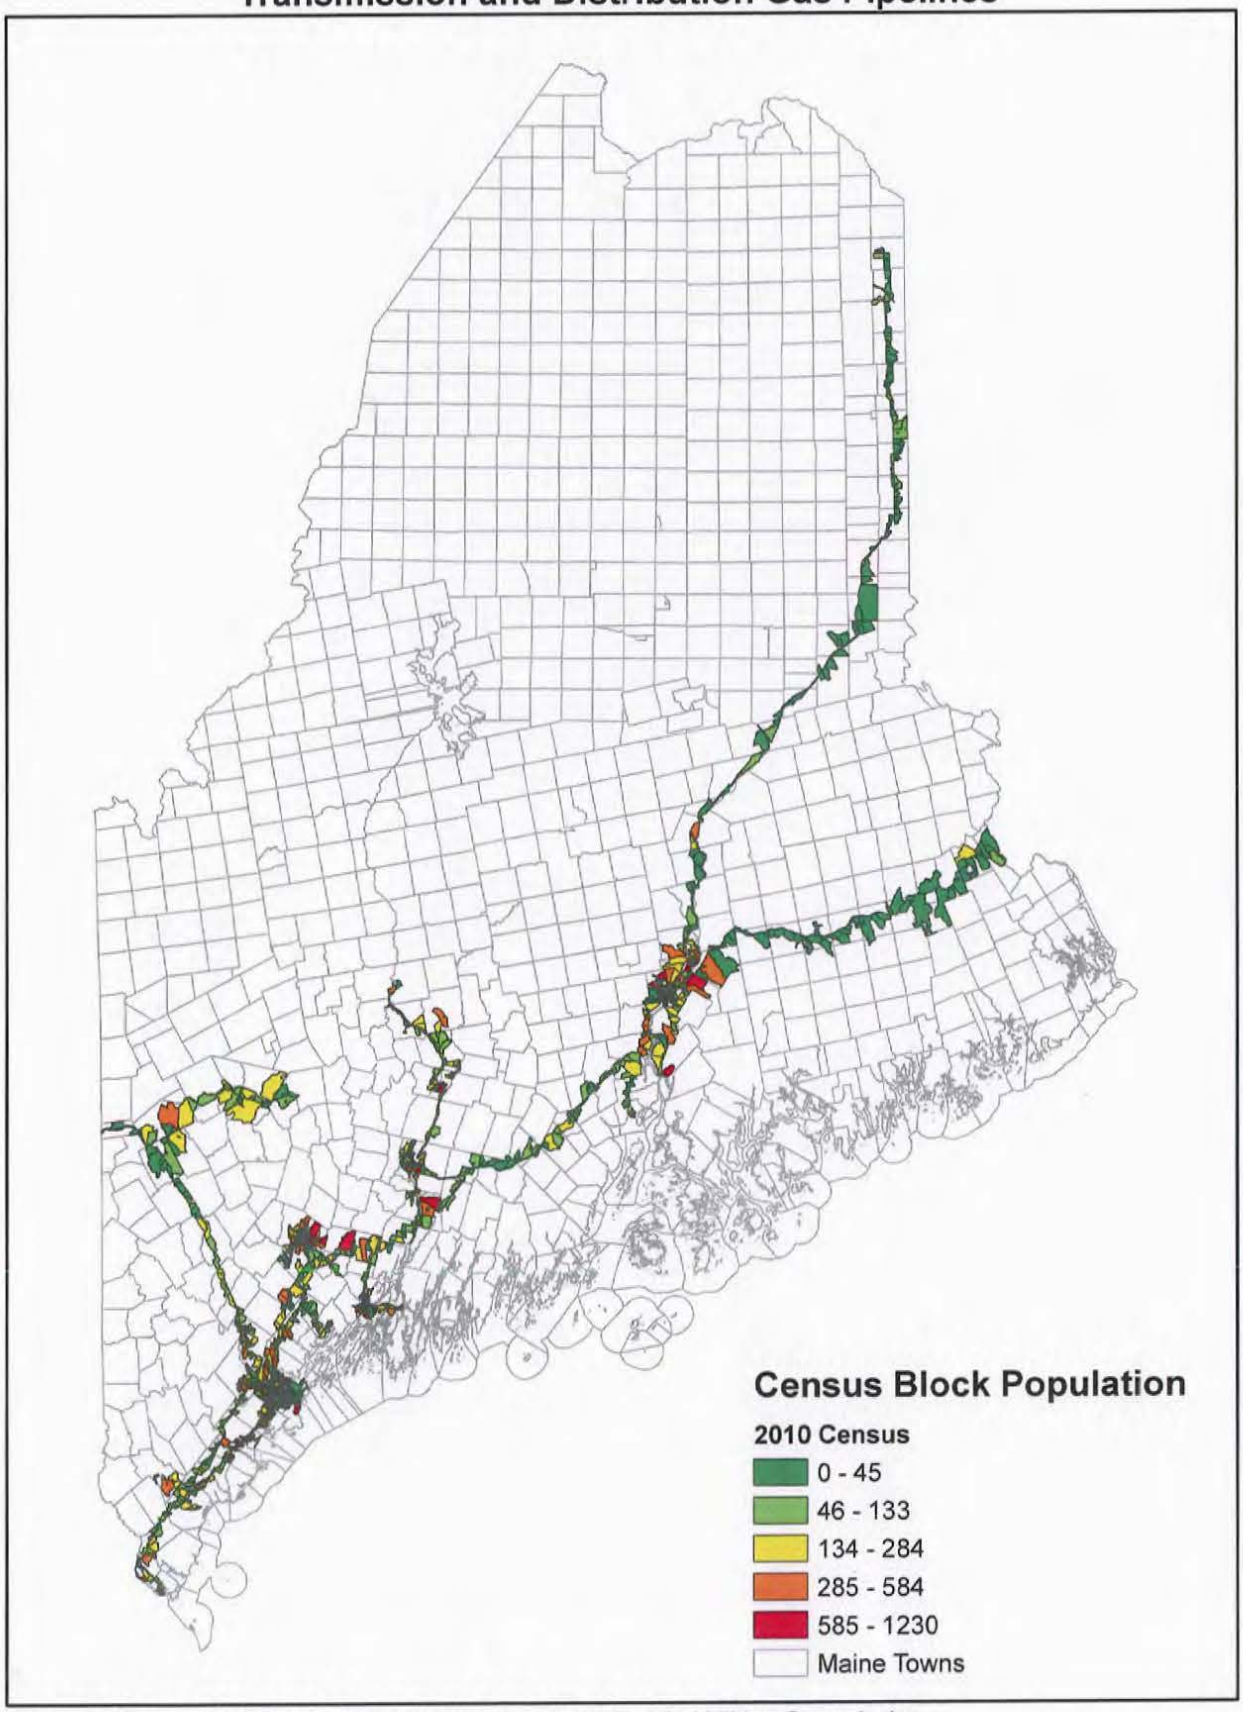
Author: MJohnson 12-2-13, Produced by the Maine Public Utilities Commission

Population Density By Polygon Along Transmission and Distribution Gas Pipelines

This map pulls down 2010 Census Block Data. Included in this map is a layer that highlights population density along the existing transmission and distribution network for the gas utilities using polygons differentiated by color. Town layer boundaries are also included.

This map may be useful to broadly identify where there are concentrations of people located in and around existing gas facilities.

Population Density By Polygon Along Transmission and Distribution Gas Pipelines



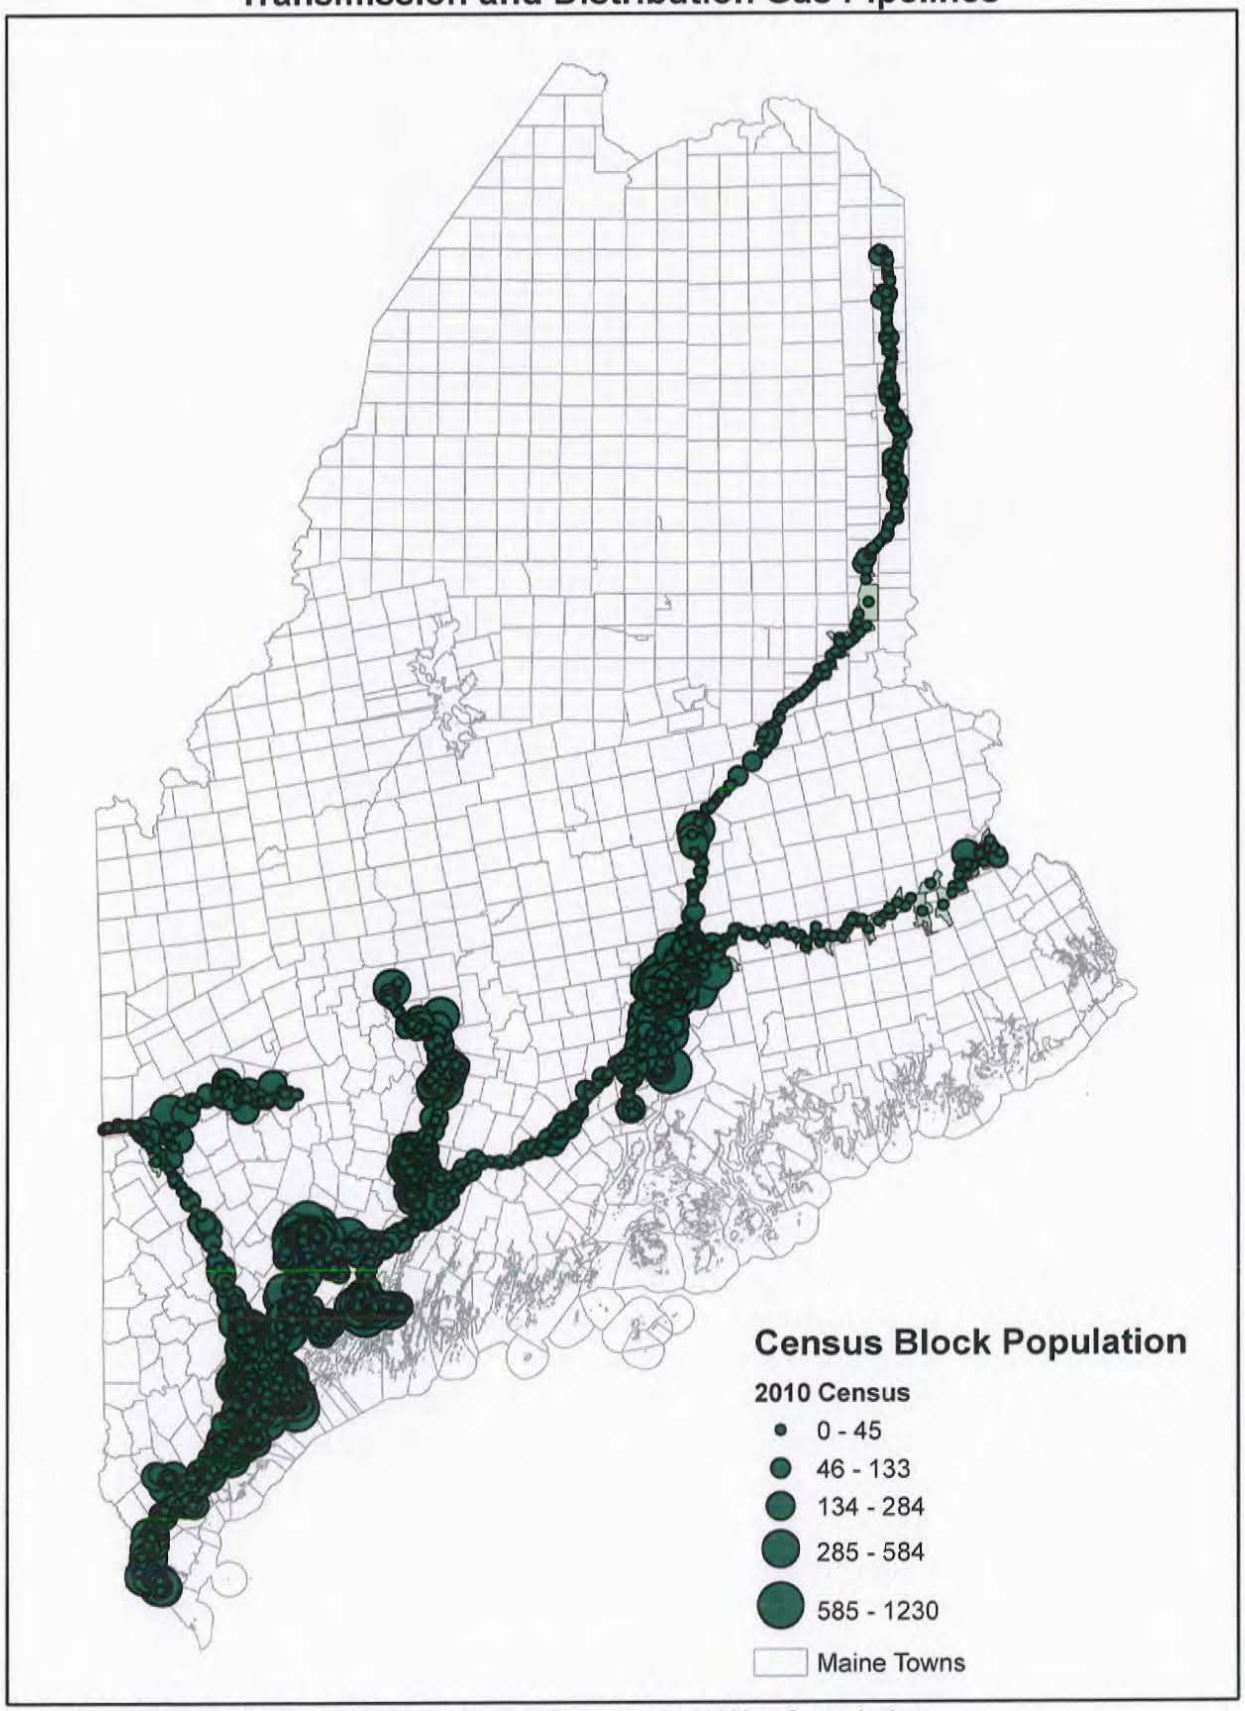
Author: MJohnson 12-06-13, Produced by the Maine Public Utilities Commission

Population Density By Centroid Point Along Transmission and Distribution Gas Pipelines

This map pulls down 2010 Census Block Data. Included in this map is a layer that highlights population density along the existing transmission and distribution network for the gas utilities using centroid points weighted by density size. Town layer boundaries are also included.

This map may be useful to broadly identify where there are concentrations of people located in and around existing gas facilities.

Population Density By Centroid Point Along Transmission and Distribution Gas Pipelines



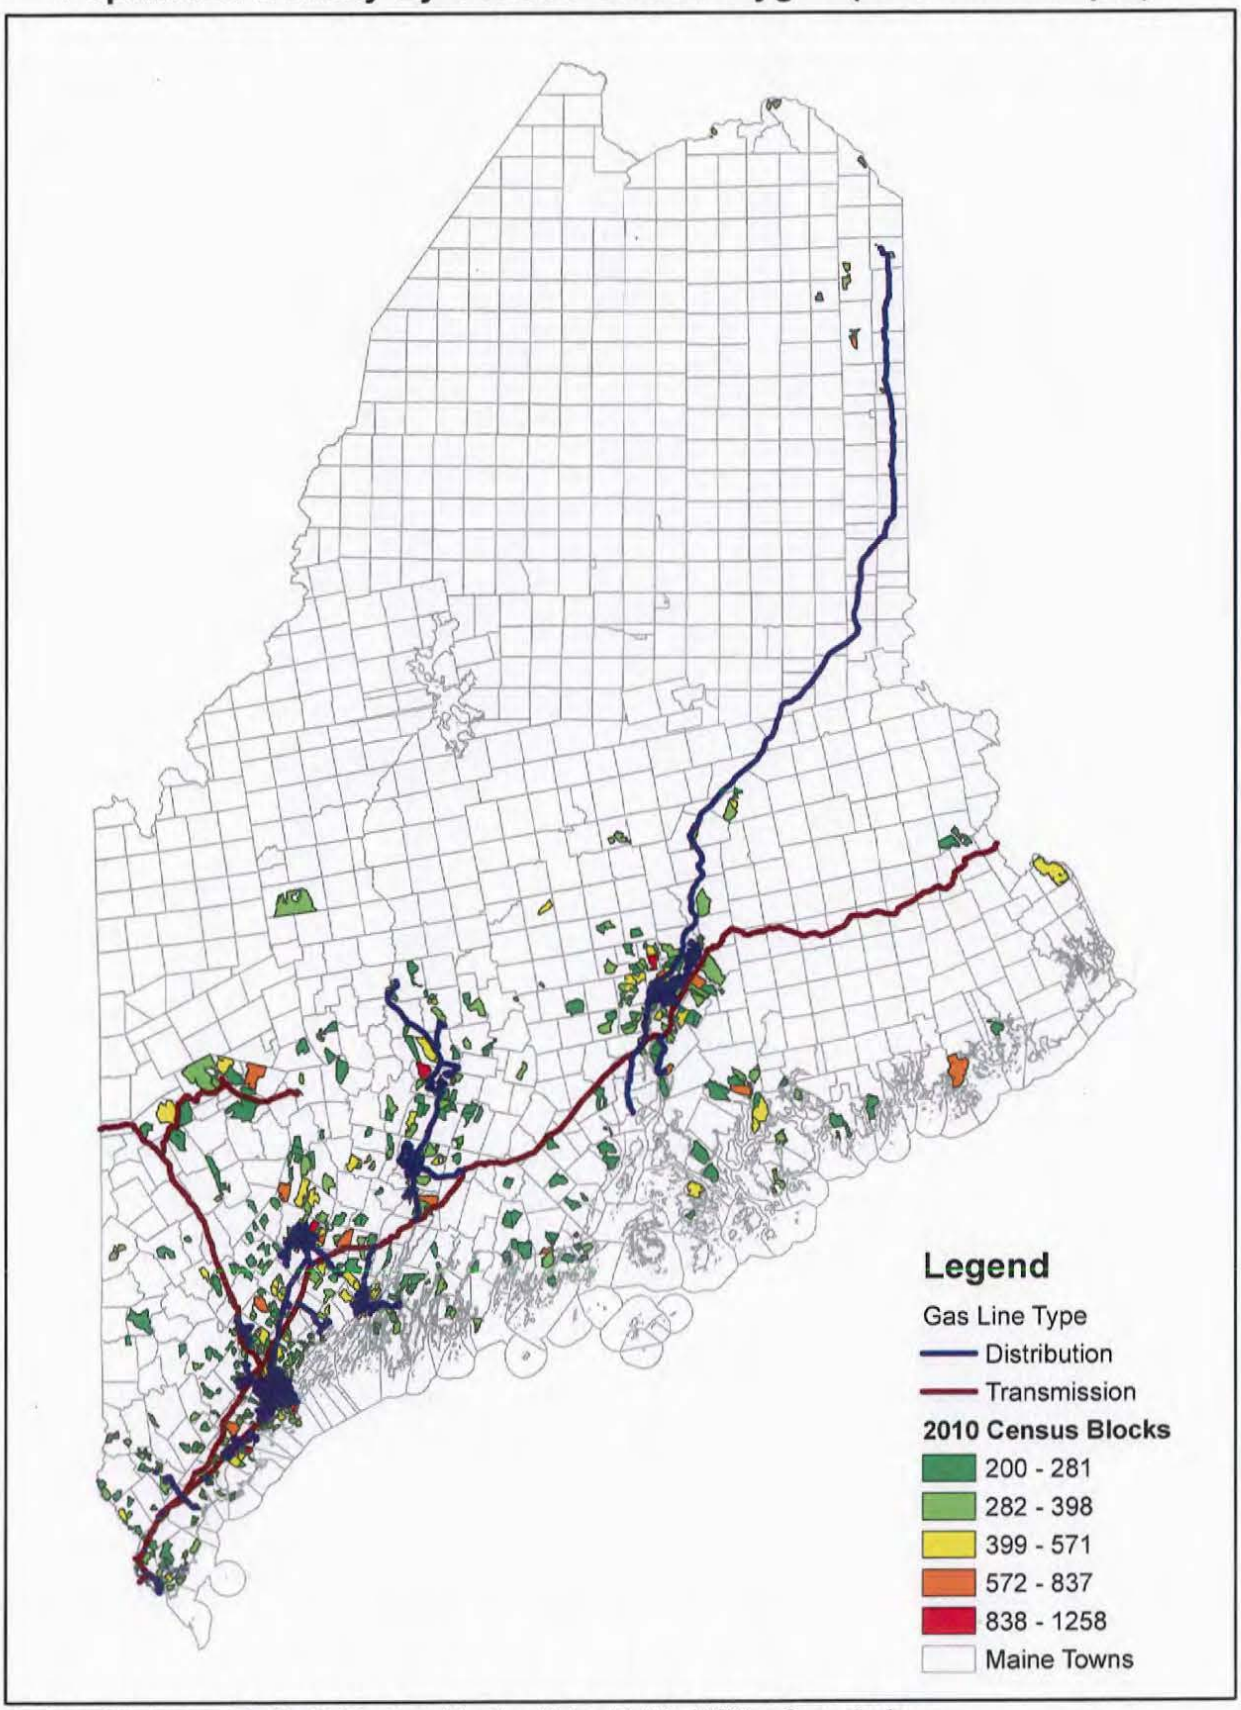
Author: MJohnson 12-06-13, Produced by the Maine Public Utilities Commission

Population Density By Census Block Polygon (Over 200 People)

This map pulls down 2010 Census Block Data and maps it by Census Block polygon to indicate the density of where people are living. It excludes populations with less than 200 people. Included in this map is the transmission and distribution network for the gas utilities. Town layer boundaries are also included.

This map may be useful to broadly identify where there are concentrations of people in Maine with larger-size population clusters in and around existing gas facilities.

Population Density By Census Block Polygon (Over 200 People)



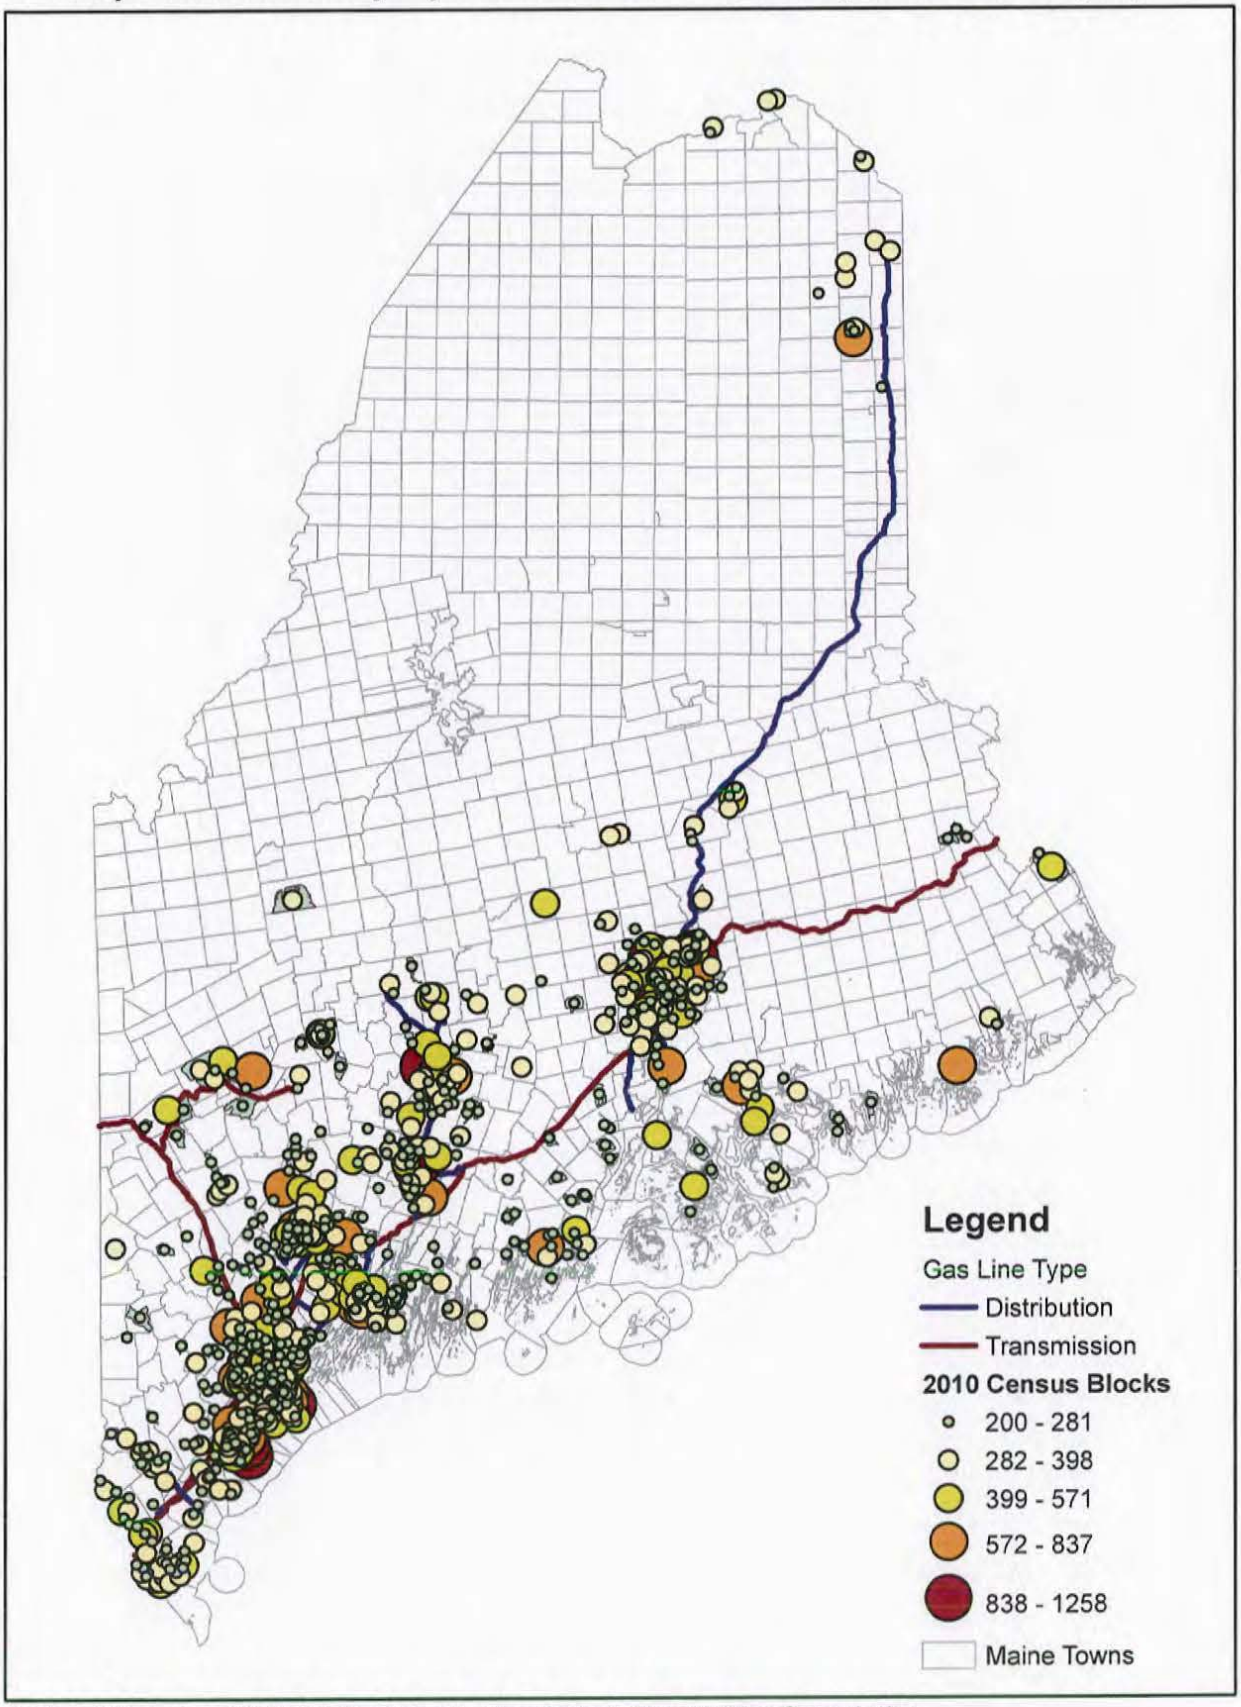
Author: MJohnson 12-06-13, Produced by the Maine Public Utilities Commission

Population Density By Census Block Cluster (Over 200 People)

This map pulls down 2010 Census Block Data and maps it by Census Block cluster to indicate the density of where people are living. It excludes populations with less than 200 people. Included in this map is the transmission and distribution network for the gas utilities. Town layer boundaries are also included.

This map may be useful to broadly identify where there are concentrations of people in Maine with larger-size population clusters in and around existing gas facilities.

Population Density By Census Block Cluster (Over 200 People)



Author: MJohnson 12-06-13, Produced by the Maine Public Utilities Commission

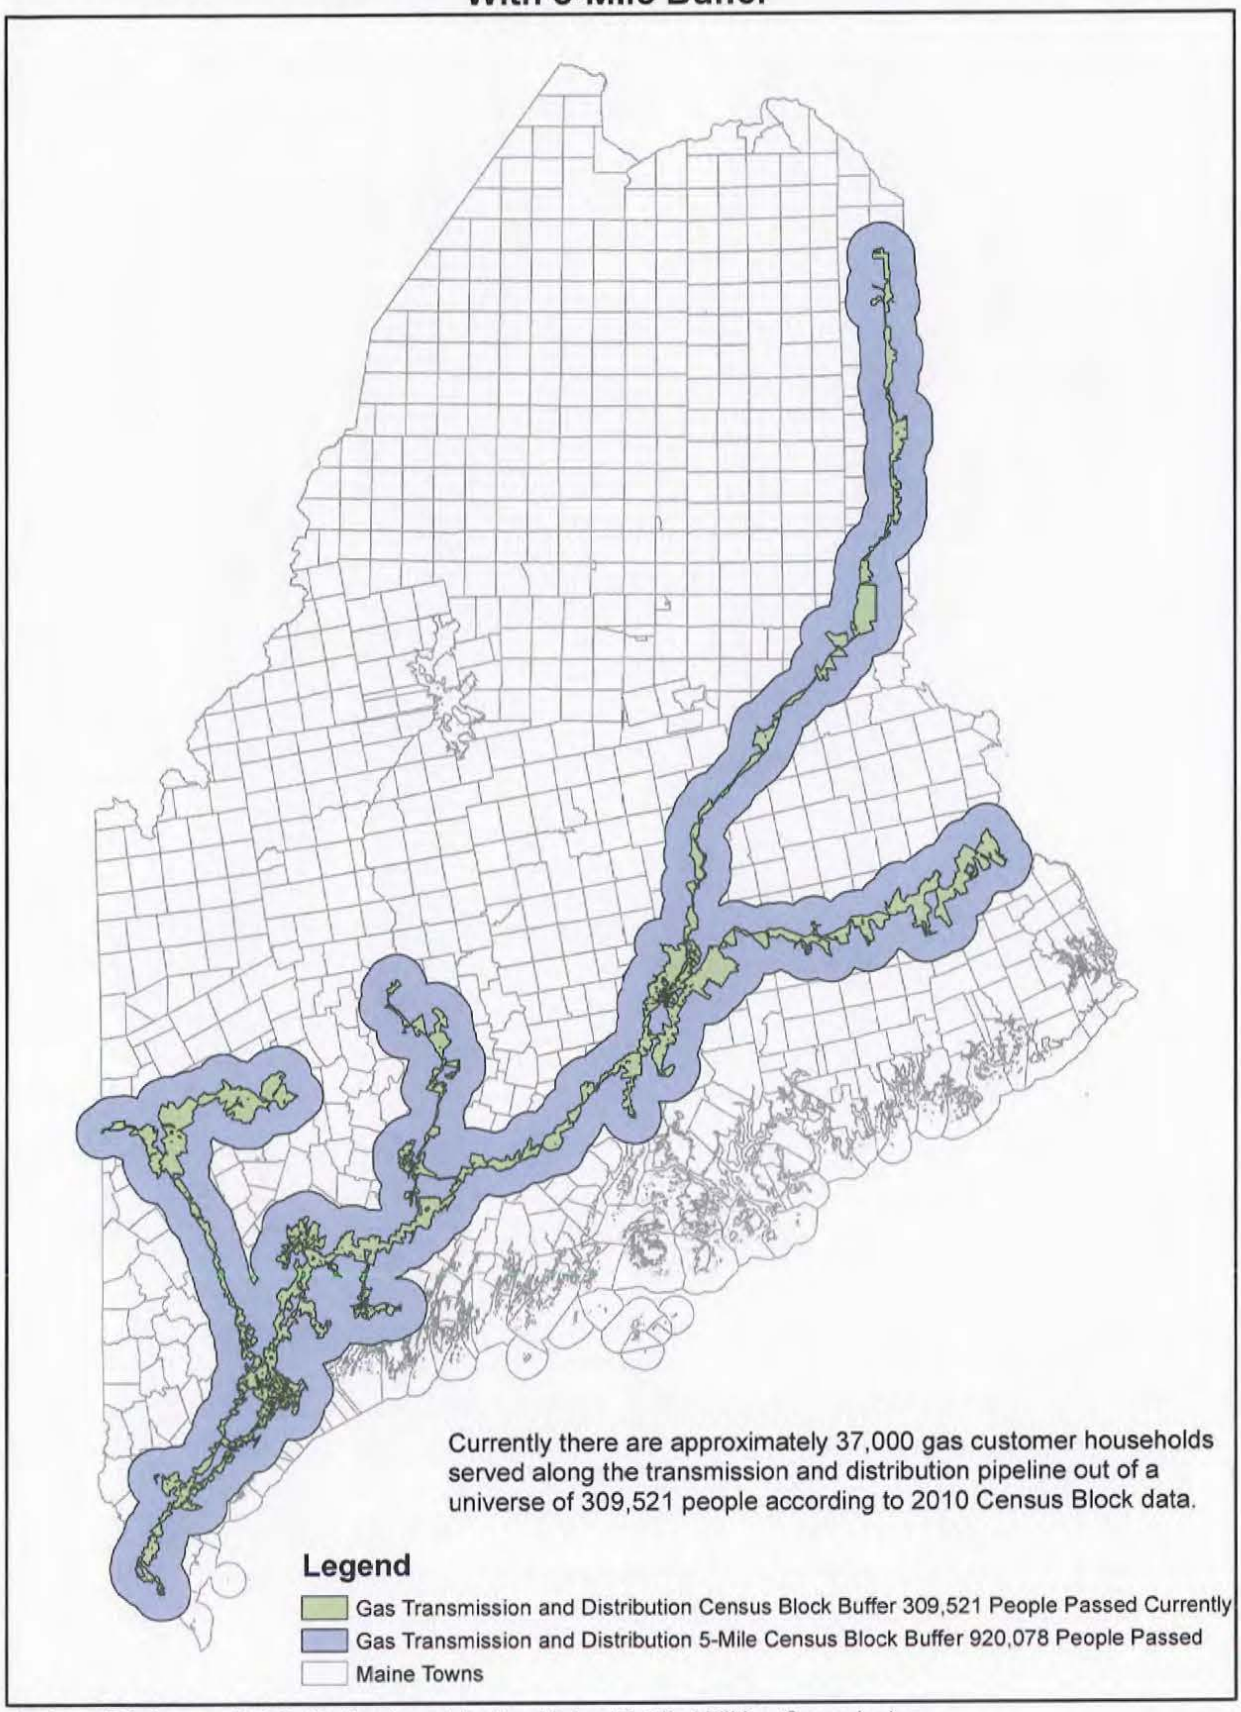
Census Block Population Density "People Passed" by Pipelines (With 5-Mile Buffer)

This map pulls down 2010 Census Block Data and maps it spatially around existing transmission and distribution pipelines. The Census Block indicates that there is a population of approximately 309,521 people who are passed by the T and D network.

Currently there are approximately 37,000 Gas Customer-Households who are served by the distribution networks from the major gas utilities.

The map also indicates that if a five mile buffer is placed on each side of the existing gas corridor, then a potential population of 920,078 people could theoretically have access to natural gas.

Census Block Population Density "People Passed" by Pipelines With 5-Mile Buffer

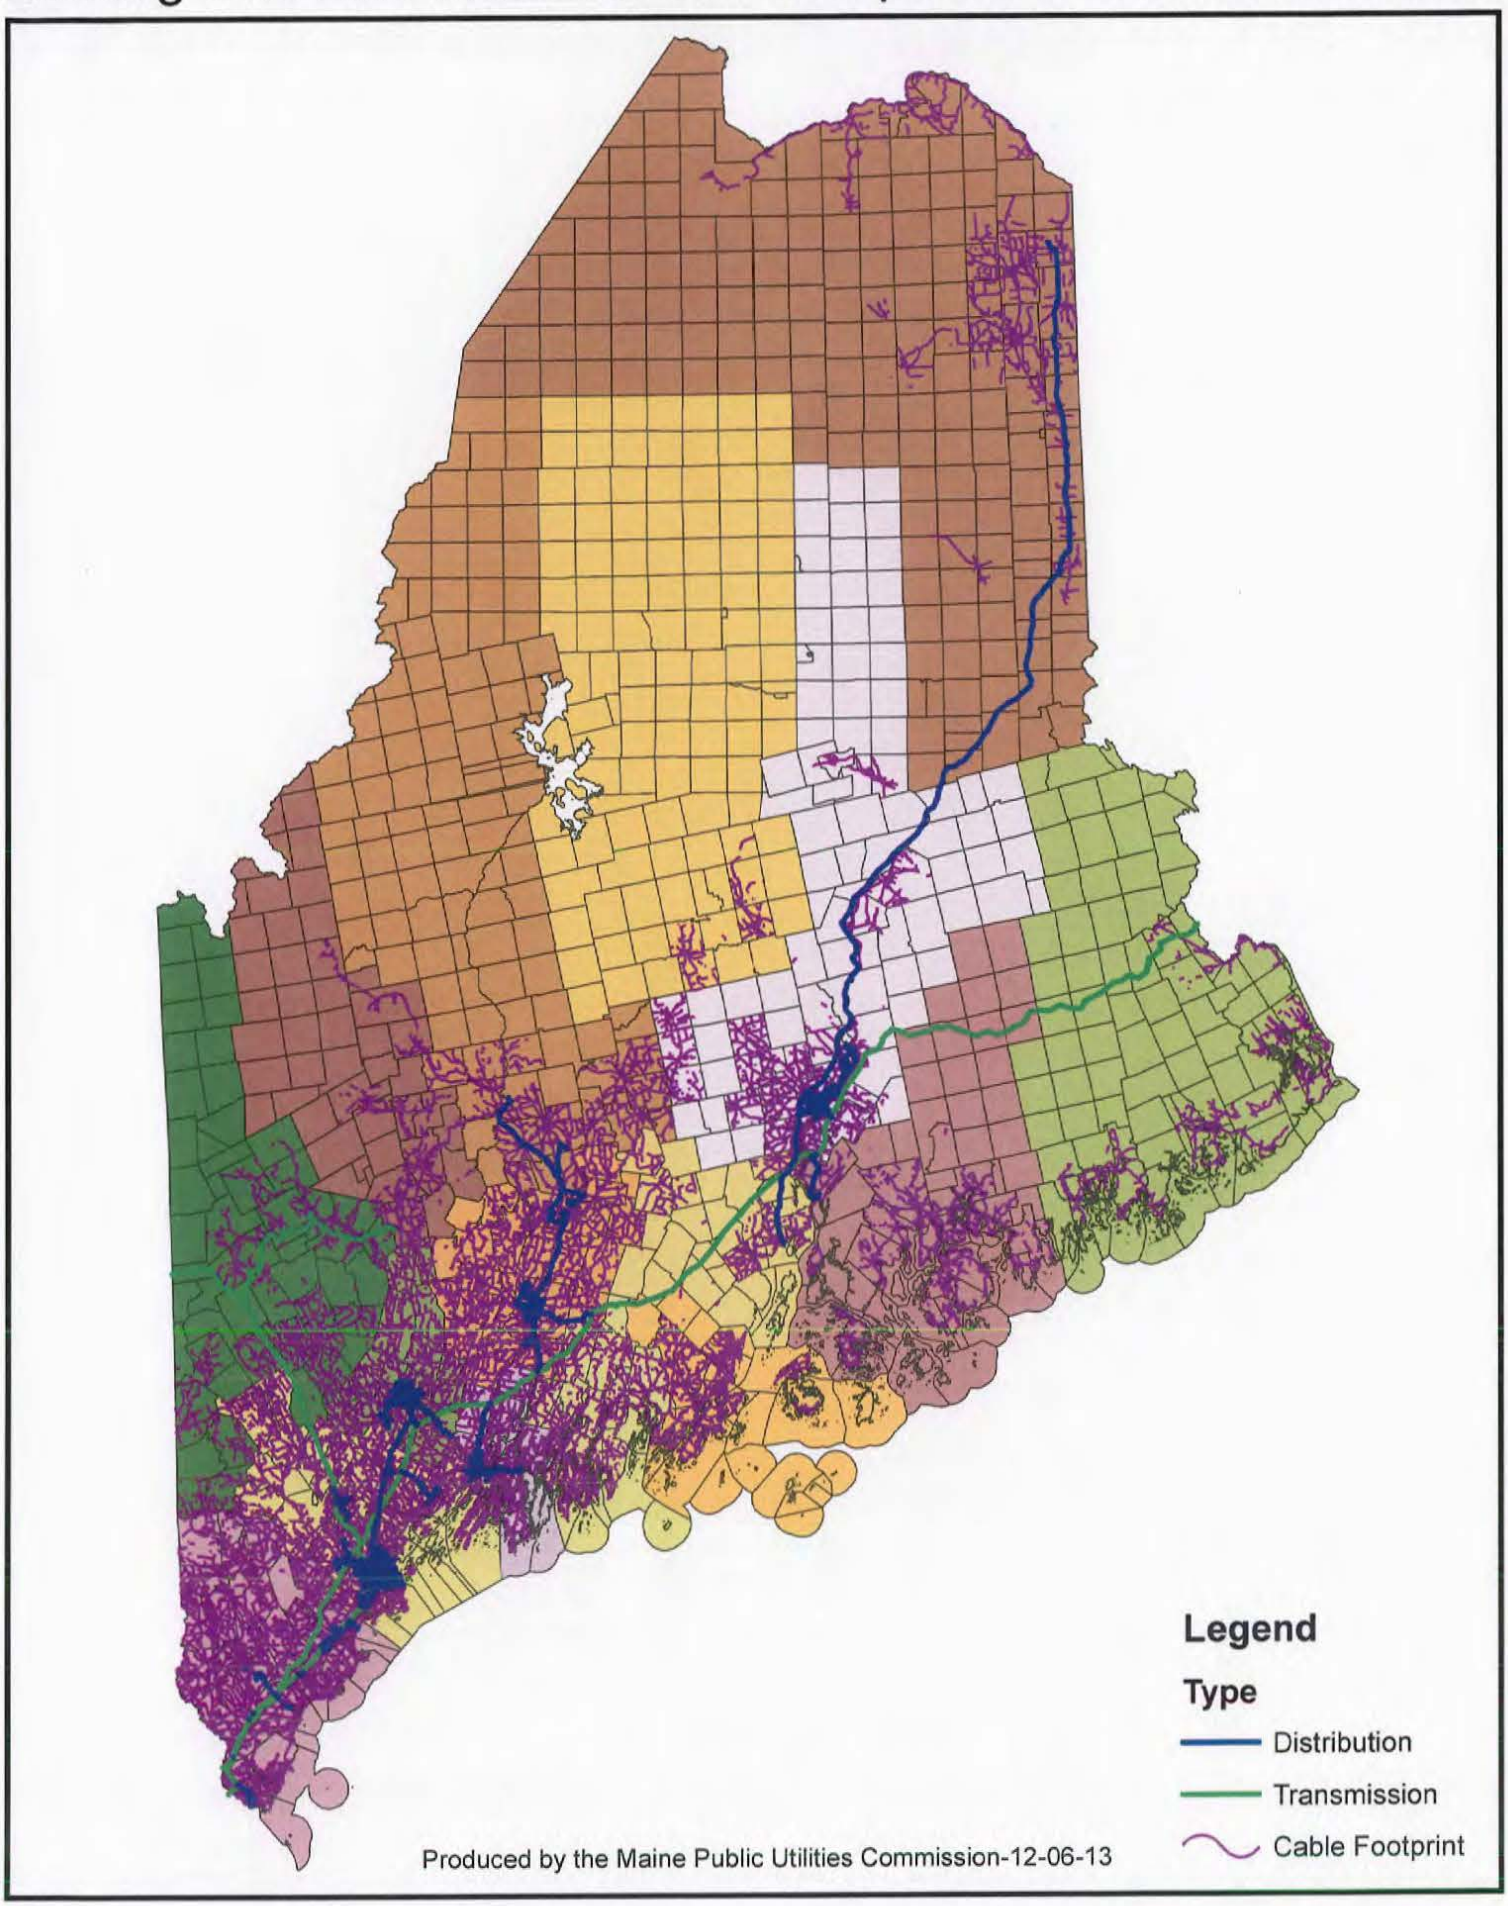


Author: MJohnson 12-06-13, Produced by the Maine Public Utilities Commission

Existing Gas Line Infrastructure Compared to Cable Broadband

This map compares the existing gas line infrastructure to cable broadband's infrastructure throughout Maine. Similar to the Census Data maps, it is another way to identify concentrations of people near existing facilities that could be served.

Existing Gas Line Infrastructure Compared to Cable Broadband

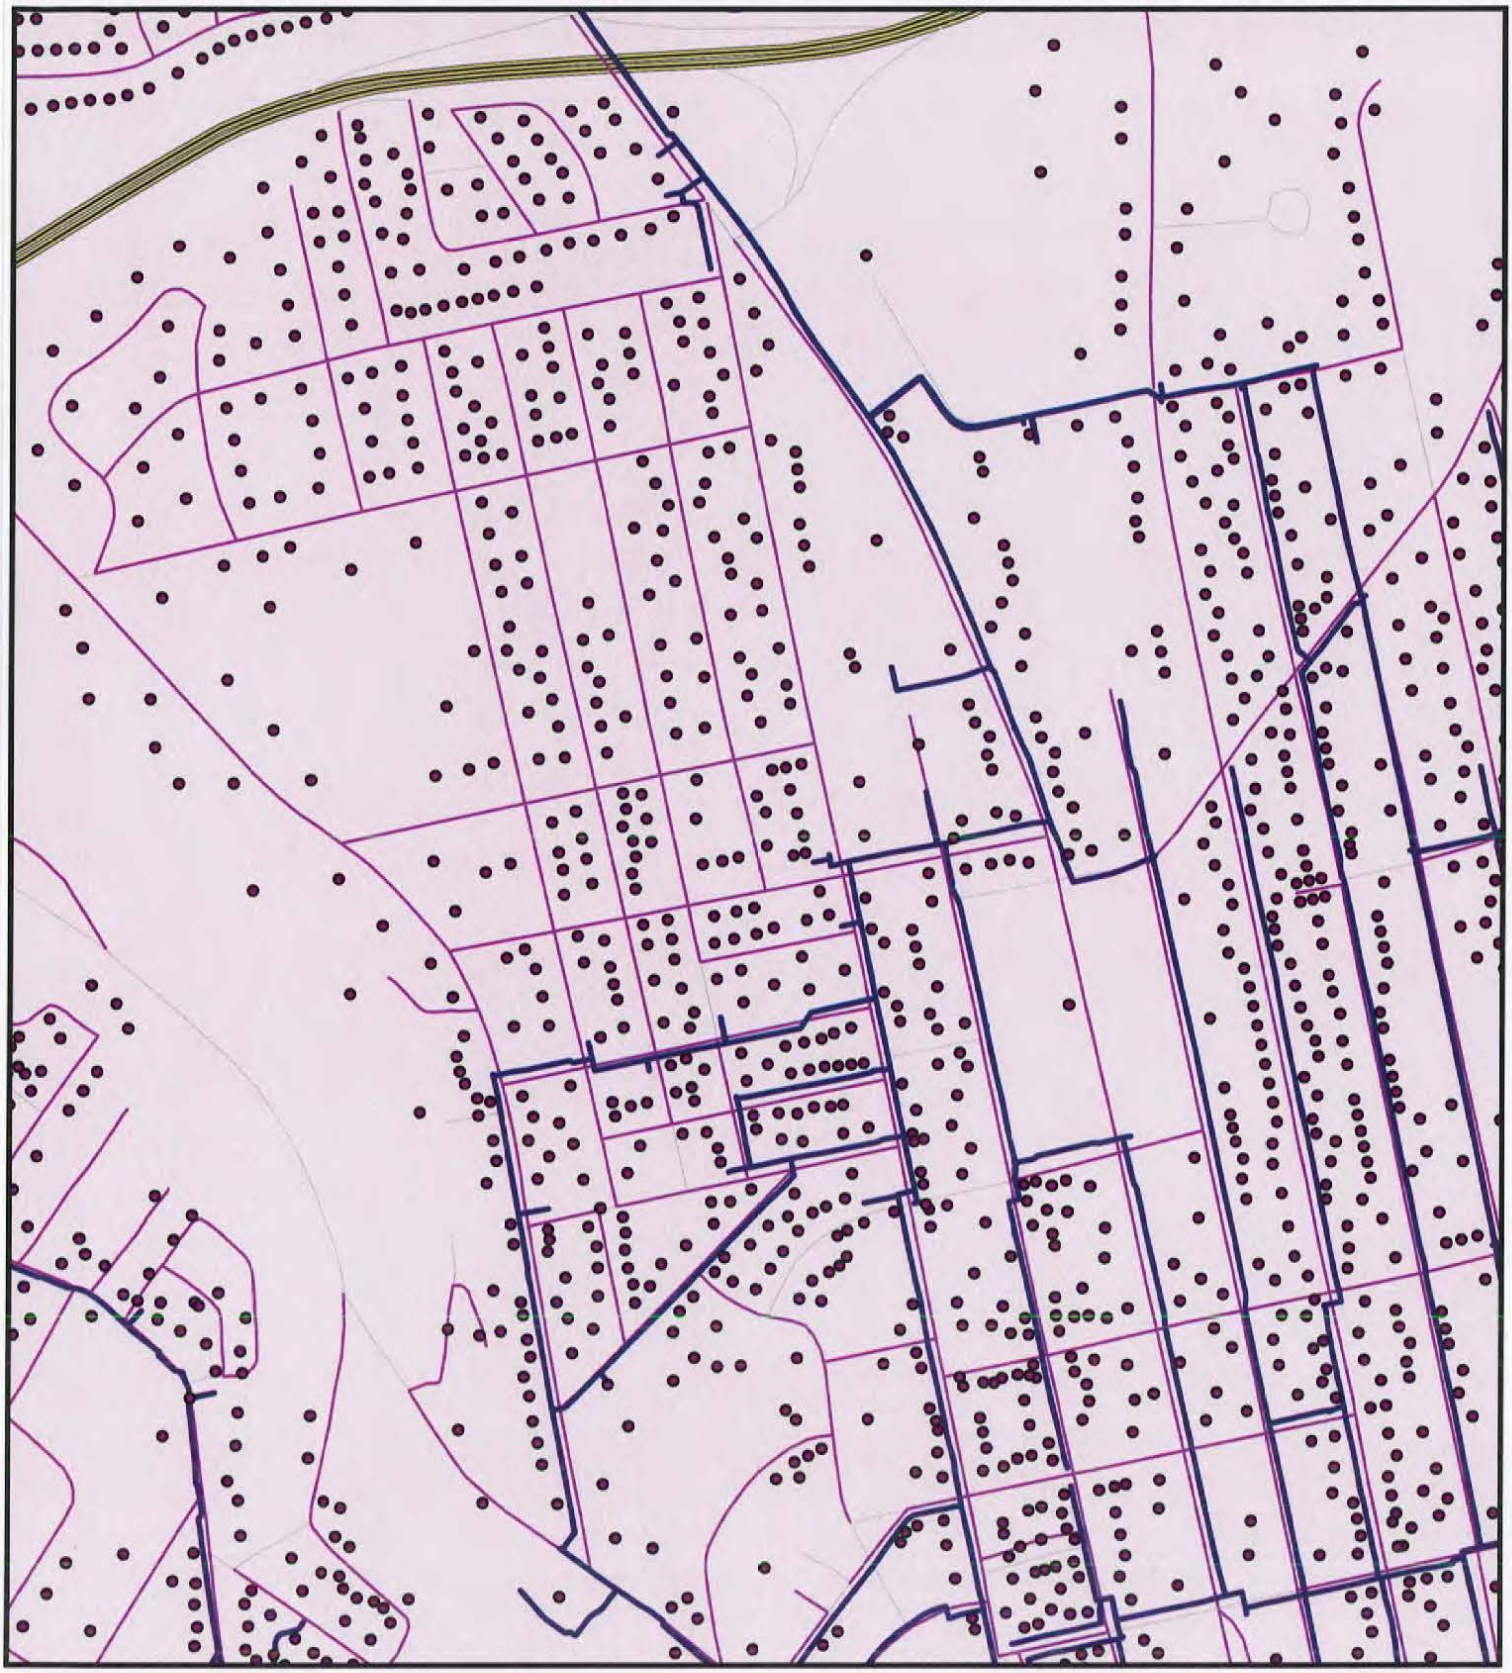


Existing Gas Distribution vs. Existing Cable Broadband

Similar to the last map, this map compares the existing gas line infrastructure to cable broadband's infrastructure throughout Maine. However, this map provides a much more granular view of a market current served by natural gas and cable broadband in the Bangor area.

The map also utilizes E9-1-1 household address data to identify residential and commercial businesses currently served by the gas and cable broadband companies.

Existing Gas Distribution vs Existing Cable Broadband



Produced by the Maine Public Utilities Commission-12-06-13

Legend

Roads
