Growing Maine's Global Footprint

Maine International Trade Center 2018 Annual Report

What Trade Means to Maine

In 2018,
Maine exports
were up 6%
over the
previous year.

2,087 Maine companies exported
\$2.8 billion in goods and services to **169** countries

Trade supports **157,300** Maine jobs (nearly 1 in 5)

Trade-related jobs grew **10 times faster** than total employment
in Maine during the same time period.

With more than 95%
of the world's population
and 80% of the world's
purchasing power outside
the United States,
future economic growth
and jobs for Maine
increasingly depend on
expanding opportunities in
the global marketplace.

Our Role & 2018 Highlights

Maine International Trade Center (MITC) helps Maine businesses enter and expand global markets for their products and services. MITC offers one-on-one consulting and research, affordable group trade show participation, connections around the world, export reimbursement funds for small businesses, and more. Leveraging overseas synergy, MITC also works to increase international student attraction and foreign investment. A public-private partnership, MITC is funded through Maine Department of Economic and Community Development (DECD), corporate contributions, and membership dues of over 300 businesses and organizations.

President's Letter

Dear MITC Members and Friends,

When I was growing up, my family would load up and head Downeast to our camp, which was just this side of Machias and not particularly close to anything. The ride down followed the Blacks Woods Road between Ellsworth and Cherryfield. One minute you're zooming along, the next making a too-fast hairpin turn through some rocks, then around a pond with no guardrail and

3 feet of loose gravel between the car and a probably somewhat less than refreshing swim. Anyone who has ever made this drive knows that particular road is an apt description of 2018 in the world of international trade.

With the rise of unprecedented trade tensions, MITC was called upon to explain, interpret, and help navigate the evolving global market landscape. In spite of the uncertainty and concerns, total exports from Maine this year were up 6% over last year, and diversifying markets is a more vital strategy than ever. To that end, MITC launched new efforts to connect with and better serve businesses statewide. The "MITC Across Maine: 2018 Business Tour" brought our staff to Lewiston, Auburn, Bangor, Brewer, and Orono. A restructured, refreshed trade education series called "Global U" and the new "Trade On Demand" web portal offer trade education in person and online, along with other resources for exporters.

As global trade continues to evolve, MITC remains your top local resource to help your business identify the best overseas markets and increase international sales. Our Annual Report tells the story of "Growing Maine's Global Footprint" through highlights of our activities overseas and at home. These accomplishments only happen with your participation and engagement.

Thanks for your continued support of MITC and our mission.

Wade Merritt,
President and State Director of International Trade

MITC Board – December 2018: (front row) Denise Garland, Adrian Kendall, Kelly L'Heureux, Wade Merritt, Carl Spang, Brenda Garrard, and Larry Robinson; (back row) Larry Wold, Jeffrey Porter, Adam Kennedy, Dennis Leiner, Tony Caruso, and Chip Kelley

MITC Members

Our members are the lifeblood of what we do. Our success depends on their success in entering and doing business in markets around the globe, which in turn supports jobs in Maine and strengthens the state's economy. Working together helps all of us grow and prosper.

Over 300 MITC members include manufacturers and service providers, educational institutions, industry associations, and economic development partners. We work with both exporters and importers. Most of our members (82%) have 100 or fewer employees, while 69% have less than 25 employees.

Trade Assistance

MITC's essential purpose is to help Maine businesses enter and expand global markets for their products and services. The one-on-one consulting assistance and research services that we provide are extremely important and highly valued by Maine businesses, according to our 2017 International Business Needs Survey. Trade assistance covers a broad range of topics including logistics, tariffs, documentation, sourcing, and research reports on new markets.

312
companies
across Maine
assisted

MITC staff have a combined total of 96 years of international trade experience. Along with many years of experience comes a depth of knowledge and strong connections in key industry sectors including advanced manufacturing, agriculture, bioeconomy (forest & ocean), biotech, consumer goods, defense, education, green shipping, life sciences, logistics, seafood, and specialty food.

During 2018, MITC staff shared their knowledge as presenters or panelists at numerous conferences and seminars including: “Maine-China trade: What’s at stake?”; 2018 Food Export USA –Northeast Seafood Buyers Mission Buyer Orientation & Briefing; Fletcher Arctic Conference; and NAFSA Region XI Conference. For continued professional development, our staff attended conferences, trainings, and trade shows relevant to their roles throughout the year such as the Stanford Graduate School of Business Executive Program for Nonprofit Leaders, the BIO International Convention, and the Arctic Circle Assembly (see photo at left).

MITC's Maine North Atlantic Development Office (MENADO) coordinated a Maine delegation of 45 people from business, government, academia, and the arts community at the 2018 Arctic Circle Assembly in Iceland.

Trade Education

Throughout the year, MITC holds trade education programs. Content is developed to address current topics of importance and highest need for Maine businesses based on trends in trade assistance requests, business survey responses, and expert input on emerging markets. In addition, MITC collaborates with other organizations across the state to co-host seminars on topics of common interest whenever possible.

Last year, for the first time in Maine, we hosted **ExporTech™**, a national export assistance program that applies a structured export strategy development process to help companies enter or expand in global markets. Over a 10-week period, participants attended 3 one-day work-shops, obtained individualized coaching to develop an actionable export growth plan, and presented their export growth plans to experienced international business people for feedback.

During the summer of 2018, MITC developed a new three-tiered trade education series called **Global U** to provide practical skills training and valuable takeaways to help Maine businesses at various experience levels succeed in international markets. From September through June, **Global U** includes a combination of in-person seminars and live webinars.

Level One seminars are meant for those new to export and import who are still determining if the time is right for them to begin international trade. Level Two offerings for those with some export experience will include more advanced, in-depth content on topics such as international documentation. Finally, Level Three training is geared toward those who have experience in several international markets and sell a significant portion of their products/services abroad.

TRADE ON DEMAND

education resources
24/7 web portal
members only access

As a complement to our new trade education series, we also launched **Trade on Demand**, a members-only web portal with resources available 24/7. Members can access information when they have the time (or the need) to know. **Trade on Demand** includes webinars, market reports, exporter's guides by country, trade terms and statistics, and more.

Programs & Events

In May, the 38th annual Maine International Trade Day was held at the Samoset Resort in Rockport. The theme for Trade Day 2018 was “Global Trade’s New Era: Accessing Asia.” The event included an opening reception, an interactive panel discussion, a New Product Global Showcase, and the annual International Trade & Investment Awards luncheon.

MITC members value opportunities to connect with other internationally-active Maine companies. Our annual member appreciation and holiday receptions saw strong attendance numbers again this year. These networking events provide an informal atmosphere for business professionals to discover what other Maine companies are doing in global markets.

As a statewide organization committed to supporting all of Maine’s internationally active businesses, we launched a new initiative called “MITC Across Maine: 2018 Business Tour” with team visits to Lewiston-Auburn and Bangor. In the mornings, our staff met with MITC members, business leaders, and local and regional economic development professionals to discuss the biggest opportunities for the region and how MITC can provide assistance on the international front. In the afternoons, the MITC team visited local manufacturers and educational institutions.

Exploring New Potential Markets

MITC's Maine North Atlantic Development Office (MENADO) organized a 4-day business development itinerary in Greenland for Hancock Lumber to help the company understand Greenland's supply chain and channels of distribution for building materials. A dozen meetings were organized with building materials retailers and distributors, builders, infrastructure project staff, and port officials. Icelandic shipping company Eimskip will offer service connecting Portland and Nuuk, Greenland through a partnership with Greenland's Royal Arctic Line in 2019.

“I have been working with Dana Eidsness with MENADO at MITC on building relationships in Greenland and Iceland with the goal to hopefully ship Maine building materials to Greenland. We just finished a trip with an action-packed agenda, connecting with partners abroad to understand their development goals and how Hancock Lumber and other Maine organizations might partner to supply building materials to Greenland. Hancock Lumber is fortunate to be connected to MITC as we collaborate and explore this new market opportunity.”

— Mark Hopkins, Chief Operating Officer, Hancock Lumber

Trade Shows and Trade Missions

Offering valuable exposure to international distributors and buyers in a cost-effective way for small- and medium-sized companies, MITC coordinates group participation and one-on-one meetings at major industry trade shows and offers financial assistance through US Small Business Administration's State Trade Expansion Program (STEP). MITC also works with participating companies to make the most of the experience before, during, and after the show. During 2018, MITC coordinated participation for Maine companies in 10 trade shows:

- Winter Fancy Food Show (San Francisco, CA)
- JEC World International Composites Event (Paris, France)
- Seafood Expo North America (Boston, MA)
- Seafood Expo Global (Brussels, Belgium)
- OutDoor Europe (Friedrichshafen, Germany)
- China Fisheries and Seafood Expo (Qingdao, China)
- DEFSEC Atlantic (Halifax, Nova Scotia)
- CAMX – Composites and Advanced Materials Expo (Orlando, Florida)
- Seafood Expo Asia (Hong Kong, China)
- MEDICA (Düsseldorf, Germany)

52
participating
organizations

\$45 million
in projected
sales

792
serious leads
and distributor
agreements

During 2018, MITC coordinated Maine participation in two trade missions: the State of Maine Trade Mission to Ireland & the UK (see page 13) and the US Seafood Mission to Vietnam, the fifth largest export market for US lobster.

Defense Industry Maine

In partnership with the Maine Department of Economic and Community Development (DECD) and the Office of Economic Adjustment (OEA) at the U.S. Department of Defense (DOD), Defense Industry Maine (DIME) is an initiative of Maine International Trade Center to assist Maine companies in the DOD supply chain to diversify their businesses. DIME strives to help create a resilient defense supply chain that can weather changing federal procurement needs.

In 2018, DIME completed an overhaul of the website to include an interactive map of the companies in Maine's growing DOD supply chain and establish a portal highlighting services, resources, and grants available to aid companies in their diversification efforts. DIME also hired a dedicated Senior Research Associate, George Lindbom, to assist companies with their market research needs.

DIME Director Tom Conley led several Maine companies to the Canadian Defense and Security show – DEFSEC Atlantic – in Halifax, Nova Scotia.

In November, MITC hosted International Traffic in Arms Regulations (ITAR) Training in Portland. A dozen Maine companies in the defense supply chain participated in the day long educational program led by international compliance expert Mike Allocca of Allocca Enterprises.

During the last year, MITC staff met with and helped dozens of Maine companies in the defense supply chain.

A new sector was added to the investment attraction portfolio in 2018, the forest products industry. Spurred by paper mill closings and the loss of thousands of jobs, industry stakeholders came together to craft the Forest Economy Roadmap, a research-based vision to help identify opportunities. MITC is an active member of this collaboration as the state is ideally positioned for investment in cross laminated timber, tall wood buildings, packaging materials, high-tech papers, biochemicals, bio plastic composites, biofuels, and nanomaterials.

34,700
Mainers work
for companies
with foreign
ownership

Attending industry-sponsored events (the Northern Border Regional Commission's Investing in the Future Forest Economy, Maine Forest Products Council activities, and the Maine Wood Sustainability Conference) and site visits to paper, lumber, and pellet mills (IGIC/St. Croix, SAPPI, and Pleasant River Lumber) assisted in honing the message to develop new materials to introduce potential overseas investors to Maine's forest products.

The other sectors in the Invest in Maine business attraction portfolio are advanced materials and composites, food and beverage, and life sciences.

Working with Belfast-based lead generation consultant OCO Global, Invest in Maine met with 12 companies at the JEC World International Composites Event in Paris, France. Eight of these meetings were first-time introductions. OCO Global also coordinated a round of meetings in the Milan area, as well as with exhibitors at the MIAC—International Paper Industry Exhibition in Lucca,

Italy. The focus of the Italy trip was primarily composites and forest products with participation by the University of Maine Advanced Structures and Composites Center. Visits also included composites manufacturers and companies in food processing, pharma and diagnostics, and engineering.

Danilo Di Fonzo, OCO Global Italian Market Specialist, with Manuel Silvestrini (right), Business Development Manager at Modula S.p.A. (a company of System Group), during the visit at System Group's world headquarters in Fiorano Modenese, Italy. A leader in automated vertical storage, Modula operates in over 50 countries and plans to double the size of the Lewiston, Maine facility in 2019.

The Maine North Atlantic Development Office (MENADO) was formed in 2013 as an initiative of Maine International Trade Center (MITC) to increase trade and investment between Maine and markets of the North Atlantic Region and to guide the State's policy in Arctic affairs. Here are a few highlights of activities in 2018:

Norwegian Institute for Food Fisheries & Aquaculture (Nofima)

MENADO organized a 2-day visit to Maine for the CEO of the Norwegian Institute for Food, Fisheries and Aquaculture (Nofima), which offers resources to help fast track product development for Maine businesses and researchers looking to add value to fisheries and aquaculture waste materials through access to their research experts and bioprocessing facility in Tromsø, Norway. During the visit, over 70 individuals from Maine businesses and institutions were engaged through private meetings and events co-hosted by partners from Verrill Dana LLP, the New England Ocean Cluster, and UNE North.

State of Maine UK & Ireland Trade & Outreach Mission

In September, the State of Maine UK & Ireland Trade & Outreach Mission included successful networking and business development opportunities for eight Maine companies. After 2 years of network development and outreach, a Maine-County Cork, Ireland Economic Partnership Agreement was signed that will serve as the foundation for business development connectivity for life sciences, marine technology, fisheries, aquaculture, ocean freight, shipping, food and beverage, education, and tourism sectors for years to come. A life sciences roundtable discussion with the UK pharma industry was hosted at One Nucleus, an organization for international life science and healthcare companies in London and Cambridge, UK. MITC/MENADO is exploring a partnership with One Nucleus for a reciprocal exchange to aid Maine and UK life sciences companies in establishing an international presence.

Chief Executive Tim Lucey and Mayor Patrick Gerard Murphy of County Cork, Ireland and Maine DECD Acting Commissioner Denise Garland signed a Maine & County Cork economic development agreement.

Incoming Delegations Hosted:

- UArctic
- 2018 Chef Summit
- Cork County Council
- Goleen Coast Guard
- National Guard Arctic Interest Council
- Greenland Representation
- UK Polar Research & Policy Initiative
- Maine Beer Box (events in Leeds, UK and Portland, ME)
- UK Northern Powerhouse

Outgoing Maine Delegations & Missions Coordinated:

- Arctic Frontiers Conference
- Arctic Circle Forum
- UK & Ireland Trade & Outreach Mission
- Greenland Trade & Outreach Meetings
- Arctic Circle Assembly

StudyMaine is a consortium of Maine high schools, colleges, and universities designed to help connect these educational institutions with international students who want to attend high school and/or college in the United States. With 23 member schools last year, MITC's StudyMaine program provided marketing and research reports, consulting services, and other assistance with strong support from the U.S. Commercial Service in Portland.

In March, StudyMaine organized a 6-day recruiting mission to Mexico and Colombia. During the mission, school representatives had opportunities to meet potential students and parents at education fairs, present at EducationUSA events, and hold one-on-one meetings with education agents.

A group of five education agents from Russia and Ukraine visited Maine in late October. The 3-day visit included one-on-one meetings and campus tours with several Maine schools. The agents appreciated the opportunity to assess the educational institutions and communities in person, as well as hear from current international students on why they selected particular campuses and academic programs.

In 2018, nearly **2,500** international students contributed an estimated **\$90 million** to Maine's economy.

Our Future Global Leaders Internship program teaches international market research and workplace skills to some of the best and brightest Maine college students and recent graduates.

As a Research Assistant, MITC interns gain practical experience researching international markets and assisting Maine businesses. To date, MITC has trained more than 200 Research Assistants. While producing research reports is still the main focus, we are working to expand learning opportunities for our interns through company visits and tours as well as partnerships with other organizations.

In collaboration with Food Export USA, we have created a new Food Export Research Intern position on our team focused on Maine's agriculture and food industry. In addition, a few of our interns have participated in the Maine Flagship Internship Program at the University of Maine, learning soft skills and presenting on their experience at a symposium at the end of the summer.

"Maine International Trade Center provided me with valuable experience and professional connections. During my internship, I focused on research and was able to attend business meetings and tours, training seminars, and networking events. It was rewarding to help Maine companies navigate the complex waters of international trade."

– Apryl King, former MITC Research Assistant, 2017-2018

Young Global Professionals

Young Global Professionals is a network of over 300 early career employees who have international perspective, experience, or interests. The group holds events several times a year, providing both a source of connections for young workers interested in career development as well as an excellent resource for companies seeking potential employees with global business skills. Previous events have included networking receptions, private tours at local businesses, and the popular annual international trivia night.

Export Assistance Grants

MITC was awarded \$195,000 in federal funding in October 2017 under the sixth round of the U.S. Small Business Administration's State Trade Expansion Program (STEP) grant initiative to increase the number of small businesses that export, as well as the value of exports by small businesses. The grant provided funds to Maine companies across the state to support attendance at international trade events and export compliance training for workforce development.

From the 2017-2018 grant year, over 50 Maine small businesses received STEP Financial Assistance Awards, resulting in \$12.8 million in actual sales with an additional \$17 million projected in the next 12-18 months. These figures represent a 72:1 immediate return and a projected 226:1 future return on grant funds.

In October 2018, MITC was awarded a new \$344,500 STEP grant with funding available through December 31, 2019.

MITC is the state partner for Food Export USA, which promotes the export of food, seafood, and agricultural products through the Market Access Program (MAP). MAP provides cost-share assistance to eligible organizations for activities such as consumer advertising, public relations, point-of-sale demonstrations, participation in trade shows, market research, and technical assistance. According to the most recent annual reporting available (2017), 21 Maine companies participated in 102 activities resulting in \$102 million in actual sales and \$166 million in projected sales.

Our Key Partners

With the support and collaboration of these key partner organizations, MITC can provide additional valuable assistance to Maine exporters with significant impact on the state's economy.

New International Collaboration

Maine Outdoor Brands (MOB) is an alliance of like-minded business leaders and entrepreneurs started in 2017 and has grown to more than 80 members. MOB represents an \$8.2 billion outdoor recreation economy in Maine. While MITC and MOB partnered in the past at the Outdoor Retailer trade show in the US, OutDoor Europe in Friedrichshafen, Germany in June 2018 was our first collaboration at an overseas trade show.

With financial support from the US Small Business Administration's State Trade Expansion Program (STEP) grant, MITC and MOB organized a shared booth for five Maine companies, exhibiting internationally for the first time: Good To-Go, Blaze Partners, Sea Bags, Flowfold, and Threlked Photography. In addition, the exhibiting companies participated in Gold Key Service pre-scheduled, one-on-one appointments with international buyers, agents, and distributors during the show, arranged by the US Commercial Service in Munich.

“Participating in the OutDoor Europe show gave us the opportunity to meet with distributors, agents, and individual buyers from all over Europe, which would not have been possible without the support of MITC and MOB. As a result, we met with one of our Japanese distributors and expanded our product offering there, closed a new account in Norway, and found promising leads with agents and distributors in the UK and Scandinavia.”

— James Morin, COO, Flowfold
