#### Front Cover:

With the passing of Labor Day, Down East days grow noticeably shorter and nights grow somewhat cooler, but that simply heralds the onslaught of Maine's foliage season. Almost miraculously mile after mile of green trees turn sparkling red, flaming orange and buttery yellow. Maine's countryside is set ablaze in a majestic display of natural brilliance that attracts visitors from across the country and around the world.

Foliage season in Maine begins during the first week in September along the Canadian border and concludes during the latter part of October as South Coast trees reach their peak. Fall visitors take more time to discover Maine's back roads, fine restaurants, and out-of-the-way country inns than they do at any other times of the year, and during that colorful seven week period, hundreds of motor coaches bring thousands of group tour visitors to Maine. An essential portion of Maine's tourism business, group tours now account for \$150 million a year in sales revenues and Maine ranks 25th in the nation for group business. During the same time period, cruise ships such as the QE2 make for Portland, Bar Harbor and Camden on a regular basis. Thousands of cruise ship passengers disembark to take day trips to Acadia National Park, the Camden Hills and waterfront and to discover the joys of Kennebunkport, the Old Port and Freeport.

Autumn in Maine! What a glorious time of year.

#### BLAINE HOUSE

(Pictured on Left)
Built in 1833 for Captain James Hall, the Blaine House was later occupied and enlarged by James G. Blaine, whose brilliant political career nearly brought him the Presidency, as the Republican candidate running against Grover Cleveland in 1884. The house was given to the State of Maine in 1919, at which time it was remodeled by architect John Calvin Stevens and its grounds by the Olmsted Brothers landscape architectural firm. Since then it has been home to nineteen first families.

### To the Citizens, Governor and Members of the Legislature of the State of Maine:

We are pleased to present the Budgetary Financial Report for the State of Maine for the fiscal year ended June 30, 1996. This report is prepared on a budgetary basis by the Bureau of Accounts and Control staff within the Department of Administrative and Financial Services. We believe that the information presented is accurate in all material respects and fairly represents the results of operations of the State.

This Budgetary Financial Report is presented in three sections: Introductory, Financial, and Statistical. The Introductory Section includes the State's organizational chart, certain financial highlights and initiatives. The Financial Section includes the financial statements and the combining statements and schedules prepared on a budgetary basis. The Statistical Section includes fiscal, social, and demographic information about the State.

The preparation of this Budgetary Financial Report was made possible by the dedicated service of the staff within the Bureau of Accounts and Control and the support of other State agencies.

Sincerely,

Carol F. Whitney State Controller

Victor E. Fleury

Deputy State Controller

### PLUS 1 CAMPAIGN

On January 23, 1996, Governor Angus S. King, Jr.'s State of the State address featured "Plus 1: A Small Business Campaign for Maine." There are approximately 36,000 unemployed workers in Maine and over 33,000 businesses that employ less than 20 people. "If each of our small businesses adds just one new employee, the net result would be full employment." The Plus 1 Campaign seeks to facilitate small business development by removing barriers that inhibit small business growth and by helping small businesses capitalize on the numerous opportunities available to them within a rapidly changing, global economy.

The following recommendations were the product of a working group of small businesses and organizations that serve and/or represent small businesses, which was convened by Governor King to generate and prioritize ideas for small business development.

KEY: X = implemented O = in progress

(As of June 30, 1996)

#### BLAINE HOUSE CONFERENCES ON SMALL BUSINESS:

- **X** A statewide **Blaine House Conference on Small Business** was held at the Augusta Civic Center on May 30, 1996. Over 1,100 people attended.
- X Eight Governor's Regional Conferences on Small Business are planned for the fall of 1996 at geographically diverse sites. Total projected attendance is 1,600.

#### **TECHNOLOGY**

- O The State Planning Office is developing recommendations for a **state telecommunications policy**, which will address, among other things, the issue of in-state toll rates. Report due late January 1997.
- O The Bureau of Taxation and the Department of Labor have begun to provide on-line information, services, and forms, making State Government more user-friendly. Both agencies have homepages on the World Wide Web. Taxation's home page includes sales and use tax bulletins, a monthly newsletter for tax professionals, and e-mail links to forms ordering. Labor's home page includes unemployment tax liability, independent contractor and labor market information, allowing users to download registration for Unemployment Compensation.
- X Financing packages for hardware and software acquisition, known as the Plus 1 Computer Loan Program, was announced by Governor King at a May 1996 press conference. Over forty Maine banks are participating in the program, with the Finance Authority of Maine providing Rapid Response Guarantees when necessary.

#### INTERNATIONAL TRADE

- X The Maine International Trade Center is scheduled to open in Portland during the fall/winter 1996. Legislation "to consolidate and improve delivery of international trade services" was enacted by the Legislature and signed into law by Governor King (Public Law 1995, Chapter 648).
- O The Maine TradeNet has been awarded a federal grant to develop an "International Trading Network to Aid Maine's Small Wood Products Exports." Nine partnering organizations are providing cash and in-kind support for the project.

#### MAKING STATE GOVERNMENT MORE CUSTOMER-FRIENDLY

#### Department of Environmental Protection Five Point Plan for Environmental Excellence

- X Under the **Small Business Compliance Assistance Policy**, violations that are discovered while a small business is receiving assistance from the DEP are not subject to enforcement actions, as long as the violations are corrected within 90 days. This policy, which applies to air, water, land, and solid and hazardous waste regulations, allows small businesses to utilize DEP as a compliance and technical assistance resource.
- X The Small Business Technical Assistance Program, a non-regulatory program focusing on education and outreach to assist small business in complying with the Clean Air Act, has been expanded to include hazardous waste issues. Expansion of this program is expected to result in greater rates of compliance, reduced pollution and in some instances cost savings for small businesses.
- O Coordinated Department-Wide Initiatives for Small Business. A pilot Model Facility Program for gasoline stations will begin in March 1997. The program simplifies environmental requirements and rewards environmental excellence. Also DEP's Industry Partnership with commercial printers is underway. To date, DEP staff have been trained by a printing industry consultant and have performed several on-site assessments. DEP staff are developing a guide regarding compliance and waste reduction issues for printers. Casco Bay has been targeted for a Watershed Partnership, in which DEP will provide small businesses with pollution prevention information so that they can reduce or eliminate activities that negatively impact water quality within the watershed.
- X A step has been added to DEP's formal rulemaking process, whereby all proposed rules will be reviewed by the **Pollution Prevention Advisory Committee**, Small Business Technical Assistance Program staff and small Business Ombudsman, for their impact on small business. This step will also ensure that the regulated community receives adequate notice of rulemaking and is provided with an opportunity to provide input.
- O A strategic plan for **Promotion of Environmental Services and Technology** has been developed. The plan emphasizes developing membership of the Environmental Business Council of Maine, market development and technology development.

#### **Reducing Paperwork:**

- X Legislation allowing combined reporting for unemployment contributions and income tax withholding was enacted by 117th Legislature and signed into law by Governor King (Public Law 1995, Chapter 657). The registration process will also be combined. The law takes effect beginning January 1, 1997.
- O The Bureau of Taxation has proposed a **Sales Tax Short Form** to cut the form in half and enable approximately 70% of Maine businesses, primarily small businesses, to file a much reduced easy-to-calculate return. The short form is expected to be in use in February 1997.
- O During the fall of 1995, businesses (primarily small businesses) were interviewed regarding reporting requirements. Data gathered via interviews was reported to the Maine Quality Council. The **Streamlined Business Reporting Team** is now conducting an inventory of State agency business reporting requirements. Ultimately the team will make recommendations on reporting improvements and reductions.
- X The Bureau of Taxation's Audit Group Cooperative Compliance Review process, which applies to large industrial users, has been modified and expanded to include small to mid-sized businesses. The Managed Audit Program approach is currently being applied to smaller businesses across the state, making the State audit process more efficient and educational for both businesses and State auditors.

#### **Protecting Home-Based Businesses:**

O Direct sellers are exempt from Maine's Unemployment Compensation Law. Emergency legislation excluding "Services Provided by Direct Sellers" from the Definition of Employment for Purposes of Unemployment Compensation was enacted by 117th Legislature and signed into law by Governor King (Public Law 1995, Chapter 612).

#### Advocacy/Outreach:

O A Small Business Advocacy Network has been formed. The purpose of this network among state agencies that interact with small businesses is to make state government more responsive and customer-friendly and to educate small businesses about the resources available to them. Small Business Advocates representing 15 state agencies have been appointed.

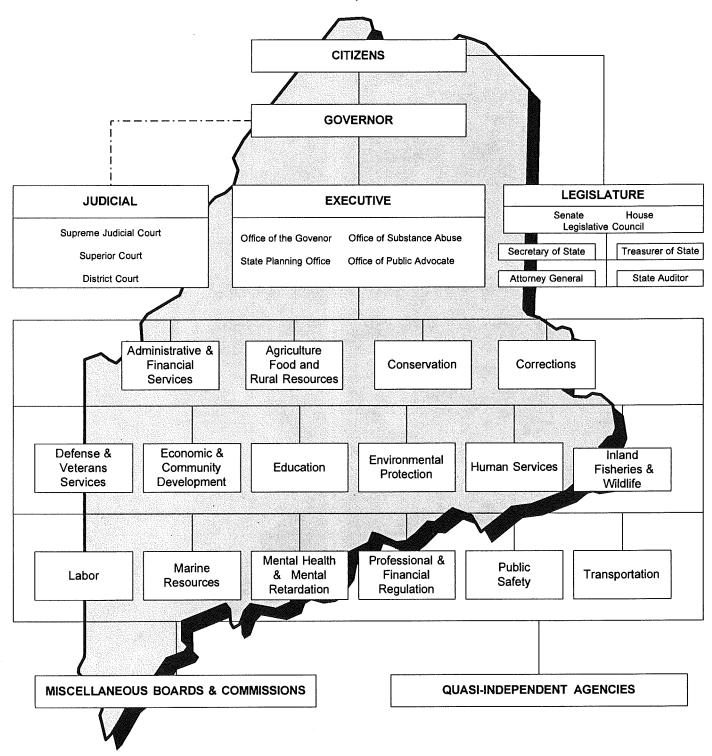

#### **Capital Formation & Job Creation Tax Credits:**

- X A \$5 million Small Enterprise Growth Fund was enacted by the 117th Legislature and signed into law by Governor King (PL 1995, Chapter 699). This fund will provide "patient" capital of up to \$150,000 for small businesses demonstrating the potential for high growth and public benefit. A \$6 million Agricultural Marketing Loan Fund was also enacted (PL 1995, Chapter 658). This fund will provide low-interest financing to Maine firms engaged in agriculture and aquaculture. These programs are to be capitalized by a combined \$11 million "Bond Issue to Encourage and Support Economic Development," which will go before Maine voters on November 5, 1996.
- O Encourage Private Capital Development for Entrepreneurs through Entrepreneurial Education Centers, offering noncredit courses, credit courses, and degrees in entrepreneurship and small business management. These Centers are under development at the University of Southern Maine and the University of New England. The establishment of Angel Capital Networks, which finances emerging entrepreneurial businesses, is predicated on the existence of these Centers.
- X Small Corporate Offering Registration (SCOR). A Securities Specialist position with the Department of Professional and Financial Regulation, Securities Division, was authorized by the Legislature and Governor. This position will assist small businesses and entrepreneurs in utilizing a simplified method of raising investment capital via small public offerings or Small Corporate Offering Registration.
- X A Statewide Educational Forum on Banking and Insurance, with workshops on Financing and Employee Issues was conducted at the May Blaine House Conference on Small Business. Both workshops will again be offered at the Governor's Regional Conferences on Small Business held throughout the fall of 1996.

NOTES

## NOTES TO THE FINANCIAL STATEMENTS June 30, 1996

Annual Report on the Budgetary Basis versus Annual Report consistent with Generally Accepted Accounting Principles (GAAP).

NOTE 1

#### SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The State of Maine issues two financial reports each year. One report is on a budgetary basis and one is on a GAAP basis. The budgetary report presents all funds of the primary government as they are recorded on the official accounting system maintained in the Bureau of Accounts and Control, as well as statistical and economic information. Accruals have been made to the proprietary funds.

The GAAP report presents financial information on the accrual basis of accounting, recognizing amounts owed but not paid at the end of the fiscal year, as well as amounts due but not received by the end of the fiscal year as necessary to conform to standards set by the Governmental Accounting Standards Board. Financial information for proprietary and trust funds are the same in the two reports.

#### **Basis of Presentation - Fund Accounting**

The State reports its financial position and results of operations in funds and account groups. A fund is a separate accounting entity with a self-balancing set of accounts. Cash and other financial resources, all related liabilities and residual equities, or balances, and changes therein, are recorded and segregated. Each fund's purpose is to carry on specific activities or attain certain objectives in accordance with special regulations, restrictions or limitations. Transactions between funds, if any, have not been eliminated.

Account groups are accounting entities used to provide accountability for the State's general fixed assets and general long-term obligations. They are not considered funds because they do not report resources available to finance current operations or debt that will require use of current resources.

The State has established the following fund categories, further divided by fund types and account groups:

#### **Governmental Funds:**

These funds account for the general governmental activities.

The General Fund is the primary operating fund. It is used to account for all governmental transactions not accounted for in another fund.

Special Revenue Funds account for specific revenue sources and the related current liabilities, other than expendable trusts or major capital projects, that are legally restricted to expenditures for specified purposes. Special revenue funds include the following:

Highway Fund is used to account for revenues derived from registration of motor vehicles, operator licenses, gasoline tax, and other dedicated revenues (except for federal matching funds and bond proceeds used for capital projects). The Legislature allocates this fund for the operation of various Department of Transportation programs including construction and maintenance of highways and bridges, for a portion of state police administration, and for other state programs.

Other Special Revenue Funds is a fund which a major portion consists of federal funds received. Also included are a grouping of various special purpose funds have been established on a self-supporting basis. Revenues are generated by taxes, licenses, fees, and federal matching funds and grants. Expenditures of these funds can only be made in accordance with restrictions imposed by the source of the revenues.

The *Debt Service Fund* is used to account for the accumulation of resources and payment of general obligation bond principal and interest from governmental resources as well as revenues collected from the Maine Veterans Home and the Maine Technical Colleges to pay principal and interest on revenue bonds.

Capital Project Funds account for financial resources used to acquire or construct major capital assets other than those financed by proprietary funds. These resources are derived primarily from proceeds of general obligation bonds. Also included in this fund type are proceeds from bond issues for uses other than major capital facilities.

#### **Proprietary Funds:**

These funds are used to account for ongoing activities that are similar to those found in the private sector. The measurement focus is on the determination of net income rather than the disclosure of current expendable financial resources. Proprietary funds include the following two fund types:

Enterprise Funds account for transactions related to resources received and used to finance self-supporting activities. These activities offer products and services on a user-charge basis to the general public.

Internal Service Funds account for transactions related to the financing and sale of goods or services between state agencies. The costs associated with these goods or services are billed to the recipient agency as user charges.

#### **Fiduciary Funds:**

These funds are used to account for assets held by the State acting as either a trustee or an agent for individuals, organizations or other funds. The fiduciary funds include:

Expendable Trust Funds account for those assets held in a trustee capacity where the principal and income may be expended in the course of the funds' designated operations.

Nonexpendable Trust Funds account for those assets held in a trustee capacity by the State for which only income derived from the trust principal may be expended for designated operations. The principal must be preserved intact.

Agency Funds account for assets the State holds on behalf of others. Agency funds are custodial in nature and do not involve measurement of operations.

#### General Long-Term Debt Account Group:

This account group is used to establish control and accountability for the long-term debt not accounted for in proprietary funds or nonexpendable trust funds. This includes unmatured, long-term debt related to General Obligation bonds, Certificates of Participation, capital leases, and other long-term financing arrangements.

#### Measurement Focus and Basis of Accounting

Governmental and expendable trust funds are accounted for using a flow of current financial resources measurement focus and the modified accrual basis of accounting. Revenues are recognized when they become both measurable and available. "Available" means earned and collected or expected to be collected within the current period or soon enough thereafter to be used to pay liabilities of the current period (2 months). The major taxes subject to accrual are individual income tax, and property tax on telecommunications equipment. Taxes on telecommunications equipment are recognized as revenue in the year for which they are levied. Such taxes are levied by April 1; prepayment of one-half of the telecommunications tax is due on June 1, and all other property taxes are due on October 1. Formal collection procedures begin on November 1. Unpaid property taxes become a lien on March 15 of the fiscal year for which they are levied. Revenues from other sources are recognized when received and expenditures are recorded when paid.

Proprietary fund types and nonexpendable trust funds are accounted for on a flow of economic resources measurement focus and the accrual basis of accounting. With this measurement focus, revenues are recorded when earned and expenses are recorded at the time liabilities are incurred. This measurement focus emphasizes the determination of net income. For all proprietary funds, the State applies all applicable Financial Accounting Standards Board (FASB) pronouncements issued on or prior to November 30, 1989, unless those pronouncements conflict with or contradict GASB pronouncements. Agency fund assets and liabilities are reported using the modified accrual basis of accounting. They are custodial in nature and do not measure results of operations or have a measurement focus.

#### Equity in Treasurer's Cash Pool

The State follows the practice of pooling cash and cash equivalents. Cash equivalents consist of short-term, highly liquid investments that are both readily convertible to known amounts of cash and are near maturity. These are comprised primarily of commercial paper, U.S. Treasury bills, bank Certificates of Deposit, and repurchase agreements. The balances pooled are reported at cost, which approximates market value. Interest earned on pooled cash is allocated to the various funds based on their average equity balances. "Cash - Other" includes petty cash and cash with the fiscal agent that will be used for bond payments.

#### **Investments**

Other investments are carried at the lower of cost or market except for investments of the deferred compensation plan, which are carried at market value. Donated investments are stated at fair market value at the date of donation.

#### **Deposits with United States Treasury**

Deposits represent unemployment tax receipts deposited with the United States Treasury. Funds are drawn down as benefits are paid.

#### Receivables

Accounts receivable in the governmental funds consist primarily of the accrual of taxes, amounts due back from service providers for various reasons, payments required to be made into the unemployment

security trust fund, and amounts due from private persons or organizations for goods and services furnished by the State.

Accounts receivable of the enterprise funds are primarily amounts due but not yet remitted from lottery sales by agents, and low interest agricultural loans made for the construction and modernization of storage facilities. All receivables are stated net of estimated allowances for uncollectible amounts, which are determined based upon aging of the accounts and past collection experience.

#### **Interfund Transactions**

During the course of operations, the State has numerous transactions between funds to finance operations, provide services, and construct assets. To the extent that certain transactions between funds were not completed as of June 30, 1996, interfund receivables or payables have been recorded. Receivables and payables resulting from transactions between funds are classified as "Due from Other Funds" or "Due to Other Funds" on the balance sheet. "Due to Other Funds" and "Due from Other Funds" will not balance because accruals have been made to proprietary funds but not to governmental funds.

"Advances To/From Other Funds" are long-term operating advances made by one fund to another. The advances are offset by a fund balance reserve to indicate they do not constitute expendable financial resources. These also will not balance because of accruals made to proprietary funds that are not made to governmental funds.

Title 28-A, § 64 and Title 8, § 387, of the M.R.S.A. require the Bureau of Alcoholic Beverages and Lottery Operations to transfer all net earnings to the general fund.

#### Inventories

The cost of materials and supplies of the governmental funds are reported as expenditures when purchased. Inventories of materials and supplies in the proprietary funds are determined by physical counts and by perpetual inventory systems. Proprietary fund inventories are stated at cost or average cost, except for the Bureau of Alcoholic Beverages which maintains its inventory on a current replacement cost basis which is not in conformity with GAAP, but approximates FIFO (first in, first out) cost.

#### **Fixed Assets**

For governmental funds, fixed asset acquisitions are recorded as expenditures in the acquiring fund.

Fixed assets of proprietary funds are accounted for in the acquiring fund. Depreciation is recorded on a straight-line basis over the assets' estimated useful lives which are 2-25 years for equipment and 10-40 years for buildings and improvements.

#### **Accrued Liabilities**

Accounts payable consist primarily of amounts due outside vendors for goods and services provided. Other liabilities in the governmental funds consist of miscellaneous loans payable and amounts in suspense awaiting identification. Other liabilities of proprietary funds include accrued payroll, compensated absences, deferred revenue, lottery prizes payable, actuarial liabilities of the workers' compensation and risk management funds, amounts owed pursuant to Certificates of Participation and other financing arrangements for fixed assets.

#### **Long-Term Debt**

Long-term bonded debt of governmental funds are recorded in the General Long-Term Debt Account Group. Long-term debt and other obligations financed by proprietary funds, as well as the related interest payments, are recorded as liabilities in the appropriate funds.

#### **Fund Balances**

Fund balances are reported as reserved where legally restricted for a specific future use. Otherwise, these balances are considered unreserved. The State has the following reservations:

Reserved for Encumbrances and Continuing Appropriations identifies unexpended amounts in appropriations and encumbrances which the Legislature has specifically authorized to be carried into the next fiscal year.

Working Capital Advances to Other Funds is an amount relating to a long-term receivable that cannot be appropriated.

Designated for Other Purposes identifies the amount of fund balance reserved for other specified purposes including working capital needs, long-term loans to other funds and contingency funds from which the Governor may allocate sums for various purposes.

Rainy Day Fund was set up to create a reserve for operating deficits or other emergencies. Fifty percent of the excess of total general fund revenues received over accepted estimates in that fiscal year goes from unappropriated surplus of the general fund to the rainy day fund. The maximum amount allowed by law is four percent of the total general fund revenues received in the immediately preceding fiscal year.

#### **Total Column-Memorandum Only**

The total column on the Combined Statement of Revenues, Resources, Expenditures and Changes in Fund Balances (Exhibit II) is captioned "memorandum only" to indicate that it is presented only to facilitate financial analysis. Data in this column does not present a consolidated financial position. Interfund eliminations have not been made in the aggregation of this data.

#### **Accounting Disclosures**

Prior to fiscal year 1996, expenditures for construction of fixed assets for certain transportation related enterprise funds were recorded in the special revenue fund and capital projects fund and transferred to the enterprise funds as contributed capital upon completion. Beginning in fiscal year 1996, the expenses of construction are capitalized as construction in progress within the enterprise funds and transferred to the appropriate fixed asset category upon completion in order to improve accountability for fixed assets in the transportation-related enterprise Funds. The effect of this change increased the amount of fixed assets and contributed capital reported in the enterprise funds by \$13.5 million. The change has no effect on net income or retained earnings.

Three new funds were created in the fiscal year ended June 30, 1996:

1. An Enterprise Fund was created pursuant to 5 M.R.S.A. § 1737, to provide risk management insurance to eligible entities that were not part of the primary government (Note 11). Prior to 1996 these activities were accounted for in one Internal Service Fund. The separation was done to allow the State to more closely match services with the cost of providing those services. The

effect on retained earnings was a decrease in the InternalService Fund and an increase in the Enterprise Fund of \$3.6 million.

- 2. An Internal Service Fund was created to account for financing activities related to Workers' Compensation, and to establish a more actuarially sound method for accumulating resources to cover related liabilities. General government Workers' Compensation activities were previously reported within the Governmental Funds and General Long-Term Debt Account Group. The effect is a decrease in retained earnings in the Internal Service Funds of \$63.9 million.
- 3. Prior to July 1, 1995, the Maine State Retirement System (MSRS) administered post retirement health care benefits for the State. As of July 1, 1995, Title 5, § 17152 effectively repealed the M.S.R.S.'s administration of the program. It is now accounted for as an internal service fund.

#### Note 2

#### **BUDGETARY PROCESS**

In accordance with statute, the Governor presents a proposed budget biennially to the Legislature. The Legislature enacts the budget through a series of specific appropriation and allocation bills for the general fund and special revenue funds. Effective November 27, 1995, a state constitutional amendment provides the Governor a "line item" veto of dollar amounts, allowing a dollar substitution for those amounts disapproved as long as the appropriation or allocation is not increased either in that line or in any other line in the legislative document. Another constitutional amendment requires the State to fund at least 90 percent of the annual cost of future mandates imposed on local governments, unless overridden by a two-thirds vote of the elected members in both the House and Senate.

Once passed and signed, the budget becomes the financial plan. It sets forth proposed expenditures for all departments and agencies, interest and debt redemption charges, and expenditures for capital projects to be undertaken and executed during each fiscal year. The budget also sets forth the anticipated revenues and any other additional means of financing expenditures proposed for each fiscal year.

Budgetary control is maintained at the account level at which appropriations and allocations are approved by the Legislature, including those pertaining to the required funding of mandates imposed by the State on local municipalities, principally through a quarterly allotment system. Budget revisions during the year, reflecting program changes or intradepartmental administrative transfers, may be effected with Executive and Legislative branch approval. Except in specific instances, only the Legislature may transfer appropriations between departments. In order to provide sufficient funding for several programs during the year ended June 30, 1996, supplemental appropriations of \$2.5 million were required.

Encumbrance accounting, which requires that purchase orders, contracts and other commitments be recorded to reserve a portion of the appropriation or allocation for expenditure, is employed as an extension of formal budgetary control. Appropriated and allocated balances are available for subsequent expenditure to the extent that encumbrances have been approved by the end of the fiscal year. Since they do not constitute expenditures or liabilities, encumbrances outstanding at year-end are reported as

reservations of fund balances representing those portions of fund balances that are not available for allocation or expenditure or that are legally segregated for specific future uses. Unencumbered appropriations in the General Fund and in the Highway Fund lapse at year-end unless, by law, they are carried forward to a subsequent year. The State's budget is prepared primarily on a cash basis and differs from Generally Accepted Accounting Principles.

NOTE 3

#### **DEFICIT FUND BALANCES/RETAINED EARNINGS**

Two Internal Service Funds have fund deficits at June 30, 1996. There was a deficit of \$927,000 in the Retained Earnings of the Telecommunications Fund and a deficit of \$46.2 million in the Workers' Compensation Fund. The deficit in the Workers' Compensation fund reflects the accrual of the actuarial liability of \$50.2 million. The Telecommunications deficit is being reduced by an increase in rates charged.

Note 4

#### **DEPOSITS AND INVESTMENTS**

The deposit and investment policies of the State of Maine, Office of the Treasurer, are governed by Title 5 of the Maine Revised Statutes Annotated. Per § 135, "The Treasurer of the State may deposit the money, including trust funds of the State, in any of the banking institutions or trust companies or state or federal savings and loan associations or mutual savings banks organized under the laws of this State or in any national bank or banks or state or federal savings and loan associations located in the State..." "When there is excess money in the State Treasury which is not needed to meet current obligations, the Treasurer of State may invest, with the concurrence of the State Controller or the Commissioner of Administrative and Financial Services and with the consent of the Governor, those amounts in bonds, notes, certificates of indebtedness or other obligations of the United States which mature not more than 24 months from the date of investment or in repurchase agreements secured by obligations of the United States which mature within the succeeding 24 months, prime commercial paper, tax-exempt obligations or bankers' acceptances." State funds may also be deposited "...as may be required by the terms of custodial contracts or agreements as may need be negotiated in accordance with the laws of this State."

Investment policies of the permanent trust funds are governed by Title 5, § 138. According to this statute, "The Treasurer of State, with the approval of the Commissioner of Administrative and Financial Services, the Superintendent of Banking and the Attorney General, shall invest all permanent funds held in trust by the State in such securities as are legal investments for savings banks under Title 9-B.... For purposes of this section, those investments include, without limitation, shares of an investment company registered under the federal Investment Company Act of 1940, whose shares are registered under the United States Securities Act of 1933, only if the investments of the investment company are limited to obligations of the United States or any agency or instrumentality, corporate or otherwise, of the United States or any agency or instrumentality, corporate or otherwise, of the United States."

The investment policies of the Percival P. Baxter Expendable Trusts, as stated in the late Governor's last will and testament, provide only that the funds may be managed, invested, reinvested and administered within the trustee's discretion..

The State Treasurer may also participate in the securities loan market by lending state owned bonds, notes or other certificates of indebtedness of the federal government if they are fully collateralized by treasury bills or cash. In addition, the State Treasurer may invest up to \$4 million in lending institutions at a 2% lower-than-market yield, provided the financial institutions lend operating funds (at least equal to the amount of the deposit) to agricultural enterprises in this state at 2% interest rate reductions. The Treasurer may also invest up to \$4 million in lending institutions at a 2% lower-than-market yield, provided the financial institutions lend operating funds (at least equal to the amount of the deposits) to commercial enterprises approved by the Treasurer at 2% interest rate deductions.

No amounts exceeding 25% of the capital, surplus, and undivided profits of any trust company or national bank or 25% of the reserve fund and undivided profits of a mutual savings bank or state or federal savings and loan association shall be on deposit therein at any one time. The restriction does not apply to deposits subject to immediate withdrawal to meet the payment of any bonded debts, or interest, or to pay current bills or expenses of the State. Also exempt are those deposits secured by the pledge of certain securities as collateral, and deposits fully covered by insurance. The collateral shall be in an amount equal to the deposit. The value of the securities pledged shall be determined by the Treasurer of State on the basis of market value.

A cash and short-term investment pool is maintained and is available for use by all funds and certain quasi-state agencies. Each fund type's net equity in this pool is displayed on the combined balance sheet as "Equity in Treasurer's Cash Pool." Equity of quasi-state agencies is reported in the Trust and Agency Funds. The pooled cash and short-term investments at June 30, 1996 are as follows:

#### Investments of the Treasurer's Cash Pool

June 30, 1996

(Dollars in Thousands)

Repurchase Agreements	\$ 137,019
Certificates of Deposit	19,306
Treasury Bills	83,920
Commercial Paper	105,588
Total	\$ 345,833

#### **Short-Term Financing**

In July 1995, the State issued \$182 million of general obligation tax anticipation notes (TANs) at 4.5% with a maturity date of June 28, 1996. TANS are authorized by Article 9 Section 14 of the Maine State Constitution. The July 1995 TANs were issued to improve the State's cash position.

During fiscal year 1996, bond anticipation notes (BANs) totaling \$26.8 million were issued by the State with interest rates ranging from 3.7% to 4.1% and a maturity date of May 15, 1996. The BANs were issued as a temporary financing vehicle for new projects that were ultimately financed with bond

issuance proceeds. The BANs are backed by the full faith and credit of the State. As of June 30, 1996, there are no BANs outstanding.

#### Note 5

#### LONG-TERM OBLIGATIONS

Liability for bonds is recorded in the General Long-Term Debt Account Group. Other general long-term obligations recognized are its obligations under Certificates of Participation, capital leases, and other financing arrangements.

#### **General Obligation Bonds**

Bonds are issued pursuant to Sections 14, 14-A, 14-B, 14-C, and 14-D of Article 9 of the Maine State Constitution. Bonds issued pursuant to Section 14 have been authorized by two-thirds of the House and Senate and by the citizens of Maine through bond referenda. They are general obligation bonds, backed by the full faith and credit of the State. These bonds are retired through the use of appropriations and are repaid in annual installments beginning not more than one year after issuance. Debt service principal and interest payments for General Fund and Highway Fund bonds are appropriated and paid from the General Fund and Highway Fund, respectively.

Self-liquidating bonds are general obligation bonds issued for quasi-state agencies. Transfers from the Maine Veterans' Home, state colleges and vocational institutions are made for the required debt service.

During fiscal year 1996, bonds were issued in the amount of \$76.7 million for removal of oil storage tanks, clean up of hazardous substance sites, construction of water pollution control facilities, capping of solid waste landfills, construction and renovation of correctional facilities, improvements to airport, cargo port and ferry service facilities, training equipment for the Maine Technical College System, housing for people with special needs, and statewide telecommunications equipment.

The following schedule presents the changes in general obligation bonds:

#### **Changes in General Obligation Bonds**

June 30, 1996

(Dollars in Thousands)

	Balance July 1, 1995	Retirements	Additions	Balance June 30, 1996
Cananal Evand				• • • • • • • • • • • • • • • • • • • •
General Fund	\$ 377,055	\$ 59,297	\$ 51,700	\$ 369,458
Highway Fund	136,950	17,510	25,000	144,440
Self-Liquidating	2,055	<u>263</u>	-	1,792
Total	<u>\$ 516,060</u>	<u>\$ 77,070</u>	<u>\$ 76,700</u>	<u>\$ 515,690</u>

The future debt service requirements for the bonds are as follows:

#### Future Debt Service on General Obligation Bonds

June 30, 1996

#### (Dollars in Thousands)

Fiscal Year	Principal	Interest	Total
1997	\$ 88,180	\$ 27,214	\$115,394
1998	71,305	22,689	93,994
1999	65,735	18,985	84,720
2000	59,705	15,545	75,250
2001	57,445	12,218	69,663
Thereafter	173,320	22,219	195,539
Total	<u>\$ 515,690</u>	<u>\$ 118,870</u>	\$ 634,560

Any bonds not issued within five years of the date of ratification may not be issued after that date. Within two years after expiration of the five year period, the Legislature may extend, by a majority vote, the five year period for an additional five years or may deauthorize the bonds. If the Legislature fails to take action within those two years, the particular bond issue shall be considered to be deauthorized.

A summary of general obligation bonds authorized by voters and unissued at June 30, 1996, follows:

### General Obligation Bonds Authorized and Unissued June 30, 1996

#### (Dollars in Thousands)

	Unissued	New			Unissued

Totals	\$36,801	\$91,900	<b>\$1,251</b>	\$76,700	\$50,750

#### Certificates of Participation, Capital Leases, and Other Financing Arrangements

Since 1988, the State has entered into various financing arrangements for the construction of certain state buildings, improvements other than buildings, and technology equipment, through the issuance of Certificates of Participation, capital leases, and other financing arrangements. The Certificates of Participation, capital leases, and other financing arrangements do not constitute a debt or liability within the meaning of any Constitutional or statutory limitation, or a contractual obligation in excess of amounts appropriated, and the State has no continuing legal or moral obligation to appropriate money for future minimum payments or other obligations under any agreement. Each agency's obligation to make its minimum payments or other obligations under its agreement are subject to and dependent upon appropriations being made by the Legislature.

The financing arrangement between the State and the Maine Court Facilities Authority is presented in the schedule below but is not included in the General Long-Term Debt Account Group. On a GAAP basis this debt is considered a capital lease of the State and on the statutory basis it is considered an operating lease.

### Changes in Certificates of Participation, Capital Leases, and Other Financing Arrangements June 30, 1996

#### Certificate of Participation and Other Financing Arrangements - Proprietary Funds

The State has entered into various financing arrangements, through its Internal Service Funds, for the purchase of equipment through the issuance of Certificates of Participation and other financing arrangements. The liability for payment of these obligations and the related assets are recorded directly in the fund from which payment will be made.

The schedule of Certificates of Participation and other financing arrangements for the Proprietary Funds are as follows:

### Future Debt Service on Certificates of Participation and Other Financing Arrangements for Proprietary Funds

Total Fixed Assets	<u>\$ 53,597</u>	<u>\$ 48,206</u>

#### Note 7

#### MAINE STATE RETIREMENT SYSTEM

The following selected financial information was reported in separately issued, audited financial statements. The Maine State Retirement System has been audited by Coopers & Lybrand L.L.P., for the year ended June 30, 1996. The financial statements of the Maine State Retirement System are available from the Maine State Retirement System, 2 Central Plaza, Augusta, ME 04330. The information presented below includes all activity of the Retirement System. Required information separately presented for the State is not available.

#### Plan Description

The Maine State Retirement System (System) is a body corporate and politic and an incorporated public instrumentality of the State. It is the administrator and agent for a multiple-employer defined benefit public employee retirement system established and administered under Title 5 M.R.S.A., Chapter 421, 423 and 425. The System provides pension, death and disability benefits to its members. Members include state employees; public school employees who are defined by Maine law as teachers and for whom the State pays the employer retirement contributions; and employees of approximately 250 local municipalities and other public entities in Maine, each of which contracts for participation in the System under provisions of the relevant statutes. The System acts as the common investment agent for the State and all other participating entities. At June 30, 1996, the approximate membership consisted of:

Active Vested and Non-Vested Members	47,494
Inactive Members	51,366
Retirees and Beneficiaries	27,031
Other Benefit Recipients	1,989
Total Members, Retirees and Beneficiaries	127,880

The System's retirement programs provide defined retirement benefits based on members' average final compensation and creditable service. Vesting occurs upon the earlier of ten years' service credit or the earning of one year's service credit immediately preceding retirement at or after normal retirement age.

Normal retirement age is 60 or 62, determined by whether a member had at least 10 years of creditable service on June 30, 1993. The monthly benefit is reduced by a statutory prescribed factor for each year that a member is below the normal retirement age. The System also provides death and disability benefits, which are established by statute for state and public school employees, and by contract with other participating employers under applicable statutory provisions.

Upon termination of membership, members' accumulated employee contributions are refundable with interest, credited for a five year period for non-vested members and through the date of refund for vested members. Withdrawal of accumulated contributions results in forfeiture of all benefits. The annual rate of interest credited to members' accounts is set by the System's Board of Trustees and is currently 6.5%.

In the event that a participating entity withdraws from the System, its individual employee-members can terminate membership or remain contributing members. The participating entity remains liable for contributions sufficient to fund benefits for its already retired former employee-members, for its terminated vested inactive members, and for those active employees, whether or not vested, who remain contributing System members.

Retirement benefits are funded by contributions from members and employers as well as earnings from investments. Disability and death benefits are funded by employer contributions and investment earnings. Member and employer contributions are a percentage of applicable member compensation. Member contribution rates are defined by law and depend on the terms of the plan under which a member is covered. Employer contribution rates are determined by annual actuarial valuations.

The System also provides group life insurance under a plan that is administered by a third party insurance company. Premiums are set and collected by the System. Benefit payments are made by the insurance company from premiums collected. Any shortfall of benefit payments over premiums collected is remitted by the System to the insurance company.

#### **Funding Status and Progress**

The amount shown in the next schedule as "Pension Benefit Obligation" is a standardized disclosure measure of the present value of pension benefits, adjusted for the effects of projected salary increases, estimated to be payable in the future as a result of employee service to date. The measure is the actuarial present value of credited projected benefits and is intended to help users assess the System's funding status on a going-concern basis, assess progress made in accumulating sufficient assets to pay benefits when due, and make comparisons among public employee retirement plans. The measure is independent of the actuarial funding method used to determine contributions to the System.

The pension benefit obligation was determined as part of actuarial valuations at June 30, 1996, and 1995. Significant actuarial assumptions used include: a) a rate of return on the investment of assets of 8% per year compounded annually, b) projected cost of living increases for eligible benefit recipients of 4% per year compounded annually, attributable to inflation, and c) projected salary increases of 6% to 10% per year attributable to seniority/merit and inflation.

At June 30, 1996, the unfunded pension benefit obligation was:

#### **Unfunded Pension Obligation**

June 30, 1996

(Dollars in Millions)

Pension Benefit Obligation:	
Retirees and Beneficiaries Currently Receiving Benefits and Terminated	
Employees Not Yet Receiving Benefits	\$ 3,037.7
Current Employees:	
Accumulated Employee Contributions, Including Allocated Investment Income	1,123.4
Employer-Financed Vested	1,200.5
Employer-Financed Non-vested	1,360.5
Total Pension Benefit Obligation	6,722.1
Net Assets Available for Benefits, at Cost	<u>3,065.1</u>
Unfunded Pension Benefit Obligation	\$3,657.0

In addition, the System's Group Life Plan has unfunded benefit obligations of approximately \$77 million, which consists of the present value of benefit obligations of \$104 million, offset by net assets available for benefits of \$27 million. The present value of the benefit obligation was calculated with an assumed discount rate of 8%.

#### Contributions Required and Made

The System's funding policy provides for periodic employer contributions at actuarially determined rates. Expressed as percentages of annual covered payroll, these rates are sufficient to accumulate adequate assets to pay benefits when due. Level percentages of payroll employer contribution rates are determined using the entry age normal actuarial funding method. The System also uses the level percentage of payroll method to amortize the unfunded liability of the State and teacher plan(s) over a closed 35 year period.

Plan members are required by statute to contribute 7.65% of earnable compensation or have "pickup" contributions made at a rate of 7.65% of earnable compensation. "Pickup" contributions are defined by statute as member contributions which are assumed and paid by the employer through a reduction of members' salaries for services rendered in lieu of employee contributions. The contribution rate differs for special groups of state employees.

Contributions totaling \$356.8 million (\$253.7 million employer and \$103.1 million employee), were made in accordance with actuarially determined contribution requirements established through an actuarial valuation performed at June 30, 1996.

Significant actuarial assumptions used to compute contribution requirements are the same as those used to compute the standardized measure of the pension obligation.

#### **Trend Information**

Historical trend information gives an indication of the progress made in accumulating sufficient assets to pay benefits when due. For 10 year historical supplementary information, see separately issued MSRS

financial statements. The standardized measure of the pension obligation is available beginning with fiscal year 1995.

The following schedule is a two-year analysis of the funding progress of the System.

### Funding Progress of the Maine State Retirement System June 30, 1996

(Dollars in Thousands)

	Net Assets Available for Benefits	Pension and Group Life Benefit Obligation	Percentage <u>Funded</u>	Unfunded Pension and Group Life <u>Benefit</u> Obligation	(Unaudited) Annual Covered <u>Payrol</u> l	(Unaudited) Unfunded Pension and Group Life Benefit Obligation as a Percentage of Covered Payroll

	Member Contributions	State and Local Agency Contributions	(Unaudited) Member, State and Local Agency Contributions as a Percentage of Annual Covered Payroll	Net Investment <u>Income</u>	Total <u>Revenues</u>
1996	\$ 103,117	\$ 253,647	27.1%	\$ 291,724	\$ 648,488
1995	106,727	244,106	(A)	164,582	515,415

#### (A) Information regarding annual covered payroll is not available.

In November 1995, voters approved a Constitutional amendment that requires the State to fund the unfunded liabilities which existed as of June 30, 1996, in the state and teacher plan(s). The funding must commence by June 30, 1997, over a period not to exceed 31 years. The creation of new unfunded liabilities is prohibited, except those arising from experience losses. Such liabilities must be funded over a period of not more than ten years. In addition, the amendment requires use of actuarially sound current cost accounting, reinforcing the existing statutory requirements.

#### Note 8

#### OTHER POST EMPLOYMENT EMPLOYEE BENEFITS

#### Post Retirement Health Care Benefits

In addition to providing pension benefits, the State of Maine funds health care benefits for most retirees. Public Laws of 1995, Chapter 368 § G-3 and § G-4 repealed the provision that required payment by the Maine State Retirement System for retirees' health insurance premiums. The State subsequently assumed administrative responsibility for post retirement health care insurance premium payments.

Any employee who is eligible for group health insurance pursuant to 5 M.R.S.A. § 285 is eligible for retiree health benefits, including: most State employees and Legislators, and employees of the Maine Turnpike Authority, the Maine Technical College System, the Maine Maritime Academy and the Maine State Retirement System. Specifically excluded (5 M.R.S.A. § 285 1-B) are members of the Maine Municipal Association and the Maine Teachers Association, and employees of counties and municipalities and their instrumentalities. Benefits for teachers are addressed in 20-A M.R.S.A. §13451 et seq.; the State pays 25 % of post retirement health insurance premiums for teachers. The State pays 100% of post retirement health insurance premiums for other eligible individuals who were first employed before July 1, 1991. A pro rata portion, ranging from 0% for retirees with less than 5 years participation to 100% for retirees with 10 or more years of participation, is paid for eligible individuals first employed after July 1, 1991. Retirees eligible for Medicare are covered under supplemental insurance policies. Coverage for retirees who are not eligible for Medicare includes basic hospitalization, supplemental major medical and prescription drugs, and costs for treatment of mental health, alcoholism and substance abuse.

Funds for post retirement health care benefits are transferred on a weekly basis to an Internal Service Fund account. Expenditures are recognized as premiums are paid, using funds generated by current employer contributions. For the fiscal year ended June 30, 1996, there were 6,787 retired eligible State and Technical College employees and 7,737 retired teachers.

The State does not segregate payments to insurers by funding source. In 1996, \$16.3 million was expended for premium payments, including direct payments by the Maine State Retirement System. The amount provided by participants cannot be determined: generally, the portion of premium charges that are not paid by the State for retired teachers is borne by the individual teachers. A balance of \$4.9 million remained in the newly-created retiree health Internal Service Fund.

Retiree health care benefits are funded on a pay-as-you-go basis. During the fiscal year ended June 30, 1996, funds were provided by the following sources:

# Health Insurance Premiums Paid Into the Retiree Health Insurance Fund June 30, 1996

(Dollars in Thousands)

			Technical
		State	College
	Teachers	Employees	<b>Employees</b>
Maine State Retirement System (Funds Remaining)	\$ 2,500	\$ 7,900	\$ -
Employer Contribution*	500	9,300	800
Legislative Appropriation	657	-	-
Total	\$3,157	\$17,200	\$ 800

<sup>\*</sup> A rate of 3.8%, reduced to .53% for State employees, and a rate of 3.8% for Technical College System employees, were applied to current payroll.

#### Postretirement Life Insurance Benefits

In addition to providing pension and health care benefits and in accordance with statutory authority the State of Maine through the Maine State Retirement System (MSRS) provides certain life insurance benefits for retired employees who, as active employees, participated in the Group Life Insurance Program for a minimum of 10 years. Payments of claims are made by MSRS from a fund containing a percentage of the monthly State paid basic life insurance premiums of active State employees, basic life insurance premiums of active teachers and earnings on the investments of the fund. In addition to the cost of claims, the State pays a monthly retention fee to a life insurance company. Retired State employee and retired teacher life insurance claims totaled \$2.8 million for the fiscal year ended June 30, 1996. The number of participants eligible to receive benefits at fiscal year ended 1996 cannot be readily determined.

#### Other Postemployment Benefits

Upon termination from active employment with the State, individuals may qualify for continuation of health and dental benefits, for an 18 month period after date of termination. This coverage is mandated by and complies with the Consolidated Omnibus Budget Reconciliation Act (COBRA). Individuals participating under COBRA will be responsible for the entire monthly premium, plus an additional 2% to cover administrative costs. There were 100 former employees covered under COBRA at June 30, 1996.

#### NOTE 9

#### **DEFERRED COMPENSATION**

The State offers its employees a deferred compensation plan created in accordance with Internal Revenue Code § 457. The plan, available to all employees, permits them to defer a portion of their salary until future years. The deferred compensation is not available to employees until the employee retires, resigns, or otherwise leaves State employment; becomes disabled, and his claim is approved by the Advisory Council; or suffers an unforeseen financial emergency.

All amounts of compensation deferred under the plan, all property and rights purchased with those amounts, and all income attributable to those amounts, property, or rights are (until paid or made available to the employee or other beneficiary) solely the property and rights of the State (without being restricted to the provisions of benefits under the plan), subject only to the claims of the State's general creditors. Participants' rights under the plan are equal to those of the general creditors of the State in an amount equal to the fair market value of the deferred account for each participant.

The financial liability of the State is limited in each instance to the payment of premiums and the purchase of shares under the deferred compensation program while the enrolled remains a State employee, and only to the amount of the compensation or portion of compensation held for payment of such premiums or shares. In the past, the plan assets have been used only to pay benefits. Events subsequent to June 30, 1996, mandate that these funds be held in trust for employees, eliminating the validity of any claims by the State's creditors.

#### NOTE 10

#### SELF-INSURANCE

#### Risk Management

The State maintains several types of self-insurance plans. These include property, vehicle, boat and aircraft, tort, civil rights, employee bonds, police professional, and workers' compensation.

The plan allocates the cost of providing claims servicing and claims payment by charging a "premium" to each agency based on a review of past losses and estimated losses for the current period. All risk financing liabilities are reported when it is probable that a loss has occurred and the amount of the loss can be reasonably estimated. Claims liabilities are actuarially determined based on estimates of the ultimate cost of claims, including future claim adjustment expenses, that have been incurred but not reported and claims reported but not settled. Claims liabilities are reevaluated periodically to take into consideration recently settled claims, the frequency of claims, and other economic and social factors. Because actual claims liabilities depend on such complex factors as inflation, changes in legal doctrines, and damage awards, the process used in computing claims liability does not necessarily result in an exact amount.

Commercial insurance has been purchased for losses that exceed the following limits: buildings, \$1 million; boat hulls, \$100,000; aircraft, \$50,000; and boat liability, \$10,000. Aircraft liability is insured from the first dollar. There is a fund depletion policy that contributes money to the fund when the year's claims exceed \$2.5 million in the aggregate for police professionals, vehicles, civil rights, and tort.

Annuity contracts have been purchased for the purpose of settling certain claims. Information is insufficient to determine the amount of the claims liabilities outstanding for which annuity contracts have been purchased in the claimant's name, and the amount of the related liabilities which have been removed from the balance sheet.

At June 30, 1996, \$2.41 million was reported as the estimated claims payable for the State's self-insurance plan. The discounted amount is \$2.18 million and was calculated based on a 6% yield on investments. There have not been any significant reductions in insurance since the last fiscal year.

Changes in the balance of claims and judgments liabilities during fiscal 1996 were:

#### Risk Management Fund Claims Payable

June 30, 1996

(Dollars in Thousands)

	<u>Amount</u>
Liability at Beginning of Year	\$ 1,727 *
Current Year Claims and Changes in Estimates	1,554
Claims Payments	(1,102)
Liability at End of Year (discounted)	\$ 2,179

<sup>\*</sup> Prior to Fiscal Year 1996, the Risk Management Internal Service Fund and the Public Entity Risk Pool Enterprise Fund (Note 11) were reported as one fund. As a result, liability information for the prior year is not available for the individual funds. The Internal Service Fund's pro-rated liability (not discounted) is \$1.7 million as of the beginning of the year.

#### **Unemployment Insurance**

The State is self-insured for unemployment compensation. As a direct reimbursement employer for all unemployment compensation the State recognizes all costs for unemployment compensation as claims are paid. These costs totaled \$1.64 million for the fiscal year ended June 30, 1996.

#### Workers' Compensation

Workers' compensation is accounted for in an Internal Service Fund. Interfund premiums are treated as quasi-external transactions. Each State agency is charged a "premium" based on the number of employees to be covered plus an added amount to reduce the unfunded liability. The Legislature, Legislative Council and Law Library employees are self-insured for workers' compensation purposes. The State assumes the full risk of all claims filed for workers' compensation.

Until June 30, 1995, the Workers' Compensation Division initially made claims payments on a pay as you go basis and was then reimbursed for the payment amount by the individual State department whose employee was injured and filed the claim. The claims liability was recorded in the General Long-Term Debt Account Group. It was organized as an Internal Service Fund on July 1, 1995. The Workers' Compensation Internal Service Fund assumed all liability for outstanding losses that previously were paid by individual departments. Annuity contracts have been purchased for the purpose of settling certain claims. Information is insufficient to determine the amount of the claims' liabilities for which annuity contracts have been purchased in the claimant's name, and the amount of the related liabilities which have been removed from the balance sheet.

Based on actuarial calculations, as of June 30, 1996, the State is liable for unfunded claims and incurred but not reported claims. The claims total approximately \$68.9 million. The discounted amount is \$50.2 million and was calculated based on a 6% yield on investments.

Changes in the balance of claims and judgments liabilities during fiscal 1996 were as follows:

#### Workers' Compensation Liability

June 30, 1996

(Dollars in Thousands)

Liability at Beginning of Year	Amount \$ 63,874*
Current Year Claims and Changes in Estimates	(1,318)
Claims Payments	(12,356)
Liability at End of Year	\$ 50,200

<sup>\*</sup> Prior to Fiscal Year 1996, the Workers' Compensation liability was disclosed in the Notes to the Financial Statements at its face value, although discounted figures were recorded in the General Long-term Debt Account Group. As a result, prior year information is not comparable and not presented.

#### Health Care

The State of Maine's health insurance plan provides insurance coverage for active employees of the State as well as several quasi-governmental agencies. The State is insured under a retrospectively rated insurance policy from a commercial insurer as a group plan with the Maine Technical College System, the Maine Turnpike Authority and other smaller quasi- governmental entities.

Rates were set to generate working premiums totaling \$98.3 million of which the State group represented approximately 88%. If actual loss experience for the period required less then \$98.3 million of working premiums, then a credit would be due from the carrier. If loss experience for the period required more then \$98.3 million of working premiums then the participant groups would be liable for an additional 10% or \$9.8 million. The insurance carrier is responsible for loss experience beyond \$108.1 million.

At June 30, 1996, the contract cycle with the health care insurer had ended. At the termination of that cycle, a final cost settlement is to be determined. The final settlement had not been concluded as of the report date and therefore any receivable or payable that may result had not been determined but is not believed to be material.

#### Disability

State law allows confidential employees who become temporarily disabled to receive 66.67% of their salary for up to 335 calendar days. There were approximately 853 confidential employees at June 30, 1996. The expenditure amount for this benefit cannot be determined.

#### **Note 11**

#### PUBLIC ENTITY RISK POOL

The State provides risk management insurance advice and services to public instrumentalities other than State departments or agencies. If there is a strong public need; coverage is otherwise unavailable; or is offered only at unreasonable cost to that person or entity; and if the Governor has approved that person or entity for insurance services, they are eligible for such services. These instrumentalities are primarily educational entities such as The University of Maine System, the Maine Technical College System, and

the Maine Maritime Academy. During the fiscal year ended June 30, 1996, approximately 50 individual persons or entities participated in this pool.

The risk pool is accounted for in an Enterprise Fund. Prior to FY 1996, this fund was combined with the self-insurance fund for State agencies (Note 12). The fund was split by allocating the unused contributions to the respective funds. The risk pool participates on an equal basis in the commercial insurance and fund depletion policy described in the Internal Service Fund Statute (see Note 10). It provides that persons or entities participating in the State administered fund do not have a right of recovery except against the assets of the State administered fund and do not have recourse against any State assets or employees. It also provides that the assets of the fund may not be transferred to meet a budgetary shortfall or pay uninsured expenses.

Claims liabilities are actuarially determined based on estimates of the ultimate cost of claims, including future claim adjustment expenses, that have been incurred but not reported and claims reported but not settled. Because actual claims liabilities depend on such complex factors as inflation, changes in legal doctrines, and damage awards, the process used in computing claims liability does not necessarily result in an exact amount. A provision for inflation in the calculation of estimated future claims costs is implicit in the calculation. Reliance is placed both on actual historical data that reflects past inflation and on other factors that are considered to be appropriate modifiers of past experience. Anticipated investment income is considered in setting rates for the fund. Annuity contracts have been purchased for the purpose of settling certain claims. Information is insufficient to determine the future amount of the claims liabilities for which annuity contracts have been purchased in the claimants' name, and the amount of the related liabilities which have been removed from the balance sheet.

Based on actuarial calculations, as of June 30, 1996, \$336,000 is reported as the estimated claims payable for the administered risk pool. The discounted amount is \$306,000 and was calculated based on a 6% yield on investments. The estimated losses are based upon actual claims that have been submitted as well as claims incurred but not reported. The following schedule shows the changes in the reported liability since June 30, 1995.

### **Public Entity Risk Pool Claims Payable**

June 30, 1996

(Dollars in Thousands)

(Donais in Thousands)	
	<u>Amount</u>
Unpaid Claims and Claims Adjustment Expenses	
at Beginning of the Fiscal Year	<u>\$ 546</u>

#### **NOTE 13**

#### JOINT VENTURES

Joint ventures are independently constituted entities generally created by two or more governments for a specific purpose. The only material joint venture in which the State participates is the Tri-State Lotto Commission.

The Tri-State Lotto Commission (The Commission) was established in 1985 pursuant to passage into law of the Tri-State Lotto Compact by the States of Maine, New Hampshire and Vermont. The Commission

is authorized and empowered to promulgate rules and regulations regarding the conduct of lottery games, including the price or prices of tickets, the number and size of prizes for winning tickets, and the licensing of agents.

The Commission is composed of one member from each of the participating states. Each compact member, state lottery or sweepstakes commission appoints one of its members to serve on the Commission. Each member shall hold office at the pleasure of the appointing authority. The Commission shall elect a chairman from among its members, annually.

The Commission has designated that 50% of its operating revenue be aggregated in a common prize pool. A prize award liability is established when the winning ticket number is selected. If no winning ticket is selected, the available jackpot is carried over to the following drawing. The Tri-State Lotto Compact requires that prizes not claimed within one year from the date of the drawing are forfeited. All unclaimed prizes are credited to future prize pools. The Commission funds its jackpots through annuity contracts purchased from insurance companies and zero-coupon US Government Treasury Strips.

A proportional share of revenue and expenses are allocated to each state based on the amount of ticket sales made by each state. Exceptions are the facility's management fee, which is based on a contracted percentage of operating revenue that varies from state to state; Daily Number expenses that are allocated to each state based on Daily Number ticket sales; and certain other miscellaneous costs that are based on actual charges generated by each state.

The financial statements of the Tri-State Lotto Commission may be obtained at the Bureau of Alcoholic Beverages and Lottery Operations, 8 State House Station, Augusta, ME 04333.

#### Note 14

#### COMMITMENTS AND CONTINGENCIES

#### **Federal Grants**

The State receives significant financial assistance from the federal government. The receipt of grants is generally dependent upon compliance with terms and conditions of the grant agreements and applicable federal regulations, including the expenditure of resources for allowable purposes. Grants are subject to the Federal Single Audit Act. Disallowances by federal officials as a result of these audits may become liabilities of the State. The amount of expenditures which may be disallowed by the grantor agencies cannot be determined at this time.

#### Municipal Solid Waste Landfills

Title 38 MRSA § 1310-F establishes within the Department of Environmental Protection a cost sharing program for the closure and remediation of solid waste landfills which pose an actual or potential hazard to the environment and public health. The State's obligation to provide cost sharing to municipalities is subject to the availability of general obligation bond funds approved for that purpose. At June 30, 1996, \$59 million had been authorized and issued for solid waste landfill closure and remediation with \$56 million expended or encumbered. At June 30, 1996, the estimated cost of future landfill closure and remediation projects is not known. In the 1996 fiscal year \$13 million in bond funds was expended for solid waste landfill projects.

#### **Construction Commitments**

At June 30, 1996, the Department of Environmental Protection had contractual commitments for pollution abatement construction projects as provided for by Title 13 MRSA § 411. Subject to approval by the Commissioner, the State may contribute to the design, engineering and construction of municipal pollution abatement facilities. At June 30, 1996, \$100 million in general obligation bond funds had been authorized for pollution abatement construction projects, \$90 million had been issued and \$85 million expended. The amount of bond funds committed in contracts to these projects at June 30, 1996 was \$5 million. The estimated cost of future pollution abatement construction projects is not known. In the fiscal year ended June 30, 1995, \$10 million in bond funds was expended on pollution abatement projects.

A portion of the payment that is made to municipalities for General Purpose Aid to Local Schools is allocated for debt service. This portion represents the subsidy for debt service resulting from local outstanding indebtedness for school construction and renovation projects. As of June 30, 1996, outstanding commitments by municipalities for school construction projects totaled \$674.7 million.

At June 30, 1996, the Department of Transportation had contractual commitments of approximately \$103.4 million for construction of various highway projects. The State's share of that amount is expected to be approximately \$21.6 million. Funding for these future expenditures is expected to be provided from federal funds, state funds, and bond proceeds.

#### **Contingent Receivable**

At June 30, 1996, the Maine Department of Transportation (MDOT) had unreimbursed expenditures paid from the Highway Fund in fiscal years 1996 and prior. Based on historical experience, these expenditures are potentially reimbursable, in part, by the federal highway program through project modifications. The MDOT has not determined the probability or estimated the amount of any reimbursement.

#### **Constitutional Debt**

Article 9, § 14-A, of the Maine State Constitution provides that the State may insure the payment of mortgage loans on real estate and personal property within the State for industrial, manufacturing, fishing, agricultural and recreational enterprises. The aggregate of these obligations may not exceed \$90 million at any one time. As of June 30, 1996, amounts committed pursuant to this authorization were \$61.5 million.

Article 9, § 14-C, of the Maine State Constitution provides that the State may insure the payment of mortgage loans for the acquisition, construction, repair and remodeling of houses owned or to be owned by members of two tribes on several Indian reservations. These loans may not exceed \$1 million in the aggregate at any one time. As of June 30, 1996, amounts committed pursuant to this authorization were approximately \$84,000.

Article 9, § 14-D, of the Maine State Constitution provides that the State may insure the payment of any mortgage loan to resident Maine veterans of the Armed Forces of the United States, including loans to a business organization owned in whole or in part by a resident Maine veteran. These loans may not exceed \$4 million in the aggregate at any one time. As of June 30, 1996, amounts committed pursuant to this authorization were \$1.4 million.

Article 8, § 2, of the Maine State Constitution provides that the State may secure funds for loans to Maine students attending institutions of higher education. Funds shall be obtained by the issuance of

State bonds, when authorized by the Governor. The amount of bonds issued and outstanding shall not at any one time exceed \$4 million in the aggregate. As of June 30, 1996, there were no amounts issued pursuant to these authorizations.

#### Moral Obligation Debt

Statutes governing certain public Authorities provide for Capital Reserve Provisions. These provisions authorize the State to make up any deficiencies in their Debt Service Reserve Funds, subject to legislative appropriation, effectively constituting a moral obligation to back the Authorities' credit. Since such moral obligations do not constitute full faith and credit obligations of the State, voter approval of such obligations is not required. The State has never been called upon to make any direct payments pursuant to such provisions. As of June 30, 1996, approximately \$2.6 billion in moral obligation bonds were outstanding and the required debt service reserve was \$258.4 million.

Issuing Authorities, bonds outstanding, required debt reserve, moral obligation debt limits and the legal citation for each Authority appear in the following table:

#### **Moral Obligation Bonds**

June 30, 1996

(Dollars in Thousands)

<u>Issuer</u>	Bonds Outstanding	Required Debt Reserve	Moral Obligation Debt Limit	Legal <u>Citation</u>
*Finance Authority of Maine	\$ 242,278	\$37,771	\$ 591,000	10 MRSA §1032, 1
Maine Educational Loan				
Authority	31,360	2,386	50,000	20-A MRSA §1142
Maine Municipal Bond Bank	841,430	99,030	No Limit	30-A MRSA § 6006
Maine Health and Higher				-
Educational Facilities Authority	556,410	43,623	No Limit	22 MRSA § 2075
Loring Development Authority	-		100,000	5 MRSA §13080-N
Maine State Housing Authority	998,000	75,622	1,150,000	30-A MRSA § 490
Total	\$2,669,478	<u>\$258,432</u>	. ,	Ü

<sup>\*</sup> It is the opinion of the State's legal counsel that statutory history provides substantial support for the conclusion that the legislature intended that these bonds be secured by the moral obligation of the State.

#### NOTE 15

#### LITIGATION

The State of Maine, its units and employees are parties to numerous legal proceedings, many of which normally occur in governmental operations. In the opinion of the Attorney General and other legal counsel representing the State, it is not probable that the legal proceedings will have a material adverse impact on the State's financial position. Therefore, the State has not recorded liabilities in anticipation of awarded or anticipated unfavorable judgments.

In all the cases listed below, except in the case of the Consent Decrees, the Attorney General advises that the State, its agencies and employees have valid defenses and that the State is vigorously defending the claims. The State is also a party to various legal proceedings, which, if resolved in the State's favor, would result in contingency gains to the State's General Fund balance, without material effect upon fund balance. The ultimate dispositions and consequences of all these proceedings are not presently determinable, but it is not probable that the ultimate disposition of any single proceeding or all legal proceedings collectively will have, in the opinion of the State's Attorney General and the Department of Administrative and Financial Services, any material adverse effect on the State's financial position.

The State is a defendant in two class actions lawsuits, <u>Bates v. Peet, et al.</u>, and <u>Consumer Advisory Board, et al. v. Glover, et al.</u>, which were settled by Consent Decrees applicable to the mental health and mental retardation services provided by the Department of Mental Health, Mental Retardation, and Substance Abuse Services. In both cases, the State remains subject to the terms of the Decrees and believes that it can meet the requirements within its existing budget, but it is possible that additional funds could be required as a result of future court orders.

The State is a defendant in <u>SC Testing Technologies v. Maine, DEP et al.</u>, a contract case seeking damages of \$42 million arising out of the State's repeal of legislation requiring that automobiles be tested prior to registration. The State prevailed in both the Maine Superior and Supreme Judicial Courts. Plaintiff recently filed a petition for certiorari to the United States Supreme Court on only one of the original multiple grounds for suit - the claim that the State is federally preempted from amending Maine laws on auto emission testing by the terms of the Federal Clean Air Act. It is believed that there is only a remote chance that the US Supreme Court will agree to that review.

Parker v. Wakelin and Dzialo v. Perrier are two lawsuits seeking judgments that certain legislative changes made to save money in the State Retirement System are unconstitutional. The Parker case involves teachers who work for local school districts but who are members of the Maine State Retirement System. In that case the State lost on certain significant issues before the United States District Court for the District of Maine, and an appeal is pending. However, the Attorney General believes that Maine's appeal raises significant issues on which the State has a reasonable chance of prevailing. The Dzialo suit, which involves similar legislative changes as they impact directly on State employees, was filed in December of 1996. It is likely that the outcome of the Parker case will be largely dispositive of the Dzialo case. If the Parker decision is not reversed on appeal, it has been estimated that the Legislature will be required to increase the annual funding for the Retirement Plan (for both teachers and State employees) by an amount that has been estimated at \$16 million for FY 1998 and larger amounts in future years. Plaintiffs have cross appealed on those issues on which the State prevailed at the District Court level, and if Plaintiffs prevail on their appeal, the annual cost to the State (for both teachers and State employees) has been estimated at an additional \$22 million for FY 1998, a figure that will also increase over time.

The State is also a defendant in an administrative reimbursement action brought by the federal Department of Health and Human Services arising out of a dispute concerning the proper allocation of pension contribution costs between the State and federal government. The case, which arose out of a federal audit for fiscal year 1991-92, is currently pending before the federal Department of Health and Human Services Departmental Appeals Board. The claim in dispute is approximately \$7 million, although the State has asserted setoffs nearly equaling the amount claimed by DHHS.

The federal government has not pursued an unasserted claim in an amount ranging from \$5.7 to \$7.7 million in the Medicaid Program. The claim arises out of a State of Maine Gross Receipts Tax in effect

from July 1993 to December 1993 that the federal government claims was inappropriate. The law was amended effective December 1993, and later repealed. This is a national issue which affects many states and it is possible that federal legislation may resolve the matter prior to any potential administrative reimbursement action.

The State is in receipt of a Notice of Claim demanding \$7 million for damages based on the death of a patient at the Augusta Mental Health Institute. This claim includes both a claim against the State under the Maine Tort Claims Act and claims against State employees and contractors under state and federal law. No lawsuit has been filed. Even if liability were found, it is not probable that the damages would approach the amount claimed.

State employees are defendants or potential defendants in several civil rights actions in which large dollar amounts have been claimed. The State cannot itself be sued under the applicable civil rights laws but could be responsible for certain defense costs in such suits and also self-insures certain of its employees up to a maximum of \$300,000 for any one occurrence.

The State of Maine has been audited by the IRS and the IRS has taken the position that the State owes employment taxes on independent contractors that the IRS alleges qualify as employees under federal tax law. This dispute is currently pending before the IRS at the administrative level. After an initial assessment of over a million dollars, the IRS has reduced the assessment to less than \$450,000 for the tax year 1993. The State is filing an administrative appeal.

The State is a defendant in a number of tort claim actions. These cases, whether at the notice of tort claim stage or filed as court actions, are subject to the limitations stated in the Maine Tort Claims Act, 14 M.R.S.A §8101 et seq., of \$300,000 per occurrence, a bar on punitive or exemplary damages, and complete immunity for an array of discretionary actions. It is not probable that the State's aggregate exposure will exceed \$10 million.

The State is a party to numerous other legal proceedings, such as tax reimbursement actions, many of which recur in government operations. As noted above, the State is defending the actions. In the opinion of the Attorney General, even if liability is found in some of these cases, it is not probable the damages awarded will have any material effect on the financial condition of the government.

#### **NOTE 16**

#### SUBSEQUENT EVENTS

#### **Bond Authorizations**

Subsequent to June 30, 1996, voters approved bond issues of \$40.5 million and \$4.9 million. The proceeds are to fund major improvements at state parks and historic sites, encourage and support economic development, construct water pollution control facilities, address environmental health deficiencies in drinking water supplies, investigate, abate and clean up hazardous substance discharges, clean up tire stockpiles, close and clean up municipal solid waste landfills, and connect libraries and communities electronically.

#### **Tax Anticipation Notes**

On July 2, 1996, the State issued \$150 million of general obligation tax anticipation notes (TAN's) with an interest rate of 4.5% and a maturity date of June 27, 1997. These notes were issued to provide cash flow to the General Fund during fiscal year 1997.

#### **Bond Anticipation Notes**

Subsequent to fiscal year 1996, bond anticipation notes (BANs) totaling \$10.125 million were issued by the State with interest rates ranging from 4% to 4.15% and maturities in May and June, 1997. The BANs were issued as a temporary financing vehicle for new projects that will be financed with future bond proceeds.

#### Lease/Financing Arrangements

The State entered into a lease financing agreement with the Maine Court Facilities Authority for the financing of court facilities in Skowhegan and Biddeford. The total principal amount financed was \$5.9 million, the amortization of which will begin September 1, 1997. The State entered into three other financing agreements subsequent to fiscal year end. The total principal amount financed was \$4.3 million. The financing was for computer equipment and motor vehicles, and is administered within the Internal Service Fund.

#### Repeal of Gross Receipts Tax

Effective January 1, 1997, legislation repealed the seven percent gross receipts tax charged to consumers for nursing home care. For fiscal year 1996, these taxes totaled approximately \$25 million.

#### **Individual Income Tax Ceiling Repealed**

Chapter 24 Public Laws of 1997 repealed 36 MRSA § 5111-B, which had become effective June in 1995. The repealed statute had mandated individual income tax rate reductions and tax refunds once a certain targeted revenue amount was reached. The statute had never been applied, as the targeted amount had not been reached.

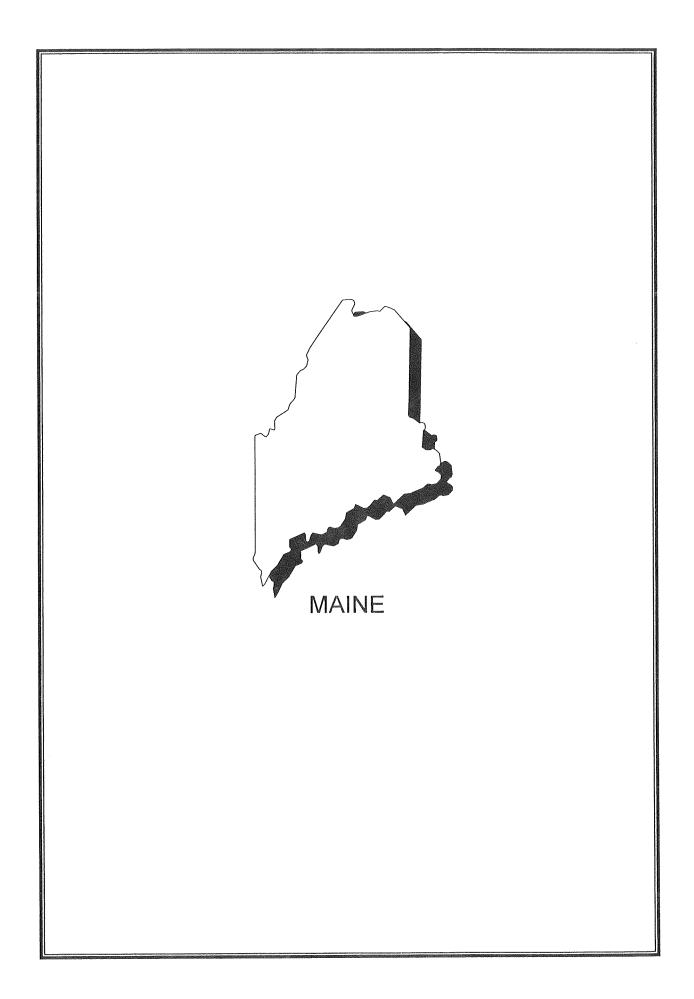

#### **Revised Hospital Financing Plan**

In the spring of 1997 the State of Maine, in cooperation with Maine hospitals and following discussions with the federal government, developed a revised plan for payments to and from hospitals. The purpose of the plan was to phase out the "tax and match" financing arrangement by June 30, 1998, with the minimum possible disruption. The plan results in an increase in the hospitals' tax burden in the 1997 and 1998 years with a compensating increase in the state's commitment to the hospitals to pay for bad debt and charity cases (the disproportionate share program). The increase in the disproportionate share reimbursement rate was applied retroactively to July 1, 1995.

#### Lease of Augusta State Airport

As of December 1, 1996, the State of Maine, through the Department of Transportation, entered into a lease/purchase agreement with the City of Augusta. The City will operate, and eventually own, the facilities of the Augusta State Airport, currently accounted for as an Enterprise Fund.

The lease terms also provide for the Department of Transportation to pay an annual subsidy to the City of Augusta for airport purposes, and for the City to remit income from airport operations to the Department.

The General Fund is the largest of the State's operating funds. Its purpose is to finance all State Government activities not specifically financed by dedicated revenue.

The major sources of revenues for the General Fund are sales and use tax, individual income tax, corporate income tax and transfers from the Bureau of Alcoholic Beverages and Lottery Operations.

The major expenditures of the General Fund are for aid to local education, support of the University and Technical College Systems, the State's share of Federally mandated Human Services, Natural Resources and General Government programs.

# **HIGHWAY FUND**

The Highway Fund is used to account for revenues derived from registration of motor vehicles, operators' licenses, gasoline tax, other dedicated revenues and proceeds of bonds. The Federal matching funds and corresponding expenditures are accounted for in the Other Special Revenue Funds.

The Legislature allocates revenues to the Highway Fund for the operation of the Department of Transportation. The allocation covers construction and maintenance of highways and bridges, other allied programs, a major portion of the cost of State Police operations, and highway bond issues.

# HIGHWAY FUND

# OTHER SPECIAL REVENUE FUNDS

A major portion of the Other Special Revenue Funds are comprised of Federal Funds received by the State. Also included are a grouping of various special purpose funds which have been established on a self-supporting basis. Revenues are generated by taxes, licenses, fees and Federal matching funds and grants. Expenditures of these funds can only be made in accordance with restrictions imposed by the source of the revenues.

### **ENTERPRISE FUND**

**Enterprise Funds** are used to account for operations that are financed and operated in a manner similar to private business, where the intent of the State is that the costs of providing goods or services to the General Public on a continuing basis be financed or recovered primarily through user charges; or where the State has decided that periodic determination of net income is appropriate for accountability purposes. The State uses the following Enterprise Funds:

The *Alcoholic Beverages Fund* was established to license and regulate the sale of alcoholic beverages. Net profit from the fund is transferred to the State's General Fund and is used for general Governmental purposes.

The *Community Industrial Fund* is used to assist local development corporations to construct community industrial buildings by loaning money when the projects can reasonably be expected to create new employment. Preference is given to projects in economically deprived areas.

The **Forest Nursery Fund** accounts for the self-supporting operation of State nurseries. The nurseries propagate, maintain and distribute plants for conservation purposes.

The *Marine Ports Fund* is used to account for the operation and maintenance of port facilities within the jurisdiction of the Department of Transportation.

The *Lottery Fund* was established to account for all operations of the Maine State Lottery. This includes the Tri-State Lotto Commission which was established in 1985 and is a joint venture between the States of Maine, New Hampshire and Vermont. The Commission is authorized and empowered to promulgate rules and regulations regarding the conduct of lottery games, including the price or prices of tickets, the number and size of prizes for winning tickets and the licensing of agents.

The **Potato Marketing Improvement Fund** provides low interest loans to Maine potato growers for the modernization of storage facilities and improvements in the marketing of the product.

The *Prison Industries Fund* accounts for a self-supporting program of job training through the employment of inmates in manufacturing and selling products.

The **Seed Potato Board Fund** is used for the growing of seed for sale to potato growers, for research in disease control, and for the development of new product varieties.

The **State Airport Fund** accounts for all operations and maintenance of the Maine State Airport.

The **State Ferry Service Fund** provides for the operation of ferry services between the mainland and various islands for the purpose of transporting vehicles, freight and passengers to and from those islands.

### INTERNAL SERVICE FUND

Internal Service Funds are used to account for the financing of goods or services provided by one department or agency to other departments or agencies of the Government and to other Government units, on a cost reimbursement basis. The State uses the following Internal Service Funds:

The **Central Fleet Management** is responsible for administering a uniform program for the operation and maintenance of all state vehicles except for the Department of Transportation.

The *Division of Data Processing* provides major data processing services including computer operations, programming and applications systems development, technical support and networking services.

The **Office of Information Services** is responsible for providing information services in data processing and telecommunications and for assuring the coordination of data processing throughout State Government.

The **Space Management Division** provides uniform procedures and a standard policy for the leasing of State-owned facilities, maintains records of State Agency property, leasing needs and all available space owned, leased and potentially available for lease, making this information available to all State Agencies. It also monitors market prices for real estate property leases, establishes rates to be charged to State Agencies, and holds all property leases to ensure they are negotiated and managed to the best economic advantage of the State.

The *Division of Motor Transport Services* provides for all the equipment and vehicle needs of the Department of Transportation.

The *Division of Purchase's Postal, Printing and Supply* is responsible for the purchase of all services, supplies, materials and equipment required by any State department or agency, to purchase and contract for all postal and mailing services, duplicating needs, and the disposal of State and Federal surplus property.

The *Risk Management Division* provides insurance advice and services for all forms of insurance except health and workers' compensation. This includes insurance for automobile, fire, liability and any other type of coverage which may be necessary to protect the State from financial loss.

The *Division of Telecommunications Services* provides for all voice and data communication services to State departments and agencies.

### TRUST AND AGENCY FUNDS

*Trust and Agency Funds* are fiduciary in nature and are maintained to account for assets held by the State acting in the capacity as trustee or agent.

<u>Expendable Trust Funds</u> account for assets held by the State in a trustee capacity where the principal and income may be expended in the course of the funds' designated operations. They include:

**Employment Security Fund** pays claims for unemployment to eligible recipients through employer contributions, employer reimbursements and Federal Grants.

**Abandoned Property** accounts for unclaimed property receipts. Holders must annually report these properties to the Treasurer, who will honor claims indefinitely.

There are many other small Expendable Trust Funds throughout State agencies and accounted for by the State Treasurer.

Nonexpendable Trust Funds account for assets held by the State in a trustee capacity where only income derived from the trust principal may be expended for designated operations. The principal must be preserved intact. They include:

**Baxter Park Trust Fund,** a gift to the State of Maine by former Governor Baxter, calls for principal to be maintained intact and income to be used for operations.

Lands Reserved Trust Funds were established from revenue derived from the sale of timber from public lands and from appreciation on investments. The income is to be used for school purposes by townships when they become organized towns or plantations.

Other Trust Funds are composed of numerous small Trust Funds which have been combined for reporting purposes.

Agency Funds account for assets held by the State as agent for other funds, Governmental units, organizations, or individuals. They include:

Salary Deferral 457 Plan consists of employee contributions and earnings on investments.

**Payroll Tax and Deductions Fund** which receives all payroll tax and deduction funds needed to pay the Federal Government, other State agencies, and payroll vendors.

*Treasurer's Agency Fund* accounts for funds of quasi-governmental units placed in the Treasurer's cash pool for investment purposes.

- 1. Civilian labor force, employed, and unemployed estimates are by place of residence. Current month estimates are preliminary; prior month and year-ago estimates are revised. Items may not add due to rounding. All data exclude members of the Armed Forces. MSA stands for Metropolitan Statistical Area.
- 2. Total employment includes nonfarm wage and salary workers, agricultural workers, unpaid family workers, domestics, the self employed, and workers involved in labor disputes.
- 3. People are classified as unemployed, regardless of their eligibility for unemployment benefits or public assistance, if they meet all of the following: they were not employed during the survey week; they were available for work at that time; and they made specific efforts to find employment some time during the prior four weeks. Persons laid off from their former jobs and awaiting recall and those expecting to report to a job within 30 days need not be looking for work to be counted as unemployed.
- 4. The unemployment rate is calculated by dividing the total number of unemployed by the total civilian labor force, and is expressed as a percent.
- 5. Kittery-York is the five-town Maine portion of the Portsmouth-Rochester PMSA which includes towns in both Maine and New Hampshire.
