STATE OF MAINE

FINANCIAL REPORT

For Period
July 1, 1978 to June 30, 1979

DEPARTMENT OF FINANCE & ADMINISTRATION
Bureau of Accounts and Control

RICHARD A. DIEFFENBACH, CPA
STATE CONTROLLER

HJ
11
.M221
1979

The State of Maine Financial Report is published annually by the State Controller in accordance with Title 5, section 1547 of the Maine Revised Statutes Annotated. Printed under appropriation 1031.1.

Richard A. Dieffenbach, CPA
State Controller

Donald A. Brown
Deputy State Controller

STATE OF MAINE
DEPARTMENT OF FINANCE AND ADMINISTRATION
BUREAU OF ACCOUNTS AND CONTROL

November 20, 1979

Governor Joseph E. Brennan,
Members of the Legislature
and Other Citizens of Maine

The accompanying statements present the financial position of the various funds of our State Government at June 30, 1979, and their resources and expenditures for the fiscal year then ended. Comparative prior year and budgetary data as well as footnotes, statistical information and an outline of the State's budget and accounting procedures have been included in this report to promote a better understanding of the State's finances.

This report reflects the recommendations of the National Council on Governmental Accounting's March 1979 restatement of the principles of Governmental Accounting, Auditing and Financial Reporting. Accordingly, modest changes in statement format and terminology have been made in relation to the prior year presentation. The new classification of "Governmental Funds" is defined to include the State's General Fund and Highway and Other Dedicated Funds (formerly reported in the aggregate as "Operating Funds") as well as the Proceeds of Bonds Funds and Debt Service Fund.

I am pleased to announce that the U. S. Department of Treasury has certified Maine as being in full compliance with the audit requirements of the Revenue Sharing Act based on our prior years' audited reports. Audit services covering the quadrennial period ending June 30, 1982 will be provided by Ernst and Whinney.

Questions or comments about the State of Maine's finances are always welcome.

Respectfully submitted,

A handwritten signature in dark ink, appearing to read "Richard A. Dieffenbach".

STATE CONTROLLER

FEB 1980

OFFICE OF THE SECRETARY OF THE TREASURY
WASHINGTON, D.C. 20226

DIRECTOR
OFFICE OF REVENUE SHARING

NOV 8 1979

Dear Governor Brennan:

The "State and Local Fiscal Assistance Amendments of 1976" extended the Revenue Sharing Act for 3 3/4 years. Section 123 of these Amendments requires an audit in accordance with generally accepted auditing standards of all funds, for the purpose of determining compliance, for one of the three fiscal years ended in 1977, 1978 or 1979.

I am pleased to inform you that the State of Maine is now considered acceptable as having fully complied with this audit requirement of the Revenue Sharing Act.

If we can be of any assistance in the future, please do not hesitate to contact us.

Sincerely,

Kent A. Peterson
Acting Director
Office of Revenue Sharing

The Honorable
Joseph F. Brennan, Governor
State House
Augusta, ME 04333

CC: Richard Dieffenbach
State Controller

GENERAL NOTES TO THE FINANCIAL STATEMENTS

I. GENERAL

Maine is the largest and most northern of the six New England states. Its land area of approximately 30,147 square miles supports over one million year-round residents. The State's economy is based on manufacturing - principally paper, lumber, textile and processed food products. Farming, fishing and tourism are also important industries.

The State of Maine is governed by a bicameral Legislature, an Executive Branch and the Court System. The legislative body consists of 33 Senators and 151 members of the House of Representatives, all of whom are elected for two year terms. The Governor is elected to a four year term of office.

II. FISCAL ENTITY DEFINED

The State of Maine, as a fiscal entity, consists of the Court System and all the various State agencies whose funding and daily operating policies are subject to review by the Legislature and/or Executive Branch. Quasi-governmental units such as the following independently administered public authorities are not part of the State for purposes of centralized accounting or these financial statements:

University of Maine	Maine Health Facilities Authority
Maine Maritime Academy	Maine Housing Authority
Maine Turnpike Authority	Maine School Building Authority
Maine Municipal Bond Bank	

III. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

a) Accounting and Financial Reporting Principles: All financial transactions are recorded in the following Funds which are maintained in accordance with the recommendations of the National Committee on Governmental Accounting:

<u>Governmental Funds</u>	<u>Other Funds</u>
General Fund	Enterprise Funds
Highway Fund	Internal Service Funds
Other Special Revenue Funds	Trust and Agency Funds
Proceeds of Bonds (Capital Project) Funds	
Debt Service Funds	

Fixed Asset and Long Term Debt account groups are maintained to identify the cost of State-owned property, plant and equipment, and long term debt.

b) Budgets: Legislatively authorized budgets define the financing and anticipated expenditures for the various services and programs assigned to the Governmental Funds and larger Other Funds. The balanced nature of the budget requires that expenditures and encumbrances may not exceed estimated resources.

c) Bases of Accounting: Both the modified accrual and full accrual bases of accounting are used to record the various segmented operations of the State, as appropriate. Modified accrual accounting (used principally by the Governmental Funds) results in the recognition of only liquid assets readily convertible to cash and short term liabilities which will be paid by use of those assets. Revenues are recorded when measurable and available and expenditures are generally recorded in the period in which the goods or services are received. Commitments for goods or services to be received in the future are recorded as a reservation of budgeted amounts and are carried forward for use in a subsequent year.

Full accrual accounting is used to record the operations of those funds for which it is important to match revenues in the period in which the goods or services generating those revenues were provided. Enterprise and Internal Service Funds, for example, recognize prepaid expenses, inventories, depreciable assets, etc. which would not be reflected on the balance sheets of the Governmental Funds.

d) Valuation of Assets and Liabilities:

i) Receivables, including self-declared or State-assessed taxes, are recorded when legally enforceable claims arise. A reserve is established for amounts whose collection may extend beyond the subsequent accounting period.

ii) Investments: Investments in the Treasurer's Cash Pool and Trust and Agency Funds are carried at cost, which approximates market.

iii) Inventories: Inventories of Enterprise and Internal Service Funds are stated generally at the lower of cost (first-in, first-out) or market.

iv) Property, Plant and Equipment: Property, plant and equipment are stated at cost or estimated cost when original cost is not available.

Straight-line depreciation is used to amortize the cost of capital assets in the Enterprise and Internal Service Funds. Replacements or betterments are capitalized if they significantly add to the productivity or extend the economic lives of these assets.

Purchases of capital equipment is expensed in the Governmental Funds.

v) Personnel service costs are expensed when paid. In addition to the normal carryover of June wages and salaries paid in early July, there was approximately \$9.0 of unrecorded employee vacation benefits at June 30, 1979.

IV. TREASURER'S CASH POOL

The State Treasurer combines all available cash for investment purposes. Earnings from the temporary investments are distributed to the participating funds based on daily average cash balances. Components at June 30, 1979 are summarized as follows (in thousands of dollars):

<u>Description</u>	<u>Maturity</u>	<u>Interest Rate</u>	<u>Principal</u>	<u>Cost</u>
U. S. Treasury Bills	1979	7.1 - 9.5%	\$ 4,058	\$ 3,962
Repurchase Agreements	1979	7.2 - 10.0%	5,000	5,000
Prime Rated Commercial Paper	1979	7.5 - 11.0%	69,500	69,166
Certificates of Deposit	1979	8.6 - 12.0%	87,480	87,480
				<u>165,608</u>
Excess Investments Purchased Over Demand Cash				<u>(14,325)</u>
				<u>\$ 151,283</u>

V. PENSIONS PLANS

State employees and local teachers and employees of participating local government units are eligible to participate in the Maine State Employees' Retirement System, which provides for retirement and other benefits. Generally retirement expense is comprised of the actuarially determined normal cost plus an amount accrued. The State's contribution to the System for State employees and teachers was \$39 million in 1979.

At June 30, 1978 (the latest valuation date), the unfunded accrued benefits for State employees and teachers were approximately \$799 million. The actuarially computed value of vested benefits is not available. The report of the consulting actuary for the system indicates that, under the actuarial assumptions used for the actuarial valuation, the contributions of employees and the State, together with investment income, will provide for the cost of unfunded accrued benefits within twenty-six years.

VI. NOTES AND BONDS PAYABLE

General obligation bonds and bond anticipation notes outstanding at June 30, 1979 totalled \$264,150,000. The anticipated source of repayment and annual maturities are as follows (in thousands of dollars):

DEBT SERVICE REQUIREMENTS TO MATURITY SUMMARY BY SOURCE OF REPAYMENT

<u>Anticipated Source of Repayment</u>	<u>Principal</u>	<u>Interest</u>
General Fund	\$ 185,945	\$ 56,054
Highway Fund	50,935	14,339

Authorized and unissued bonds at June 30, 1979 totalled \$152,488,355.

VII.

COMMITMENTS AND CONTINGENCIES

a) Leases: The State is a party to various leases, principally for office space. The terms of all such leases expressly provide that the State shall not be obligated to pay any sums except where payment is provided by appropriation.

b) Highway Construction: At June 30, 1979 the Highway Fund had \$ 53 million of construction contract commitments which were contingent upon receipt of funding. Of this amount \$ 32.9 million has been budgeted by the Legislature to reflect expected proceeds from authorized and unissued general obligation bonds, however, this amount is not recorded as appropriated fund balance in the related balance sheets. \$ 20.1 million is expected to be received in the form of Federal matching grants.

c) The State of Maine is contingently liable through the Maine Guarantee Authority and the Maine and Veteran's Small Business Loan Funds (included in the Enterprise Funds) as guarantors of insured mortgages in the amount of \$23.0 million.

d) Litigation:

i) The United States of America has filed two suits in the United States District Court for the District of Maine on behalf of the Passamaquoddy Tribe and Penobscot Nation, so-called, claiming \$150 million in damages for each tribe for alleged wrongful takings of land by the State of Maine and Massachusetts.

During the past year, the Attorney General has participated in extended discussions with the Indians and Federal Government to achieve a negotiated settlement that will not adversely affect the State's financial position. The outcome of the negotiations cannot be predicted.

The Attorney General has undertaken extensive research on the merits of the suits for damages and land. Based on legal and historical research, the Attorney General is of the opinion that there are good and valid defenses to the claims and that, regardless of the success of efforts to resolve this matter by negotiation or through Congress, the probability of the Tribes recovering a judgment for either land or money against the State of Maine through litigation is extremely remote.

ii) Individual and class action suits have been filed against the State Tax Assessor in opposition to certain rulings on taxable income. Determinations against the State could require refunds of approximately \$4 million of taxes paid in previous years.

iii) Several suits have been filed related to the State's involvement in the Spruce Budworm spraying project. The largest seeks to order the State to refund a \$4 million Federal grant. Complaints have been denied by the United States District Court, however the matter is on appeal to the Court of Appeals for the First Circuit. In the opinion of the Attorney General, there are good and valid defenses to the claim, and it is extremely unlikely the earlier rulings will be overturned.

iv) The State, its agencies or officials are involved in numerous other legal actions. Some of the suits involve action by the State to recover monies or otherwise to obtain relief that will be financially advantageous to the State. Conversely, other suits involve claims against the State. While the ultimate effect of such actions cannot be ascertained at this time, the liabilities which may arise from such actions would not materially impact the financial position of the State.

e) The State is self-insured with respect to workers' compensation, and records the cost of compensation for claims awarded on a pay-as-you-go basis. The liability for claims asserted but not awarded and claims which may be asserted is not subject to reasonable estimate, however the ultimate liability will not have a material effect on the financial condition or results of operations of the funds of the State of Maine.

f) Other Contingencies: Expenditures of Federal grant funds are subject to review and audit. The United States Department of Labor has notified the Maine Department of Manpower Affairs that it has identified approximately \$500,000 in potential disallowances. The audit process is subject to administrative appeal and could result in litigation. No material questioned costs have been brought to our attention relating to Other Federal grant programs.

VIII. OTHER

a) The Maine State Legislature has requested that a separate Federal Expenditure Fund be established to monitor the combined resources and expenditures of monies received from the Federal Government. While this action impacts the 1979 operations of the Highway Fund in comparison to 1978, it does not affect the combined Governmental Fund statements.

b) Dollar amounts have been truncated to facilitate the presentation of some of the financial statements, thus columns may not add by immaterial amounts.

GOVERNMENTAL FUNDS

The following governmental funds are used to record the financial transactions of the various activities and programs of the State:

1) General Fund - The General Fund accounts for all undedicated resources and their expenditures. The majority of revenues are raised from the State's sales and income taxes; they are used, in part, to finance the court system, Legislature, centralized administration, educational assistance, natural resource management as well as providing matching funds for Federal human service programs, etc. During 1979, expenditures of \$478.5 million exceeded revenues by approximately eight million dollars. The June 30, 1979 fund balance was \$26.4 million.

2) Highway Fund - The Highway Fund uses the dedicated motor fuel taxes and motor vehicle licenses to finance the State's highway construction and maintenance programs. (Effective in 1979, accountability for Federal highway funds was transferred from the Highway Fund to the Federal Expenditure Fund - the impact of this change in accounting is reflected on the various Highway Fund statements.) The June 30, 1979 Highway Fund balance was \$7.9 million.

3) Other Special Revenue Funds - The Other Special Revenue Fund classification is an aggregation of all other dedicated resources including Federal revenues, unemployment taxes, certain business regulation fees, hunting and fishing licenses, etc. Expenditures of these funds can only be made in accordance with restrictions imposed by the source of the revenues. The net available special revenue fund balances was \$30.4 million at June 30, 1979.

4) Proceeds of Bonds Funds - Proceeds from the sale of general obligation bonds are segregated until used. On November 1, 1978, the State sold \$14,915,000 of ten-year serial general obligation bonds in support of energy conservation, municipal sewerage and vocational school construction programs.

5) Debt Service Fund - The Debt Service Fund accounts for the accumulation of resources for, and the payment of, general long-term debt principal and interest. During 1979, the State retired \$21.8 million in debt.

ENTERPRISE FUNDS

Enterprise Funds are used to account for activities which provide services to the general public on a user-charge basis. Such funds are largely intended to be self-supporting, thus the enterprise accounts include fixed assets, depreciation and debt service.

The principal Enterprise Funds included:

Bureau of Alcoholic Beverages - The sale of alcoholic beverages is controlled through State-operated stores or licensed agents. Net income from the operation of the Bureau of Alcoholic Beverages is transferred to the General Fund.

Department of Transportation Services - The Department of Transportation operates the Augusta Airport, Maine Pier in Portland and the ferry services in the mid-coastal region of the State. Outstanding debt relating to the ferry service was \$570,000 at June 30, 1979. The amount is repayable in varying installments through 1985 with interest at approximately 3 percent.

Maine Guarantee Authority - The Maine Guarantee Authority is organized to foster industrial and recreational expansion through loan guarantees. At June 30, 1979, the Authority was contingently liable as guarantor of insured mortgages in the amount of \$21,798,748. A reserve of \$2,083,000 has been established to provide for future losses on guarantees, acquired property, or notes and accounts receivable.

Other Loan Funds - The Maine Small Business Loan Authority and Maine Veterans Small Business Loan Authority operate loan guarantee programs for new and existing small businesses throughout the State. Their combined contingent liability for insured loans at June 30, 1979 was \$1,168,777.

The Department of Education operates a direct loan program for candidates to practice osteopathic medicine.

Prison Industries - The Maine State Prison at Thomaston operates an outlet for handicrafts and furniture produced in the inmate woodwork shop.

Seed Potato Board - The Seed Potato Board operates two experimental farms to test and produce improved seed potatoes.

Maine State Lottery - The Maine State Lottery's profits are transferred to the General Fund. All Lottery prizes extending over one year are funded through the purchase of annuities and are not reflected on the accompanying balance sheet.

Bonds have been authorized in the amount of \$2,100,000 to construct the Maine Veteran's Home which will be operated as an enterprise fund. Operations through June 30, 1979 have included \$1,177 in miscellaneous revenues and \$613 in expenses - the resultant retained earnings of \$564 is invested in the Treasurer's Cash Pool.

INTERNAL SERVICE FUNDS

Internal Service Funds provide centralized services for all other funds. Revenues are derived from user agencies on a cost reimbursement basis. Working capital advances have been provided from the Highway and General Funds.

The principal Internal Service Funds include:

Highway Garage - Operates the central motor pool for the Department of Transportation and other State agencies. Inventories consist of repair parts and fuels recorded at average cost. Vehicles and maintenance garages are recorded at cost less allowance for straight-line depreciation computed over the estimated useful lives of the assets.

Central Computer Services - Supplies data processing services. Leases covering the rental of the major computer equipment have been capitalized (exclusive of interest) and are being depreciated on a straight-line basis over the estimated useful lives of the equipment. The corresponding lease rental obligations represent the balance of the equity payments which are due in varying monthly installments through July 1981. Interest is payable at five percent.

Insurance Reserve Fund - Provides a reserve to indemnify the State for self-insured retention losses and related loss adjustment perils. The fund balance shall not exceed 2% of the insurable value of all State property (including the University of Maine) which at June 30, 1979 was approximately \$732 million.

Postal Printing and Supply Fund - Provides in-house reprographics and postal services. The fund also maintains a central warehouse of office supplies which are recorded at cost.

Schooling of Children in Unorganized Territories - Funds the cost of maintaining educational facilities and equipment in the unorganized territories of the State.

TRUST AND AGENCY FUNDS

The Trust and Agency Funds are a grouping of various funds which are administered by the State as trustee or as an agent for the general public. Trust and Agency Funds are classified as either expendable or nonexpendable funds.

Expendable funds include the accounts of the Maine State Retirement System, the State Employees Group Life Insurance Fund, interest and other revenue from non-expendable trusts, and various private trusts.

Nonexpendable trusts funds consist of endowments for maintenance and preservation of public lands and other donor restrictions. The Lands Reserved for Public Uses Fund consists of revenues from the sale of timber in unorganized territories which are held for the future benefit of towns when organized. The Permanent School Fund represents the proceeds from the sale of 20 townships of public lands in 1828 which are reserved for the benefit of primary schools - only the interest can be expended. The Baxter State Park Trust Fund provides for the perpetual maintenance of forest lands including Baxter State Park.

GENERAL LONG TERM DEBT

The General Long Term Debt account group is utilized to account for the long term liabilities which are intended to be repaid by appropriations, income from short term investments and student fees.

The general long term debt outstanding at June 30, 1979 totaled \$261,480,000 including \$14,915,000 of general obligation bonds sold November 1, 1978. The issue was rated Aaa by Standard and Poor's Corporation and AA by Moody's Investors Service.

Bonded debt related to the Enterprise Funds (\$570,000) is not included in the accompanying statement because it is repayable from the operations of the Maine Ferry Service.

At June 30, 1979, the State Treasurer had borrowed \$2,100,000 in bond anticipation notes to finance construction at the Northern Maine Vocational Technical Institute. The note is due April 1, 1980 with interest at 5.73%.

GENERAL FIXED ASSETS

The General Fixed Asset Account Group provides a record of the cost of the land, buildings, improvements and capital equipment which was purchased from Funds other than the Enterprise and Internal Service Funds. The latter Funds maintain their own fixed asset records.

General fixed assets are defined as tangible property having a life of more than one year and costing in excess of \$100. They do not include 1) roads, bridges and related highway systems, 2) display items of the Maine State Museum or 3) property acquired by tax lien. Original construction costs have been researched for buildings back to the mid 1800's; Equipment acquired prior to 1950 has been valued at estimated cost. Additions are recorded at cost. General fixed assets are not subject to depreciation.

The following Statement of General Fixed Assets has been prepared from the Bureau of Public Improvement's summary of agency inventory records as of June 30, 1978 which has been amended to reflect the cost of property and equipment acquired in 1979. Dispositions in 1979 are not believed to be material. State agencies working to update their fixed asset records which are not fully reflected in this statement include the District Court System, Parks and Recreation, Pineland Center and the Maine Correctional Center.

BUDGET AND ACCOUNTING PROCEDURES

I. GENERAL

Governmental accounting and reporting have evolved differently from the generally accepted accounting principles used by private enterprise. The major differences stem from the governmental reliance on fund accounting to monitor its stewardship of available resources as opposed to an emphasis on profitability. In government there is no profit or loss, except in relation to a comparison of actual and budgeted transactions. This is in part due to a special legal status of governments - i.e. unlimited life and the authority to create its own resources through taxation. In oversimplified terms, the objectives of government are directed toward providing those services which are not readily available in the private sector. These services include public protection, regulation and other legal proceedings, aid to individuals and families in need, education, economic development, etc. The priorities and level of commitment to governmental programs and services are determined by elected representatives through the budget process.

II. THE BUDGET PROCESS

The State budget process provides for an appropriation/allocation of funds within projected revenues and available prior year funds carried forward. The budget authorizes an agency to operate up to a specified expenditure level and for a specified period. In other words, it defines the financial constraints within which a governmental activity must operate.

A Biennial Budget is prepared for the Governmental Funds and larger other funds in the even years. (Some funds are not included in the formal budget document, however they are controlled by the availability of cash and donee or source restrictions.) The Budget is formulated by the Executive Branch based on levels of need identified by the various program managers. Approximately eight months before the State budget is presented to the Legislature, departments begin assembling their combined requests based, in part, on parameters specified by the Governor through the State Budget Officer. This is a time consuming process involving a great deal of analyses and justification. Eventually a departmental budget is submitted to the Bureau of the Budget where it is subjected to further analyses and discussions. The negotiating process continues until the total of all requests are within the anticipated resources.

The Governor's financial program is submitted to the Legislature which must weigh the administration's funding requests with those presented by individual legislators. Public hearings and debate on financial matters are conducted by the Appropriations Committee. This committee submits its recommendations on all money requests to the full Legislature for vote.

Money requests can take several forms:

i) Part I Budget: The Part I Budget requests funds to continue programs at their current levels.

ii) Part II Budget: The Part II Budget defines anticipated costs for new programs, expansion of current programs, or those transferred from other funding sources.

iii) Emergency Appropriations: Emergency appropriation requests can be presented at anytime to provide funding for unexpected occurrences or supplemental needs.

iv) Individual Legislative Documents: Specific requests may be presented by individual legislators concerning a project of special interest.

Once a bill has been passed in both the House and Senate, it goes to the Governor for approval. Approved legislation becomes law ninety days after adjournment, unless otherwise specified. Vetoed legislation is returned to the Legislature for reconsideration.

Appropriations segregate the authorized funding by line category - Personal Services, All Other, Capital or Unallocated. Programs may not exceed their budget without supplemental appropriations or administratively authorized transfers. The Governor is able to authorize transfers up to the extent of the lesser of \$100,000 or ten percent of the Legislatively authorized appropriation. Once an appropriation is known, it must be allotted by the Governor before it can be utilized. Quarterly allotments help to maintain centralized financial control through regulation of the timing of program expenditures. This is particularly important should revenue estimates fail to materialize, because expenditures may have to be curtailed to maintain the required balanced budget.

Allotments are consumed when goods or services are received (an expenditure) or when commitments or orders are processed for goods or services to be received (an encumbrance). Funds lapse and become available for reappropriation if they are not expended or encumbered during the life of an appropriation. Appropriations may cover (1) a fixed period of time such as a fiscal year; (2) a variable period of time such as the life of a designated non-recurring project; or (3) an indefinite period.

III. THE ACCOUNTING SYSTEM

The accounting system closely parallels the budget in order to reflect compliance with legal restrictions on the expended resources. Equally important is the fact that the accounting system is designed to reflect the financial reporting recommendations of the National Council on Governmental Accounting. All financial transactions are recorded in one of eight Funds. The largest of these is the General Fund in which general tax revenues and other undesignated receipts are used to finance the majority of the State's services. Sales tax, individual and corporate income taxes, and other business taxes provide the majority of funds available for Legislative appropriation to operate such programs as the court system, the Legislature, central administration, mental health and correction facilities, education subsidies, etc. Special Revenue Funds and the Highway Fund reflect the financial activity related to revenues whose resources are restricted by their source (legislative designations or limits imposed by the donee). For example, the State highway system is primarily funded by a dedicated tax on motor fuel and the activities of the Inland Fisheries and Wildlife Department are funded by dedicated license fees. Other large Special Revenue Fund programs include Federal Revenue Sharing and Unemployment Compensation. General obligation debt proceeds and repayment of principal and interest are recorded in the Proceeds of Bonds Fund and Debt Service Fund, respectively. Some State services closely resemble private sector business activities such as the State Liquor stores - these are accounted for in Enterprise Funds. Internal Service Funds are used to report on the central service activities like computer and printing which are furnished from Other State government programs on a fee-for-service basis. Both Agency Funds are fiduciary in nature and represent assets held by the State for benefit of other parties. The larger Trust and Agency funds include the Maine State Retirement System, Baxter State Park grants, and miscellaneous.

Because of the variety of activities and programs run by the State, the State Controller has established several specialized accounting conventions, which are consistently applied within the fund accounting system. Generally, the appropriation accounts follow the modified accrual basis of accounting which recognizes revenues when measurable and available and expenditures as of the point in time when they are payable. Thus, no attempt is made to prorate the cost of purchases impacting more than one accounting period. Only liquid assets and liabilities intended to be liquidated from those assets are recognized under the modified accrual basis of accounting. Buildings, equipment and bonded debt are recorded off-line in the General Fixed Asset and Long Term Debt Account Groups.

Full accrual accounting is used by the Enterprise, Internal Service and Trust and Agency Funds. These funds attempt to match related revenues and expenses during the accounting period in which one gives rise to the other. Pre-paid assets, accrued liabilities, fixed assets net of depreciation charges, and long term debt are all part of the full accrual basis of accounting. The following chart compares the modified and full accrual methods of accounting and their application by the State of Maine:

	<u>Modified Accrual</u>	<u>Full Accrual</u>
Used By	General, Highway, Special Revenue, Proceeds of Bonds, and Debt Service Funds	Enterprise, Internal Service, and Trust and Agency Funds
Budgets	Yes	Administration budget only
Assets	Liquid assets only- cash and amounts readily convertible to cash	Current and long term assets including prepaid expenses
Fixed Assets	Expensed when purchased. Memo control by General Fixed Asset Account Group. Not depreciated	Capitalized - subject to straight-line depreciation
Liabilities	Current liabilities only. Bonded debt pledging future resources is recorded in the Long Term Debt Account Group	Both current and long term liabilities
Revenues	Cash basis except for material items which are measurable and available, i.e. State assessed taxes recorded when billed, self-assessed taxes recorded when received.	Recognized when earned.

Expenses/Expenditures	Goods and services recorded as expenditure when received even though consumption may span more than one accounting period, i.e. fixed assets supplies, etc. Interest not prorated, but recognized as expenditure when payable	Recognized as consumed, to match revenues
Encumbrances	Reduction of appropriation resulting in segregation of equity. Does not affect expenditures until goods/services are received.	Not used
