PREFACE

The primary purpose of this handbook is to help meet the economic information needs of businesses, labor organizations, educational institutions, public/private researchers, governments, and others interested in labor market information for Maine.

Each month, and routinely during other times of the year, the Division of Economic Analysis and Research prepares and disseminates a variety of economic reports and publications. This handbook serves as a ready reference source by making available--in a single volume--detailed employment, earnings, and related information regarding selected economic activities of the state and its substate areas. Earnings data for the state, Lewiston-Auburn, and Portland areas as well as labor force data for all areas are available for more recent periods than contained in this publication. These can be obtained by contacting the Division at the below address.

Many of the statistics contained in this handbook were prepared with the assistance and methodologies provided by the Employment and Training Administration and the Bureau of Labor Statistics of the U.S. Department of Labor. Certain tables, such as the nonfarm wage and salary section, were prepared entirely from computer files using state-of-the art automation technology and required no retyping or other manual processing.

Questions or comments regarding this handbook should be directed to the Maine Department of Labor, Bureau of Employment Security, Division of Economic Analysis and Research, 20 Union Street, Augusta, Maine 04330, telephone (207) 289-2271.

INTRODUCTION

INTRODUCTION

The tables presented in this report are grouped as follows: Section I--Labor Force Statistics; Section II--Nonfarm Wage and Salary Employment; Section III--Hours and Earnings; Section IV--Covered Employment, Wages and Contributions; and Section V--Unemployment Insurance Program. A list of definitions is provided in Appendix A to explain the terms used in each Section. Appendices B and C describe the geographical and industrial classification systems used in tabulating the data.

Section I

The civilian labor force statistics presented in this section are developed on a monthly and annual basis for the state, counties, and labor market areas. Statistics are also available on a quarterly and annual basis for over 500 minor civil divisions. All estimates are final and are not seasonally adjusted. The methodology used to compile these estimates was developed by the U.S. Department of Labor, Bureau of Labor Statistics.

The statistics pertain to the civilian labor force which excludes members of the armed forces. The civilian labor force is comprised of the employed and the unemployed (refer to Appendix A for precise definitions). Also provided is the unemployed as a percent of the civilian labor force, or as it is more commonly known, the "unemployment rate."

Civilian labor force statistics have many uses. The unemployment rate and other components of the labor force are the most prominent measures of the economy and receive wide coverage in the press and on radio and television. Changes in the labor force are of vital concern to all levels of government as well as to businesses, universities, and research institutions.

Billions of dollars are distributed to state and local governments through a variety of education, training, employment, and economic development programs based on civilian labor force statistics.

Section II

This section consists of the nonfarm wage and salary employment figures by industrial classification for the state and substate areas.

The nonfarm wage and salary employment figures, except those for the federal government, refer to persons on nonfarm establishment payrolls who received pay for any part of the pay period which includes the 12th of the month. For federal government establishments, employment figures represent the number of persons who occupied positions on the last day of the calendar month. Intermittent workers are counted if they performed any service during the month.

The data exclude proprietors, the self-employed, unpaid family workers, farm workers, and domestic workers in households. Salaried officers of corporations are included. Government employment covers only civilian employees; military personnel are excluded. Employees of the Central Intelligence and National Security Agencies are also excluded.

Persons on establishment payrolls who are on paid sick leave (when pay is received directly from the firm), on paid holiday, on paid vacation, or who work during a part of the pay period even though they are unemployed or on strike during the rest of the period are counted as employed. Not counted as employed are persons who are on layoff, on leave without pay, on strike for the entire period, or who were hired but have not yet reported during the period.

The nonfarm wage and salary tables in this section have been developed with the objective of providing the lowest level of industry employment possible. Consequently, because of this detailed level of reporting, the nonfarm wage and salary tables in the report may not agree precisely with other separate official employment estimates developed for the state and for the metropolitan statistical areas (MSAs) of Lewiston-Auburn and Portland. Nonetheless, the data reported serves many useful purposes and are widely regarded as a leading barometer of the economic health of an area. The statistics have been used in guiding business decisions on plant locations, sales, and purchases; detecting and planning for swings in the business cycle; and in providing for industry-wide employment comparisons.

Section III

Included in this section are the average workweek and average hourly earnings of production workers employed in manufacturing industries. Statistics are produced on an annual basis as well as by month for the state and for the metropolitan statistical areas (MSAs) of Lewiston-Auburn and Portland.

Average hours and earnings estimates are derived from a representative sample of manufacturing establishments who report payrolls and hours worked. The reports are for production workers only which include all nonsupervisory personnel and working supervisors who are directly engaged in the manufacture of the product(s) of the establishment and other closely-related activities.

The average hourly earnings are on a "gross" basis and reflect not only changes in basic hourly incentive wage rates but also such variable factors as premium pay for overtime and shift work differentials. Averages of hourly earnings differ from wage rates. Earnings are the actual return to the worker for a stated period of time; rates are the amount stipulated for a given unit of work or time.

The workweek information relates to the average hours for which pay was received, and differs from standard or scheduled hours. Such factors as absenteeism, labor turnover, part-time work, and stoppages cause average weekly hours to be lower than scheduled hours of work for an establishment.

Because the average hours and earnings data are developed in exactly the same manner in all states, these statistics provide benchmarks against which individual employers can compare their performance with that of the same industry within the state or across the nation. The data can also be used in salary setting, including collective bargaining and other labor-management negotiations. These statistics have broad application in assessing economic conditions, particularly with regard to determining wage trends. The information available on average workweek is an important leading indicator of changes in business cycles since, traditionally, employers tend to reduce workers' hours prior to actual job layoffs. Numerous other uses of these statistics are made by government officials, businesses, trade associations, labor unions, educational institutions, and research organizations.

Section IV

All statistics compiled in this Section are tabulated from the quarterly tax reports submitted by employers subject to the Maine Employment Security Law. Also included in certain tables are similar reports for employees of federal government installations within the state.

Employment coverage under the Law has undergone various changes over the years. From January 1, 1972 to December 31, 1977, coverage applied to firms with one or more workers in each of 20 or more weeks of the year, or with a payroll of at least \$1,500 in any calendar quarter. Also in 1972, employees of state hospitals and state institutions of higher education were included, as were certain nonprofit organizations employing four or more workers in each of 20 or more weeks in a year. Effective January 1, 1978, coverage was expanded to include the following: (1) agricultural labor for employers with 10 or more workers in each of 20 weeks or who paid \$20,000 or more in wages in any calendar quarter; (2) domestic workers of employers who paid \$1,000 or more in any calendar quarter; (3) most employees of state and local governments, except elected officials; and (4) employees of nonprofit elementary and secondary schools. Aside from the above restrictions, the primary groups excluded from coverage after January 1, 1978 are nonprofit organizations with fewer than four employees; the self-employed; unpaid family members; railroad workers; and certain farm and domestic workers.

Covered employment data represent the number of workers earning wages during the pay period including the 12th of the month. The data include all corporation officials, executives, supervisory personnel, wage earners, piece workers, and part-time workers. Excluded are persons who earned no wages because of strikes or work stoppages, temporary layoffs, illnesses, or unpaid vacations.

Covered employment and wage data are distributed on an area basis, insofar as is possible, from information furnished by employers. Multi-area employers having fewer than six persons employed within a county may assign such workers to the county in which they have their largest number of employees. Information pertaining to workers who regularly perform services in more than one county is included in the "inter-county" category, as is data reported by employers who fail to show the area in which they operate.

Although the statistics presented in this Section have broad economic significance in evaluating labor market trends and industry developments, a more complete analysis is possible utilizing the nonfarm wage and salary tables contained in Section II.

Perhaps the most significant use of the covered employment and wage statistics is in administering the employment security programs of the Department. These data accurately reflect the extent of coverage of the state Unemployment Insurance program and are used to measure revenues, disbursements, and total and taxable wage trends. The tables are a primary source of data for actuarial studies, determinations of experience ratings, tax rates, insured unemployment rates, and maximum benefit levels. The data are also used in the preparation of workload forecasts and budget estimates.

Caution should be exercised in using average weekly wage data developed from these statistics. Average weekly wages are computed by dividing 1/52 of total wages for the year by average monthly employment. This procedure presupposes that wages are evenly distributed throughout each week of the year. It also assumes that average monthly employment is approximately the same as in an average week. These assumptions do not consider such variables as bonus or retroactive payments, strikes, and different payroll periods within each quarter. Average wages may also be affected by the influx of workers in various industries during seasonal periods, labor turnover, short-term jobs, job-sharing, overtime, and persons paid on a commission basis. More extensive data on average wages can be obtained from other sources of per capita earnings and special wage surveys.

A more accurate picture of average wages is available in Section III--Hours and Earnings.

Section V

The Unemployment Insurance program provides short-term financial assistance to individuals who lose their jobs and are able to work, available for work, and actively seeking work. A worker's monetary eligibility for Unemployment Insurance benefits is based upon wages earned during a predefined prior period of employment covered under the Maine Employment Security Law.

The program is financed solely by employer contributions which are paid into the Unemployment Trust Fund in amounts determined by an employer's contribution rate applied against taxable wages. Some classes of employers are allowed to make payments based on actual benefits paid under the direct reimbursable provisions of the Law. Explanations of these provisions are contained in the list of Definitions (Appendix A).

Besides providing financial assistance to unemployed persons, the program acts as a stabilizer for the economy during times of high unemployment by offsetting to some extent the lost purchasing power resulting from joblessness.

The statistics on Unemployment Insurance have many uses: budgetary and administrative planning; program volumes, costs, and evaluations; extent of protection; and benefit adequacy. The data are also used in calculating insured unemployment rates at both the state and federal levels, and in making certain required reports to Congress.

A written request for a hearing to be held by an appeals authority regarding a decision, or a request for a higher authority on a decision made by a lower authority.

LOWER AUTHORITY: The first of two administrative authorities provided to review benefit decisions.

HIGHER AUTHORITY: The second of two administrative authorities provided to review lower authority benefit decisions (as well as certain employer determinations which are not included in this report).

AVERAGE ACTUAL DURATION

The total number of weeks of unemployment compensated during a year divided by the number of first payments for the same period.

AVERAGE CONTRIBUTION AMOUNT COLLECTED PER EMPLOYEE

The result obtained by dividing total contributions due for the year by average monthly employment.

AVERAGE WEEKLY BENEFIT AMOUNT (AWBA)

AWBA--TOTAL: The amount of compensation paid for total unemployment during a year divided by the corresponding number of weeks for which compensation for total unemployment was paid.

AWBA--PARTIAL: The amount of compensation paid for less than total unemployment during a year divided by the corresponding number of weeks for which less than total compensation was paid.

AWBA--ALL: The amount of compensation paid for total and partial unemployment during a year divided by the corresponding number of weeks for which total and partial unemployment was paid.

AVERAGE WEEKLY WAGES

The result obtained by dividing 1/52nd of total wages for the year by average monthly employment. See Section IV for limitations of data.

BENEFITS PAID (EXCLUDING DIRECT REIMBURSABLE)

REGULAR: The amount of compensation paid during a year which is not recoverable by reimbursement from another source such as employer direct reimbursement or federal share of extended benefits.

Extended benefits is a federal-state program which provides compensation to certain claimants who have no rights to regular benefits during periods of high unemployment.

CIVILIAN LABOR FORCE

The number of persons by place of residence who were either employed or unemployed during the survey week which includes the 12th of the month. Labor force data and its components, employed and unemployed, are for civilians only.

CLAIMS

INITIAL CLAIM: A notice of unemployment filed: (1) to request a determination of entitlement to and eligibility for compensation; or (2) to begin a second or subsequent period of unemployment within a benefit year or period of eligibility.

CONTINUED CLAIM: A notice filed by mail or in person for waiting period credit or payment for one or more weeks of unemployment.

CONTRIBUTION RATE

The tax rate assigned to each employer under provisions of the Maine Employment Security Law. Rates are usually in effect for a calendar year and are applied to taxable wages to determine contributions due. An employer's contribution rate is generally based upon the specific rate schedule in effect and the firm's experience with unemployment. This experience is measured in terms of the benefits paid and contributions credited associated with the employer in relation to his average taxable payroll. Rates are also calculated based on total wages but these are for analytical purposes only and have no statutory basis.

CONTRIBUTIONS DUE

The state unemployment taxes assessed to covered employers for payments to be made for deposit in the Unemployment Trust Fund. Contributions are based on a tax rate schedule that is applied to taxable wages. Contributions are due on or before the last day of the month following the close of each calendar quarter. Contributions due for a year are usually received during that same year except in the case of the October-December quarter when they are received in the following year.

CONTRIBUTIONS RECEIVED

That portion of state unemployment taxes due which is actually paid by employers during a calendar year. Not included as contributions are payments made in lieu of contributions by employers under the direct reimbursable provisions of the Maine Employment Security Law.

COVERED EMPLOYMENT

The number of workers of those employers subject to the Maine Employment Security Law. The data relating to covered employment are for weekly pay periods which include the 12th of each month. Included are all corporation officials, executives, supervisory personnel, wage earners, piece workers, part-time workers, as well as persons on the payroll but on paid vacations. Similar employment data for federal government installations within the state are also included. See Section IV for further explanation.

DEPENDENTS' ALLOWANCES

The supplemental amount payable for a week of total or partial unemployment to individuals with dependents.

DIRECT REIMBURSABLE PROVISIONS

Refers to a method of financing benefit payments. Certain nonprofit employers or governmental entities are permitted, in lieu of paying contributions, the option of reimbursing the Unemployment Trust Fund on a dollar-for-dollar basis for benefits paid to their former workers.

FINAL PAYMENTS

The last unemployment insurance check paid to a claimant which exhausts the individual's maximum potential benefit entitlement under a specific program.

FIRST PAYMENTS

The first unemployment insurance check paid under a specific program to a claimant during the individual's benefit year.

FUND BALANCE (EXCLUDING LOANS)

The year-end reserves (excluding federal loans) available in the Unemployment Trust Fund, benefit fund, and clearing account to be used for the payment of unemployment insurance benefits.

INDUSTRIAL CLASSIFICATION

The Standard Industrial Classification code assigned to each employer. Establishments are classified into industries on the basis of their principal product or activity. If a firm in private industry or a government agency conducts different activities at its various establishments or installations, separate industry codes are assigned to each activity to the extent possible. Industry coding is in accordance with the Standard Industrial Classification (SIC) Manual. The SIC Manual currently used is the 1972 edition which has been in effect since January 1, 1975. Previously, the 1967 edition was used from January 1, 1968 through 1974.

Under the FUTA process, repayments are made by employers via a federal tax of 0.3 percent of taxable wages for the first year loans are due. The federal tax rate increases by 0.3 percent each year until the loan is repaid in full.

METROPOLITAN STATISTICAL AREA (MSA)

A large population nucleus, together with adjacent communities which have a high degree of economic and social integration with that nucleus. In New England, MSAs are composed of cities and towns rather than entire counties as in other areas of the United States. To qualify as an MSA in New England, an area (made up of a central core and outlying cities and towns) must contain a city of at least 50,000 population or have a total population of at least 75,000.

- (1) Did any work for pay or profit; or
- (2) Did at least 15 hours of unpaid work in a family oriented enterprise; or
- (3) Were temporarily absent from their regular job because of illness, vacation, bad weather, industrial dispute, or various personal reasons.

APPENDIX C. STANDARD INDUSTRIAL CLASSIFICATION

The 1972 edition of the Standard Industrial Classification (SIC) Manual was used to codify establishments on the basis of their principal product or activity. The following is a more complete description of the major industry groupings tabulated in the preceding tables. Note that not all industry groupings are listed, but only those pertinent to the state. For a more detailed explanation of the four-digit codes which appear at the end of some Nonfarm Wage and Salary tables, consult the 1972 SIC manual. Although government has been removed as an industry division from the 1972 SIC manual, for purposes of analysis, all government activities tabulated in these reports have been grouped as either federal, state, local, or noncovered state and local. This last category consists of state and local government activities which are not covered under the Maine Employment Security Law (see Section IV for further explanation).
