PREFACE

We wish to express our thanks to all of the employers who responded to the Occupational Employment Statistics (OES) survey, and supplied the necessary employment and wage information. This publication would not have been possible without their cooperation.

This publication was prepared by Merrill Huhtala, Occupational Wage Programs Manager. Data contained herein were collected between 1992 and 1994 by Wendy Nelson, Occupational Employment Statistics Program Manager, and William Curran, Economic Research Analyst. Word processing and desktop publishing support were provided by Brenda Evans, Shirley Darveau, and Kerry Tims. Partial financial support for this project was provided by the Maine Occupational Information Coordinating Committee.

The focus of this publication is on occupational wage rates, by industry, for every occupation covered by the OES survey. There are a number of uses for this type of information. Vocational advisors in high schools, technical colleges, universities, and government employment offices use this information in advising students and job seekers on potential earnings. Compensation Analysts or Human Resources Specialists may wish to compare salaries within their company to those reported in their industry, or to other industries. Individuals considering a career change can compare wage rates between industries for occupations of interest to them. The data can also be used as a reference point for those engaged in employment interviews or salary negotiations.

Occupational and industry employment estimates, as well as employment projections, are also products derived from the OES program. *Maine Occupational Staffing* reports and *Industrial and Occupational Employment Projections for Maine* are available from our office.

If you have any questions regarding occupational wage rates, please contact Merrill Huhtala, Occupational Wage Program Manager, at (207) 287-2271.

INTRODUCTION

The occupational wage information presented in this publication was obtained during the 1992-1994 Occupational Employment Statistics (OES) survey of Maine industries. The OES program is a federal-state cooperative endeavor coordinated by the U.S. Bureau of Labor Statistics. It serves as the primary source of occupational employment and projection information for all 50 states, the District of Columbia, and United States territories. The collection of occupational wage data through the OES program began in 1991. By 1995 there were 11 states and territories collecting wage rates via OES. It is anticipated that by 1997 OES will be a source of wage rate information nationwide, resulting in a national standard which is currently nonexistent.

Economy-wide wage rates for over 550 occupations are reported in the table titled 1994 Occupational Wage Rates, All Industries Combined. The table lists the occupational title, OES code, and 1994 hourly and annual earnings. The tables that follow contain occupational wage rates for 55 industries surveyed during the 1992-1994 OES survey cycle. These tables provide the mean, median, and mid-range earnings for each occupation reported in a particular industry.

It should be noted that there are several industries for which very little wage data are available. This is due to requirements established by the U.S. Bureau of Labor Statistics regarding respondent confidentiality and data integrity. If employer response for a given industry did not meet these requirements, the data was either published at an aggregate level or not published at all. The Table of Contents provides a list of industries which were published along with the year they were surveyed under the OES program.

METHODOLOGY

Sample:

The sampling frame for the 1992, 1993, and 1994 OES surveys was the previous year's 2nd Quarter Employment, Wages, and Contributions (ES-202 report) covered by the Maine Employment Security Law. Business establishments with less than five employees were excluded from the survey. Owners of unincorporated firms (sole proprietorships and partnerships) and self-employed workers were also excluded. Sample size and response to each year's OES survey was as follows:

<u>Year</u>	<u>Sample</u>		<u>Response (percent)</u>	
	<u>Units</u>	<u>Employment</u>	<u>Units</u>	<u>Employment</u>
1992	1,009	89,391	79.57	78.52
1993	1,641	54,793	77.20	83.10
1994	2,226	119,879	73.05	80.89

Wage Collection:

Occupational wage data is collected in the form of 11 wage ranges in the OES program, which are broken down as follows:

<u>Range</u>	<u>1992 Hourly Rate</u>	<u>1993-1994 Hourly Rate</u>
A	Under \$5.00	Under \$5.00
B	\$ 5.00 - 6.49	\$ 5.00 - 6.49
C	\$ 6.50 - 7.99	\$ 6.50 - 8.99
D	\$ 8.00 - 9.99	\$ 9.00 -11.99
E	\$10.00 -11.99	\$12.00 -15.99
F	\$12.00 -13.99	\$16.00 -19.99
G	\$14.00 -16.99	\$20.00 -24.99
H	\$17.00 -20.99	\$25.00 - 34.99
I	\$21.00 -24.99	\$35.00 - 44.99
J	\$25.00 -35.00	\$45.00 - 59.99
K	Over \$35.00	Over \$60.00

Annual wages are calculated under the assumption that full time employees work a 40 hour week, 52 weeks per year, or 2,080 hours per year.

Wages collected by the OES program represent straight-time wages, which are total earnings before payroll deductions, and exclude premium pay for overtime and for work on weekends, holidays, and late shifts. Also excluded are performance bonuses and lump sum payments such as profit sharing, attendance bonuses, holiday or year end bonuses, and other nonproduction bonuses. Payments which are included are cost-of-living allowances, longevity pay, and incentive payments which result from commissions, piecework, or production bonuses.

Although the wage data was collected in the form of ranges rather than actual wage rates, the U.S. Bureau of Labor Statistics has determined that the mean, median, 25th percentile, and 75th percentile could be calculated accurately. These figures have been included in the industry wage tables.

1994 Estimated Hourly Mean:

In order to make valid comparisons of wage rates by industry, and to calculate economy wide wage rates, mean hourly wage rates for industries covered by the 1992 and 1993 surveys were updated to reflect a 1994 Estimated Hourly Mean. This 1994 estimate was developed by applying a percentage increase to the original mean based on the percentage change in quarterly employment and wages reported in the 2nd Quarter report of Wages, Employment, and Contributions (ES-202). This percentage change was then applied to the original mean of every occupation reported in each industry.

Economy-Wide Wage Estimates:

Economy-wide occupational wage rates based on the 1994 Estimated Hourly Mean are contained in the table entitled Occupational Wage Rates, Maine Statewide, All Industries Combined. This figure represents a weighted average calculated using the 1994 Estimated Hourly Mean and occupational employment estimates, also for 1994.

Data Limitations:

As with any statistical data, there are some limitations that users of these wage tables should be aware of. Although we have provided hourly wage rates for every occupation listed, users are reminded that compensation for many occupations is by commission, piece-rate, or salary. The rates provided in these tables are based on the assumption of a 40 hour workweek, 52 weeks per year, or 2080 hours per year. There are many occupations for which these standards are not appropriate, such as waiters and waitresses, real estate salespersons, real estate appraisers, airplane pilots and flight engineers, truck drivers, and teachers, to name a few. Another limitation users should be aware of involves interpretation of the mid-range figures. In 1992 the upper limit of the OES wage rate was \$35.00. Any occurrence of a \$35.00 value in an industry surveyed in 1992 should be interpreted as being greater than \$35.00. Likewise, the 1993 and 1994 surveys used \$60.00 as the upper limit, so any occurrence of a \$60.00 value should be interpreted as greater than \$60.00.

Estimated Employment:

The Estimated Employment column in the industry tables represents estimated occupational employment for the second quarter of the year in which the OES survey was conducted. Detailed occupational employment estimates are contained in separate publications, entitled *Occupational Staffing Patterns*. Contact the Division of Labor Market Information Services if you would like to obtain these publications.
