## What is the purpose of the Wood Processor Report?

Each year, the Maine Forest Service collects information from Maine primary wood processors regarding the volume of wood processed in Maine. Information is also collected for volumes imported into Maine or exported from Maine.

*This report summarizes, for 2008, the volume of wood harvested in Maine, processed by Maine mills, and imported into or exported from Maine.*

Wood flow data is summarized for sawlogs, pulpwood, biomass chips, and imports and exports.

## How was this information collected?

In 2008, the Maine Forest Service received wood processor reports from 155 primary processing mills (sawmills, pulp and paper mills), 59 portable sawmills, 25 firewood dealers, 34 loggers and brokers who may have exported wood, 22 concentration yards, and 10 mills that burn some form of wood for energy. Volume information contained in these individual reports is confidential and by law shall not be made public, except that summary reports may be published using aggregated data which does not reveal the activities of an individual person or firm (12 MRSA chapter 805, subchapter 5, "Forest Landowner and Wood Processor Reporting Requirements").

## Interpreting Harvest, Export, Import, and Processed by the Maine Forest Products Industry

### Maine wood processed

wood that is harvested in Maine and used by a Maine primary processing facility.

### Exported from Maine without processing

wood that is harvested in Maine and exported out of state without processing by a Maine mill.

### Imported from out of state

wood that is imported from out of state (not harvested in Maine) and processed by a Maine mill.

### Total processed by Maine Forest Products Industry

total volume of wood processed in Maine, regardless of origin.

## Definitions and Notes

### 1. Biomass Chips:

produced in the woods by chipping the entire tree, including branches and tops. Usually used as energy fuel, they may also be suitable for sludge composting, playground padding, and mulch.

### 2. Bole/Stem Pulp Chips:

produced in the woods by chipping the lower portion of the tree. These chips are not free of bark, but are suitable for use in pulp mills.

### 3. Cords (cfs):

a stack of fuel wood, pulpwood, or other material that measures 4 x 4 x 8 feet, or 128 cubic feet.

### 4. Construction and Demolition Waste (C and D Waste):

ground up wooden debris left over from construction and demolition that is burned by wood to energy facilities.

### 5. Firewood:

roundwood that is burned for home heating.

### 6. Hog Fuel:

any woody residue produced from mills, such as sawdust, bark or shavings, and used as energy fuel.

### 7. Pulpwood:

roundwood that is used for the production of wood pulp. Generally sold as tree length, 16', 8' or 4' lengths.

### 8. Sawlogs:

a log that meets minimum standards of diameter, length, and defect, intended for sawing into boards or lumber. Includes sawlogs, studwood, pallet logs, boltwood, and veneer logs.

### 9. Sawmill residues:

clean, pulp-quality chips made from debarked slabs and edgings at sawmills. Used by pulp and paper mills to produce wood pulp.

### 10. Thousand Board Feet (MBF)

One thousand board feet. One board foot is the amount of wood contained in an unfinished board 1" thick, 12" long, and 12" wide.

## Report Highlights

 Maine's forest products industry consumed 15.8 million green ton equivalents in 2008, down from 17.0 million green ton equivalent in 2007. Seventy-seven percent of the supply (12.1 million green ton equivalents) was harvested in Maine, while 23% (3.7 million green ton equivalents) was imported.

 Maine landowners harvested 14.3 million green ton equivalents of wood in 2008, down from 16.6 million green ton equivalents in 2007. Fifteen percent (2.2 million green ton equivalents) of the 2008 harvest was exported, down from 2007 (3.2 million green ton equivalents).

 Maine's pulp and paper producers processed 9.1 million green tons of pulpwood, up slightly from 2007 consumption. Seventy-two percent of the pulpwood originated from Maine's forests; 28% was imported.

 Biomass harvesting volume was 3.1 million tons in 2008, down from 2007 (3.5 million tons). Biomass energy facilities consumed 3.7 million tons in 2008, the same as reported in 2007. Eighty percent originated from Maine's forests; 20% was imported.

 Maine's sawlog production in 2008 was .7 billion board feet, down from 2007 (.9 billion board feet).

 During 2008, Maine's forest products industry imported 3.7 million green tons, while 2.2 million green tons were exported.

Sawmill residues are clean, pulp-quality wood chips made from slabs and edgings at sawmills. The volume is reported here as an additional input to the pulp and paper mills and pellet mills. Sawmill residues are a by-product of the sawing process, and are not included as additional harvest volumes from Maine's forests.

### Pulpwood Notes:

1. Other Softwood is comprised of bole chips of which specific species information was not collected.
2. Aspen volumes are based upon pure loads.
3. Other Hardwood is comprised of all hardwood species except aspen sold in pure loads.

New Brunswick	Quebec
Nova Scotia	<u>Countries:</u>
Ontario	China
Quebec	Japan
	Thailand

\* This is the first Wood Processor Report to separately report firewood as a new product. Report forms were sent to known firewood dealers. In the past some firewood was uniquely identified and reported to MFS as an export, and MFS grouped these minor volumes into the pulpwood product. This first attempt is by no means a complete accounting of the volume of processed firewood merchandized, sold, or distributed within Maine, or as an export or import. The only previous estimation of annual firewood consumption is a survey conducted by the State Planning Office in the early 1990's. That survey estimated an annual processing, sale, distribution and consumption of 400,000 cords. MFS will continue to improve its survey methods in order to obtain a consistent and reliable estimate of annual firewood processing.

In additional, this is the first year we have received reports from Maine's pellet mills. We have included reported volumes for pellet production under this section also.

## Wood Harvesting Trends (1960-2008)

The Maine Forest Service has been collecting data on volume of wood harvested since the late 1940's. The following three charts illustrate wood harvesting trends over the past 49 years.

The two graphs to the right show the harvest volumes for selected species for sawlogs and pulpwood. These volumes include exported volumes.

Harvest Levels of Selected Species for Saw logs in Maine (1960 to 2006)

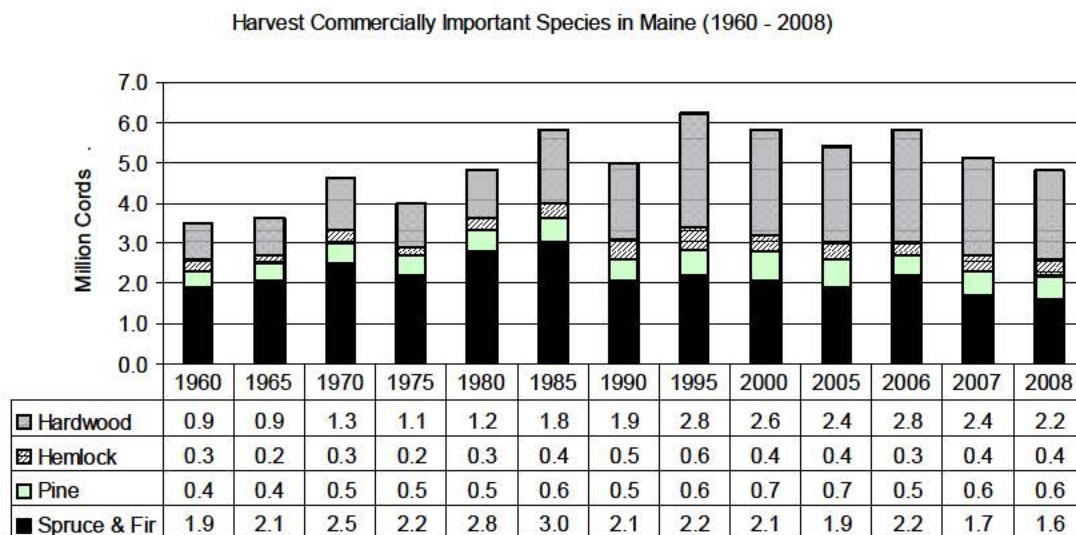

Harvest Levels of Selected Species for Pulpwood in Maine (1960 to 2006)

## Wood Harvesting Trends (1960-2008)

The graph to the right shows the volumes for commercially important species.

## Import and Export Trends (1990-2008)

The graph to the right shows the volumes of forest products being exported from Maine, imported into Maine, and processed within Maine.

**Conversion Table**  
**MBF/Weight Equivalents**  
**for various Maine Commercial Tree Species**

These conversions are used by the Maine Forest Service.

Users of this report may wish to confirm the conversion rate(s) used by individual mills and/or contractors who purchase wood.

Yellow Birch	1	5.4
Sugar Maple	1	5.4
Red Maple	1	4.5
White Oak	1	5.4
Red Oak	1	5.4
Ash	1	4.5
Aspen/Poplar	1	4.3
Softwood	1	4.6
Hardwood	1	5.4
Mixed Wood	1	4.6

***For purposes of comparing volumes, a rough conversion of 1 MBF = 2 cords is commonly used.***

These conversions factors are handy for making estimates and for forest inventory purposes, but are advisory only. The weight of a particular volume of wood varies greatly by species, time of year and other factors.

It is illegal in Maine to convert from one system of measurement to another for the basis of payment (e.g. convert a mill payment for pulpwood in dollars per ton to a landowner payment in dollars per cord).

## Maine Forest Service District Foresters

The Maine Forest Service has 10 District Foresters who provide technical assistance and educational services to landowners, loggers, schools and educational institutions, municipalities and other stakeholders. District Foresters conduct educational workshops, field demonstrations, media presentations, and can provide limited one-on-one contact with individual landowners.

### Dennis Brennan

2281 Alfred Road  
Lyman, ME 04002  
Phone: (207)324-7000  
E-mail: [dennis.brennan@maine.gov](mailto:dennis.brennan@maine.gov)

### Morten Moesswilde

536 Waldoboro Road  
Jefferson, ME 04348  
Phone: (207)549-9003  
E-mail: [morten.moesswilde@maine.gov](mailto:morten.moesswilde@maine.gov)

### Steve MacDonald

P.O. Box 130  
Jonesboro, ME 04468  
Phone: (207) 434-2622  
E-mail: [stephen.macdonald@maine.gov](mailto:stephen.macdonald@maine.gov)

### Jim Ecker

P.O. Box 415  
Old Town, ME 04468  
Phone: (207) 827-1811  
E-mail: [jim.ecker@maine.gov](mailto:jim.ecker@maine.gov)
