SERVING THE PUBLIC AND DELIVERING ESSENTIAL SERVICES TO STATE GOVERNMENT

KIRSTEN LC FIGUEROA
COMMISSIONER

DOUGLAS E. COTNOIR, CPA, CIA
STATE CONTROLLER

December 14, 2022

**To the Honorable Janet T. Mills, Governor,
The Honorable Members of the Legislature, and
Citizens of the State of Maine**

We are pleased to present the State of Maine's Fiscal Year 2022 Annual Comprehensive Financial Report (ACFR) prepared in accordance with Generally Accepted Accounting Principles (GAAP). The annual ACFR, required by Title 5 MRSA § 1547, is compiled and published by the Office of the State Controller (OSC). The report is the primary means of reporting the State's financial activities. The objective of this report is to provide a clear picture of our government as a single, unified entity, as well as providing traditional fund based financial statements.

INTRODUCTION TO THE REPORT

Responsibility

The OSC is responsible for the accuracy, fairness and completeness of the financial statements presented in this report. The statements have been prepared in accordance with GAAP. To the best of our knowledge and belief, the information presented is accurate in all material respects and includes all disclosures necessary to enable the reader to gain a reasonable understanding of Maine's financial position and activities.

Adherence to Generally Accepted Accounting Principles

As required by State statute, we have prepared the ACFR in accordance with GAAP applicable to State and local governments, as promulgated by the Governmental Accounting Standards Board (GASB). The State also voluntarily follows the recommendations of the Government Finance Officers Association of the United States and Canada (GFOA) for the contents of government financial reports.

Format of Report

This ACFR is presented in three sections: Introductory, Financial and Statistical. The Introductory Section contains this letter including an overview of current initiatives, the list of principal elected and appointed officials, and the State government organization chart. The Financial Section contains: the Independent Auditor's Report on the Basic Financial Statements; Management's Discussion and Analysis (MD&A), which provides an introduction, overview and analysis of the Basic Financial Statements; the Basic Financial Statements, which present the government-wide financial statements and fund financial statements for governmental funds, proprietary funds, fiduciary funds and similar component units, and component units, together with notes to the financial statements; Required Supplementary Information other than MD&A, which presents budgetary comparison schedules, schedules of pension funding progress, other post-employment benefit plans funding progress, and information about infrastructure assets; and the supplemental financial data, which includes the combining financial statements and schedules.

PHONE: (207) 626-8420

OFFICE LOCATED ON 4TH FLOOR, BURTON M CROSS BUILDING
www.Maine.gov/osc

FAX: (207) 626-8422

This letter of transmittal is designed to complement MD&A where the financial analysis is now presented. The State's MD&A can be found immediately following the Independent Auditor's Report from the State Auditor. The Statistical Section contains selected trend information and statistical data on financial, economic and demographic measures.

Internal Control Structure

The OSC prepared these financial statements and assumes full responsibility for the completeness and reliability of the information presented in this report. To provide a reasonable basis for making these representations, the OSC has established a comprehensive internal control framework that is designed to protect the State's assets from loss, theft, or misuse and to compile sufficient reliable information for the preparation of the State of Maine's financial statements in conformity with GAAP.

Because the cost of internal controls should not outweigh their benefits, the State's comprehensive framework of internal controls has been designed to provide reasonable rather than absolute assurance that the financial statements will be free from material misstatement.

As a recipient of federal financial assistance for federal programs, the State is also responsible for ensuring that an adequate internal control structure is in place to ensure and document compliance with applicable laws and regulations related to these federal programs. The internal control structure is subject to periodic evaluation by management and by the Office of the State Auditor as part of the annual Single Audit.

Independent Auditors

Pursuant to Title 5 MRSA § 243, the State Auditor has performed an examination of the Basic Financial Statements in accordance with auditing standards generally accepted in the United States of America and Government Auditing Standards. The auditor's opinion is presented in the financial section of this report. The audit involved examining, on a test basis, evidence supporting the amounts and disclosures in the Basic Financial Statements; assessing the accounting principles used and significant estimates made by management; and, evaluating the overall financial statement presentation. The State Auditor rendered an unmodified opinion on the Basic Financial Statements for this fiscal year.

Also, pursuant to § 243 the State Auditor has undertaken a Single Audit of the State as a whole, in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in Government Auditing Standards, issued by the Comptroller General of the United States, as required by federal law. The standards governing Single Audit engagements require the auditor to report not only on the fair presentation of the financial statements, but also on the government's internal controls and compliance with legal requirements involving the administration of federal awards. This statewide federal Single Audit Report, including the auditor's opinion in accordance with generally accepted government auditing standards, is published separately.

The State Auditor is statutorily mandated to audit all accounts and other financial records of State Government or any department or agency of State Government, including the Judiciary and the Executive Department of the Governor, except the Governor's Expense Account, and to report annually, and at such other times as the Legislature may require.

GASB Statement No. 34 requires that management provide a narrative introduction, overview and analysis to accompany the Basic Financial Statements in the form of MD&A. This letter of transmittal is designed to complement the MD&A and should be read in conjunction with it.

PROFILE OF THE GOVERNMENT

The State of Maine was the twenty-third state admitted to the Union on March 15, 1820 under the Missouri Compromise. By this time the population of Maine had reached nearly 300,000. The newly admitted state had nine counties and 236 towns. The city of Portland was the original site of the capital of Maine upon its admission to the Union. The Capital moved to Augusta in 1832 as a more central location from which to govern. The State has an area of 33,215 square miles and 3,500 miles of continuous coastline. Maine boasts 6,000 lakes and approximately 17 million acres of forest land. Geographically, the State includes 16 counties. The most populous county is Cumberland which includes Maine's largest city, Portland.

Reporting Entity

The Governor and Legislature govern all funds and accounts for every executive agency, board, commission, public trust, authority and component unit. The State of Maine financial reporting entity reflected in the ACFR, which is more fully described in Note 1 to the Basic Financial Statements, includes these funds, agencies, organizations, boards, commissions, authorities and major component units in accordance with GASB Statement No. 14 as amended by GASB Statement No. 39 and GASB Statement No. 61. There are 7 major component units, 5 non-major component units, one blended component unit, and one fiduciary component unit included in the ACFR. The major component units are discretely presented in the financial statements, and the blended component unit is included as separate funds in the fund financial statements. The fiduciary component unit is presented in the fiduciary fund and similar component unit financial statements, along with the other fiduciary activities of the State. The fiduciary activities are not included in the government-wide financial statements because the resources of these funds are not available to support the State's own programs.

The departments of the primary government record their daily financial operations in the State accounting system called AdvantageME operated by the OSC.

Budgetary Control

The Governor presents a biennial budget for the General Fund and the Special Revenue Funds to the Legislature for enactment or revision. The State Constitution provides the Governor a "line item" veto, which allows an Executive dollar substitution for those amounts disapproved, as long as an appropriation or allocation is not increased (or a deappropriation or deallocation decreased) either in the specified line or in any other line in the legislative document.

Once passed and signed, the budget becomes the financial plan for the State for the next biennium. It includes proposed expenditures for all departments and agencies, interest and debt redemption charges, and expenditures for capital projects to be undertaken and executed during each fiscal year. The budget also includes anticipated revenues and any other means of financing expenditures. In accordance with statute, the State Budget Officer must use the projections of the Revenue Forecasting Committee to prepare the General Fund and Highway Fund budgets.

The total General Fund appropriation for each fiscal year of the biennium in the Governor's budget submission to the Legislature may not exceed the General Fund appropriation of the previous fiscal year multiplied by one plus the average real personal income growth rate, as defined in Title 5 MRSA § 1665, subsection 1. This appropriation

limitation may be exceeded only by the amount of the additional costs or the lost federal revenue from the following exceptional circumstances: unfunded or under-funded new federal mandates; losses in federal revenues or other revenue sources; citizens' initiatives or referenda that require increased State spending; court orders or decrees that require additional State resources to comply with the orders or decrees; and sudden or significant increases in demand for existing State services that are not the result of legislative changes that increased eligibility or increased benefits. The Governor may designate exceptional circumstances that are not explicitly defined, but meet the intent of this statute. "Exceptional circumstances" means an unforeseen condition or conditions over which the Governor and the Legislature have little or no control. Exceptional circumstances do not apply to new programs or program expansions that go beyond existing program criteria and operation.

The State maintains budgetary control at the account and line category levels. The head of each department and agency of State government must submit a work program to the Bureau of the Budget for the ensuing fiscal year. The work program is classified to show allotments requested for specific amounts for personal services, capital expenditures, and all other departmental expenses. These are the levels at which appropriations and allocations are approved by the Legislature, principally through a quarterly allotment system. The State Controller authorizes all expenditures to be made from the amounts available on the basis of these allotments and not otherwise.

Budget revisions during the year, reflecting program changes or intradepartmental administrative transfers, require the approval of the State Budget Officer and the Governor. Except in specific instances, only the Legislature may transfer appropriations between departments. Agency requests for increases in appropriations, allocations, or funding for new programs are presented to the Legislature as a supplemental budget.

The State uses encumbrance accounting as an extension of formal budgetary control. This requires that purchase orders, contracts, and other commitments be recorded to reserve a portion of an appropriation or allocation for expenditure. Appropriated and allocated balances are available for subsequent expenditure to the extent that there are approved encumbrances at the end of a fiscal year. Unencumbered appropriations in the General Fund and in the Highway Fund are carried forward to a subsequent year only when authorized by law, otherwise the balances lapse at year-end. For financial statement purposes, unless amounts would create deficits, fund balance is classified based on existing resources, if any, which will liquidate the encumbrances outstanding at June 30 (shown as restrictions, commitments or assignments of fund balance).

Maine Budget Stabilization Fund

The Maine Budget Stabilization Fund, established in Title 5 § 1532, to replace the Maine Rainy Day Fund, is a designation of the unassigned General Fund fund balance intended to be used when revenues are under budget and critical services must be preserved. The Governor may also allocate funds from the Budget Stabilization Fund for payment of death benefits for law enforcement officers, firefighters and emergency medical services persons or to supplement school funding in situations where a municipality suffers a sudden and severe change in their property valuation.

Balances in the fund do not lapse; but carry forward each year. The money in the fund may be invested with any earnings credited to the fund except when the fund is at its statutory cap. In addition to interest earnings, the fund is capitalized at the close of each fiscal year. In fiscal year 2022 a net \$404.1 million was transferred into the fund, resulting in an ending balance of \$896 million.

MAJOR INITIATIVES AND FUTURE PROJECTS

Fiscal Stability

Maine maintained strong fiscal footing throughout fiscal year 2022. Monthly General Fund revenues consistently exceeded projections. Expenditures ran under budget in part due to pandemic-induced supply chain issues and workforce shortages. The Governor and Legislature made wise, bipartisan decisions to continue managing State government in a fiscally sound manner, including investing federal COVID-19 funds strategically and appropriately. Surplus revenues were directed toward bolstering the State's savings, providing relief to those most impacted by the pandemic, and addressing other critical issues facing the State.

The unprecedented federal fiscal and monetary policies and Maine's fiscally prudent efforts significantly impacted Maine's economy, raising the volume and mix of economic activity, which in turn increased revenues to unexpected levels. Under Governor Mills' leadership, Maine's GDP growth over the past four years is 6th best in the nation and the unemployment rate has dropped to 3.3 percent – tied with the New England average and just below the U.S. average. Currently, Maine's economy, as measured by GDP, has surpassed pre-pandemic levels, our impressive bond ratings have been upheld by Moody's and S+P, State government is in the black, and the State's Budget Stabilization Fund is at its highest level ever.

The December 2021 and March 2022 revenue forecasts both revised General Fund estimates upward for fiscal years 2022 and 2023 by substantial margins with all the major revenue lines showing increases. In the December 2021 forecast, projected revenues were increased by \$443.2 million for fiscal year 2022 and \$822.2 million for the 2022-2023 biennium overall. The March 2022 forecast revised General Fund revenue estimates upward by another \$234.9 million for fiscal year 2022 and \$411.7 million for the biennium overall.

The fiscal year 2022-2023 General Fund supplemental budget enacted in April 2022, Public Law 2021 Chapter 635, included net appropriations of about \$172 million for the biennium with a reduction of about \$90.6 million in fiscal year 2022. The reduction primarily resulted from a one-time de-appropriation to capture freed up General Fund dollars from the enhanced Federal Medical Assistance Percentage (FMAP) rate states have been receiving during the COVID-19 public health emergency. The enacted appropriations were a mix of one-time and ongoing impacts. One-time appropriations included support for higher education, career and technical education materials and supplies, child welfare, hospitals, nursing homes, long-term care facilities, and emergency housing assistance. Ongoing appropriations supported childcare workers and early childhood educators, universal free meals in public schools, behavioral health, in-home and community services, and increased wages for direct support workers and professionals under the MaineCare program.

The supplemental budget also included one-time transfers of \$892.5 million in fiscal year 2022 and \$40.8 million in fiscal year 2023 from General Fund unappropriated revenue to Other Special Revenue accounts in agencies for a variety of one-time purposes intended to address critical needs and other priorities for the Administration. These purposes included \$729.3 million for one-time \$850 checks sent directly to an estimated 858,000 Maine people to assist with pandemic related costs, including inflation. Other General Fund transfers in fiscal years 2022 and 2023 were directed to: highway and bridge projects, efforts to address PFAS contamination, cost of living payments for retired teachers and State employees, electric vehicle incentives, a two years of free community college pilot, and an affordable housing voucher program.

Finally, Public Law 2021 Chapter 635 contained several tax relief measures, primarily impacting fiscal year 2023 revenue. These included: increasing the value of the Earned Income Tax Credit and the maximum benefit under the Property Tax Fairness Credit, which were continuations of measures enacted in Public Law 2021 Chapter 398;

an overhaul to the Education Opportunity Tax Credit to transform it into a powerful, nation-leading tool to retire student debt for graduates and help employers to draw people from all walks of life to work and live in the State of Maine; and a provision to increase the amount of retirement pension exempt from state income tax up to \$35,000. Language establishing transfers to MaineDOT and a new Education Stabilization Fund as priorities for fiscal year 2022 General Fund resources distributed through the “cascade” was also enacted.

Actual General Fund revenues over the course of fiscal year 2022 consistently exceeded projections and at year end revenues that exceeded budget were distributed in accordance with statute. Distributions via the “cascade” included transfers of \$35 million to the Highway and Bridge Reserve account, \$15 million to the newly created Education Stabilization Fund, \$2.5 million to the Reserve for Operating Capital, just over \$100 million to MaineDOT for Highway and Bridge Capital and nearly \$402 million to the Budget Stabilization Fund. At the end of the fiscal year, there was a General Fund unappropriated balance of about \$33.6 million and the balance in the Budget Stabilization Fund was nearly \$896 million. The budgeted General Fund unappropriated balance for the end of the 2022-2023 biennium is currently projected at \$34.5 million.

Both the December 2021 and March 2022 revenue forecasts also increased Highway Fund revenues by modest margins for a total upward revision of \$5.4 million for fiscal year 2022 and \$8.1 million for the 2022-2023 biennium overall. The Highway Fund changes in both forecasts were largely the result of projected increases in motor vehicle registrations and fees and other Highway Fund revenue lines with motor fuel tax lines unchanged. The enacted 2022-2023 Highway Fund supplemental budget included net allocations of about \$721,000 in fiscal year 2022 and about \$6.2 million for the biennium overall. Actual Highway Fund revenues for fiscal year 2022 exceeded budgeted projections and the Highway Fund had a projected unallocated balance of approximately \$21 million at the end of fiscal year 2022 with a projected balance of about \$1.4 million at the end of the biennium.

American Rescue Plan Act

The Coronavirus Aid, Relief, and Economic Security Act (CARES Act), signed into law on March 27, 2020, provided \$1.25 billion in Coronavirus Relief Funds (CRF) to the State of Maine. Subsequently, the President signed the American Rescue Plan Act of 2021 (ARPA) on March 11, 2021, which provided \$997.5 million in Coronavirus State Fiscal Recovery Funds (SFRF) to the State of Maine.

In June and July of 2021, the Legislature enacted, and the Governor signed into law, Public Law 2021 Chapter 78 and Chapter 483, which allocates \$997 million of the State’s discretionary ARPA funding. This effort, known as the Maine Jobs and Recovery Plan (MJRP), includes 114 projects across 23 State entities.

The MJRP draws heavily on recommendations from the Governor’s Economic Recovery Committee and the State’s 10-Year Economic Development Strategy, transforming them into real action to improve the lives of Maine people and strengthen the economy. Governor Mills has specifically honed in on strategic investments to relieve the significant toll of the COVID-19 pandemic on Maine’s people, communities, and economy, while addressing known, systemic challenges that have constrained the State’s ability to grow and thrive, broadly divided into three categories: immediate economic recovery from the pandemic; long-term economic growth for Maine; and infrastructure revitalization. The Governor’s Jobs Plan was approved by the Legislature on July 19, 2021 and went into effect on Oct. 18, 2021. This made Maine one of the first four states in the nation and the first in New England to commit 100% of its State Fiscal Recovery Funds from the American Rescue Plan Act.

The MJRP included three initiatives to support the economic recovery of Maine’s heritage industries – forestry, fishing and farming – from impacts due to the COVID_19 pandemic. Over \$40 million in economic recovery funds was awarded to 391 business in these heritage sectors across all 16 counties in Maine. Through the MJRP funding,

in just over one year, the State has provided health insurance premium support to 5,700 small businesses and 27,900 employees covering 44,500 lives, funded 286 PreK student slots and converted 123 existing PreK slots from part day/part week to full day/full week through first round of PreK infrastructure grants, and enabled Maine's community colleges to enroll 1,000+ students into free and low-cost training programs, with 206 courses planned or underway. The Jobs Plan is providing grant funds to help communities address critical infrastructure with more than \$54 million funding 111 drinking water, sewer, septic system, and infrastructure climate adaptation grants awarded across 75 communities.

In the year since the Jobs Plan took effect, the Mills Administration has delivered direct economic relief to nearly 1,000 Maine small businesses, supported more than 100 infrastructure projects around the state to create jobs and revitalize communities, and invested in workforce programs estimated to offer apprenticeship, career and education advancement, and job training opportunities to 22,000 Maine people.

As of November 8, 2022, of the more than 142 business cases (across 114 initiatives), 135 have been fully approved through a two-part process that confirms federal eligibility, reporting parameters, and metric structure. This represents a total of approximately \$974 million in Federal funds deployed or ready to be deployed into Maine's economy. At the end of October 2022, more than half of all funds (~55%) have now been obligated or spent.

Maine was highlighted by the non-partisan Center on Budget and Policy Priorities as a national leader in deploying American Rescue Plan recovery funds towards talent, jobs, and innovation. The report ranked Maine in the top three states for share of funds allocated towards workforce development, higher education, and business assistance. The White House has also cited three of Maine's initiatives in describing American Rescue Plan workforce best practices and the US Department of Treasury, the federal agency charged with overseeing the American Rescue Plan Act, recognized Maine as the lead example of a state investing in job training with federal recovery funds.

Liquidity and Reserves

The State's cash position has continued to show significant improvement during FY 2021 and into FY 2022, even without consideration of the federal CARES Act and ARPA funding. Again, internal borrowing for cash flow purposes was not needed at any time in the 2022 fiscal year.

During FY 2022, \$401.9 million was transferred into the Budget Stabilization Fund (BSF) from General Fund Unappropriated Surplus and an additional \$2.5 million of interest earnings was deposited into the fund. The final balance in the BSF on June 30, 2022 was \$896.0 million. The total BSF balance represents 16.6% of the State's 2022 fiscal year General Fund revenue.

Stress-Testing State Revenues

The 2022 Stress-Test Report was issued after historic fiscal and monetary stimulus implemented by Congress and the Federal Reserve in the months immediately after the start of the pandemic have led to unprecedented revenue growth in FY 2021 and FY 2022 and a BSF at 16.6% of FY 2022 revenue. The report provides policymakers with the estimated impact of a moderate and severe recession on sales and individual income tax revenues, and the sufficiency and needs of the BSF in each of the recession scenarios.

The two forecasting groups concluded that the current BSF of \$896 million is sufficient to fully offset the revenue shortfalls estimated as the result of a moderate recession assuming certain individual income tax conformity provisions to the 2017 federal TCJA expire as provided under current law. If those federal provisions are extended beyond 2027 and the state conforms to those extensions, the BSF is sufficient to meet the FY 2023 – FY 2025 spending limits and comes within \$21 million of meeting the FY 2026 spending limit. A BSF at its current maximum

of 18% of FY 2022 revenue (\$970.5 million) would provide enough resource to meet the state's spending limit through FY 2026 but continue to leave a revenue shortfall of \$150 million in FY 2027.

While the BSF at its current level or at its statutory cap would not be sufficient to fully offset a revenue shortfall because of a severe recession, it would provide enough resource to maintain spending at the spending limit in FY 2023 and FY 2024, providing approximately 15 months for the Governor and Legislature to bring the budget into balance.

Education

Increased General Fund appropriations to General Purpose Aid for Local Education enacted in the 2022-2023 biennial budget, Public Law 2021 Chapter 29 and Chapter 398, enabled the State to make a historic investment in Maine public schools and keep a promise from the Governor. Beginning in FY 2022, for the first time in the State's history, the State met its statutory obligation to pay 55 percent of the cost of K-12 education. Public Law 2021 Chapter 398 also provided a 3 percent baseline increase to the University of Maine System, the Maine Community College System, and Maine Maritime Academy.

Public Law 2021 Chapter 635, the 2022-2023 General Fund supplemental budget, maintained funding for K-12 education at 55% and directed \$15 million of year-end unappropriated surplus to a new Education Stabilization Fund to help maintain that funding commitment into the future. Additionally, it included ongoing appropriations to fully fund universal free meals for students in public schools and support increased pay for childcare workers and early childhood educators to strengthen Maine's childcare system. This was in addition to the significant investments the Maine Jobs & Recovery Plan makes in expanding childcare and Pre-K education.

The supplemental budget also included several one-time initiatives to tackle Maine's workforce shortage and improve opportunities for Maine students. Twenty million in one-time General Fund dollars was dedicated to providing up to two years of free community college for all students from the high school graduating classes of 2020, 2021, 2022 and 2023 who enroll in a Maine community college full-time. Additionally, nearly \$8 million in one-time General Fund dollars was directed to the University of Maine System to help keep tuition flat for in-state students and an additional \$7.5 million provides ongoing debt service for the University System to invest in updating and renovating its campus buildings. The supplemental budget also provided one-time General Fund dollars to offset cost increases of career and technical education materials and supplies and included provisions to overhaul the Education Opportunity Credit to provide an annual \$2,500, up to \$25,000 lifetime maximum, refundable tax credit benefit for student loan debt relief.

Although schools reopened in the fall of 2020, remote learning continued to be critical to the hybrid learning models being utilized as schools continue to respond to the impacts of the COVID-19 pandemic during fiscal year 2022. Federal funding associated with Covid-19 continued to be used to support schools in a variety of ways, including but not limited to personal protective equipment (PPE), facility reconfigurations, air system upgrades, additional transportation and teacher costs, COVID-19 testing for students and staff, and supporting teacher training and knowledge in remote learning techniques.

Healthcare

The biennial and supplemental budgets for fiscal years 2022 and 2023 (Public Law 2021 Chapter 29, Chapter 398 and Chapter 635) provided funding for numerous healthcare initiatives that include but are not limited to: one-time support for hospitals, nursing facilities and private non-medical institutions in responding to the pandemic; rate increases and related cost-of-living adjustments for a broad spectrum of Medicaid providers and services; investments in the State's public health capacity; provision of a full adult dental benefit for low-income Mainers;

wage increases for direct care workers; additional support for in-home and community services for older adults, healthcare benefits for children who would be eligible for federal benefits but for their immigration status, and expansion of the Children’s Health Insurance Program to provide comprehensive coverage to an additional 40,000 Maine kids. Substantial one-time reductions related to the pandemic-related enhanced FMAP rate were also included.

Additional funded efforts included DHHS’ continued work to improve the child welfare system and transform the system of services for people with behavioral health challenges. Nearly \$130 million in behavioral health system investments were made as part of the biennial and supplemental budgets to support prevention, early intervention, harm reduction, all levels of treatment, crisis care, and recovery assistance. The supplemental budget also provided \$22 million in one-time General Fund dollars to create an Emergency Housing Relief Fund at MaineHousing to help address homelessness with emergency housing assistance.

In addition to expanding access to MaineCare for more than 90,000 Maine people, Governor Mills’ Made for Maine Health Coverage Act authorized the Department of Health and Human Services to run a State-based Health Insurance Marketplace as part of a larger plan to improve private health insurance for Maine people and small businesses. The State-Based Marketplace is central to the Administration’s work to improve access to affordable health care. Open enrollment in the [CoverME.gov](https://www.coverme.gov) Marketplace began on November 1, 2021 giving Maine people better access to affordable health insurance options.

Combatting the opioid epidemic in Maine has remained another of the Governor’s top health-related priorities and efforts to address this continuing crisis are also supported by both federal and State funds. Recent efforts include increasing reimbursement rates for residential substance use disorder treatment and extending a key employment program for Maine people affected by the opioid crisis. The new reimbursement rates were funded through the 2022 – 2023 “Part II” biennial budget and were approved by the U.S. Centers for Medicare and Medicaid Services. The new rates took effect Nov. 1, 2021. Additionally, the Maine Department of Labor extended its Connecting with Opportunities Initiative, a program for Maine people affected by the opioid epidemic to receive education, skills training, and job search assistance through the end of 2022. The Initiative also prepares Maine people for careers in fields that directly treat substance use disorders, such as counseling, addiction treatment, and mental health care. Finally, the Administration’s OPTIONS program has placed liaisons around the State to connect people who have overdosed to recovery services and treatment, promote drug prevention and harm reduction strategies, and distribute naloxone, the lifesaving overdose medication. One of the Governor’s highest priorities continues to be mitigating the public health impacts of the COVID-19 pandemic to ensure the safety of Mainers. Substantial federal funds have supplemented State funds committed to prevention and response efforts, as well as financial supports for healthcare providers intended to address impacts from the pandemic. Compared to other states, Maine has one of the strongest and most effective nationwide responses to the pandemic and has had a nation-leading vaccination rate.

Transportation

MaineDOT traditionally receives its funding from the State Highway Fund, the TransCap Trust Fund, federal funds, proceeds from authorized bond sales, and other sources. MaineDOT released a \$3.17 billion work plan for all MaineDOT work activities for calendar years 2022 through 2024. The work plan consists of \$2.2 billion in capital work over three years with \$1.8 billion for highway and bridge projects and \$424 million for multi-modal projects.

The State continues to experience a persistent and growing gap between projected Highway Fund revenues and the funds needed for Maine’s transportation infrastructure. Allocations to MaineDOT in recent budgets reflect this challenge. About \$8 million in reductions of Highway Fund FY 2022 and FY 2023 allocations to MaineDOT

programs were contained in the enacted biennial budget, Public Law 2021 Chapter 224. These were primarily associated with adjusting for actual employee benefit costs and managing position vacancies and administrative costs within available resources. The 2022-2023 supplemental budget, Public Law 2021 Chapter 537, increased Highway Fund allocations to MaineDOT by about \$3.2 million for the biennium, nearly all of which was allocated for FY 2023. MaineDOT has also directed additional federal COVID funding available for FY 2022 and FY 2023 to its Highway and Bridge Capital and Highway Light Capital programs.

Notably, the General Fund 2022-2023 biennial and supplemental budgets included measures to direct General Funds to MaineDOT's highway and bridge projects. Consistent with the Governor's recommendations, the bills enacted by the Legislature authorized a one-time transfer of \$50 million from FY 2021 General Fund unappropriated surplus to MaineDOT for use in FY 2022 and \$85 million from FY 2022 surplus to use in FY 2023. Additionally, Public Law 2021 Chapter 398 amended statute regarding the required year-end distributions of any General Fund revenue that exceeds budget. Beginning with FY 2021, 20% of the excess General Fund remaining after certain other priority transfers is transferred to MaineDOT for highway and bridge projects. MaineDOT received about \$56 million from the "cascade" at the end of FY 2021 and about \$100 million at the end of FY 2022. Additionally, the law provides that if the Budget Stabilization Fund is at its statutory limit, then the funds that would normally flow to it are transferred to MaineDOT instead.

Property Tax Relief

Public Law 2021 Chapter 398 raised municipal revenue sharing to 4.5% in FY 2022 and then fully restored revenue sharing to its statutorily required 5% level in FY 2023. Revenue sharing has increased every year since the Governor took office, improving from 2 percent to 3 percent in Fiscal Year 2020, to 3.75 percent in Fiscal Year 2021, to 4.5 percent in Fiscal Year 2022, and now to the full 5 percent in Fiscal Year 2023. The Department of Administrative and Financial Services estimates revenue sharing at 5 percent to be \$233,372,787 for Fiscal Year 2023. For comparison, revenue sharing at 2 percent would have delivered only \$93,349,115 to municipalities, a difference of more than \$140 million. Chapter 398 also maintained the reimbursement to municipalities for the Homestead Property Tax Exemption at 70% in FY 2022 and increases the reimbursement by 3% each year thereafter until it reaches 100%.

The biennial budget and the 2022-2023 supplemental budget also included provisions that increased the amount of the Property Tax Fairness Credit and expanded eligibility for the credit. For tax years beginning on or after January 1, 2022, resident individuals whose benefit base exceeds 4% of their income can receive a credit up to \$1,000 if under 65 years of age, or \$1,500 if 65 years of age or older.

The increases in revenue sharing rates, Homestead reimbursement and Property Tax Fairness credit, along with increasing the funding level for the total cost of K-12 education to 55%, are intended to help mitigate property tax increases at the local level.

Looking to the Future

Forward looking planning and policy for Maine's future remain among the Governor's top priorities. The Governor's recommended budgets consistently allocate funding for Maine's long-term planning and coordination efforts across state government. Additionally, the Governor's Maine Jobs & Recovery Plan, approved by the Legislature and supported by the Governor's Office of Policy Innovation and the Future and the Department of Administration and Financial Services, invests nearly \$1 billion in federal American Rescue Plan funds to achieve three goals: immediate economic recovery from the pandemic; long-term economic growth for Maine; and infrastructure revitalization. As previously described, these investments are already working to address known, systemic challenges that have constrained Maine's ability to thrive, with priority focus on expanding Maine's

workforce. After more than one year of implementation, Maine is among the leading states in the country in successfully deploying these funds to benefit economic recovery, workforce challenges, and infrastructure projects.

The Governor's Office of Policy Innovation and the Future (GOPIF), in partnership with the Governor's Energy Office, plays a critical role in efforts to identify Maine's long-term challenges, develop goals and strategies, and then helps coordinate the ongoing work between State agencies to achieve them. Areas of focus include climate change and energy issues, children's policy, housing, and economic issues like federal funds management and workforce development. Notable activities on these fronts include, but are not limited to:

- Maine Won't Wait, a four-year Climate Action Plan: On December 1, 2020, the Maine Climate Council released a four-year Climate Action Plan entitled Maine Won't Wait. The plan's strategies are already underway and supporting Maine's legal requirement to decrease greenhouse gas emissions by 45% by 2030 and 80% by 2050 and achieve carbon neutrality by 2045. The climate plan was recognized in 2022 by the American Planning Association as the among the best state planning efforts in the country. Since its release, significant and sustained investments, capitalized by state funds and new federal programs, are already underway to implement strategies of the state's Climate Action Plan. Targeted programs and efforts have been made to reduce emissions and improve efficiency in buildings including the most successful heat pump deployment program in the country; efforts to reduce emissions in transportation sector through EV charging infrastructure and vehicle incentives and new public transportation programs; and through continued clean energy development and deployment which is proceeding at a record pace. In addition, a new state program, the Community Resilience Partnership, has been launched to support regional, municipal and tribal efforts to reduce emissions, understand community vulnerabilities, and plan for adaptation to climate impacts. Already more than 100 Maine communities are engaged in the program and doing the essential work to plan for and act in response to climate changes.
- Governor's Bipartisan Infrastructure Law Coordinating Committee: Governor Mills signed an executive order on April 25, 2022, to mobilize a cross-agency effort to coordinate federal Bipartisan Infrastructure Law funds and opportunities among state agencies, municipalities, tribal governments and other entities. Staff from the Governor's Office and the Governor's Office of Policy Innovation and the Future coordinate this work as State agencies pursue opportunities through an Infrastructure Implementation Committee and a Resilience Working Group. While many of the 375 programs outlined in the BIL legislation are continuing to take their final form at the federal level, it is estimated that Maine will receive close to \$2.5 billion in formula funding alone and will have opportunities to compete for extensive additional grants. The Mills Administration is committed to ensuring Maine people and communities receive the greatest possible benefit from the initiatives included in the Bipartisan Infrastructure Law. Members of the Committee include leadership and staff from the Departments of Transportation, Environmental Protection, Economic and Community Development, Health and Human Services, Administration and Financial Services as well as the Maine Connectivity Authority and the Governor's Energy Office. The Resilience Working Group also includes State natural resource agencies and Maine Emergency Management Agency. GOPIF has engaged additional support to ensure communities and state agencies are aware of upcoming competitive funds and staff are providing targeted grant-writing support for high priority projects.
- Aging Cabinet: Governor Mills created the Cabinet on Aging in 2022 by executive order. The new Governor's Cabinet comes at a time when Maine's median age makes it the oldest state in the nation, with tens of thousands of people expected to retire in the coming years, removing them from the state's workforce and increasing demand for aging-related services. The Cabinet on Aging will help Maine prepare for and address these demographic changes by advancing policies that will support Maine people in aging

safely, affordably, and in ways and settings that best serve their needs. The Cabinet is bringing together State government agencies to coordinate and advance work on issues such as affordable housing and long-term services and supports; community engagement and planning; financial security and protection against fraud; access to information, broadband, and services; and engagement and employment in Maine's growing economy.

- Maine Offshore Wind Initiative - Harnessing the wind resources off the coast of Maine is seen as key for achieving the State's goal of using 100 percent renewable energy by 2050. In 2019, Governor Mills created the Maine Offshore Wind Initiative, a multi-faceted approach to pursue a thoughtful, responsible path for offshore wind. Elements of the initiative include a comprehensive economic plan for an offshore wind industry in Maine, the Maine Offshore Wind Roadmap; the research array for floating offshore wind; a study of port infrastructure to support offshore wind focusing on Searsport; regional collaboration through the Gulf of Maine Task Force; and forging offshore wind research and development partnerships. Recently, the Mills Administration applied to the federal government to lease a 15.2-square-mile area in the Gulf of Maine for the nation's first research site in federal waters for floating offshore wind. On this site, which is nearly 30 miles offshore, the State hopes to deploy a small-scale research array of 12 or fewer wind turbines on innovative floating hulls designed at the University of Maine. This project will advance UMaine's patented technology and will foster leading research into how floating offshore wind interacts with Maine's marine environment, fishing industry, shipping and navigation routes, and more.
- Housing Policy: With a new senior level policy leader, GOPIF is supporting the urgent need to increase the supply of housing across the state for multiple household income levels through policy, coordination, and through new funding programs, including Maine Jobs & Recovery Funds. With key partnerships with Maine Housing, a new DECD Housing Opportunity Program, other state government municipal planning efforts, and with state lawmakers, unprecedented state and federal funds are being allocated to address short and long-term housing needs and additional resources and policies will continue to be pursued.
- Children's Cabinet: The Children's Cabinet's strategic plans lay out two overarching goals that all Maine children enter kindergarten prepared to succeed and all Maine youth enter adulthood healthy, connected to the workforce and/or education. Despite the impacts of the pandemic, the Mills Administration, led by the Children's Cabinet have continued to make significant progress toward those goals including targeting State government resources on several efforts. Governor Mills sees quality early childcare and education as critical to the healthy development of young children and to the long-term growth of Maine's economy and supports investments in Maine's childcare infrastructure to increase the availability and quality of childcare, especially in underserved communities in rural Maine. With significant new funding from the Maine Jobs & Recovery Plan, state funds, and other ARPA response funds, significant additional resources have been allocated to stabilize the childcare system staff and providers, to support the expansion of childcare infrastructure and Pre-K programs, and additional funds have been invested in career exploration programs for Maine youth.

OTHER INFORMATION

Awards and Acknowledgements

The Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate of Achievement of Excellence in Financial Reporting to the State of Maine for its annual comprehensive financial report for the fiscal year ended June 30, 2021. This is the fifteenth consecutive year that Maine has achieved this prestigious award. In order to be awarded a Certificate of Achievement, a government must publish an easily

readable and efficiently organized annual comprehensive financial report. This report must satisfy both generally accepted accounting principles and applicable legal requirements.

A Certificate of Achievement is valid for a period of one year only. We believe that our current annual comprehensive financial report continues to meet the Certificate of Achievement Program’s requirements and we will be submitting it to the GFOA to determine its eligibility for another certificate.

The Certificate of Achievement is the highest recognition a government may receive for excellence in financial reporting. We thank the finance community and our auditors for their contributions in achieving this award.

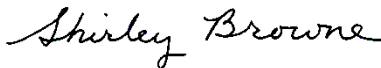

State government continues to have many accomplishments of which it can be proud. Consistent with the vision of Governor Mills to improve and enhance the fiscal administration of governmental operations, the Office of the State Controller continues to improve and refine its skills to meet the challenges of financial management in the 21st century. The Office provides assistance to many State agencies to help ensure the integrity and accountability of the programs they deliver to Maine’s citizens. We partner with financial and program managers to find the best solutions to the State’s financial challenges. In an environment where economic resources are limited and agencies are coping with budget constraints, the challenge of maintaining effective controls is greater than ever. We will continue to partner with each department, at its highest levels, to ensure that the tools are available to help each agency assess its risks and target controls to manage those risks effectively and within its budgetary constraints whenever possible.

Each year the preparation of the ACFR requires the efforts of the finance people throughout the State from virtually all agencies, departments and component units. We sincerely appreciate the dedicated efforts of all of these individuals. We are especially proud of the dedication and contributions of the staff of the Office of the State Controller, who strive to maintain the public’s trust in our financial operations. Their efforts culminate in the ACFR each year.

Sincerely,

Douglas E. Cotnoir, CPA, CIA

INDEPENDENT AUDITOR'S REPORT

Honorable Members of the Legislative Council, 131st Maine Legislature;

Report on the Audit of the Financial Statements

Opinions

We have audited the accompanying financial statements of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information (except for blended component unit, Maine Governmental Facilities Authority, and fiduciary component unit, Maine Public Employees Retirement System) of the State of Maine, as of and for the year ended June 30, 2022, and the related notes to the financial statements. We did not audit the financial statements of the blended component unit, fiduciary component unit, or the aggregate discretely presented component units. These financial statements collectively comprise the State of Maine's basic financial statements as listed in the table of contents.

In our opinion, based on our audit and the reports of the other auditors, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the State of Maine, as of June 30, 2022, and the respective changes in financial position, and, where applicable, cash flows thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

We did not audit the financial statements of the following component units: Efficiency Maine Trust, Finance Authority of Maine, Maine Community College System, Maine Connectivity Authority, Maine Governmental Facilities Authority, Maine Health and Higher Educational Facilities Authority, Maine Maritime Academy, Maine Municipal Bond Bank, Maine Public Employees Retirement System, Maine State Housing Authority, Maine Turnpike Authority, Midcoast Regional Redevelopment Authority, Northern New England Passenger Rail Authority, and the University of Maine System. The financial statements of these named component units represent 100 percent of the assets, net position, and revenue of the aggregate discretely presented component units; 93 percent of assets, 96 percent of net position, and 34 percent of revenue of the aggregate remaining fund information (Maine Public Employees Retirement System and Maine Governmental Facilities Authority); and 4 percent of the assets, and less than 1 percent of the net position and revenue of the governmental activities (Maine Governmental Facilities Authority). The financial statements of these named component units were audited by other auditors whose reports have been furnished to us, and our opinion, insofar as it relates to the amounts included for these component units, is based solely on the report of the other auditors.

Basis for Opinions

We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued

by the Comptroller General of the United States. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the State of Maine and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Key Audit Matters

Key audit matters are those matters that were communicated with those charged with governance and, in the auditor's professional judgment, were of most significance in the audit of the financial statements of the current period. These matters were addressed in the context of the audit of the financial statements as a whole, and in forming the auditor's opinion thereon, and the auditor does not provide a separate opinion on these matters. Key audit matters identified during our audit include:

- **Implementation of Governmental Accounting Standards Board (GASB) Statement No. 87 *Leases*:** This statement increases the usefulness of governments' financial statements by requiring recognition of certain lease assets and liabilities; including reclassification of leases that previously were reported as operating leases and recognized based on the payment provisions of the contract. We audited the State's reclassification and revaluation of leased assets and the reporting thereof. The State's policies relative to leased assets are discussed in Notes 1 and 12 to the financial statements.
- **American Rescue Plan Act (ARPA) Coronavirus State and Local Fiscal Recovery Funds (SLFRF) \$80 million contribution to the Employment Security Trust Fund (ESTF):** In fiscal year 2022, Public Law 2021, Chapter 483, Part D authorized the transfer of \$80 million to the ESTF for the purpose of replenishing the ESTF for COVID-19 related benefit payments. The transfer was treated as an offset to current year claims expenses totaling \$91.2 million, reducing claims expenses to \$11.2 million in the ESTF financial statements. We audited the transfer and its effect on the State's financial statements. The State has discussed this transfer in Note 7 to the financial statements.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the State of Maine's ability to continue as a going concern for twelve months beyond the financial statement date, including any currently known information that may raise substantial doubt shortly thereafter.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinions. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit is conducted in accordance with generally accepted auditing standards and *Government Auditing Standards* will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with generally accepted auditing standards and *Government Auditing Standards*, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the State of Maine's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the State of Maine's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the Management's Discussion and Analysis on pages 33 to 44, and Budgetary Comparison Information, State Retirement Plans, Other Post-Employment Benefit Plans, and Information about Infrastructure Assets Reported Using the Modified Approach on pages 141 to 178, be presented to supplement the basic financial statements. Such information is the responsibility of management and, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We and other auditors have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Supplementary Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the State of Maine's basic financial statements. The accompanying combining and individual non-major fund financial statements are presented for purposes of additional analysis and are not a required part of

the basic financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. The information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America by us and other auditors. In our opinion, based on our audit and the reports of the other auditors, the combining and individual non-major fund financial statements are fairly stated, in all material respects, in relation to the basic financial statements as a whole.

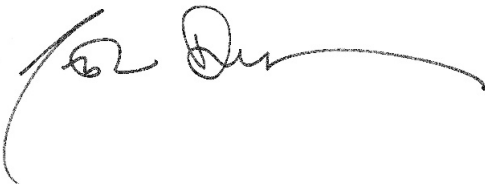

Other Information

Management is responsible for the other information included in the annual report. The other information comprises the introductory and statistical sections but does not include the basic financial statements and our auditor's report thereon. Our opinions on the basic financial statements do not cover the other information, and we do not express an opinion or any form of assurance thereon.

In connection with our audit of the basic financial statements, our responsibility is to read the other information and consider whether a material inconsistency exists between the other information and the basic financial statements, or the other information otherwise appears to be materially misstated. If, based on the work performed, we conclude that an uncorrected material misstatement of the other information exists, we are required to describe it in our report.

Other Reporting Required by *Government Auditing Standards*

In accordance with *Government Auditing Standards*, we have also issued our report dated December 14, 2022, on our consideration of the State of Maine's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the State of Maine's internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the State of Maine's internal control over financial reporting and compliance.

A handwritten signature in black ink, appearing to read 'M. Dunlap', with a long horizontal flourish extending to the right.

MANAGEMENT'S DISCUSSION AND ANALYSIS

This section of the State of Maine's annual financial report presents the State's discussion and analysis of financial performance during the year ended June 30, 2022. Please read it in conjunction with the transmittal letter at the front of this report and with the State's financial statements, which follow this section.

FINANCIAL HIGHLIGHTS

Coronavirus Disease (COVID-19) Pandemic:

During the fiscal year ended June 30, 2022, the effects of COVID-19, a respiratory disease caused by a new strain of coronavirus, which was declared a pandemic by the World Health Organization, continued to impact the economy at all levels, including within the State, and continued to cause volatility in financial markets around the world, including in the United States.

Maine was well-poised, economically before the onset of the COVID-19 pandemic. Maine's economy, as measured by GDP, has not only fully recovered to pre-pandemic levels, it has surpassed them. Maine's bond ratings have been upheld by both Moody's and Standard & Poor's, and we have increased the balance in the Budget Stabilization Fund to its highest level ever.

The unprecedented federal fiscal and monetary policies have significantly impacted Maine's economy, raising the volume and mix of economic activity, which is in turn driving revenues and prosperity. The economic, financial and budgetary impacts on the State and its economy from the measures taken to combat the spread of COVID-19 have been and are expected to continue to be significant.

Government-wide:

- The net position of Governmental Activities increased by \$457.5 million, while net position of Business-Type Activities increased by \$170.1 million. The State's assets and deferred outflows exceeded its liabilities and deferred inflows by \$2.574 billion at the close of fiscal year 2022. Of this amount \$2.029 billion was reported as negative "Unrestricted" net position. A negative balance means that it would be necessary to convert restricted assets (e.g., capital assets) to unrestricted assets if all ongoing obligations were immediately due and payable. Component units reported net position of \$3.768 billion, an increase of \$128.1 million (3.5 percent) from the previous year.

Fund level:

- At the end of the fiscal year, the State's governmental funds reported combined ending fund balances of \$2.696 billion, an increase of \$175.5 million from the previous year. The General Fund's total fund balance was \$960.4 million, an increase of \$174.8 million from the previous year. The General Fund tax revenue increase was primarily due to a wage growth of nearly 2 percent as well as a significant increase in capital gains realization. The Other Special Revenue Fund total fund balance was \$1.506 billion, an increase of \$136.5 million from the prior year. This was due primarily to an increase in net Transfers from Other Funds
- The proprietary funds reported net position at year-end of \$1.155 billion, an increase of \$192.1 million from the previous year. The increase is primarily the result of an increase in the Employment Security Fund of \$156.6 million and an increase in Employee Health Insurance and Retiree Health Insurance Funds, both Internal Service Funds, of \$4.6 million and \$14.1 million, respectively.

Long-term Debt:

- The State's liability for general obligation bonds decreased by \$96.3 million during the fiscal year, which represents the difference between new issuances and payments of outstanding debt. During the year, the State did not issue any new general obligation bonds and made principal payments of \$96.3 million.

Additional information regarding the government-wide, fund level, and long-term debt activities can be found beginning on page 36.

OVERVIEW OF THE FINANCIAL STATEMENTS

This discussion and analysis is an introduction to the State of Maine's basic financial statements, which are comprised of three components: 1) government-wide financial statements, 2) fund financial statements, and 3) notes to the financial statements. This report also contains other supplementary information in addition to the basic financial statements.

Government-wide Statements

The government-wide statements report information about the State as a whole using accounting methods similar to those used by private-sector companies. The Statement of Net Position presents all of the State's assets, deferred outflows, liabilities and deferred inflows with the difference between the two reported as net position. Over time, increases and decreases in net position are an indicator of whether the financial position is improving or deteriorating.

The Statement of Activities presents information showing how the State's net position changed during the most recent fiscal year. All changes in net position are reported as soon as the underlying events giving rise to the change occur, regardless of the timing of related cash flows. Therefore, revenues and expenses are reported in these statements for some items that will only result in cash flows in future fiscal periods (e.g., uncollected taxes and earned but unused leave).

Both government-wide statements report three activities:

Governmental activities - Most basic services, such as health and human services, education, governmental support and operations, justice and protection, and transportation are included in this category. The Legislature, Judiciary and the general operations of the Executive departments fall within the Governmental Activities. Income taxes, sales and use taxes, and State and federal grants finance most of these activities.

Business-type activities - The State charges fees to customers to help cover all, or most of, the costs of certain services it provides. Operating costs not covered by customer fees are subsidized by the General Fund. Lottery tickets, Ferry Services, and the State's unemployment compensation services are examples of business-type activities.

Component units - Although legally separate, component units are important because the State is financially accountable for these entities. The State has one "blended" component unit, the Maine Governmental Facilities Authority (MGFA) with Governmental Activities as described above. Maine reports 12 other component units (7 major and 5 non-major) as discretely presented component units of the State, and one component unit is reported with the State's fiduciary funds. Complete financial statements of the individual component units may be obtained directly from their respective administrative offices as shown in Note 1 A to the financial statements.

Government-wide statements are reported utilizing an economic resources measurement focus and full accrual basis of accounting. The following summarizes the impact of the transition from modified accrual to full accrual accounting:

- Capital assets used in governmental activities are not reported on governmental fund statements but are included on government-wide statements.
- Certain tax revenues that are earned, but not available, are reported as revenues in the Governmental Activities, but are reported as deferred inflows on the governmental fund statements.
- Other long-term assets that are not available to pay for current period expenditures are recorded as deferred outflows in governmental fund statements, but not deferred on the government-wide statements.
- Internal service funds are reported as Governmental Activities in the government-wide statements, but reported as proprietary funds in the fund financial statements.
- Governmental fund long-term liabilities, such as certificates of participation, net pension liabilities, compensated absences, bonds and notes payable, and others appear as liabilities only in the government-wide statements.
- Capital outlay spending results in capital assets on the government-wide statements, but is recorded as expenditures on the governmental fund statements.

- Proceeds from bonds, notes and other long-term financing arrangements result in liabilities on the government-wide statements, but are recorded as other financing sources on the governmental fund statements.
- Net position balances are allocated as follows:
 - *Net Investment in Capital Assets* are capital assets, net of accumulated depreciation, and reduced by outstanding balances for bonds, notes, and other debt attributed to the acquisition, construction or improvement of those assets.
 - *Restricted Net Position* are those with constraints placed on the use by external sources (creditors, grantors, contributors, or laws or regulations of governments) or imposed by law through constitutional provisions or enabling legislation.
 - *Unrestricted Net Position* is the net amount of the assets, deferred outflows of resources, liabilities, and deferred inflows of resources that do not meet any of the above restrictions.

Fund Financial Statements

The fund financial statements provide more detailed information about the State’s most significant funds. Funds are fiscal and accounting entities with self-balancing sets of accounts that the State uses to keep track of specific revenue sources and spending for particular purposes. The State’s funds are divided into three categories – governmental, proprietary, and fiduciary – and use different measurement focuses and bases of accounting.

Governmental funds: Most of the basic services are included in governmental funds, which generally focus on how money flows into and out of those funds and the balances left at year-end that are available for future spending. The governmental fund statements provide a detailed short-term view that helps determine whether there are more or fewer financial resources that can be spent in the near future to finance the programs of the State. The governmental fund statements focus primarily on the sources, uses, and balance of current financial resources and often have a budgetary orientation. These funds are reported using a flow of current financial resources measurement focus and the modified accrual basis of accounting. Because this information does not encompass the additional long-term focus of the government-wide statements, a separate reconciliation provides additional information that explains the relationship (or differences) between them. The governmental funds consist of the General Fund, special revenue, capital projects, and permanent funds.

Proprietary funds: When the State charges customers for the services it provides, whether to outside customers or to other agencies within the State, these services are generally reported in proprietary funds. Proprietary funds (enterprise and internal service) apply the accrual basis of accounting utilized by private sector businesses. Enterprise funds report activities that provide supplies and services to the general public. An example is the State Lottery Fund. Internal service funds report activities that provide supplies and services to the State’s other programs and activities – such as the State’s Postal, Printing and Supply Fund. Internal service funds are reported as Governmental Activities on the government-wide statements.

Fiduciary funds: The State is the trustee or fiduciary for assets that belong to others. The State is responsible for ensuring that the assets reported in these funds are used only for their intended purposes and by those to whom the assets belong. These funds include pension and other employee benefit trusts administered by the Maine Public Employees Retirement System, a component unit, private-purpose trusts, and custodial funds. Fiduciary funds are reported using the accrual basis of accounting. The State excludes these activities from the government-wide financial statements because these assets are restricted in purpose and do not represent discretionary assets of the State to finance its operations.

Notes to the Financial Statements

The notes to the financial statements provide additional information that is essential to a full understanding of the data provided in both the government-wide and fund financial statements.

Required Supplementary Information

The required supplementary information includes budgetary comparison schedules for the General Fund and major special revenue funds. Also included are notes and a reconciliation of fund balance from the budgetary basis to fund balance determined according to generally accepted accounting principles. This section also includes schedules of funding progress for certain pension and other post-employment benefit trust funds and condition and maintenance data regarding certain portions of the State's infrastructure.

Other Supplementary Information

Other supplementary information includes combining financial statements for non-major governmental, proprietary, and fiduciary funds. These funds are added together, by fund type, and presented in single columns in the basic financial statements. Budgetary comparison schedules by agency are also included for the general fund, the highway fund, federal funds, and other special revenue fund.

FINANCIAL ANALYSIS OF THE STATE AS A WHOLE

The State's net position increased by \$627.6 million to \$2.574 billion over the course of fiscal year ended June 30, 2022, as detailed in Tables A-1 and A-2. The increase is primarily due to increased corporate and individual tax revenue for governmental activities.

* As restated

The State's fiscal year 2022 revenues totaled \$13.569 billion. (See Table A-2) Taxes and Operating grants and contributions accounted for most of the State's revenue by contributing 45.7 percent and 42.2 percent, respectively. The remainder came from charges for services and other miscellaneous sources.

The Coronavirus Aid, Relief, and Economic Security Act, also known as the CARES Act, is a \$2.2 trillion dollar economic stimulus bill signed into law on March 27, 2020 in response to the economic fallout of the COVID-19 pandemic. Through federal legislation, the State of Maine received \$1.25 billion dollars of Coronavirus State Fiscal Recovery Funds (CSFRF) during fiscal year 2020 to be expended through fiscal year 2023.

The State recorded operating grant revenues and operating expenses in the Coronavirus Relief Federal Expenditures Fund as costs were incurred. The current unexpended amount is recorded as a Due To Other Government.

The American Rescue Plan Act of 2021, also known as ARPA, is a \$1.9 trillion dollar bill intended to provide funding to combat the COVID-19 pandemic, including public health and economic impacts, signed into law on March 11, 2021. Through federal legislation, the State of Maine received \$997.5 million dollars of State and Local Fiscal Recovery Funds (SLFRF) payable in two tranches. The first tranche of \$498.75 million was received during fiscal year 2021 and the second tranche of \$498.75 was received in fiscal year 2022.

The total cost of all programs and services totaled \$12.941 billion for the year 2022. (See Table A-2) These expenses are predominantly (64.7 percent) related to health & human services and education activities. The State's governmental support & operations activities accounted for 12.5 percent of total costs. Total net position increased by \$627.6 million, primarily due to an increase in tax revenue of \$898.1 million. The increase in operating grants and contributions was offset with increases in expenses in health & human services, education and economic development & workforce training primarily due to the impact of the COVID-19 pandemic.

* As Restated

Governmental Activities

Revenues for the State's Governmental Activities totaled \$12.739 billion while total expenses equaled \$12.404 billion. The increase in net position for Governmental Activities was \$457.5 million in 2022, which was primarily the result of an increase in tax revenue of \$898.1 million. The increase in tax revenue was primarily due to a wage increase of nearly 2 percent as well as a significant increase in capital gains realization. The increase in expense activities is offset in part with the increase in operating grants & contributions primarily due to the impact of COVID-19. In addition, the State's Business-Type Activities transfers of \$122.9 million (net) to the Governmental Activities, included statutorily required profit transfers and the pledged profit of the Alcoholic Beverages Fund to finance the payment of the Liquor Revenue Bonds.

The users of the State's programs financed \$645.5 million of the cost. The federal and State governments subsidized certain programs with grants and contributions of \$5.722 billion. \$6.372 billion of the State's net costs were financed by taxes and other miscellaneous revenue.

TABLE A-3: TOTAL SOURCES OF REVENUES FOR GOVERNMENTAL ACTIVITIES FOR FISCAL YEAR 2022

TABLE A-4: TOTAL EXPENSES FOR GOVERNMENTAL ACTIVITIES FOR FISCAL YEAR 2022

Business-Type Activities

Revenues for the State's Business-Type Activities totaled \$830.1 million while expenses totaled \$537.1 million. The increase in net position for Business-Type Activities was \$170.1 million in 2022, due entirely to the decrease in expenses related Employment Security Fund

Table A-5 presents the revenue of State Business-Type Activities: Employment Security, Alcoholic Beverages, Lottery, Ferry Services, Military Equipment Maintenance, Consolidated Emergency Communications and other. The table also shows each activity's net cost (total cost less fees generated by the activities and intergovernmental aid provided for specific programs) or net revenue. The net cost shows the financial burden placed on the State's taxpayers by each of these functions.

TABLE A-5: NET REVENUE (COST) OF BUSINESS-TYPE ACTIVITIES
(Expressed in Thousands)

	<u>Total Cost</u>		<u>Net Revenue (Cost)</u>	
	<u>2022</u>	<u>2021</u>	<u>2022</u>	<u>2021</u>
Employment Security	\$ 11,217	\$ 251,681	\$ 160,823	\$ (95,234)
Alcoholic Beverages	183,874	175,750	62,026	61,671
Lottery	319,494	328,250	72,368	69,748
Ferry Services	13,713	12,501	(7,166)	(6,659)
Consolidated Emergency Communications	5,705	6,120	1,335	989
Other	3,048	4,722	3,640	999
Total	<u>\$ 537,051</u>	<u>\$ 779,024</u>	<u>\$ 293,026</u>	<u>\$ 31,514</u>

The cost of all Business-Type Activities this year was \$537.1 million. The users of the State's programs financed most of the cost. The State's net revenue from Business-Type Activities was \$293.0 million. Employment Security net revenue increased by \$160.8, while Alcoholic Beverages and Lottery contributed \$62.0 and \$72.4 million of net revenue, respectively. The \$122.9 million (net) transfers from the State's Business-Type Activities to the Governmental Activities included statutorily required profit transfers and the pledged profit of the Alcoholic Beverages Fund to finance the payment of the Liquor Revenue Bonds.

FINANCIAL ANALYSIS OF THE STATE'S FUNDS

TABLE A-6: GOVERNMENTAL FUND BALANCES
(Expressed in Thousands)

	<u>2022</u>	<u>2021</u>	<u>Change</u>
General	\$ 960,371	\$ 785,596	\$ 174,775
Highway	4,185	56,673	(52,488)
Federal	52,326	61,932	(9,606)
Other Special Revenue	1,506,249	1,369,756	136,493
Other Governmental Funds	172,420	246,120	(73,700)
Total	<u>\$ 2,695,551</u>	<u>\$ 2,520,077</u>	<u>\$ 175,474</u>

As of the end of the fiscal year, the State's governmental funds reported combined ending fund balances of \$2.696 billion, an increase of \$175.5 million in comparison with the prior year. Of this total, \$67.5 million (2.5 percent) is classified as non-spendable, either due to its form or legal constraints, and \$994.1 million (36.9 percent) is restricted for specific programs by external constraints, constitutional provisions, or contractual obligations. Unspent bond proceeds and revenue restricted for transportation, natural resources or other programs are included in restricted fund balance. At the end of fiscal year 2022, there was a \$604.4 million of unassigned fund balance on the GAAP basis in the General Fund.

General Fund revenues and other sources were greater than General Fund expenditures and other uses resulting in an increase in the fund balance of \$174.8 million. Revenues and other sources of the General Fund increased by approximately \$710.1 million (13.9 percent), as compared to fiscal year end 2021, which is mainly attributed to an increase in tax revenue of over \$701.7 million primarily due to in Sales & Use Tax, Individual Income Tax and Corporate Income Tax. General Fund expenditures and other financing uses increased by \$1.1 billion (24.1 percent), as compared to fiscal year 2021. This is due, primarily, to an increase in Transfers to Other Funds of \$713.4 million primarily related to various legislative initiatives.

Other Special Revenue Fund balance increased \$136.5 million, due primarily to an increase in net Transfers from Other Funds of \$720.1 million for various legislative initiatives.

Budgetary Highlights

For the 2022 fiscal year, the final legally adopted budgeted expenditures for the General Fund amounted to \$4.375 billion, an increase of about \$18 million from the original legally adopted budget of approximately \$4.357 billion. Actual expenditures on a budgetary basis amounted to approximately \$281.9 million less than those authorized in the final budget. After deducting the encumbered obligations and other commitments that will come due in fiscal year 2022, including the budgeted starting balance for fiscal year 2022, there were funds remaining of \$502.4 million to distribute in fiscal year 2022. Actual revenues exceeded final budget forecasts by \$517.7 million. Interest earnings of \$2.5 million along with legislatively and statutorily approved transfers resulted in an increase to the balance in the Budget Stabilization Fund to \$896.0 million as of June 30, 2022. This item is further explained in Note 2 of the Financial Statements.

CAPITAL ASSET AND DEBT ADMINISTRATION

Capital Assets

By the end of fiscal year 2022, the State had roughly \$4.815 billion in a broad range of capital and right to use assets, including land, infrastructure, improvements, buildings, equipment, vehicles and intangibles. During fiscal year 2022, the State acquired or constructed more than \$216.8 million of capital and right to use assets. The most significant impact on capital assets during the year resulted from continued construction and rehabilitation of roads and bridges, and major construction and renovation of State-owned facilities. More detailed information about the State's capital assets and significant construction commitments is presented in Notes 8 and 18 to the financial statements.

Modified Approach for Infrastructure

As allowed by GASB Statement No. 34, the State has adopted an alternative process for recording depreciation expense on selected infrastructure assets – highways and bridges. Under this alternative method, referred to as the modified approach, the State expenses certain maintenance and preservation costs and does not report depreciation expense. Utilization of this approach requires the State to: 1) maintain an asset management system that includes an up-to-date inventory of infrastructure assets; 2) perform condition assessments that use a measurement scale and document that the infrastructure assets are being preserved at or above the condition level established; and 3) estimate the annual amounts that must be expended to preserve and maintain the infrastructure at the condition level established by the State. As long as the State meets these requirements, any additions or improvements to infrastructure are capitalized and all other maintenance and preservation costs are expensed.

Highways and bridges are included in the State’s infrastructure. There are 8,789 highway miles or 17,851 lane miles within the State. Bridges have a deck area of 12.4 million square feet among 3,019 total bridges. The State has established a policy to maintain its highways at an average condition assessment of 60. At June 30, 2022, the actual average condition was 76.2. Its policy for bridges is an average sufficiency rating condition assessment of 60. The actual average condition for bridges was 74.0 at June 30, 2022. Preservation costs for fiscal year 2022 totaled \$176.0 million compared to estimated preservation costs of \$185.0 million.

Transportation bonds, approved by referendum, are issued to fund improvements to highways and bridges. Of the amount authorized by PL 2019, Chapter 673, \$460 thousand in General Fund bonds were spent during fiscal year 2022.

Additional information on infrastructure assets can be found in Required Supplementary Information (RSI).

Long-Term Debt

The State Constitution authorizes general obligation long-term borrowing, with 2/3 approval of the Legislature and ratification by a majority of the voters, and general obligation short-term notes, of which the principal may not exceed an amount greater than 10 percent of all moneys appropriated, authorized and allocated by the Legislature from undedicated revenues to the General Fund and dedicated revenues to the Highway Fund for that fiscal year, or greater than 1 percent of the total valuation of the State of Maine, whichever is the lesser.

At year-end, the State had \$1.716 billion in general obligation and other long-term debt outstanding. More detailed information about the State’s long-term liabilities is presented in Note 11 to the financial statements.

TABLE A-8: OUTSTANDING LONG-TERM DEBT
(Expressed in Thousands)

	Governmental Activities		Business-type Activities		Total Primary Government	
	2022	2021*	2022	2021	2022	2021

Total	<u>\$ 1,714,985</u>	<u>\$ 1,828,636</u>	<u>\$ 959</u>	<u>\$ 979</u>	<u>\$ 1,715,944</u>	<u>\$ 1,829,615</u>

*As restated

During the year, the State reduced outstanding long-term obligations by \$96.3 million for general obligation bonds and \$319.3 million for other long-term debt. Also during fiscal year 2022, the State incurred \$301.9 million of additional long-term obligations.

Credit Ratings

The State’s credit was rated during fiscal year 2022 by Moody’s Investors Service as Aa2 with a stable outlook and by Standard & Poor’s as AA with a stable outlook.

FACTORS BEARING ON THE FUTURE OF STATE AND NEXT YEAR'S BUDGETS

The Maine Consensus Economic Forecasting Commission (CEFC) convened on October 28, 2022, to review and revise its forecast through 2027. This meeting builds on the Commission's forecast update of February 1, 2022, incorporating the most recent data available for all relevant baseline data.

The CEFC is optimistic about recent strong in-migration to Maine and its potential to fuel the local economy. However, the Commission notes that limiting factors such as lack of housing and childcare may hamper growth in the coming years. Additionally, the CEFC is concerned about high rates of inflation and associated interest rate hikes. High heating oil prices during the coming winter season will present challenges for Maine households. These high energy costs, combined with high overall inflation, geopolitical upheaval, and tight labor markets were among the key risks to continued economic growth that the CEFC considered as it revised its forecasts.

Total nonfarm employment is forecast to increase by 2.5% in 2022 based on year-to-date estimates from the Maine Department of Labor, 0.8% in 2023, 0.4% in 2024, and 0.2% in 2025, before leveling off to 0.0% growth in 2026 and 2027. This reflects an upward revision to the 2022 growth rate, but a downward revision for 2023. The CEFC noted that the downward revision in 2023 was incorporated due to uncertainty surrounding current labor market tightness. The revised forecast anticipates employment will nearly return to pre-pandemic levels in 2022, will surpass them in 2023 and will grow to 645,300 in 2025 before leveling off. These forecast levels of employment are higher than those expected in the Commission's February 2022 forecast.

The Commission raised its forecast for total personal income growth in 2022 from 1.7% to 3.6%, left its forecast unchanged for 2023 at 5.0%, and revised its forecast for 2024-2026 down slightly to 4.7%, 4.4%, and 4.5%, respectively, reflecting the Federal Reserve's current efforts to restrain inflation by continuing modest increases in interest rates over the next few months. These were 0.2, 0.1 and 0.1 percentage points lower than the last forecast for 2024-2026. The Commission also revised its forecast for 2027 up from 4.5% to 4.6%. This revision in the near-term accounts for data pointing to strong wage growth in 2022.

The Commission revised its estimates of growth in wages and salaries, the largest component of personal income, up from 6.5% to 11.0% in 2022 and from 5.5% to 6.0% in 2023, leaving the remaining years unchanged. Similarly, it revised growth in supplements to wages and salaries up from 6.5% to 7.0% in 2022 but left all following years unchanged. The upward revision in 2022 is due to strong wage growth and the recognition that retirement contributions are often tied to wages and salaries.

The Commission revised its forecast for growth in the Consumer Price Index (CPI) up from 5.0% to 8.3% for 2022 following persistently high inflation in recent months. The forecast was also revised up for all remaining years, from 4.0% to 5.8% for 2023; from 2.5% to 4.0% for 2024; from 2.5% to 3.5% for both 2025 and 2026; and from 2.5% to 3.0% for 2027. High energy prices, labor market tightness, and continued supply challenges have led the CEFC to expect inflation to take several years to abate.

Finally, the Commission revised its forecast for corporate profits up in 2022, from 4.0% to 10.2%, and down in 2023 and 2024, to 2.0% and 5.0% (from 4.0% and 6.0%, respectively). The forecasts for 2025-2027 were left unchanged, at 6.0% each year.

Maine had a strong year of population growth in 2021, gaining just under 10,000 in population. Net domestic migration fueled Maine's growth as the state had the seventh highest net domestic migration rate in the U.S. and first in New England.

Total personal income grew by 4.5% in the second quarter of 2022. Wage and salary income, which is the largest component of personal income, grew by 6.0%. Meanwhile, Gross Domestic Product fell for two consecutive quarters, by 0.5% and 1.2% in the first two quarters of 2022. The Consumer Price Index continues to show persistently rapid price increases, reaching a peak of 9.1% year-over-year in June and decelerating to 8.2% by September. The PCE price index increased by 6.2% in August.

Given high inflation and economic uncertainty, the Consumer Sentiment Index was down almost 17% in October, though rebounding slightly from a series low in June. The Small Business Optimism Index was down 7.1% from a year ago in September.

Single family existing-home sales have cooled, with the number of sales falling by 8.6% year-over-year in September, although prices continued to increase by a more modest 3.1%. Maine's House Price Index rose 21% in the second quarter of 2022 over a year prior, higher than both New England and the United States.

The key assumptions made by the CEFC are:

- Economic conditions are highly uncertain, with the potential for a slowdown in 2023; concerns remain that conditions are uneven across different sectors, demographic/socioeconomic groups, and amongst Maine counties.
- We have transitioned to an endemic phase of COVID-19; people’s behavior has adjusted to living with the risks of the virus (the “new normal”) and the economy and health system will be minimally disrupted by foreseeable future waves.
- No further federal stimulus is anticipated; many businesses that are paying back loans from past stimulus in the face of uncertain economic conditions are struggling. High inflation, high interest rates, low consumer sentiment, housing affordability/availability, and the correction in the stock market combine to create a challenging macroeconomic environment.
- The current labor supply is limited and affected by many different factors, including structural changes in the economy, the availability of consistent, in-person childcare, retirements by workers age 55 and up, and the demographic structure of Maine’s population. Migration has been a source of growth for labor supply. The Commission is optimistic that there is an opportunity for Maine to see continued increased in-migration in the coming years as telework has become part of the “new normal” and people look for locations that allow for work-life balance and access to outdoor recreation, but housing and childcare/school availability are potential limiting factors.
- Rising interest rates are slowing effective demand for real estate, although variation in regional economies exists. Higher home prices have contributed to higher rental prices. Affordability is of particular concern as interest rates have spiked, causing more potential buyers to be priced out of the market.
- The healthcare system in Maine has been under tremendous stress during the pandemic and those strains are likely to continue for the near term with implications for the workforce and patients accessing care. Workforce and inflation are two key challenges for the healthcare system. Employment remains below pre-pandemic levels although traveling nurses have been providing some additional labor.
- The availability of high-speed internet and mobile phone coverage will be an important equalizer between urban and rural areas and could contribute to the diffusion of migration across the state. The creation of the Maine Connectivity Authority and infusion of federal funding will help the successful buildout of high-speed internet. It should be noted, though, that not all jobs can be done in a remote work environment.
- Inflation expectations are much higher, more persistent, and more widespread than what the Federal Reserve Bank previously expected. There is a risk of continued higher inflation into 2023, with higher energy prices posing a particular concern for consumers in Maine where heating oil and gasoline are heavily relied on. Heating oil prices have started the heating season high and are expected to remain elevated, with the potential for even larger costs to households and businesses if there is a colder than usual winter. Inflation risks are likely to take several years to fully ease.
- The strength of the U.S. dollar could pose a challenge to exporters in Maine. A high dollar also keeps energy prices high and could also affect the numbers of Canadian tourists choosing to come to Maine.
- Geopolitical tensions remain elevated and could continue to have a negative effect on the forecast.

The Revenue Forecasting Committee (RFC) will meet to review and update the current revenue forecast to comply with the statutory reporting date in December 2022. Based on the November CEFC forecast, the RFC will consider its revenue projections through the fiscal year ending June 30, 2023 for the General Fund, Highway Fund, Fund for a Healthy Maine and Medicaid/MaineCare Dedicated Revenue Taxes.

At June 30, 2022, the State of Maine reported an ending fund balance of \$960.4 million in the General Fund on a GAAP basis, an increase of more than \$174.8 million since the end of fiscal year 2021. The General Fund “unassigned” fund balance on a GAAP basis at June 30, 2022 was \$604.4 million.

There are factors that adversely affect our General Fund Balance Sheet that we should continue to strive to improve over the next several years. The primary factors that have a significant impact on the State's Financial Statements compiled and issued in accordance with Generally Accepted Accounting Principles as applicable to governments include such items as accruing tax revenues for budgetary purposes and for financial statement purposes without accruing the offsetting liabilities for budgetary purposes and the demand from appropriations whose balances carry from year to year, which results in lower amounts accruing to the Unassigned Fund Balance of the General Fund. The State has eliminated the smaller tax line accruals on a budgetary basis and has made contributions to General Fund reserves a higher priority in the budget.

These actions, along with the Governor's commitment to closing the structural gap in the budget, have resulted in significant increases in the equity and cash positions of the General Fund. Consequently, the State has seen record levels in its Treasurer's Cash Pool and Budget Stabilization Fund, and has not required external borrowing in the form of TANs or BANs for cash flow purposes.

CONTACTING THE STATE'S FINANCIAL MANAGEMENT

This financial report is designed to provide citizens, taxpayers, customers, investors and creditors with a general overview of the finances of the State and to demonstrate the State's accountability for the money it receives. GOVERNMENTAL FUND FINANCIAL STATEMENTS

MAJOR FUNDS

General Fund – This is the State's primary operating fund. Its purpose is to account for all financial resources obtained and used for general government operations, which are not required to be accounted for in another fund.

Highway Fund – This fund is used primarily to account for motor fuel tax revenues, motor vehicle license and registration fees, and special State appropriations that are legally restricted to the construction and maintenance of State highways and bridges.

Federal Fund – This fund is used to account for grants, block grants and other financial assistance received from the federal government, that are legally restricted to expenditures for purposes specified in the grant awards or agreements.

Other Special Revenue Fund – This fund is used to account for revenue sources that are legally restricted to expenditures for specified purposes, including some major capital projects that are not accounted for in the Highway and Federal Funds.

NON-MAJOR FUNDS

Other Governmental Funds are used to account for revenue sources that are legally restricted to expenditures for specified purposes, including some major capital projects and funds held in trust for public purposes.

STATE OF MAINE
RECONCILIATION OF THE BALANCE SHEET - GOVERNMENTAL FUNDS
TO THE STATEMENT OF NET POSITION

June 30, 2022
(Expressed in Thousands)

Total fund balances for governmental funds	\$	2,695,551
Amounts reported for governmental activities in the Statement of Net Position are different because:		
Capital assets used in governmental activities are not financial resources and therefore are not reported in the governmental funds.		4,986,738
Accumulated Depreciation & Amortization		<u>(587,248)</u>
		4,399,490
Refunded Bond Deferred Outflows		1,237
Pollution Remediation Receivable		283
Long-term liabilities are not due and payable in the current period. Therefore, long-term liabilities are not reported in the governmental fund statements. However, these amounts are included in the Statement of Net Position. This net effect of these balances on the statement:		
Bonds Payable		(986,000)
Interest Payable Related to Long-term Financing		(6,370)
Certificates of Participation and Other Financing Arrangements		(59,185)
Leases		(12,000)
Loans Payable to Component Unit		(270,449)
Compensated Absences		(65,670)
Pension Liabilities and Deferrals		(1,873,537)
Other Post-Employment Benefit Liabilities and Deferrals		(2,728,099)
Pollution Remediation and Landfill Obligations		<u>(47,361)</u>
		(6,048,671)
Certain revenues are earned but not available and therefore are not reported in the governmental fund statements.		412,108
Other Revenue		(40,683)
Internal service funds are used by management to charge the costs of certain activities to individual funds. The assets and liabilities of the internal service funds are included in governmental activities in the Statement of Net Position.		<u>443,225</u>
Net position of governmental activities	\$	<u><u>1,862,540</u></u>

The accompanying notes are an integral part of the financial statements.

The accompanying notes are an integral part of the financial statements.

STATE OF MAINE
RECONCILIATION OF THE STATEMENT OF REVENUES, EXPENDITURES AND CHANGES
IN FUND BALANCES - GOVERNMENTAL FUNDS TO THE STATEMENT OF ACTIVITIES

Fiscal Year Ended June 30, 2022
(Expressed in Thousands)

Net change in fund balances - total governmental funds		\$ 175,474
Amounts reported for governmental activities in the Statement of Net Activities are different because:		
Governmental funds report capital outlay as expenditures. However, in the Statement of Activities, the cost of those assets is allocated over their estimated useful lives as depreciation expense.		
Capital Outlay	167,648	
Depreciation Expense	(39,653)	
The net effect of various transactions involving capital assets (i.e. sales, trade-ins and contributions) is to increase net position.	<u>(2,375)</u>	125,620
Refunded Bond Deferred Outflows		(388)
Pollution Remediation Receivable		(177)
The issuance of long-term debt provides current financial resources to governmental funds which increases long-term debt in the Statement of Net Position. Repayment of the principal of long-term debt consumes the current financial resources of governmental funds, but repayment reduces long-term debt in the Statement of Net Position. This is the amount that proceeds exceed repayments:		
Bond Proceeds	(44,815)	
Proceeds from Other Financing Arrangements	(24,300)	
Repayment of Bond Principal	102,845	
Repayment of Other Financing Debt	5,147	
Repayment of Pledged Revenue Principal	66,544	
Repayment of Lease Principal	638	
Accrued Interest	(77)	
Amortization of Bond Premiums	12,429	118,411
Certain expenditures are reported in the funds. However, they either increase or decrease long-term liabilities reported as expenditures on the Statement of Net Position and have been eliminated from the Statement of Position as follows:		
Compensated Absences	(2,611)	
Pension Liabilities and Deferrals	222,561	
Other Post-employment Benefit Liabilities and Deferrals	(331,336)	
Pollution Remediation and Landfill Obligations	<u>(4,955)</u>	(116,341)
Certain revenues are earned but not available and therefore are not reported in the governmental fund statements.		132,939
Internal service funds are used by management to charge the costs of certain activities to individual funds. The net revenue (expense) of the internal service funds is included in governmental activities in the Statement of Activities.		<u>21,986</u>
Changes in net position of governmental activities		<u><u>\$ 457,524</u></u>

The accompanying notes are an integral part of the financial statements.

PROPRIETARY FUND

FINANCIAL STATEMENTS

MAJOR FUNDS

Employment Security Fund - This fund accounts for unemployment insurance contributions from employers and the payment of unemployment benefits to eligible claimants.

NON-MAJOR FUNDS

Non-Major Enterprise Funds are used to account for operations that are financed and operated in a manner similar to private business, where the State intends to finance or recover the costs of providing goods or services to the General Public on a continuing basis primarily through user charges. The State also uses these funds where periodic determination of net income is appropriate for accountability purposes.

FIDUCIARY FUND

FINANCIAL STATEMENTS

Pension (and Other Employee Benefits) Trusts – accounts for funds held by the Maine Public Employees Retirement System (the System), a component unit included with Fiduciary Funds per GASB Statement No. 34. The System provides pension, death, and disability benefits to its members, including State employees, some public school employees, and employees of approximately 300 local municipalities and other public entities in Maine.

Private-Purpose Trusts and Custodial Funds are used to account for private-purpose assets held by the State in a fiduciary capacity, acting as either a trustee or an agent for individuals, organizations or other governments.

COMPONENT UNIT

FINANCIAL STATEMENTS

Finance Authority of Maine (FAME) – The Authority provides commercial financing and loan guarantees to Maine businesses and educational financing to Maine students and their parents; administers several revolving loan programs on behalf of the State; and administers the Maine College Savings Program Fund.

Maine Community College System – is Maine’s comprehensive two-year college system and offers certificate, diploma and associate degree programs. The financial statements of the system include the activity of seven colleges, the central administrative office and the Center for Career Development.

Maine Health & Higher Educational Facilities Authority – MHHEFA assists Maine health care institutions and institutions of higher education in undertaking projects involving the acquisition, construction, improvement, reconstruction and equipping of health care and educational facilities and the refinancing of existing indebtedness. The Authority, pursuant to the Student Loan Corporations Act of 1983, may finance student loan programs of institutions of higher education.

Maine Municipal Bond Bank – is authorized to issue bonds providing funds to counties, cities, towns, school districts, or other quasi-municipal corporations within the State.

Maine State Housing Authority – is authorized to issue bonds for the purchase of notes and mortgages on single- and multi-family residential units to provide housing for persons and families of low income in the State. The Authority also administers various housing and energy related state and federal programs and collects and disburses federal rent subsidies for low income housing.

The Maine Turnpike Authority – is authorized and empowered to construct, maintain and operate a turnpike at such a location as shall be approved by the State Highway Commission and to issue turnpike revenue bonds of the Authority, payable solely from revenues of the Authority.

University of Maine System – The State University consists of seven universities, eight centers, and a central administrative office.

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accompanying financial statements of the State of Maine (the State) have been prepared under guidelines established by generally accepted accounting principles (GAAP) as mandated by the Governmental Accounting Standards Board (GASB).

Preparation of the financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements.

A. REPORTING ENTITY

For financial reporting purposes, the State of Maine's reporting entity includes the "primary government" and its "component units." The primary government includes all funds, organizations, agencies, boards, commissions and authorities. Component units are legally separate organizations for which the State is financially accountable. Component units can also be legally separate, tax exempt entities that raise and hold economic resources for the direct benefit of a governmental unit.

Financial accountability is defined in GASB Statement No. 14, *The Financial Reporting Entity*, as amended by GASB Statement No. 61, *The Financial Reporting Entity: Omnibus – an amendment of GASB Statements No. 14 and No. 34*. The State is financially accountable for those entities for which it appoints a voting majority of the governing board and either is able to impose its will on that entity or the entity may provide specific financial benefits to, or impose specific financial burdens on, the primary government. Entities for which the State does not appoint a voting majority of the governing board may be included if the organization is fiscally dependent on the primary government and there exists a financial benefit or burden relationship with the State. Entities that do not meet the specific criteria for inclusion may still be included if the nature and significance of its relationship with the primary government is such that exclusion would cause the reporting entity's financial statements to be misleading or incomplete.

Under GASB Statement No. 39, *Determining Whether Certain Organizations are Component Units, an Amendment of GASB Statement No. 14*, individually significant legally separate, tax-exempt entities should be reported as component units if their resources are for the direct benefit of the State and the State can access those resources. Although the State has not identified any organizations that would qualify as direct component units of the State by meeting all of the criteria of GASB Statement No. 39, a few of the component units described later in this note have significant foundations that meet the criteria of GASB Statement No. 39.

Blended Component Units

Blended component units are entities that are legally separate from the State, but provide services entirely, or almost entirely to the State or otherwise exclusively, or almost exclusively, benefits the primary government even though they do not provide services directly to it. The State reports one blended component unit.

The Maine Governmental Facilities Authority (MGFA) is a legally separate organization that has its board appointed by the primary government and provides services entirely, or almost entirely, to the State. Its purpose includes assisting in the financing, acquisition, construction, improvement, reconstruction, and equipping of additions to structures designed for use as a court facility, State office or State activity space. In their separately issued financial statements, MGFA records a lease receivable from the State and a liability for bonds issued. However, in accordance with GASB, capital leases that exist between the State and MGFA are not recorded as leases in this report. The assets associated with these leases are reported in the government-wide statements along with the related debt. The corresponding debt service activity is recorded in the Governmental Funds. MGFA financial activity associated with servicing the debt is reported in an internal service fund. Therefore, the State reports MGFA's balances and transactions as though they were part of the primary government, using the blending method.

Discrete Component Units

Discrete component units are entities that are legally separate from the State but are either accountable to the State or related so closely to the State that exclusion would cause the State's financial statements to be misleading or incomplete. Component units that are not material to the State's financial statements have been excluded. The column labeled "Component Units" emphasizes these organizations' separateness from the State's primary government.

The State is able to impose its will upon these discretely presented component units whose boards of directors or boards of trustees are appointed by the Governor:

The Maine Community College System is Maine's comprehensive two-year college system and offers certificate, diploma and associate degree programs. The combined financial statements of the System include the activity of seven colleges, the central administrative office and the Center for Career Development (including the Maine Career Advantage and Maine Quality Centers programs), and its component unit, Maine Community College Educational Foundations.

The Maine Turnpike Authority (MTA) constructs, maintains and operates a turnpike at such a location approved by the State Highway Commission. It issues turnpike revenue bonds payable solely from revenues of the Authority. The Authority's fiscal year ends December 31.

The University of Maine System is the State University governed by a single Board of Trustees. The combined financial statements of the System include the activity of seven universities, eight centers, the central administrative office, and its component units, which include several foundations and alumni associations that raise funds on the System's behalf. The foundation changed its year end to December 31, 2021. As a result, only 6 months of revenues and expenses are captured in the totals for the audited University of Maine System's Annual Comprehensive Financial Report (ACFR). The 6 months of revenues, including additions to endowments, totaled \$32.5 million and expenses were \$11.4 million. In the fiscal year end June 30, 2021 ACFR the foundation reported \$105.2 million in revenues, including additions to endowments and \$20.2 million for expenses.

There is a financial burden/benefit relationship between these entities and the State:

The Finance Authority of Maine provides commercial financing and loan guarantees to Maine businesses and educational financing to Maine students and their parents. The Authority also provides financial and other services for the NextGen College Investing Plan, Department of Agriculture for the Agricultural Marketing Loan Fund and the Potato Marketing Improvement Fund, the Northern Maine Transmission Corporation, Dairy Improvement Loan Fund Board, Compliance Assistance Loan Program Board, Maine Rural Development Authority Board and the Small Enterprise Growth Fund Board. The Governor appoints the fifteen voting members of the Authority.

Maine Health & Higher Educational Facilities Authority (MHHEFA) – MHHEFA assists Maine health care institutions and institutions of higher education in undertaking projects involving the acquisition, construction, improvement, reconstruction and equipping of their facilities and the refinancing of existing indebtedness. The Authority, pursuant to the Student Loan Corporations Act of 1983, may also finance student loan programs of institutions of higher education. MHHEFA's board consists of twelve members, four of whom serve *ex officio* and must be the Superintendent of Financial Institutions, the Commissioner of Health and Human Services, the Commissioner of Education, and the Treasurer of State. The remaining eight members must be residents of the State appointed by the Governor.

The Maine Municipal Bond Bank issues bonds on behalf of counties, cities, towns, school administrative districts, community school districts, or other quasi-municipal corporations or eligible borrowers as designated by the Legislature (the "governmental units") within the State. The Bond Bank is also authorized by the Legislature to issue bonds on behalf of the State of Maine to finance qualified transportation projects and payments to healthcare providers, to be repaid by taxes, fees and grant and liquor revenues. The Governor appoints three residents of the State to the five-member Board of Commissioners. The remaining two members include the Treasurer of State and Superintendent of Financial Institutions who serve as commissioners, *ex officio*.

Maine State Housing Authority issues bonds to purchase notes and mortgages on residential units, both single and multi-family, for the purpose of providing housing for persons and families of low income in the State. The Authority also acts as an agent for the State in administering federal weatherization, energy conservation, fuel assistance and homeless grant programs and collecting and disbursing federal rent subsidies for low income housing. The Governor appoints five of the Authority's seven commissioners. The remaining two commissioners are the Treasurer of State and the Director of the Maine State Housing Authority, both of whom serve *ex officio*. The Authority's fiscal year ends on December 31.

The State's financial statements also include a fiduciary component unit:

Maine Public Employees Retirement System administers a public employee retirement system. It provides pension, death, and disability benefits to its members, which include employees of the State, some public school employees, employees of approximately 300 local municipalities and other public entities in Maine. The State has a financial benefit/burden relationship with the retirement system since the legislature has substantive approval over their budget.

Complete financial statements of the major component units can be obtained directly from their respective administrative offices by writing to:

Finance Authority of Maine 5 Community Dr. PO Box 949 Augusta, ME 04432	Maine Health and Higher Education Facilities Authority PO Box 2268 Augusta, ME 04338	Maine Public Employees Retirement System PO Box 349 Augusta, ME 04332-0349	Maine Turnpike Authority 2360 Congress Street Portland, ME 04102
Maine Community College System 323 State Street Augusta, ME 04330	Maine Municipal Bond Bank PO Box 2268 Augusta, ME 04338	Maine State Housing Authority 26 Edison Drive Augusta, ME 04330-6046	University of Maine System 65 Texas Ave Bangor, ME 04401

Related Organizations

Officials of the State's primary government appoint a voting majority of the governing board of the Maine Veteran's Home. The primary government has no material accountability for this organization beyond making board appointments.

B. GOVERNMENT-WIDE AND FUND FINANCIAL STATEMENTS**Government-Wide Financial Statements**

The Statement of Net Position and Statement of Activities report information on all non-fiduciary activities of the primary government and its component units. Primary government activities are distinguished between governmental and business-type activities. Governmental activities generally are financed through taxes, intergovernmental revenues, and other non-exchange revenues. Business-type activities are financed in whole or in part by fees charged to external parties for goods or services.

The *Statement of Net Position* presents the reporting entity's non-fiduciary assets, deferred outflows of resources, liabilities, deferred inflows of resources, and net position. Net position is reported in three components:

Net investment in capital assets component consists of capital assets, net of accumulated depreciation, reduced by the outstanding balances of bonds, mortgages, notes, or other borrowings that are attributable to the acquisition, construction, or improvement of those assets.

Restricted component of net position consists of restricted assets reduced by liabilities and deferred inflows of resources related to those assets. Generally, a liability relates to restricted assets if the asset results from a resource flow that also results in the recognition of a liability or if the liability will be liquidated with the restricted assets reported. Constraints placed on restricted components of net position are either externally imposed by creditors, grantors, contributors, and the like, or imposed by law through constitutional provisions or enabling legislation. The government-wide statement of net position reports \$831.0 million of restricted net position, of which \$667.5 million is restricted by enabling legislation.

Unrestricted component of net position consists of the net amount of assets, deferred outflows of resources, liabilities, and deferred inflows of resources that do not meet the definition of the two preceding categories. The unrestricted component of net position often is designated, to indicate that management does not consider it to be available for general operations and often have constraints on resources that are imposed by management, but can be removed or modified.

The *Statement of Activities* demonstrates the degree to which the direct expenses of a given function or segment is offset by program revenues. Direct expenses are those that are clearly identifiable within a specific function. Program revenues include 1) charges to customers or applicants who purchase, use, or directly benefit from goods, services, or privileges provided by a given function, and 2) grants and contributions that are restricted to meeting the operational or capital requirements of a particular function. Taxes and other items not meeting the definition of program revenues are instead reported as general revenues.

Fund Financial Statements

Separate financial statements are provided for governmental funds, proprietary funds, and fiduciary funds, even though the latter are excluded from the government-wide statements. Major individual governmental funds and major individual proprietary funds are reported as separate columns in the fund financial statements, with non-major funds being combined into a single column.

C. MEASUREMENT FOCUS, BASIS OF ACCOUNTING AND FINANCIAL STATEMENT PRESENTATION**Measurement Focus and Basis of Accounting**

The government-wide statements are reported using the economic resources measurement focus and the accrual basis of accounting, as are the proprietary and fiduciary fund financial statements. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of cash flows. Property taxes are recognized as revenues in the year for which they are levied. Grants and similar items are recognized as revenues as soon as all eligibility requirements imposed by the provider have been met.

Proprietary funds distinguish operating revenues and expenses from nonoperating items. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with a proprietary fund's principal ongoing operations. All revenues and expenses not meeting this definition are reported as non-operating revenues and expenses.

Governmental fund statements are reported using the current financial resources measurement focus and the modified accrual basis of accounting. Revenues are recognized in the governmental funds when they become susceptible to accrual, generally when they become both measurable and available. "Available" means earned and collected or expected to be collected within the current period or soon enough thereafter to pay liabilities of the current period. For this purpose, the State generally considers revenues available if they are collected within 60 days of the end of the fiscal year.

Significant revenues susceptible to accrual include: income taxes, sales and use taxes, and other taxes; federal grants; federal reimbursements; and other reimbursements for use of materials and services. Revenues from other sources are recognized when received because they are generally not measurable until received in cash. Property taxes are recognized as revenue in the year for

which they are levied, provided the “available” criterion is met.

The State Tax Assessor levies taxes on properties located in the unorganized territory of Maine by August 1 of each year, and on telecommunications personal properties statewide by March 30 of each year. Unorganized territory property taxes are due on October 1 and telecommunications personal property taxes are due on August 15. Formal collection procedures begin on November 1, and unpaid property taxes become a lien no later than March 15 of the fiscal year for which they are levied.

Expenditures are generally recorded when a liability is incurred. However, expenditures related to claims and judgments, debt service and compensated absences are recorded only when payment is due and payable.

Financial Statement Presentation

The State reports the following major governmental funds:

The *General Fund* is the State’s primary operating fund. It accounts for all financial resources except those required to be accounted for in another fund.

The *Highway Fund* accounts for the regulation, construction and maintenance of State highways and bridges and is funded by motor fuel taxes, motor vehicle license and registration fees, special State appropriations, and other charges.

The *Federal Fund* accounts for grants and other financial assistance received from the federal government, including federal block grants, that are legally restricted to expenditures for purposes specified in the grant awards or agreements.

The *Other Special Revenue Fund* accounts for specific revenue sources that are legally required to be expended for specified purposes, and the related current liabilities, including some major capital projects that are not accounted for in the Highway and Federal Funds. Examples of the most significant types of revenue sources include: Fund for a Healthy Maine (tobacco settlement revenue), State municipal revenue sharing, hospital and service provider taxes, and oil transfer fees.

The State reports the following major enterprise fund:

The *Maine Employment Security Fund* receives contributions from employers and provides unemployment compensation benefits to eligible unemployed workers.

Additionally, the State reports the following fund types:

Governmental Fund Types:

Special Revenue Funds include operating fund activities financed by specific revenue sources that are legally restricted for specified purposes. An example is funds for acquisition of public reserved lands.

Capital Projects Funds account for the acquisition or construction of major capital assets and other programs financed by bond proceeds.

Permanent Trust Funds report resources that are legally restricted to the extent that only earnings, and not principal, may be used for purposes that benefit the government or its citizenry. Examples include the Baxter State Park Fund and Permanent School Fund.

Proprietary Fund Types:

Enterprise Funds report the activities for which fees are charged to external users for goods or services, such as the unemployment compensation program, lottery operations and transportation services.

Internal Service Funds provide goods or services primarily to other agencies or funds of the State, rather than to the general public. These goods and services include printing and mailing services, supplies warehousing, information technology, fleet management, risk management, health-related benefits, and financing for acquisition and construction of governmental facilities. In the government-wide financial statements, internal service funds are included with governmental activities.

Fiduciary Fund Types:

Pension (and Other Employee Benefits) Trust Funds report resources that are required to be held in trust for members and beneficiaries of the State’s pension, death and disability benefit plans. These resources are managed by the Maine Public Employees Retirement System (MPERS). The fund also reports resources that are required to be held in trust for members and beneficiaries of the State and for MPERS’ retiree healthcare benefits. The investment trusts, managed by the Maine Public Employees Retirement System, hold the long-term investments. The trustees of the Healthcare Other Employee Benefits Trust Fund are the State Controller and State Treasurer.

Private Purpose Trust Funds report resources of all other trust arrangements in which principal and income benefit individuals, private organizations, or other governments. Examples include Abandoned Property and Lands Reserved Trust Funds.

Custodial Funds report assets and liabilities for deposits and investments entrusted to the State as an agent for others. Examples include amounts held for entities self-insured for worker's compensation and unemployment claims, inmate and student guardianship accounts and non-entitlement units.

D. FISCAL YEAR-ENDS

All funds and discretely presented major component units are reported using fiscal years which end on June 30, except for the Maine State Housing Authority and Maine Turnpike Authority, which utilize December 31 year-ends.

E. ASSETS, DEFERRED OUTFLOWS OF RESOURCES, LIABILITIES, DEFERRED INFLOWS OF RESOURCES AND NET POSITION/FUND BALANCE

Equity in Treasurer's Cash Pool

The State pools cash and cash equivalents for a variety of State agencies and public sector entities. The pooled balances are reported at fair value. Interest earned on pooled cash is allocated to the various funds, generally based on their average equity balances. The Treasurer's Cash Pool has the general characteristics of a demand deposit account and is comprised primarily of prime commercial paper, repurchase agreements, U.S. Treasury Bills, U.S. Treasury Notes, and other U.S. Agency Obligations, certificates of deposit, and corporate bonds.

For component units that participate in the cash pool, equity is shown at fair value.

Cash and Cash Equivalents

Cash equivalents consist of short-term investments that mature within three months. On the Statement of Cash Flows, the amount reported as "Cash and Cash Equivalents" is equal to the total of the amounts reported on the Statement of Net Position as "Equity in Treasurer's Cash Pool," "Cash and Cash Equivalents," "Cash with Fiscal Agent," "Restricted Equity in Treasurer's Cash Pool," and "Restricted Deposits and Investments."

Cash with Fiscal Agent

Cash with Fiscal Agent in Governmental Funds represents cash that will be used for debt service on bonds and unspent proceeds of bonds and Certificates of Participation.

Cash with Fiscal Agent in Proprietary Funds represents proceeds of Certificates of Participation and other financing arrangements that have not been spent.

Other investments of the State are carried at fair value. Donated investments are stated at fair value at the date of donation.

Investments Held on Behalf of Others

These assets include amounts held by the State in a fiduciary capacity, acting as either a trustee or an agent for individuals, organizations or other funds. Generally, these investments are reported at fair value or at amortized cost which approximates fair value. The State also holds \$127.1 million of Workers' Compensation, \$64.0 million of Bureau of Insurance, and \$47.0 million of Maine Department of Labor surety bonds and letters of credit that are not reflected on the financial statements.

Restricted Deposits and Investments

Restricted deposits and investments include: unemployment tax receipts deposited with the United States Treasury that are drawn down to pay unemployment benefits; cash and investments of the Maine Governmental Facilities Authority, a blended component unit that has been independently audited; unspent bond proceeds, and funds invested in Certificates of Deposit and other investments at various financial institutions within the State. The financial institutions lend these deposits and investments to local commercial and agricultural enterprises to foster economic growth in Maine.

Inventories

The costs of materials and supplies of the Governmental Funds are reported as expenditures when purchased. Undistributed vaccines and food commodities are reported as inventory and unearned revenue in the Federal Fund. Revenues and corresponding expenditures are recognized when vaccines and food commodities are issued. Inventories of materials and supplies in the Proprietary Funds are determined by physical counts and by perpetual inventory systems. Proprietary Fund inventories are stated at cost or average cost.

Receivables

Receivables consist primarily of amounts due to the State from taxpayers and service providers. Also included in receivables are amounts due but not yet remitted to the State from lottery sales by agents. Loans receivable for the primary government represent low interest financing arrangements to construct and modernize agricultural storage facilities and local commercial enterprises, as well as Department of Transportation loans to local governments. Receivables in the component units' column arise in the normal course of business. Receivables are stated net of estimated allowances for uncollectible amounts that are determined based upon past collection experience and aging of the accounts.

Lease receivables are recorded as the present value of the future lease payments expected to be received from the lessee during the lease term, reduced by any provision for estimated uncollectible amounts. Lease receivables are subsequently reduced over the life of the lease as cash is received in the applicable reporting period. The present value of future lease payments to be received are discounted based on the same rate used to calculate the State's lease obligations.

Interfund Transactions and Balances

Numerous transactions are made between funds to finance operations, provide services, and acquire or construct assets. To the extent that transactions between funds were not completed as of June 30, interfund receivables and payables have been recorded in the fund financial statements. Interfund receivables and payables have been eliminated from the Statement of Net Position.

Long-term loans made by one fund to another are classified as "Working Capital Advances Receivable" and "Working Capital Advances Payable." In the fund financial statements, advances receivable are offset by nonspendable fund balance designations indicating that the long-term loans do not constitute expendable financial resources.

Due from/to Primary Government/Component Units

Numerous transactions are made between the primary government and component units to finance operations, provide services, acquire or construct assets, or repay bonds. To the extent that transactions between funds were not completed as of June 30, "Due from Primary Government" and "Due to Component Unit" receivables and payables have been recorded. Two component units have December 31 year ends, therefore the "due to" and "due from" amounts may differ.

Due from/to Other Governments

Due from/to Other Governments represents amounts receivable from or payable to municipalities or the federal government. Due from Other Governments represents primarily federal grants receivable for Medicaid claims, other health and human services programs, and federal grants receivable for transportation-related expenditures. Due from Other Governments in the component units column represents amounts receivable for grants, bond repayment and retirement benefits. Due to Other Governments primarily consist of amounts owed to municipalities for Municipal Revenue Sharing and the federal government for Medicaid cost recoveries from providers.

Capital Assets

Capital assets, which include land, buildings, equipment and infrastructure assets (e.g., roads, bridges, ramps and similar items), are reported in the government-wide statements and applicable fund financial statements. Capital assets that are used for governmental activities are only reported in the government-wide statements. The State capitalizes governmental fund buildings valued at \$1 million or more and proprietary fund buildings valued at \$100 thousand or more. Governmental fund equipment is capitalized at \$10 thousand or more and proprietary fund equipment is capitalized at \$5 thousand or more. Governmental and proprietary fund software is capitalized at \$1 million or more. All land, regardless of value, is capitalized. Capital assets are recorded at cost or, if donated, at acquisition value at date of acquisition. In some instances, capital assets historical cost were not available. The costs of these assets at the date of acquisitions have been estimated.

In the government-wide statements, most capital assets are depreciated on a straight-line basis over the assets' estimated useful lives, which are 10-40 years for software, buildings and improvements, and 2-25 years for equipment. The State uses the modified approach for reporting its significant infrastructure assets. As long as the State maintains and preserves its infrastructure assets at pre-determined condition levels, maintenance costs are expensed and depreciation is not reported. This approach is discussed further in the Required Supplementary Information.

Right to use leased assets are recognized at the commencement date of the contract and represent the State of Maine's right to use an underlying asset for the lease term. Right to use leased assets are measured at the initial value of the lease liability plus any payments to the lessor before the commencement of the contract term, less any incentives received from the lessor at or before the commencement of the contract term, plus any initial direct cost necessary to place the asset into service. Right to use assets are amortized over the shorter of the contract term or useful life of the underlying asset using the straight-line method. The amortization period varies from 2 to 40 years.

Capital assets of component units are capitalized upon purchase and depreciated over their estimated useful lives. The estimated useful lives of fixed assets are 5-60 years for non-road structures and improvements and 3-15 years for equipment, furniture, fixtures and vehicles. Component units reflect infrastructure in improvements other than buildings and record depreciation expense on them. The Maine Turnpike Authority (MTA) uses the modified approach for reporting its significant infrastructure assets. As long as MTA maintains and preserves its infrastructure assets at pre-determined condition levels, maintenance costs are expensed and depreciation is not reported.

Deferred Outflows of Resources

Deferred outflows of resources are defined as a consumption of net assets by the government applicable to a future period; they increase net position, similar to assets. Note 16 provides further detail on the components of deferred outflows of resources.

Accounts Payable

Accounts payable represent the gross amount of expenditures or expenses incurred as a result of normal operations, but for which no actual payment has yet been issued to vendors/providers. Incurred but not paid (IBNP) Medicaid claims settlements are actuarially estimated. The IBNP estimate recorded at June 30, 2022 is \$249.9 million.

Tax Refunds Payable

The amount of collected or accrued tax revenues that will be refunded is estimated and accrued as a General Fund liability.

Claims Payable

Claims payable represent workers' compensation, retiree health, employee health, and other claims payable, including actual claims submitted and actuarially determined claims incurred but not reported. The actuarially determined claims liability is discounted and presented at net present value.

Compensated Employee Absences

In the government-wide statements and proprietary fund financial statements, compensated absences are recorded as a long-term liability as required by GASB. In the governmental fund financial statements, vested or accumulated leave is reported as an expenditure and fund liability when incurred upon retirement, termination or death. Sick and vacation payments to terminated employees as of June 30, 2022 but paid after the fiscal year end are also reported in the funds. Approximately 53 percent of the governmental fund compensated absences are liquidated by the general fund. In the discretely presented component units, employees' accumulated compensated absences are recorded as an expense and liability as the benefits accrue.

Net Pension Liability

For purposes of measuring the net pension liability and deferred outflows/inflows of resources related to pensions, and pension expense, information about the fiduciary net position of the Maine Public Employees Retirement System (MPERS) and additions/deductions from MPERS' fiduciary net position have been determined on the same basis as they are reported by MPERS. For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with the benefit terms. The primary government's proportionate share of pension amounts was further allocated to proprietary funds based on the salaries paid by each proprietary fund. Pension investments are reported at fair value. Note 9 provides further detail on the net pension liability.

OPEB Liability

The total OPEB liability is the portion of the actuarial present value of projected benefit payments attributed to past periods of employee service. It is the liability of employers and nonemployer contributing entities to employees for benefits provided through an OPEB plan that is not administered through a trust. The net OPEB liability is the liability of employers and nonemployer contributing entities to employees for benefits provided through a defined benefit OPEB plan that is administered through a trust.

Deferred Inflows of Resources

Deferred inflows of resources are defined as an acquisition of net assets by the government applicable to a future period; they decrease net position, similar to liabilities. Note 16 provides further detail on the components of deferred inflows.

Loans Payable to Component Units

In the Statement of Net Position, the amount of bond proceeds received by a component unit for unmatured GARVEE, TransCap and Liquor Revenue bond proceeds is called "Loans Payable to Component Unit." The offsetting receivables are classified as "Loans Receivable from Primary Government."

Long-Term Obligations

In the government-wide statements and proprietary fund financial statements, long-term debt and other long-term obligations are recorded as liabilities.

In the fund financial statements, governmental fund types recognize the face amount of debt issued as other financing sources.

Lease liabilities represent the State's contractual requirement to make lease payments arising from the lease. Lease liabilities are recognized at the lease commencement date based on the present value of future lease payments expected to be made during the lease term. The present value of the lease payments are discounted at rates based on state specific municipal market data.

Net Position/Fund Balances

The difference between assets, deferred outflows of resources, liabilities and deferred inflows of resources is "Net Position" on the government-wide, proprietary and fiduciary fund statements and "Fund Balances" on governmental fund statements.

Fund Balance Restrictions

Fund balances for governmental funds have been classified in accordance with GASB Statement No. 54.

The State reported the following fund balance restrictions:

Nonspendable Fund Balance - indicates items that cannot be spent. This includes activity that is not in a spendable form (inventories, prepaid amounts, long-term portion of loans/notes receivable, or property held for resale unless those proceeds are restricted, committed or assigned) and activity that is legally or contractually required to remain intact, such as a principal balance in a permanent fund.

Restricted Fund Balances – include balances that are legally restricted for specific purposes due to constraints that are either externally imposed by creditors, grantors, contributors, or imposed by law through a constitutional provision or enabling legislation.

Committed Fund Balances – indicates assets that can be used only for specific purposes pursuant to constraints imposed by a formal action of the Maine Legislature through Legislation passed into law.

Assigned Fund Balances – include amounts constrained by the State’s intent to be used for a specific purpose, but are neither restricted nor committed. The State has two types of intent authorized by statute. Management decisions are made in accordance with statutory powers and duties, including encumbrances. Legislative assignments include formal actions passed into law that lapse with the passage of time and do not require additional legislation. For governmental funds, other than the General Fund, this is the residual amount within the fund that is not restricted or committed.

Unassigned Fund Balance – is the residual amount of the General Fund not included in the four categories described above. Also, any deficit fund balances within the other governmental fund types are reported as unassigned.

F. REVENUES AND EXPENDITURES/EXPENSES

In the government-wide Statement of Activities, revenues and expenses are segregated by activity (governmental or business-type), then further by function (e.g., governmental support & operations, education, health & human services, etc.). Additionally, revenues are classified between program and general revenues. Program revenues include: charges to customers or applicants for goods, services, or privileges provided; operating grants and contributions; and capital grants and contributions. Internally dedicated resources are reported as general revenues, rather than as program revenue. General revenues include all taxes. Certain indirect costs are included in the program expenses reported for individual functions. The effects of interfund activity are eliminated in the government-wide Statement of Activities.

The State’s policy is that restricted amounts are spent first when an expenditure is incurred for purposes for which both restricted and unrestricted (committed, assigned, or unassigned) amounts are available. Within unrestricted fund balance, the State’s policy is that committed amounts are reduced first, followed by assigned amounts, and then unassigned amounts when expenditures are incurred for purposes for which amounts in any of those unrestricted fund balance classifications could be used.

In the governmental fund financial statements, expenditures are reported by function. Capital outlay expenditures for real property or infrastructure (e.g. highways) are included with expenditures by function.

Revenues and expenses of proprietary funds are classified as operating or nonoperating and are subclassified by object (e.g. general operations and depreciation). Operating revenues and expenses generally result from providing services and producing and delivering goods. All other revenues and expenses are reported as nonoperating, capital contributions, transfers or special items

NOTE 2 - BUDGETING AND BUDGETARY CONTROL, AND LEGAL COMPLIANCE**Appropriation Limits**

The total General Fund appropriation for each fiscal year of the biennium in the Governor's budget submission to the Legislature may not exceed the General Fund appropriation of the previous fiscal year multiplied by one plus the average real personal income growth rate, as defined in Title 5 Maine Revised Statutes Annotated (MRSA) § 1665, subsection 1, plus the average forecasted inflation rate. “Average forecasted inflation rate” means the average forecasted change in the Consumer Price Index underlying the revenue projections developed by the Revenue Forecasting Committee.

This appropriation limitation may be exceeded only by the amount of the additional costs or the lost federal revenue from the following exceptional circumstances: unfunded or under-funded new federal mandates; losses in federal revenues or other revenue sources; citizens' initiatives or referenda that require increased State spending; court orders or decrees that require additional State resources to comply with the orders or decrees; and sudden or significant increases in demand for existing State services that are not the result of legislative changes that increased eligibility or increased benefits.

The Governor may designate exceptional circumstances that are not explicitly defined, but meet the intent of, this statute. "Exceptional

circumstances" means an unforeseen condition or conditions over which the Governor and the Legislature have little or no control. Exceptional circumstances do not apply to new programs or program expansions that go beyond existing program criteria and operation.

Budget Stabilization Fund

The Maine Budget Stabilization Fund ("BSF"), a fund designation established under Title 5 MRSA C. 142, is included in the \$604.4 million unassigned General Fund fund balance. The BSF had a balance of \$896.0 million. Amounts in the stabilization fund may be expended only to offset a General Fund revenue shortfall. The Governor may also allocate funds for payment of death benefits for law enforcement officers, firefighters and emergency medical services personnel.

Balances in the fund do not lapse, but carry forward each year. Money in the fund may be invested with any earnings credited to the fund except when the fund is at its statutory cap. The State Controller is required to transfer to the fund 80 percent of the amount available from the unappropriated surplus after all required deductions of appropriations, budgeted financial commitments and adjustments at the close of each fiscal year when the fund is not at its statutory cap. In accordance with the statute, the State Controller made the required \$401.9 million transfer for fiscal year 2022.

The statutory cap for the fund is 18 percent of the total General Fund revenue received in the immediately preceding fiscal year. At the close of the fiscal year, the cap is based on the revenue received in the fiscal year being closed. Based on fiscal year 2022 actual General Fund revenue, the statutory cap at the close of fiscal year 2022 and during fiscal year 2022 was \$970.5 million. At the close of fiscal year 2022, the balance of the Maine Budget Stabilization Fund was \$896.0 million. No reductions to the Maine Budget Stabilization Fund balance are required when it exceeds the balance of the statutory cap as a result of a decline of General Fund revenue.

Budget Stabilization Fund Activity

(Expressed in Thousands)

Balance, beginning of year	\$ 491,915
Increase in fund balance	<u>404,082</u>
Balance, end of year	<u><u>\$ 895,997</u></u>

Budget and Budgetary Expenditures

The gross unified budget bills and budget document encompass resources from the General Fund, Highway Fund, Federal Expenditures Fund, Federal Block Grant Fund, Other Special Revenue Fund, internal service funds and enterprise funds. Separate gross unified budget bills must be submitted for the General Fund and the Highway Fund. All funds except trust and custodial funds, bond funds and costs of goods sold expenditures in internal service funds and enterprise funds are subject to legislative allocation. The biennial budget sets forth proposed expenditures for the administration, operation and maintenance of the departments and agencies of the State Government; all interest and debt redemption charges during each fiscal year and all expenditures for capital projects to be undertaken and executed during each fiscal year. Within this structure, budgetary control by agency is maintained at the program and line category level. The State Budget Officer and the Governor must approve budget revisions during the year, reflecting program changes or intradepartmental administrative transfers.

Except in specific instances, only the Legislature may transfer appropriations between departments. Changes in appropriation, allocation, or funding for new programs are presented to the Legislature as supplemental budgets or separate pieces of legislation. For the year ended June 30, 2022, the Legislature decreased appropriations to the General Fund by \$94.9 million.

Actual expenditures did not exceed legislatively authorized appropriations at the Department level; therefore, the State complied with all related budget laws at the legal level.

Governmental Fund Balances - Restricted, Committed and Assigned

The State's fund balances represent: (1) restricted purposes, which include balances legally restricted for specific purposes due to constraints that are externally imposed by creditors, grantors, contributors, or laws or regulations of other governments; (2) committed purposes, which include balances that can only be used for specific purposes pursuant to constraints imposed by formal action of the Legislature; (3) assigned purposes, which includes balances that are constrained by government's intent to be used for specific purposes, but are neither restricted nor committed. A summary of the nature and purpose of these fund balance types at June 30, 2022 are detailed on the following pages.

NOTE 3 - ACCOUNTING CHANGES AND RESTATEMENTS

ACCOUNTING CHANGES

GASB Statement No. 87, *Leases*. The objective of this Statement is to better meet the information needs of financial statement users by improving accounting and financial reporting for leases; enhancing the comparability of financial statements between governments; and also enhancing the relevance, reliability (representational faithfulness), and consistency of information about the leasing activities of governments. As a result of implementing GASB Statement No. 87, the State's internal service fund and governmental activities net position increased by \$5.2 million.

The following GASB Statements, or paragraphs of GASB Statements, became effective for fiscal year ended June 30, 2022 and had no impact on the State of Maine's net position:

GASB Statement No. 89, *Accounting for Interest Cost Incurred before the End of a Construction Period*. The objectives of this Statement are (a) to enhance the relevance and comparability of information about capital assets and the cost of borrowing for a reporting period and (b) to simplify accounting for certain interest costs.

GASB Statement No. 92, *Omnibus 2020*. The objectives of this Statement are to enhance comparability in accounting and financial reporting and to improve the consistency of authoritative literature by addressing practice issues that have been identified during implementation and application of certain GASB Statements.

GASB Statement No. 93, *Replacement of Interbank Offered Rates* addresses the accounting and financial reporting effects that result from the replacement of IBORs with other reference rates in order to preserve the reliability, relevance, consistency, and comparability of reported information. GASB Statement No. 99, *Omnibus 2022* paragraphs 8 through 10 address other derivative instruments that are neither investment derivative instruments nor hedging derivative agreements. The State does not have derivative instruments, other derivative instruments or contracts with references to LIBOR or other IBORs.

GASB Statement No. 97, *Certain Component Unit Criteria, and Accounting and Financial Reporting for Internal Revenue Code Section 457 Deferred Compensation Plans*—an amendment of GASB Statements No. 14 and No. 84, and a supersession of GASB Statement No. 32. Paragraphs 6 onward became effective for fiscal year ended June 30, 2022. This Statement establishes accounting and financial reporting requirements for purposes of determining whether a primary government is financially accountable for a potential component unit. Except for certain pension, OPEB, or other employee benefit plans, the absence of a governing board should be treated the same as the appointment of a voting majority of a governing board if the primary government performed the duties that a

governing board typically would perform. This statement also requires that the financial burden criterion in paragraph 7 of GASB Statement No. 84 be applicable to only defined benefit pension plans and defined benefit OPEB plans that are administered through trusts that meet the criteria in paragraph 3 of GASB Statement No. 67, or paragraph 3 of GASB Statement No. 74.

GASB Statement No. 99, *Omnibus 2022*. Implementation of certain requirements related to extension of the use of LIBOR, accounting for SNAP distributions, disclosures of nonmonetary transactions, pledges of future revenues by pledging governments, clarification of certain provisions in Statement 34, as amended, and terminology updates related to Statement 53 and Statement 63 were effective upon issuance.

Restatements - Component Units

The University of Maine reduced its beginning net position by \$1.177 million as a result of implementing GASB Statement No. 87. The Maine Community College also reduced its beginning net position by \$11 thousand as a result of implementing GASB Statement No. 87. The reduction was offset by \$746 thousand increase from having understated contributions receivable. A non-major component unit, Midcoast Regional Redevelopment Authority decreased its beginning net position by \$927 thousand to recognize an additional payable to a tenant.

NOTE 4 - DEFICIT FUND BALANCES/NET POSITION

PROPRIETARY FUNDS

Five internal service funds showed deficits for the fiscal year ended June 30, 2022. The Workers' Compensation Fund reported a deficit of \$21.7 million, which reflects accruals for actuarially determined claims payable. The Leased Space Fund had a deficit of \$3.3 million because rates charged were insufficient to cover expenses incurred. The Postal, Printing & Supply fund reported a deficit of \$9.8 million because expenses are recognized when incurred; however, related revenue is not earned until jobs are satisfactorily completed. All of the deficits mentioned above are expected to be funded by future service charges. The remaining two internal service funds, Financial and Personnel Services and Information Services, reported deficits of \$30.8 million and \$55.8 million, respectively. These deficits are primarily the result of the implementation of GASB Statement No. 68, Accounting and Financial Reporting for Pensions, and GASB Statement No. 75, Accounting and Financial Reporting for Postemployment Benefits Other Than Pension, which required the recognition of the entire net pension and postemployment benefits other than pension liability.

Two enterprise funds showed deficits for the fiscal year ended June 30, 2022. Maine Military Authority reported a deficit of \$6.2 million. Maine Military Authority significantly reduced its operation and workforce in Fiscal Year 2019. As a result, the fund incurred a loss on the disposal of its assets. The Consolidated Emergency Communications Fund reported a deficit of \$4.9 million. The deficit is primarily the result of the implementation of GASB Statement No. 68, Accounting and Financial Reporting for Pensions and GASB Statement No. 75, Accounting and Financial Reporting for Postemployment Benefits Other Than Pension, which required the recognition of the entire net pension and postemployment benefits other than pension liability.

NOTE 5 - DEPOSITS AND INVESTMENTS

Title 5 MRSA § 135 governs the deposit and investment policies of the State of Maine Office of the State Treasurer. The Treasurer may deposit State funds, including trust funds of the State, in any of the banking institutions (including trust companies, State or federal savings and loan associations, and mutual savings banks) organized under the laws of this State and any national bank or federal savings and loan association located in the State.

The State follows the practice of pooling cash and cash equivalents for a variety of State agencies and public sector entities. The Treasurer may invest funds that exceed current obligations, with the concurrence of the State Controller or the Commissioner of Administrative and Financial Services and the consent of the Governor.

Approved investments include bonds, notes, certificates of indebtedness, other obligations of the United States that mature not more than 36 months from the date of investment; repurchase agreements secured by obligations of the United States that mature within the succeeding 12 months; prime commercial paper with maturities not exceeding 270 days from the date of purchase; tax-exempt obligations that mature not more than 36 months from the date of investment and have a long-term rating of no less than "AA" or the equivalent; corporate bonds rated "AAA" that mature within 36 months from the date of investment; banker's acceptances with an original maturity not exceeding 180 days and rated in the highest short-term category by at least one nationally recognized securities rating organization (NRSRO); and "no-load" shares of an investment company registered under the Federal Investment Company Act of 1940, which are rated "AAAm" or "AAAm-G" by Standard & Poor's, or the equivalent by another NRSRO. Although authorized to do so, the Treasurer does not participate in the securities loan market.

Investment policies of the permanent trusts are governed by Title 5 MRSA § 138. The Treasurer, with the approval of the Commissioner of Administrative and Financial Services, the Superintendent of Financial Institutions and the Attorney General, shall invest the funds in securities that are legal investments in accordance with Title 9-B MRSA. The investments need not be segregated

to the separate trusts, but the identity of each trust must be maintained. The Treasurer may enter into custodial care and servicing contracts or agreements negotiated in accordance with the laws of this State for the handling of funds held in trust.

No amounts exceeding 25 percent of the capital, surplus, and undivided profits of any trust company or national bank or 25 percent of the reserve fund and undivided profits of a mutual savings bank or State or federal savings and loan association, shall be on deposit in any one institution at any one time. This restriction does not apply to deposits subject to immediate withdrawal to meet the payment of any bonded debt or interest or to pay current bills or expenses of the State. Also exempt are deposits secured by the pledge of certain securities as collateral or fully covered by insurance.

With assistance from the Finance Authority of Maine, the Treasurer participates in a restricted deposit program to encourage banks to provide loans at two percent below market rate. The Treasurer may invest up to \$8 million in lending institutions at a two percent lower-than-market rate provided the lenders pass the rate reduction on to the borrowers. This program earmarks \$4 million for loans to agricultural enterprises and the other \$4 million are designated for commercial entities.

The Primary Government's Deposits and Investments, excluding component units that are fiduciary in nature, at June 30, 2022 are as follows:

Primary Government Deposits and Investments
(Expressed in Thousands)

	Governmental Activities	Business- Type Activities	Private Purpose Trusts	Custodial Funds	Total
Equity in Treasurer's Cash Pool	\$ 3,958,950	\$ 22,650	\$ 500	\$ 24,988	\$ 4,007,088

Total Primary Government							<u>\$ 5,217,591</u>

Credit Risk – Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligations. This credit risk is measured by the credit quality ratings of investments as described by nationally recognized statistical rating organizations. The State’s investment policy limits its investments to those with high credit quality made by or with the advice and upon the due diligence of the State’s independent investment advisor. The State limits credit risk in its trusts by ensuring that the fixed income credit quality at the time of purchase is a minimum bond rating of “A” by either Standard & Poor’s or Moody’s rating service. Fixed income holdings thereafter shall maintain a minimum bond rating of “BBB”.

The Primary Government’s total investments by credit quality rating as of June 30, 2022 are presented below:

Standard and Poor's Credit Rating
(Expressed in Thousands)

	<u>A1</u>	<u>A</u>	<u>AA</u>	<u>AAA</u>	<u>BB</u>	<u>BBB</u>	<u>Not Rated</u>	<u>Total</u>
<i>Governmental and Business-Type Activities, excluding Non-Major Special Revenue and Permanent Funds</i>								
Commercial Paper	\$ 239,910	\$ -	\$ -	\$ -	\$ -	\$ -	\$ -	\$ 239,910
<i>Private-Purpose Trusts, Custodial Funds, and Non-Major Special Revenue and Permanent Funds</i>								
Corporate Notes and Bonds	-	1,091	247	73	-	1,608	53,887	56,906
Commercial Paper	1,505	-	-	-	-	-	-	1,505
Money Market	-	-	-	-	-	-	4,889	4,889
Other Fixed Income Securities	-	-	-	-	-	-	6,066	6,066
Total Primary Government	<u>\$ 241,415</u>	<u>\$ 1,091</u>	<u>\$ 247</u>	<u>\$ 73</u>	<u>\$ -</u>	<u>\$ 1,608</u>	<u>\$ 64,842</u>	<u>\$ 309,276</u>

Concentration of Credit Risk – Concentration of credit risk is the risk of loss attributed to the magnitude of a government’s investment in a single issuer. The State limits concentration of credit risk in its trusts by requiring that no single stock represent more than seven percent of the total portfolio. There is no concentration of credit risk policy for the Treasurer’s Cash Pool. At June 30, 2022, there were no investments that exceeded five percent of the Treasurer’s Cash Pool.

Custodial Credit Risk - For investments, custodial credit risk is the risk that, in the event of a failure of the counterparty to a transaction, the State will not be able to recover the value of its investment or collateral securities that are in the possession of an outside party. The State limits its custodial credit risk for the Treasurer’s Cash Pool by maintaining a file of the most recent credit rating analysis reports performed for each approved financial institution. The State also requires that all securities be perfected in the name of the State and held in third party safekeeping by a state approved custodian. Of the cash pool’s \$125 million invested in non-negotiable certificates of deposit, certain CD’s exceeded the FDIC insured amounts for the institutions at which they were held. However, certificates of deposits, money market accounts and regular cash deposits are all collateralized at a minimum of 100 percent with pledged securities or a Federal Home Loan Bank letter of credit.

The State does not have a policy regarding custodial credit risk for its trusts. The Percival P. Baxter Trust is held by a counterparty, but not in the State’s name.

The fair value of the trust’s investments as of June 30, 2022 was \$101.2 million and was comprised of the following (expressed in thousands):

	Percival Baxter Trust
U.S. Instrumentalities	\$ 2,113
U.S. Treasury Notes	2,767
Corporate Notes and Bonds	3,043
Other Fixed Income Securities	17,615
Equities	62,272
Cash and Equivalents	829
Other	12,547
Total	<u>\$ 101,186</u>

The State and certain vendors contract with a fiscal intermediary, Clareon, for electronic disbursements from the State to its vendors. During fiscal year 2022 these disbursements, on average, exceeded \$253 million per month. The funds in transit are not collateralized and are not held by the State Treasurer. Until the vendor receives payment, the State retains some liability.

Fair Value Measurements - The State of Maine categorizes its fair value measurements within the fair value hierarchy established by the generally accepted accounting principles. The hierarchy is based on the valuation inputs used to measure the fair value of an asset. The framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy are described below:

Level 1 - Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the State of Maine has the ability to access.

Level 2 - Inputs to the valuation method include:

- Quoted prices for similar assets or liabilities in active markets;
- Quoted prices for identical or similar assets or liabilities in inactive markets;
- Inputs other than quoted prices that are observable for the asset or liability;
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 - Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

Assets and liabilities measured at fair value are based on one or more of the three valuation techniques. The three valuation techniques are as follows:

- *Market Approach* - Prices and other relevant information generated by market transactions involving identical or comparable assets or liabilities;
- *Cost Approach* - Amount that would be required to replace the service capacity of an asset (i.e., replacement cost);
- *Income Approach* - Techniques to convert future amount to a single present amount based on market exceptions (including present value techniques).

Following is a description of the valuation methodologies used for assets at fair value.

Investments classified as level 1: Investments classified as level 1 are primarily exchange traded equity securities and other fixed income securities valued at market prices using interactive exchange data. Investments are evaluated by obtaining feeds from a number of live data sources including active market makers and inter-dealer brokers. Sources are reviewed on the basis of their historical accuracy for individual issues and maturity ranges. Treasury notes and bonds are evaluated by gathering information from market sources and integrate relative credit information, observed market movements, and sector news into the evaluated pricing applications and models.

Investments classified as level 2: Investments classified as level 2 including fixed income corporate bond, fixed income government bonds and treasury notes are priced using a published mid-price. Investments are evaluated as follows: a. A bullet (non-call) spread scale is created for each issuer for maturities going out to forty years. These spreads represent credit risk and are obtained from the new issue market, secondary trading, and dealer quotes. Each issuer-spread line has the capability to link parent/subsidiary and related companies to capture relevant movements. b. An Option Adjusted Spread (OAS) model is incorporated to adjust spreads of issues that have early redemption features. c. Final spreads are added to both a 15: and 16: (ET) U.S. Treasury curve. A special cash discounting yield/price routine calculates prices from final yields to accommodate odd coupon payment dates typical of medium-term notes. d. Evaluators maintain quality by surveying the dealer community, obtaining benchmark quotes, incorporating relevant trade data, and updating spreads daily. Note: Floating-rate medium-term notes are evaluated using the Floating-Rate Note Evaluation Model which generates evaluations for floating-rate notes by calculating current and future coupons, then discounting each cash flow by an appropriate discount margin.

Investments classified as level 3: Investments classified as level 3 include private equities securities that exist in illiquid markets. These securities are broker priced.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the State of Maine believes its valuation methods are appropriate and consistent with other

market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following table set forth by level, within the fair value hierarchy, the State of Maine's assets carried at fair value on a recurring basis as of June 30, 2022:

Fair Value Measurement
(Expressed in Thousands)

	Total	Quoted Prices in Active Markets for Identical Assets Level 1	Significant Other Observable Inputs Level 2	Significant Unobservable Inputs Level 3
Commercial Paper	\$ 246,246	\$ -	\$ 246,246	\$ -
Corporate Notes and Bonds	48,852	45,809	3,043	-
U.S. Instrumentalities	328,348	-	328,348	-
U.S. Treasury Notes	2,391,059	2,390,783	-	276
Other Fixed Income Securities	47,453	34,001	829	12,623
Equities	59,627	59,627	-	-
Total	\$ 3,121,585	\$ 2,530,220	\$ 578,466	\$ 12,899

MAINE PUBLIC EMPLOYEES RETIREMENT SYSTEM

The Maine Public Employees Retirement System (the System) makes investments in a combination of equities, fixed income securities, infrastructure, private equity, real estate, mutual funds, commingled mutual and index funds, derivative instruments, and other investment securities established by the Trustee's investment policy.

Derivative Instruments – Derivative instruments are financial contracts whose value depends on the value of one or more underlying assets, reference rates or financial indices. They include futures, forwards, options, and swap contracts. The System's investments in derivative securities only have nominal exposure to custodial credit risk. Credit risk is managed, in the case of exchange-traded derivatives, by the execution of trades through a clearinghouse and, in the case of over-the-counter transactions, by managers' due diligence assessment and approval of counterparties. Market risk is managed by imposing strict limits as to the types, amounts and degree of risk that investment managers may undertake. These limits are approved by the Board of Trustees and are monitored by the Chief Investment Officer.

The system did not have any derivative investments as of June 30, 2022 or during the year then ended.

Foreign currency forward contracts are used to hedge against the currency risk in the System's foreign equity and fixed income security portfolios. The System's fixed income managers invest in Collateralized Mortgage Obligations (CMOs) and Asset-Backed Securities to improve the yield or adjust the duration of the fixed income portfolio.

Securities Lending - The System has also entered into agreements for securities lending transactions, which are collateralized in an amount generally valued at 102 percent (105 percent for international securities) of the fair value of the securities loaned plus accrued interest. All securities and loans can be terminated on demand by either the lender or the borrower.

Cash collateral is invested in a short-term investment pool. Cash collateral may also be invested separately in "term loans." At June 30, 2022 all of the collateral for securities lending is subject to custodial credit risk. The System believes that there is no credit risk as defined in GASB Statement No. 28 and GASB Statement No. 40. The collateral held and the market value of securities on loan for the System as of June 30, 2022 was \$146.7 million and \$168.2 million, respectively.

Concentration of Credit Risk – Concentration of credit risk is the risk of loss that may be attributed to the magnitude of investment in a single issue. The System's investment policy places no limit on the amount the System may invest in any one issuer. No investment exceeded 5 percent of the fiduciary net position for the defined benefit and OPEB plans.

COMPONENT UNITS

Generally, component unit investment policies authorize investments in obligations of U.S. Treasury and Agency Securities, repurchase agreements, corporate bonds, certificates of deposit and money market funds. Some component units may invest in stocks, bonds, fixed income securities, mutual funds, commingled mutual funds and index funds, guaranteed investment contracts, real estate and other investment securities.

Certain component units also invest in the Treasurer's Cash Pool and comprise approximately 4.77 percent of pool assets. The component units reported their participation as either Cash and Cash Equivalents or Investments on their financial statements. The State reclassified \$204.7 million of the component units' participation to "Equity in Treasurer's Cash Pool" on the State's financial statements. In addition to the amounts reported, the State Treasurer's Cash Pool includes \$14.7 million, consisting of Finance Authority of Maine component unit fiduciary funds that, because of GASB Statement No. 34 reporting criteria, are not shown in the accompanying financial statements as invested in the Treasurer's Cash Pool.

NOTE 6 - RECEIVABLES

Receivable balances are segregated by type, and presented in the fund financial statements net of allowance for uncollectibles. The following tables disaggregate amounts considered to be uncollectible by fund and type of receivable as of the close of the fiscal year:

Primary Government - Receivables
(Expressed in Thousands)

	Taxes	Settlements	Accounts	Loans	Allowance for Uncollectibles	Net Receivables
Governmental Funds:						
General	\$ 973,361	\$ -	\$ 162,743	\$ 1	\$ (408,842)	\$ 727,263
Highway	22,001	-	2,818	-	(38)	24,781
Federal *	-	-	266,778	-	(63,249)	203,529
Other Special Revenue **	15,789	90,634	102,333	3,190	(60,178)	151,768
Total Governmental Funds	1,011,151	90,634	534,672	3,191	(532,307)	1,107,341
Allowance for Uncollectibles	(331,851)	-	(200,153)	(303)	-	-
Net Receivables	<u>\$ 679,300</u>	<u>\$ 90,634</u>	<u>\$ 334,519</u>	<u>\$ 2,888</u>	<u>\$ -</u>	<u>\$ 1,107,341</u>
Proprietary Funds:						
Employment Security *	\$ -	\$ -	\$ 112,494	\$ -	\$ (63,165)	\$ 49,329
Nonmajor Enterprise	-	-	35,654	-	(56)	35,598
Internal Service	-	-	11,548	-	-	11,548
Total Proprietary Funds	-	-	159,696	-	(63,221)	96,475
Allowance for Uncollectibles	-	-	(63,221)	-	-	-
Net Receivables	<u>\$ -</u>	<u>\$ -</u>	<u>\$ 96,475</u>	<u>\$ -</u>	<u>\$ -</u>	<u>\$ 96,475</u>

* Accounts receivable related to the Unemployment Insurance program increased significantly in the Federal Fund and the Employment Security Major Enterprise Fund in fiscal year 2022 and 2021. This is due primarily to a significant increase in fraudulent claims activity and benefit overpayments associated with Federal Pandemic Unemployment Compensation, Pandemic Unemployment Assistance, and other emergency benefits provided in response to the Coronavirus Pandemic.

** Maine is participating in the National Opioid Settlement (Settlement), which negotiated conclusions to investigations and litigation by the Attorney General and by certain Maine counties, cities, and towns of the marketing and sales practices of opioid pain medications by entities in the pharmaceutical supply chain. The Settlement will produce a stream of annual payments over 18 years for permissible opioid abatement activities described in the court order which gives effect to the Settlement. The Settlement also imposes certain injunctive terms agreed to by the Defendants. In addition to the Opioid settlement, Maine is participating in a Tobacco settlement. Please see Note 18 for additional information about the Tobacco settlement.

Component Units - Receivables
(Expressed in Thousands)

	Accounts	Loans and Leases	Allowance for Uncollectibles	Net Receivables
Finance Authority of Maine	\$ 2,851	\$ 89,643	\$ (4,243)	\$ 88,251

NOTE 7 - INTERFUND TRANSACTIONS

Interfund receivables and payables represent amounts owed to one State fund by another, for goods sold or services received, or for borrowings to eliminate negative balances in the Treasurer's Cash Pool.

Balances due within one year are recorded as Due to/Due from Other Funds. The balances of current interfund receivables and payables as of June 30, 2022 were:

Interfund Receivables (Expressed in Thousands)					
Due to Other Funds					
Due from Other Funds	General	Highway	Federal	Other Special Revenue	Other Governmental
General	\$ -	\$ -	\$ 6,910	\$ 14,634	\$ -

Total	\$ 3,835	\$ 6,864	\$ 27,217	\$ 7	\$ 252,970

Not included in the table above are interfund loans/advances, which are not expected to be repaid within one year. Postal, Printing & Supply (an internal service fund) owes \$111 thousand to the General Fund for operating capital.

Transfers are made in accordance with statutory authority. Significant transfers are used to 1) move revenues from the fund that statute requires to collect them to the fund that statute requires to expend them, 2) move receipts restricted for debt service from the funds collecting the receipts to the funds required to pay debt service as principal and interest payments come due, 3) use unrestricted revenues collected in the General Fund to finance various programs accounted for in other funds in accordance with budgetary authorizations, 4) move profits from the Lottery Fund, 5) transfer accumulated surpluses from other funds to the General Fund when authorized by statute and 6) move profits from the Alcoholic Beverages Fund.

During fiscal year 2022, the State of Maine, in accordance with the legislatively authorized budget, recorded the following non-routine, nonrecurring transfers.

The General Fund transferred \$729.3 million, \$97.1 million, \$50.0 million, \$35.0 million and \$20.0 million to the Other Special Revenue Fund, respectively, for: the COVID Pandemic Relief Payment Program Fund, Homestead Property Tax Exemption Reimbursement Fund, Highway and Bridge Capital Fund, Highway and Bridge Reserve Fund and the Maine Community College System Free Community College - 2 Enrollment Years Program Fund. The Liquor Operation Revenue Fund transferred \$30.0 million

to the unappropriated surplus of the General Fund.

Interfund transfers for the year ended June 30, 2022 consisted of the following:

Interfund Transfers (Expressed in Thousands)					
Transferred From					
Transferred To	General	Highway	Federal	Other Special Revenue	Other Governmental
General	\$ -	\$ -	\$ 79	\$ 59,784	\$ -

Internal Service	-	-	-	-	2,725
Total	\$ 9,591	\$ 134,181	\$ -	\$ 118	\$ 1,703,392

In fiscal year 2022, Public Law 2021, Chapter 483, Part D authorized the State of Maine to expend \$80 million of American Rescue Plan Act (ARPA) State & Local Fiscal Recovery Funds (SLFRF) for the purpose of replenishing the Employment Security Fund for COVID-19 related benefit payments. To properly reflect this expenditure in fiscal year 2022, the State of Maine recorded expenditures of \$80 million in the Federal Fund, a major Governmental fund, with a corresponding reduction in expenditures in the Employment Security Fund, a major Enterprise Fund.

NOTE 8 - CAPITAL ASSETS

The following schedule details changes in capital assets for the governmental activities and business-type activities of the primary government for the fiscal year ended June 30, 2022:

Total Depreciation Expense - Governmental Activities	\$ 64,629

NOTE 9 - MAINE PUBLIC EMPLOYEES RETIREMENT SYSTEM

OVERVIEW OF THE SYSTEM

The Maine Public Employees Retirement System, formerly named the Maine State Retirement System (the System) is a component unit of the State of Maine. Title 5 MRSA C. 421, 423, and 425 authorized the establishment and administration of the defined benefit plans. The System administers two cost sharing multiple-employer defined benefit plans, two single employer defined benefit plans and one closed agent multiple-employer defined benefit plan. All of these plans provide pension, disability, and death benefits to their members.

The State Employees and Teachers Plan (SETP) is a multiple-employer cost sharing plan with a special funding situation. The plan covers employees of the State and public school employees (defined by Maine law as teachers). The State of Maine is also a nonemployer contributing entity in that the State pays the unfunded actuarial liability on behalf of non-grant funded teachers. School districts contribute the normal cost, calculated actuarially, for their teacher members and directly pay the unfunded actuarial liability on behalf of grant funded teachers. The Participating Local Districts Plan (Consolidated PLD) covers employees of more than 300 local municipalities and other public entities (Participating Local Districts, or PLDs) in Maine, each of which contracts for participation in the System under provisions of the relevant statutes.

The System also provides single employer defined benefit plans to cover State legislators and State Judicial employees and administers a closed agent, multiple-employer defined benefit plan (Agent PLD) which covers those employers for whom the System administered single employer plans at the time the PLD Consolidated Plan was implemented who opted not to join the Consolidated Plan.

In addition to administering pension plans, the System invests funds accumulated for two OPEB Trusts. The Retiree Health Insurance Trust Fund accumulates assets to provide funding for the State's unfunded obligations for retiree health benefits. Trustees of the System were named Trustees of the Investment Trust Fund. The System also invests funds for the MainePERS OPEB Trust. The trust accumulates assets to provide funding for retiree health benefits and life insurance in retirement for qualified individuals who retire from the System. The Trustees of the System were named Trustees of the MainePERS OPEB Trust.

The System administers 3 defined contribution plans for employees of PLD's that elect to participate. At June 30, 2022, there were 80 employers participating in these plans. The 1,579 participants individually direct the \$53.9 million covered by the plans.

The System issues a publicly available annual comprehensive financial report that includes financial statements and required supplementary information (RSI) for the plan. The June 30, 2022 report may be obtained from the Maine Public Employees Retirement System, PO Box 349 Augusta, ME 04332-0349 or on-line at www.maineper.org.

Total pension funds managed by the System are constitutionally restricted and held in trust for the payment of pension and related benefits to its members. OPEB funds are statutorily restricted for the payment of retiree healthcare. The System's Board of Trustees, in its fiduciary capacity, establishes the System's investment policies and their overall implementation. With respect to the SETP, the

actuary prepares valuations for the State's portion of the SETP, including the segregation of teachers from employees.

The System also provides group life insurance under a plan administered by a third party insurance company and invests long-term assets for two Retiree Health Insurance Post-Employment Benefits Investment Trust Funds. Note 10 provides for further disclosure.

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The System's financial statements are prepared on the accrual basis of accounting. Pension contributions are recognized as additions in the period when they become due pursuant to formal commitments or statutory or contractual requirements. Investment income is recognized when earned. Contributions to defined contribution plans are recognized in the period they are contributed. Pension benefits and contributions and premium refunds are recognized as deductions when due and payable in accordance with Statutes. Benefits payable incurred but not reported are reflected as other liabilities. Distributions from defined contribution plans are recognized in the period the disbursement is made.

PENSIONS

For purposes of measuring the net pension liability, deferred outflows of resources and deferred inflows of resources related to pensions, and pension expense, information about the fiduciary net position of the defined benefit retirement plans and additions to or deductions from each plans' fiduciary net position have been determined on the same basis as they are reported by the System. The measurement period used is June 30, 2021. For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with the benefit terms. Investments are reported at fair value.

EMPLOYER ALLOCATIONS FOR COST-SHARING DEFINED BENEFIT RETIREMENT PROGRAMS

Schedules of Employer Allocations for the SETP are displayed separately for the two groups within the Plan, state employees being one group and teachers the second. This is to reflect the unique funding arrangement that currently exists within the Plan for teachers. Total employer contributions for the state employees group, adjusted for employer-specific liability contributions, were used as the basis for allocation. For the teacher group, total employer and non-employer contributions were the basis for the allocation, adjusted to remove the normal cost contributions paid by local school districts on behalf of their employees. This leaves contributions toward the unfunded liability of the Plan as the basis of allocation. This method of allocation properly distributes the collective net pension liability between the State of Maine as the non-employer contributing entity and those districts contributing towards the unfunded liability of the plan using grant funding.

The Schedules of Employer Allocations for the PLD Consolidated Plan reflect current year employer contributions, adjusted to remove contributions related to employer specific liabilities to the Plans. For the PLD Plan, certain employers have individual un-pooled pension assets resulting from the closure of individual single employer plans upon joining the PLD Consolidated Plan. For these employers, current year contributions are adjusted to reflect the gross contributions due for service prior to applying an offset from these assets, if applicable. An offset occurs when an employer with un-pooled pension assets held by the System chooses to use a portion of these assets to cover the cost of current contributions due.

MEMBERSHIP

State employees and teachers are covered under the Maine Public Employees Retirement System's State Employee and Teacher Retirement Program (SETP). State employees and public school teachers are required by law to become members of SETP when hired. Membership is optional for elected, appointed officials and substitute teachers. SETP also covers eligible employees of two discretely presented State component units: Maine Community College System and the Northern New England Passenger Rail Authority. At June 30, 2022 there were 239 employers, including the State of Maine, participating in the plan.

PLD employees become members of the Consolidated PLD plan when they are hired if their employer participates as a PLD in MainePERS at that time and if they meet the membership eligibility requirements in effect when they are hired. For some PLD employees, membership is optional. These employees include those employed by their PLD before the PLD joined MainePERS, those whose employers provide Social Security under a federal law, elected and appointed officials, and chief administrative officers. The Consolidated PLD plan includes employees of three component units of the State that have defined benefit plans: Maine Municipal Bond Bank, Maine Maritime Academy, and the Maine Public Employees Retirement System.

The System also administers two single employer retirement programs for specific State employees. The Legislative Retirement Program was established to provide a retirement program for those serving in the Maine Legislature. Except as provided otherwise by statute, membership in the Maine Legislative Retirement Program is mandatory for legislators entering service on or after December 3, 1986. The Judicial Retirement Program was established to provide a retirement program for Maine's judges. Membership in the Judicial Retirement Program is a condition of employment for all judges serving on or after December 1, 1984.

Membership in each single employer defined benefit plan consisted of the following at the measurement date of June 30, 2021:

Employees of single employer covered by benefit terms

	<u>Judicial</u>	<u>Legislative</u>
Inactive employees or beneficiaries		
currently receiving benefits	84	222
Terminated participants:		
Vested	3	124
Inactive employees due refunds	1	101
Active employees	<u>60</u>	<u>178</u>
Total participants	<u>148</u>	<u>625</u>

STATE EMPLOYEES AND TEACHERS PENSION PLAN BENEFITS

The System's retirement programs provide retirement benefits based on members' average final compensation and creditable service. Vesting occurs upon the earning of five years of service credit or the earning of one year of service credit immediately preceding retirement at or after normal retirement age. Normal retirement age for State employees and teachers is age 60, 62 or 65. The normal retirement age is determined by whether a member had met certain creditable service requirements on specific dates, as established by statute. The monthly benefit of members who retire before normal retirement age by virtue of having at least 25 years of service credit is reduced by a statutorily prescribed factor for each year of age that a member is below her/his normal retirement age at retirement. The System also provides disability and survivor benefits, which are established by statute for State employee and teacher members, and by contract with other participating employers under applicable statutory provisions.

PARTICIPATING LOCAL DISTRICTS PLAN BENEFITS

In the event that a member of the Consolidated PLD Plan withdraws from the System, its individual employee-members remain contributing members. The PLD remains liable for contributions sufficient to fund benefits for its already retired former employee-members; for its terminated vested members; and for those active employees, whether or not vested, who remain contributing System members.

CONTRIBUTION INFORMATION

Contributions from members, employers and non-employer contributors and earnings from investments fund the retirement benefits. Disability and death benefits are funded by employer normal cost contributions and investment earnings. Member and employer normal cost contributions are each a percentage of applicable member compensation. Member contribution rates are defined by law or Board rule and depend on the terms of the plan under which a member is covered. Employers' contribution rates are determined by actuarial valuations.

The Maine Constitution, Maine statutes and the System's funding policy provide for periodic employer contributions in addition to the normal cost contributions for the SETP. These are actuarially determined amounts that, based on certain actuarial assumptions are sufficient to fully fund, on an actuarial basis, the SETP by the year 2028 (Unfunded Actuarial Accrued Liability (UAAL) payments). Level percentage of payroll employer contribution rates are determined using the entry age normal actuarial funding method. The System also uses the level percentage of payroll method to amortize the unfunded liability of the State Employee and Teacher Retirement Program. For participating employers in the PLD Agent Plan, the level percentage of payroll method is also used.

The UAAL rate as applied to State employee members' compensation is first established through the annual valuation process as an amount that will meet the required unfunded actuarial accrued liability payment amount; it is then adjusted in the State's budget process to take into account differences in salary growth projections of the State Budget Office. This adjusted rate, expressed as a percentage of payroll, is the actual rate paid by the State as payment of the required UAAL payment amount for State employees. For teachers, the actuarially determined UAAL amount is paid in 12 equal monthly installments. PLD employer contribution rates are actuarially determined rates.

On occasion, the State may agree to pay employee pension contributions as a part of the compensation and benefits that are negotiated with employees. The employer-paid contributions are treated as part of their pension compensation. In accordance with statute, the actuary accumulates them in the Retirement Allowance Fund. Upon termination of membership, members' accumulated employee contributions are refundable with interest, credited in accordance with statute. Withdrawal of accumulated contributions results in forfeiture of all benefits and membership rights. The annual rate of interest credited to terminated members' accounts is set by the System's Board of Trustees and is currently 1.52 percent.

CONTRIBUTION RATES - DEFINED BENEFIT PENSION PLANS

The Maine Constitution, Maine Statutes and the System's funding policy provide for periodic employer contributions at actuarially determined rates that, based upon certain assumptions, are expressed as percentages of annual covered payroll and are sufficient to accumulate adequate assets to pay benefits when due. On July 20, 2017 Chapter 1, Constitutional Resolution was passed by the legislature and ratified by the voters in November. Any unfunded liability resulting from experience losses must be retired over a period not exceeding 20 years. Prior to the change a 10 year amortization period was used.

Significant actuarial assumptions used to compute the contribution requirements are the same as those used to compute the standardized measure of the net pension liability.

Contribution rates¹ in effect for the fiscal years ended June 30, 2022 and June 30, 2021 are as follows:

	<u>June 30, 2022</u>	<u>June 30, 2021</u>
SETP - State Employees		
Employees ²	7.65% - 8.65%	7.65% - 8.65%
Employer ¹	21.95% - 46.97%	20.93% - 32.68%
SETP - Teachers		
Employees ²	7.65%	7.65%
Employer ¹	3.84%	4.16%
Non-employer entity ¹	14.29%	14.33%
Judicial Plan		
Employees ²	7.65%	7.65%
Employer ¹	6.99%	8.89%
Legislative Plan		
Employees ²	7.65%	7.65%
Employer ¹	0.00%	0.00%
Consolidated Participating Local Entities		
Employees ²	3.85% - 9.70%	3.85% - 9.50%
Employer ¹	5.50% - 15.20%	5.20% - 16.00%

¹ Employer and non-employer contribution rates include normal cost and the UAAL required payment, expressed as a percentage of payroll.

² Employer and employee contribution rates vary depending on specific terms of plan benefits for certain classes of employees.

For the year ended June 30, 2022, the contributions recognized as part of pension expense (grant expense for Teacher Members) for each plan were as follows:

(Expressed in Thousands)

State Employee and Teacher Plan	
State Employees in primary government	\$ 164,184
Teacher Members (non-employer contribution)	178,880
Judicial Pension Plan	739
Legislative Pension Plan	<u>-</u>
Total Contributions Recognized as Pension Expense	<u>\$ 343,803</u>

NET PENSION LIABILITY - SINGLE EMPLOYER

The State is the sole employer for two defined benefit pension plans. The State's net pension liability was measured as of June 30, 2021, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of that date. The changes in net pension liabilities for these plans are as follows:

(Expressed in Thousands)

	Judicial Pension Plan			Legislative Pension Plan		
	Total Pension Liability (Asset)	Increase (Decrease) Plan Fiduciary Net Position (b)	Net Pension Liability (Asset) (a) - (b)	Total Pension Liability (Asset)	Increase (Decrease) Plan Fiduciary Net Position (b)	Net Pension Liability (Asset) (a) - (b)

COLLECTIVE NET PENSION LIABILITIES, PENSION EXPENSE AND DEFERRED OUTFLOWS OF RESOURCES AND DEFERRED INFLOWS OF RESOURCES RELATED TO PENSIONS - COST SHARING PLANS

The State's net pension liability was measured as of June 30, 2021, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of that date. The State's net pension liability is measured as the proportionate share of the net pension liability. The State's proportion of the net pension liability was based on a projection of the State's long-term share of contributions to the pension plans relative to the projected contributions of all participating employers and non-employer contributors, actuarially determined. The State's proportionate share of the collective net pension liability for each plan at June 30, 2022 and June 30, 2021 is as follows:

(Expressed in Thousands)

Pension Plan	Proportionate Share June 30, 2021	Proportionate Share June 30, 2022	Net Pension Asset June 30, 2022	Net Pension Liability June 30, 2022
SETP - State Employees ¹	95.090771 %	95.299042 %	\$ -	\$ 615,520
SETP - Teachers ²	95.704826 %	94.381819 %	-	798,306
Total Primary Government			\$ -	\$ 1,413,826

¹ Percentage of primary government State Employees in the SETP

² Percentage of non-employer contributors to the SETP - Teachers

The State's SETP – State Employee Plan is allocated to governmental and proprietary funds based on employer contributions as shown

below. Of the portion charged to governmental funds, 52 percent is posted to the General Fund, 20 percent to Other Special Revenue Funds, 15 percent to Highway Funds and 13 percent to Federal Funds.

Proportion	<u>June 30, 2021</u>	<u>June 30, 2022</u>	Change Increase (Decrease)
Governmental Funds	91.39 %	91.56 %	0.17 %
Internal Service Funds	7.29 %	7.12 %	(0.17)%
Enterprise Funds	1.33 %	1.32 %	(0.01)%

Detailed information about the pension plan's fiduciary net position is available in the separately issued Maine Public Employees Retirement System financial report.

For the cost-sharing defined benefit pension plans it shows:

Actuarial Assumptions

Actuarial assumptions used in the June 30, 2021 and 2020 valuations were based on results of an actuarial experience study for the period July 1, 2015 through June 30, 2020. Actuarially determined contribution rates are calculated based on a 2018 actuarial valuation developed as a roll-forward of the 2017 actuarial valuation, adjusted for expected experience and any assumption or methodology changes during fiscal year end 2018 using assets as of June 30, 2018. The individual entry age normal method is used to determine liabilities. A 3-year smoothed market approach is used for the asset valuation method. Each plan's unfunded actuarial liability is being amortized as a level percentage of payroll. For the SETP, the amortization method used a level percentage of payroll over closed periods. The original UAL is amortized over a remaining 8 years from July 1, 2020. Subsequent layers of UAL are amortized over individual 20 year periods. The amortization period used by both the Judicial and Legislative Plans is an open 10-year amortization. The investment rate of return used for contributions in 2018 was 6.75 percent. Contributions in 2018 used an investment rate of return, inflation rate and annual salary increases, including inflation were 6.75 percent, 2.75 percent and 2.75 percent plus merit component based on employee's years of service, respectively. All plans used a 2.20 percent cost-of-living. Normal retirement age for State employees and teachers is age 60, 62 or 65. The normal retirement age is determined by whether a member had met certain creditable service requirements on specific dates, as established by statute. The Judicial and Legislative Plans assume that 100 percent retirement occurs at age 60 for members with at least 10 years of creditable service on July 1, 1993. For members with less than 5 years of creditable service on July 1, 2001, 50 percent are assumed to retire each year after reaching age 65.

The June 30, 2021 investment rate of return used in the valuation was 6.5 percent, down from 6.75 percent used for June 30, 2020. The SETP increased annual salaries, including inflation to 3.26 percent from 2.75 percent. Judicial and Legislative annual salary increases remained constant at 2.75 percent.

The Maine State Constitution Article IX, Section 18-A was amended in fiscal year 2018 by CR 2017, c. 1. Any unfunded liability resulting from experience losses must be retired over a period not exceeding 20 years. Prior to the change a 10-year amortization period was used.

ANNUAL PENSION COST AND NET PENSION LIABILITY

For the year ended June 30, 2022, the State recognized pension expense of \$129,366 which includes \$60,700 of teacher pensions recorded in grant expense.

PENSION COSTS
(Expressed in Thousands)

SETP - State of Maine Primary Government Pension Expense	\$ 70,341
SETP - Teachers Non-Employer Pension Expense (grant expense)	60,700
Legislative Pension Expense	(208)
Judicial Pension Expense	(1,467)
Total	<u>\$ 129,366</u>

At June 30, 2022, the State reported \$389,898 of deferred outflows of resources and \$569,637 of deferred inflows of resources related to its pension plans. Deferred outflows of resources of \$167,701 relate to the State contributions that were made subsequent to the measurement date and will be recognized as a reduction of the net pension liability in the year ended June 30, 2023. Other amounts reported as deferred outflows of resources and deferred inflows of resources related to pensions will be recognized in pension expense over the next four years. Information by pension plan is as follows:

(Expressed in Thousands)

Total	<u>\$ 8</u>	<u>\$ 1,941</u>	<u>\$ 1,545</u>	<u>\$ 10,490</u>

For the Year Ended

2023	(518)	(1,860)
2024	(442)	(2,376)
2025	(442)	(2,381)
2026	(539)	(2,922)
2027	-	-

The long-term expected rate of return on pension plan assets was determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major class of assets. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. Best estimates of arithmetic real rates of return for each major asset class included in the pension plan's target asset allocation are summarized in the following table.

Asset Class	Target Allocation	Long-Term Expected Real Rate of Return
Public Equities	30.0 %	6.0 %
U.S. Government	7.5 %	2.3 %
Private Equity	15.0 %	7.6 %
Real Assets:		
Real Estate	10.0 %	5.2 %
Infrastructure	10.0 %	5.3 %
Natural Resources	5.0 %	5.0 %
Traditional Credit	7.5 %	3.0 %
Alternative Credit	5.0 %	7.2 %
Diversifiers	10.0 %	5.9 %

The discount rate used to measure the collective total pension liability was 6.500 percent for the 2021 and 2020 actuarial valuations for the State Employee and Teacher Plan. The projection of cash flows used to determine the discount rate assumed that plan member contributions will be made at the current contribution rate and that employer and non-employer entity contributions will be made at actuarially determined, contractually required rates. Based on these assumptions, the pension plan's fiduciary net position was projected to be available to make all projected future benefit payments to current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

NET PENSION LIABILITY SENSITIVITY

The following table shows how the collective net pension liability would change if the discount rate used was one percentage point lower or one percentage point higher than the current rate. The current rate used for all plans is 6.500 percent.

(Expressed in Thousands)

Defined Benefit Plans Administered Through MPERS	1% Decrease (5.500%)	Current Discount Rate (6.500%)	1% Increase (7.500%)
State Employee and Teacher Plan			
State Employees (100%)	\$ 1,316,394	\$ 645,881	\$ 82,823
Teacher Members (100%)	2,221,236	845,826	(299,342)
Judicial Pension Plan	(7,338)	(14,106)	(20,015)
Legislative Pension Plan	\$ (4,880)	\$ (5,981)	\$ (6,930)

RECOGNITION OF CHANGES - EXCEPTIONS

Changes in net pension liability are recognized in pension expense with the following exceptions:

Differences Between Expected and Actual Experience - The difference between actual and expected experience with regard to economic or demographic factors were recognized in pension expense using a straight-line amortization method over a closed period equal to the average expected remaining service lives of active and inactive members in each plan. For 2021, this was one year for the Legislative Plan, two years for the Judicial Plan and three years for the State Employee and Teacher Plan. Prior to 2017, this was two years for the Legislative Plan.

Differences Between Projected and Actual Investment Earnings - Differences between projected and actual investment earnings were recognized in pension expense using a straight-line amortization method over a closed 5 year period.

Changes in Assumptions - Differences due to changes in assumptions about future economic or demographic factors or other inputs were recognized in pension expense using a straight-line amortization method over a closed period equal to the average expected remaining service lives of active and inactive members in each plan. The actuarial assumptions used for the June 30, 2020 valuation were based on the results of an actuarial experience study for the period of July 1, 2015 through June 30, 2020.

Changes in Proportion and Differences Between Employer Contributions and Proportionate Share of Contributions - Differences resulting from a change in proportionate share of contributions and differences between total employer contributions and the employer's proportionate share of contributions were recognized in pension expense using a straight-line amortization method over a closed period equal to the average expected remaining service lives of active and inactive members in each plan. Differences between total employer contributions and the employer's proportionate share of contributions may arise when an employer has a contribution requirement for an employer specific liability.

COMPONENT UNIT PARTICIPANTS

The Maine Municipal Bond Bank, Maine Maritime Academy, Maine State Housing Authority, Maine Turnpike Authority and the Maine Public Employees Retirement System have defined benefit pension plans. All are participating local entity participants in plans administered by the Maine Public Employees Retirement System.

NOTE 10 - OTHER POSTEMPLOYMENT BENEFIT PLANS**POST RETIREMENT HEALTHCARE PLANS AND BENEFITS****State Employees**

The State has a single-employer defined benefit healthcare OPEB plan that is administered through a trust. The State of Maine funds postretirement health care benefits for most retired State employees and legislators, as authorized by Title 5 MRSA § 285. For fiscal years ending after June 30, 2015 statute limited the total premium increase for active and retired State employee health insurance to no more than any percentage increase in the Consumer Price Index, as defined in Title 5 MRSA §17001, subsection 9 plus 3 percent. Pursuant to Title 5 MRSA § 285 most retired employees of the Maine Turnpike Authority, Maine Community College System, Maine Maritime Academy, Maine Public Employees Retirement System, and Maine Educational Center for the Deaf and Hard of Hearing are eligible to participate in the health plan but are not funded by the State.

The State pays 100 percent of postretirement health insurance premiums for state employee retirees who were first employed on or before July 1, 1991. A pro rata portion, ranging from zero percent for retirees with less than five years participation to 100 percent for retirees with ten or more years of participation, is paid for eligible individuals first employed after July 1, 1991. Per Title 5 MRSA § 285 paragraphs 2 and 3, coverage depends upon terms and conditions contained in collective bargaining agreements with the State Health Commission. Retirees who are not eligible for Medicare retain coverage in the same group health plan as active employees. Retirees must pay for Medicare Part B coverage to be eligible to participate in the State-funded Companion Plan. Coverage for retirees ineligible for Medicare includes basic hospitalization; supplemental major medical and prescription drugs; and costs for treatment of mental health, alcoholism, and substance abuse.

Part-time employees are eligible for prorated benefits. Retirees who worked 50 percent or more of full-time hours receive 100 percent of the benefit. Surviving spouses and dependents may continue in the plan and pay 100 percent of the premium. Retirees ineligible for a State contribution are allowed to participate and pay the retiree premium.

Teachers and First Responders

The State also committed to pay a statutorily determined portion of the retiree healthcare premiums for retired Teachers and retired First Responders as authorized by Title 20-A MRSA § 13451 and Title 5 MRSA § 286-M, respectively. First Responders are defined in statute as retired county or municipal law enforcement officers and municipal firefighters who participate in an employer-sponsored retirement plan. Specifically excluded (Title 5 MRSA § 285 1-B) from the definition of Teachers are members of the Maine Municipal Association, Maine Teachers Association and employees of counties and municipalities and their instrumentalities, except as provided in subsection 11-A. Each group is a collection of single employer defined benefit plans. State contributions are based on rates negotiated by each school district and municipality and reflect their individual healthcare experience rating. The plans are currently funded on a pay-as-you-go basis with the State directly paying insurers.

Effective July 1, 2021, the State contribution to retired teacher health premiums was increased to 55 percent of the retiree-only premium. The rate is based on a single rate for single and employee plus children coverage, or 50 percent of the two party rate for two party and family coverage. Eligibility mirrors that of State Employees.

County and municipal law enforcement officers and municipal firefighters began coverage in fiscal year 2008 with the State contributing 45 percent of the retiree-only premium of their respective plans. Public Law 2019, Chapter 446 §2 changed a number of plan provisions. Effective July 1, 2021 the applicable premium subsidy is 55 percent. The State's premium subsidy is outlined in Title 5 MRSA §286-M ¶6, as referenced in Title 5 MRSA §285 ¶11-A, as being the cost of the retiree's share of the individual premium for the standard plan identified and offered under the group health insurance plan in which the retiree enrolls. The plan change also enables an enrollee to participate in the group health insurance plan in which the enrollee's spouse participates. Active employees may elect to enroll in the plan on different dates based on date of hire. A special open enrollment period existed for all active employees from October 1, 2019 through December 31, 2021. The State subsidy ends after the retiree is eligible for Medicare. First Responders are eligible if they retire after age 50 with 25 or more years of service and receive a retirement benefit from either the MPERS or a defined contribution plan. If retirees have fewer than 25 years of service, the normal retirement benefit must be at least 50 percent of final average compensation. Retirees must have, while actively working as a county or municipal law enforcement officer or a municipal firefighter, participated in the person's employer's health insurance plan or other fully-insured health insurance plan. Retirees can elect to participate in the plan at their retirement date. If participation is waived at that time, the retiree is ineligible to participate at a later date.

POST RETIREMENT GROUP LIFE INSURANCE PLAN

The Maine Public Employees Retirement System (the System) is a component unit of the State of Maine. For financial reporting purposes, the System administers two multiple-employer cost-sharing, defined benefit Group Life Insurance Plans (GLIP) administered by a third party insurance company in accordance with Title 5 MRSA C. 423 and 425. Members include employees of the State, public school employees (defined by Maine law as teachers), members of the Judiciary and the Legislature, which are eligible for membership in the System. The State of Maine is also a non-employer contributing entity in that the State pays contributions for retired public school teachers in the plan. Group life insurance benefits are also provided to employees of approximately 140 local municipalities and other public entities (Participating Local Districts, or PLDs) in Maine that elect to participate under provisions of the relevant statutes.

The Plan provides Basic group life insurance benefits during retirement to employees who participated in the group life insurance plan prior to retirement for a minimum of 10 years. The 10 year participation requirement does not apply to recipients of disability retirement benefits. The level of coverage in retirement is initially set to an amount equal to the retiree's average final compensation. The initial amount of Basic group life insurance benefit is then subsequently reduced at the rate of 15 percent per year to the greater of 40 percent of the initial amount or \$2,500.

Group life insurance funds managed by the System are constitutionally restricted and held in trust for the payment of benefits to participants or their beneficiaries. The System's Board of Trustees, in its fiduciary capacity, establishes the System's investment policies and their overall implementation. The System maintains separate reserves and accounts for each participating entity and performs a single actuarial valuation that provides separate data for each participating plan.

The System issues a publicly available annual comprehensive financial report that includes financial statements and required supplementary information (RSI) for the plan. The June 30, 2022 report may be obtained from the Maine Public Employees Retirement System, PO Box 349, Augusta, ME 04332-0349 or on-line at www.maineopers.org.

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The State and the System's fiduciary financial statements are prepared on the accrual basis of accounting. Premiums are recognized when due and benefits are paid when incurred using the accrual basis of accounting. Premium refunds reduce premium revenue and claims recoveries reduce claims expense. Investment income is recognized when earned. In addition, an estimate is made for group life insurance death benefits incurred before year end but not reported to the System until after year end. Group life insurance death benefits incurred but not reported are reflected as other liabilities.

CONTRIBUTIONS AND RESERVES

The State Employees Health Insurance Committee establishes contributions to the plan by member employers and employees annually. Both active and retired members pay the same premium rate. Claims liabilities of the plan are periodically computed using statistical techniques to establish premium rates. Administrative costs of the plan are allocated to plan participants.

INVESTMENTS

Investments are reported at fair value. Investments that do not have an established market are reported at estimated fair value. Fair value of shares in managed investment pools is based on unit values reported by the funds. The fair value of other investments, including real estate holdings and mortgage participation agreements, are based on third-party appraisals and valuations provided by the sponsor of the agreement. Investment purchases and sales are recorded as of their trade date. Proceeds related to securities sold not yet purchased are carried as a liability and adjusted to the fair value of the securities.

PLAN MEMBERSHIP

Membership in the OPEB plans is as follows:

	Healthcare			Group Life	
	State Employees	Teachers	First Responders	State Employees*	Teachers
Actives	12,113	27,346	652	11,698	15,029
Retirees	8,767	10,513	128	8,741	7,534
Inactives Vested	173	559	-	-	-
Total	21,053	38,418	780	20,439	22,563

* Group life membership totals include component unit and other members.

STATE EMPLOYEE HEALTHCARE FUNDING POLICY

The Trustees of the State Employee Healthcare Plan are the State Controller and State Treasurer. Title 5 MRSA § 286-B authorized an Irrevocable Trust Fund for Other Post-Employment Benefits to meet the State's unfunded liability obligations for retiree health benefits for eligible participants who are the beneficiaries of the irrevocable trust fund. Annually, beginning with the fiscal year starting July 1, 2007, the Legislature shall appropriate funds to meet the State's obligations under any group health plan, policy or contract purchased by the State Employee Health Commission. Unfunded liabilities may not be created except those resulting from experience losses. Unfunded liability resulting from experience losses must be retired over a period not to exceed 10 years. The unfunded liability for retiree health benefits for eligible participants must be retired in 30 years or less from July 1, 2007.

Public Law 2007, Chapter 240, amended Title 5 Chapter 421 by establishing the Irrevocable Trust for Other Post-employment Benefits. MPERS holds and invests long-term funds in the irrevocable trust fund. Its fiduciary responsibilities include setting investment policy in order to fund the plan in accordance with a projected disbursement schedule that does not begin before the year 2027.

TEACHERS PLAN AND FIRST RESPONDERS PLAN HEALTHCARE FUNDING POLICY

A special funding situation exists for these plans. The State is statutorily responsible for contributions to the Teachers Plan and the First Responders Plan that cover the retirees of other governmental entities. The State is the sole contributing entity for Teachers and for the First Responders, therefore, making the contribution on behalf of the employing jurisdictions at a 45 percent level for the current portion of the health plan costs. Plan members are not included in the Trust.

Public Law 2011, Chapter 380 Pt. Y § 2 established separate Irrevocable Trust Funds for Other Post-Employment Benefits to meet the State's unfunded liability obligations for retiree health benefits for eligible participants who are the beneficiaries of the irrevocable trust funds. Annually, beginning with the fiscal year starting July 1, 2011, the Legislature shall appropriate funds to meet the State's obligations to retire the unfunded liability for eligible first responders in 30 years or less from July 1, 2007. Public Law 2013, Chapter 368 Pt. H § 2 amended the starting date for funding teachers. As amended annually beginning with the fiscal year starting July 1, 2015, the Legislature shall appropriate funds to meet the State's obligations to retire the unfunded liability at June 30, 2006 for eligible teachers in 30 years or less from July 1, 2007.

Public Law 2019, Chapter 280 establishes a separate trust for the purpose of accumulating resources to assist in retiring the unfunded liability of the first responders plan. Beginning June 30, 2020, all monies not necessary to fund the normal costs and administrative costs of the program must be transferred from the Firefighters and Law Enforcement Officers Health Insurance Program Fund to the trust at the end of each fiscal year.

GROUP LIFE INSURANCE FUNDING POLICY

Premium rates are those determined by the System's Board of Trustees to be actuarially sufficient to pay anticipated claims and cover administrative costs. For State employee, legislative and judicial classes, the premiums for retiree life insurance coverage are factored into the premiums paid for Basic coverage while participants are active members. The State remits premiums at a single rate that supports basic coverage for active and retired State employees. This rate is 82 cents per month for every \$1,000 of coverage. Premiums for retiree life insurance coverage for retired teachers are paid by the State based on a rate of 33 cents per \$1,000 of coverage per month during the post-employment retirement period.

CHANGES IN THE TOTAL OPEB LIABILITY

The changes in total OPEB liabilities are as follows:

(Expressed in Thousands)

	Healthcare Increase (Decrease)	
	Teachers	First Responders
Balances at June 30, 2021	\$ 1,905,991	\$ 31,926
Changes for the Year:		
Service Cost	68,197	1,553
Interest	43,314	731
Contributions - Employee	-	(693)
Contributions - Non-Employer Contributing Entity	(28,719)	(218)
Administrative Expenses	-	72
Changes in Benefit Terms	325,417	165
Differences Between Expected and Actual Experience	(457,831)	(1,641)
Changes in Assumptions - Discount Rate	12,837	138
Changes in Assumptions - Others	(79,412)	647
Net Changes	(116,197)	754
Balances at June 30, 2022	\$ 1,789,794	\$ 32,680
Covered Payroll	\$ 1,414,447	\$ 46,207
Total OPEB Liability as a Percentage of Covered Payroll	126.5 %	70.7 %
State's Proportionate Share of the Collective Total OPEB Liability	78 %	24 %

The State's proportionate share for fiscal years ended June 30, 2022 and June 30, 2021 was estimated using the same share of implicit subsidy for each school district's or municipality's OPEB Plan.

CHANGES IN NET OPEB LIABILITY

Changes in net OPEB liabilities are as follows:

SCHEDULE OF CHANGES IN NET OPEB LIABILITY
(Expressed in Thousands)

	<u>Healthcare</u>	<u>Group Life Insurance</u>		
	<u>State Employees</u>	<u>State Employees</u>	<u>Teachers</u>	<u>State portion of Group Life Insurance</u>

The group life insurance plan includes discretely presented component units and other entities. Plan numbers in the table above report the primary government's totals.

ACTUARIAL METHODS AND ASSUMPTIONS

The projection of benefits is based on the terms of the substantive plan at the time of each valuation and include types of benefits in force at the valuation date and the pattern of sharing of costs between the employer and plan members to that point. Actuarial calculations reflect a long-term perspective and employ methods and assumptions that are designed to reduce short-term volatility in actuarial accrued liabilities and the actuarial value of assets. Significant methods and assumptions were as follows:

State Health Insurance

The valuation date is June 30, 2021 and will provide the basis for the State's financial reporting for the fiscal years ending June 30, 2022 and June 30, 2023. Costs are developed using the entry age normal cost method based on a level percentage of payroll. The participation rate for future retirees is 95 percent of active participants currently enrolled. Actuarial assumptions used in the June 30, 2021 and June 30, 2020 actuarial valuations were based on the results of an actuarial experience study conducted for the period of July 1, 2015 to June 30, 2020. No method changes occurred since the prior valuation. Significant actuarial assumptions employed by the actuary for funding purposes as of June 30, 2021 and June 30, 2020 include: updating the discount rate assumption to 6.50 percent from 6.75 percent, a 2.75 percent inflation rate; and, annual salary increases, including inflation of 2.75 percent plus merit component based on employee's years of service. The June 30, 2007 unfunded actuarial accrued liability is amortized as a level percentage of payroll over 30 years on a closed basis. The unfunded liability will be fully recognized by June 30, 2037. Assumption changes, plan changes and experience gains are amortized over a period to June 30, 2037. Experience losses are amortized over a 10 year fixed period. The initial medical trend rate had been 6.00 percent at June 30, 2020 and 2021. The ultimate medical trend rate of 4.29 percent reached at 2075 was decreased to 4.19 percent at June 30, 2021. The State actively manages premium increases within the statutory cap, so healthcare cost increases are limited to no more than inflation plus 3 percent in any year. For active members and non-disabled retirees, the rates are based on the 2010 Public Plan General Headcount-Weighted Employee and Healthy Retiree Mortality Tables and MP-2020 Mortality Improvement Scale with different adjustments made to base employee and healthy retiree mortality rates.

The long-term expected rate of return on Other Post-Employment Benefit Plan investments was determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of investment expense and inflation) are developed for each major class of assets. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. Best estimates of long-term real rates of return for each major asset class were benchmarked against returns by asset class as forecast by Horizon Actuarial Services, LLC.

Beginning with the prior fiscal year, June 30, 2021, management adopted a change in methodology recommended by the actuary. The new methodology better estimates actual self-insured plan premiums covered by the State on behalf of participants (explicit subsidy). Total claims allocated to retirees represents the total benefit payment amount and the implied subsidy payments represent the difference. The methodology will be used on a consistent basis going forward.

Group Life Insurance

The valuation date is June 30, 2021. Costs are developed using the individual entry age normal cost method based on a level percentage of payroll. The participation rate for future retirees is 100 percent of those currently enrolled. Actuarial assumptions used in the June 30, 2021 and June 30, 2020 actuarial valuations were based on the results of an actuarial experience study conducted for the period of July 1, 2015 to June 30, 2020. Significant actuarial assumptions employed by the actuary for funding purposes as of June 30, 2021 and June 30, 2020 include: updating the discount rate assumption to 6.50 percent from 6.75 percent, a 2.75 percent inflation rate; and, annual salary increases, including inflation of 2.75 percent plus merit component based on employee's years of service. The unfunded actuarial accrued liability is being amortized as a level percentage of payroll over a 30-year period on a closed basis. As of June 30, 2021, there were 16 years remaining in the amortization schedule for state employees and teachers. For active members and non-disabled retirees, the rates are based on the 2010 Public Plan General Benefits-Weighted Healthy Retiree Mortality Table, for males and females, projected generationally using the RPEC_2020 model.

The long-term expected rate of return on Other Post-Employment Benefit Plan investments was determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of investment expense and inflation) are developed for each major class of assets. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. Best estimates of long-term real rates of return for each major asset class included in the target asset allocation as of June 30, 2021 are summarized in the table in the plan section below.

The discount rate used to measure the total OPEB liability for the State Employee and Teacher Plan was 6.50 percent at the measurement date and 6.75 percent at June 30, 2020. The projection of cash flows used to determine the discount rate assumed that employer and non-employer entity contributions will be made at contractually required rates, actuarially determined. Based on these assumptions, the Plan's fiduciary net position was projected to be available to make all projected future benefit payments to current plan members. Therefore, the long-term expected rate of return on investments was applied to all periods of projected benefit payments

to determine the total OPEB liability.

Teachers Health Insurance

The valuation date is June 30, 2021. Costs are developed using the entry age normal cost method based on a level percentage of payroll. 93.33 percent of all Teachers are assumed to be eligible to receive a State contribution at retirement. 75 percent of active participants currently with coverage continue coverage at retirement. The State is currently funding the plan on a pay-as-you-go basis. One third of active participants who have currently waived coverage elect coverage at retirement. Actuarial assumptions used in the June 30, 2021 and June 30, 2020 actuarial valuations were based on the results of an actuarial experience study conducted for the period of July 1, 2015 to June 30, 2020. Significant actuarial assumptions employed by the actuary for funding purposes as of June 30, 2021 and June 30, 2020 include: using a 2.75 percent inflation rate and 3.00 percent annual salary increases. Since the State's portion of the Teachers' postretirement medical plans are not being funded by assets in a separate trust, GASB No. 75 requires that the discount rate be based on the index rate as of the measurement date of a 20-year tax-exempt general obligation municipal bond index with an average rating of AA/Aa or higher. The State of Maine elected to determine the discount rate using the Bond Buyer 20-Bond General Obligation Index. The discount rate was 2.16 percent as of the measurement date and 2.21 percent at June 30, 2020. The initial medical trend rate had been 6.00 percent at June 30, 2021 and June 30, 2020. The ultimate medical trend rate of 4.29 percent reached at 2075 was decreased to 4.19 percent at June 30, 2021. For active members and non-disabled retirees, the rates are based on the 2010 Public Plan General Headcount-Weighted Employee and Healthy Retiree Mortality Tables and MP-2020 Mortality Improvement Scale with different adjustments made to base employee and healthy retiree mortality rates.

First Responders Health Insurance

The valuation date is June 30, 2021. Costs are developed using the individual entry age normal cost method based on a level percentage of payroll. 90 percent of all active members who currently have coverage are assumed to elect coverage at retirement. No employee who has waived coverage will be assumed to be eligible for coverage at retirement. The State is currently funding the plan on a pay-as-you-go basis. The valuation assumes the State will continue this policy. Since the State's portion of the First Responders' postretirement medical plans are not being funded by assets in a separate trust, GASB No. 75 requires that the discount rate be based on the index rate as of the measurement date of a 20-year tax-exempt general obligation municipal bond index with an average rating of AA/Aa or higher. The State of Maine elected to determine the discount rate using the Bond Buyer 20-Bond General Obligation Index. The discount rate was 2.16 percent as of the measurement date and 2.21 percent at June 30, 2020. Actuarial assumptions used in the June 30, 2021 and June 30, 2020 actuarial valuations were based on the results of an actuarial experience study conducted for the period of July 1, 2015 to June 30, 2020. Other significant actuarial assumptions employed by the actuary for June 30, 2021 and June 30, 2020 include using a 2.75 percent inflation rate and 3.00 percent annual salary increase. The initial medical trend rate had been 6.00 percent at June 30, 2021 and June 30, 2020. The ultimate medical trend rate of 4.29 percent reached at 2075 was decreased to 4.19 percent at June 30, 2021. For active members and non-disabled retirees, the rates are based on the 2010 Public Plan General Headcount-Weighted Employee and Healthy Retiree Mortality Tables and MP-2020 Mortality Improvement Scale with different adjustments made to base employee and healthy retiree mortality rates.

OPEB EXPENSE AND DEFERRALS

For the year ended June 30, 2022, the State recognized OPEB expense of \$447,678. Costs related to non-State employees are charged to the General Fund.

OPEB COSTS (Expressed in Thousands)

SETP - State of Maine Healthcare OPEB Expense	\$ 26,023
SETP - Teachers Non-Employer Healthcare OPEB Expense (grant expense)	415,809
First Responders Healthcare OPEB Expense	686
Group Life Insurance OPEB Expense - State Employees	4,913
Group Life Insurance OPEB Expense - Teachers (grant expense)	247
Total	\$ 447,678

Of State employee costs charged to governmental funds, 51 percent is charged to the General Fund, 20 percent to Other Special Revenue Funds, 16 percent to the Highway Fund and 13 percent to Federal funds. At June 30, 2022, the State reported deferred outflows of resources and deferred inflows of resources related to OPEB from the following sources:

	Healthcare (Expressed in Thousands)					
	State		Teachers		First Responders	
	Deferred Outflows of Resources	Deferred Inflows of Resources	Deferred Outflows of Resources	Deferred Inflows of Resources	Deferred Outflows of Resources	Deferred Inflows of Resources

Total	\$ 10,687	\$ 6,927	\$ 5,861	\$ 15,883
For the Year Ended				
2023	(678)		(3,392)	
2024	(540)		(3,146)	
2025	(563)		(2,631)	
2026	(1,093)		(3,627)	
2027	560		(395)	
Thereafter	560		(1,424)	

The long-term expected rate of return on OPEB plan assets was determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of OPEB plan investment expense and inflation) are developed for

each major class of assets. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. Best estimates of arithmetic real rates of return for each major asset class included in the OPEB plan's target asset allocation are summarized in the following table.

Asset Class:	State Healthcare and Group Life Insurance	
	Target Allocation	Long-Term Expected Real Rate of Return
U.S. Government Securities	9.00 %	2.30 %
Public Equity	70.00 %	6.00 %
Traditional Credit	16.00 %	3.20 %
Real Assets:		
Real Estate	5.00 %	5.20 %

For the year ended June 30, 2022, the annual money-weighted average rate of return on investments, net of investment expense was 14.1 percent for both plans. The money-weighted rate of return expresses investment performance, net of investment expense, adjusted for the changing amounts actually invested.

The discount rate used to measure the collective total OPEB liability for the actuarial valuations varied by plan and is disclosed below. The projection of cash flows used to determine the discount rate assumed that plan member contributions will be made at the current contribution rate and that employer and non-employer entity contributions will be made at the actuarially determined, contractually required rates. Based on the assumption, the OPEB plan's fiduciary net position was projected to be available to make all projected future benefit payments to current plan members. Therefore, the long-term expected rate of return on OPEB plan investments was applied to all periods of projected benefit payments to determine the total OPEB liability.

SENSITIVITY ANALYSIS

The following tables show how the collective OPEB liabilities would change if the discount rate used was one percentage point lower or one percentage point higher than the current rate. The discount rate used for the funded healthcare plan is 6.50 percent. The discount rate used for unfunded healthcare plans is 2.16 percent. The discount rate used for funded group life insurance plans is 6.50 percent.

Discount Rate
(Expressed in Thousands)

	<u>1% Decrease</u>	<u>Current Discount Rate</u>	<u>1% Increase</u>
Net OPEB Liabilities			
State Employee Healthcare Plan	\$ 792,263	\$ 674,539	\$ 575,391

Teacher Group Life	\$ 37,390	\$ 19,642	\$ 5,396
Total OPEB Liabilities			
Teacher Healthcare Plan	\$2,141,917	\$1,789,794	\$1,509,069
First Responders Healthcare Plan	\$ 35,588	\$ 32,680	\$ 30,045

Healthcare Cost Trend Rate
(Expressed in Thousands)

	<u>1% Decrease</u>	<u>Current Discount Rate</u>	<u>1% Increase</u>
Net OPEB State Employee Healthcare Plan	\$ 558,479	\$ 674,539	\$ 814,846
Total OPEB Teacher Healthcare Plan	\$ 1,457,153	\$ 1,789,794	\$ 2,233,597
Total OPEB First Responder Healthcare Plan	\$ 29,446	\$ 32,680	\$ 36,465

For all plans, the current trend rate is 6.00 percent grading down to 4.19 percent.

Plan Information

GASB Statement No. 74, *Financial Reporting for Postemployment Benefit Plans Other Than Pension Plans*, principal objective is to improve the usefulness of OPEB information in the external financial statements of State and local governments. GASB established different reporting requirements for OPEB plans based on whether or not plan assets accumulated for benefits are placed in trusts (or equivalent arrangements). Two OPEB Plans met the requirements for funded OPEB trusts or their equivalents: the State Employee Healthcare Plan and the Group Life Insurance Plan for State Employees and Teachers. The other plans are funded on a pay-as-you-go basis.

Information not already contained in this note disclosure at June 30, 2022 follows. The Trustees of the State Retiree Healthcare Plan (SRHP) are the State Controller and State Treasurer.

Components of the Net OPEB Liability for the plans at June 30, 2022 were as follows:

(Expressed in Thousands)

	State Employee Healthcare Plan	State and Teachers Group Life Insurance Benefit Plan
Total OPEB liability	\$ 1,077,787	\$ 235,060
Plan fiduciary net position	331,180	123,155
State of Maine's net OPEB liability	<u>\$ 746,607</u>	<u>\$ 111,905</u>
Plan fiduciary net position as a percentage of the total OPEB liability	30.73 %	52.39 %

Actuarial assumptions for both funded OPEB plans used in the June 30, 2022 valuations were based on results from an actuarial experience study for the period of June 30, 2016 to June 30, 2020. The individual entry age normal method is used to determine liabilities. Asset amounts are taken as reported to the actuaries by the System without audit or change. Specific health and group life insurance OPEB plans' actuarial assumptions are included in the plan specific section of this note. For the 2022 healthcare valuation, the initial medical trend rate of 6.00 percent remained constant.

The long-term expected rate of return on OPEB plan assets was determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of OPEB plan investment expense and inflation) are developed for each major class of assets. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. Best estimates of arithmetic real rates of return for each major asset class included in the OPEB plans' target asset allocation are summarized in the following table.

	Target Allocation	Long-Term Expected Real Rate of Return
Asset Class for the State Employee and Teacher Group Life Insurance Benefit Plan		
Public Equity	70.0 %	6.0 %
Real Estate	5.0 %	5.2 %
Traditional Credit	16.0 %	3.2 %
U.S. Government Securities	9.0 %	2.3 %
Asset Class for State Employee Healthcare Plan		
Public Equity	70.0 %	6.0 %
Real Estate	5.0 %	5.2 %
Traditional Credit	16.0 %	3.2 %
U.S. Government Securities	9.0 %	2.3 %

For the year ended June 30, 2022, the annual money-weighted rate of return on investments, net of investment expense, was 14.1 percent for both plans. The money weighted rate of return expresses investment performance, net of investment expense, adjusted for

the changing amounts actually invested.

The discount rate used to measure the collective total OPEB liability for the actuarial valuations varied by plan and is disclosed below. The projection of cash flows used to determine the discount rate assumed that plan member contributions will be made at the current contribution rate and that employer and non-employer entity contributions will be made at actuarially determined, contractually required rates. Based on these assumptions, the OPEB plans' fiduciary net position were projected to be available to make all projected future benefit payments to current plan members. Therefore, the long-term expected rate of return on OPEB plan investments was applied to all periods of projected benefit payments to determine the total OPEB liability.

The following table shows how the collective net OPEB liabilities would change if the discount rate used was one percentage point lower or one percentage point higher than the current rate. The current rate used for both plans is 6.50 percent.

(Expressed in Thousands)

	<u>1% Decrease</u>	<u>Current Discount Rate</u>	<u>1% Increase</u>
State Employee Healthcare Plan	\$ 865,331	\$ 746,607	\$ 646,611
State Employee and Teacher Group Life Insurance Benefit Plan	\$ 147,880	\$ 111,905	\$ 82,796

Sensitivity of the net OPEB liability to changes in the healthcare cost trend rates. The following table shows how the collective net OPEB liabilities would change if the healthcare rate used was one percentage point lower or one percentage point higher than the current rate of 7.63 percent grading down to 4.19 percent.

(Expressed in Thousands)

	<u>1% Decrease</u>	<u>Current Discount Rate</u>	<u>1% Increase</u>
State Employee Healthcare Plan	\$ 620,223	\$ 746,607	\$ 899,836

NOTE 11 - LONG-TERM OBLIGATIONS

PRIMARY GOVERNMENT

The State records its liability for general obligation bonds in the Governmental Activities column on the Statement of Net Position. Other long-term obligations recognized by the State include: revenue bonds issued by the Maine Governmental Facilities Authority, a blended component unit; obligations under Certificates of Participation and other financing arrangements; loans payable to component unit for repayment of bonds issued by the Maine Municipal Bond Bank on behalf of the Maine Department of Transportation and the Liquor Operations Revenue Fund and compensated employee absences.

GENERAL OBLIGATIONS BONDS

Programs for which the State issues general obligation bonds include: adaptive equipment loan programs; environmental cleanup and protection; highway and transportation related projects; agricultural and small business job creation; and acquisition, construction, and renovation of major capital facilities including State parks and historic sites. General obligation bonds are secured by the full faith and credit of the State. Debt service requirements are provided by legislative appropriation from the State's general tax revenues and are repaid in annual installments beginning not more than one year after issuance.

Changes in general obligation bonds of the primary government during fiscal year 2022 were:

AUTHORIZED UNISSUED BONDS

Any bonds not issued within five years of the date of ratification may not be issued after that date. Within two years after expiration of the five-year period, the Legislature may extend, by a majority vote, the five-year period for an additional five years or may deauthorize the bonds. If the Legislature fails to take action within those two years, the bond issue shall be considered to be deauthorized and no further bonds may be issued. At June 30, 2022, general obligation bonds authorized and unissued totaled \$167.1 million.

REVENUE BONDS OF THE MAINE GOVERNMENTAL FACILITIES AUTHORITY

The State included \$403.2 million in other financing arrangements to reflect revenue bonds issued by the Maine Governmental Facilities Authority (MGFA), a blended component unit. Payment of the bonds is subject to, and dependent upon, biennial appropriations being made by the State Legislature. Debt issued by MGFA is not debt of the State or any political subdivision within the State. The State is not obligated for such debt, nor is the full faith and credit of the State pledged for such debt. MGFA may not issue securities in excess of \$754.0 million outstanding, at any one time, except for the issuance of certain revenue refunding securities.

During the fiscal year ended June 30, 2022, MGFA issued \$44.8 million in 2022A bonds with interest rates between 3.00 percent and 5.00 percent.

At June 30, 2022, there was \$13.2 million of MGFA in-substance defeased bonds outstanding.

CERTIFICATES OF PARTICIPATION AND OTHER FINANCING ARRANGEMENTS

The State uses financing companies, Certificates of Participation (COP's), and lease/purchase agreements to finance construction of certain State buildings, to purchase or generate software, and to purchase equipment and vehicles, including school buses. COP's are issued through a trustee, and the State is responsible for payments to the trustee that approximate the interest and principal payments made to the certificate holders. The State and school districts maintain custody and use of the assets; however, the trustee holds a lien as security until such time as the certificates are fully paid.

Neither COP's nor the other financing arrangements constitute a legal debt, liability, or contractual obligation in excess of amounts appropriated. The State's obligation to make minimum payments or any other obligation under agreements is subject to, and dependent upon, appropriations being made by the Legislature. The Legislature has no obligation to appropriate the money for future minimum payments or other obligations under any agreement.

SHORT-TERM OBLIGATIONS

The State of Maine did not issue or retire Bond Anticipation Notes during fiscal year 2022. Short-term obligations are used to meet temporary operating cash flow needs. At June 30, 2022 there were no outstanding Tax Anticipation Notes or Bond Anticipation Notes.

OTHER LONG-TERM OBLIGATIONS

In general, expenditures and fund liabilities are not recorded in governmental funds for long-term obligations until amounts owed are "due and payable." Fund liabilities are recorded in the proprietary funds when obligations are incurred. In the Statement of Net Position, the State has recorded long-term obligations for its compensated employee absences, net pension liability, other post-employment benefit obligations, pollution remediation landfill closure and post-closure care costs.

Changes in other long-term obligations for governmental and business-type activities for the fiscal year ended June 30, 2022, are summarized as follows:

Primary Government - Changes in Other Long-Term Obligations

LOANS PAYABLE TO COMPONENT UNIT

The State of Maine has pledged various revenue streams as security for Grant Anticipation Bonds (GARVEE) and Transportation Infrastructure Revenue Bonds (TransCap) issued by the Maine Municipal Bond Bank (MMBB) on behalf of the Maine Department of Transportation to provide financing for qualified transportation projects.

In addition, the State of Maine has also pledged the profit from the Alcoholic Beverages Enterprise Fund as security for \$220.6 million (\$193.8 million net of the debt service reserve) of Liquor Operations Revenue Bonds issued by MMBB. The bonds are special, limited obligations of the MMBB.

Changes in GARVEE, TransCap and Liquor Operations revenue bonds during fiscal year 2022 were:

Primary Government - Changes in GARVEE, TransCap and Liquor Revenue Bonds Payable
(Expressed in Thousands)

	Balance July 1, 2021	Additions	Reductions	Balance June 30, 2022	Due Within One Year
Loans Payable to Components Unit:					
Federal Funds	\$ 193,440	\$ -	\$ 19,697	\$ 173,743	\$ 20,073
Special Revenue Fund	143,553	-	46,848	96,705	38,074
Total	<u>\$ 336,993</u>	<u>\$ -</u>	<u>\$ 66,545</u>	<u>\$ 270,448</u>	<u>\$ 58,147</u>

Payment of principal and interest on the GARVEE bonds shall be subject to appropriation each year by the Legislature in an amount sufficient to cover the principal and interest requirements of MMBB's debt for these bonds. The State's receipt of these funds is subject to continuing federal appropriations. MMBB insured payments of principal and interest with a financial guaranty insurance policy. The bonds do not constitute a legal debt or obligation of the State.

Principal and interest on TransCap bonds are payable solely from pledged revenues, pledged rights, and pledged TransCap funds and accounts. Pledged revenues include certain motor vehicle registration and other fees, a portion of excise tax on gasoline and other special fuel, and certain amounts required to be transferred from the Highway Fund. All pledged revenues are required to be transferred to the TransCap Fund. The bonds do not constitute a legal debt or liability of the State.

Payment of principal and interest on the Liquor Operations Revenue bonds shall be made solely from the profit of the Alcoholic Beverages Enterprise Fund. The bonds do not constitute a legal debt or obligation of the State.

GARVEE, TransCap and Liquor Operations Revenue bonds issued and outstanding at June 30, 2022 are as follows:

GARVEE, TransCap and Liquor Revenue Bonds Outstanding
(Expressed in Thousands)

	Amounts Issued	Outstanding June 30, 2022	Fiscal Year Maturities		Interest Rates

Total Special Revenue Funds		<u>\$ 80,495</u>			

Total principal and interest requirements over the life of the 2010 GARVEE bonds are \$35.8 million, with annual requirements of up to \$5.6 million; for 2014 GARVEE bonds total principal and interest requirements are \$59.0 million, with annual requirements of up to \$5.0 million; for 2016 GARVEE bonds total principal and interest requirements are \$58.0 million, with annual requirements up to \$4.9 million; for 2018A GARVEE bonds total principal and interest requirements are \$63.3 million, with annual requirements up to \$6.7 million; for 2020A GARVEE bonds total principal and interest requirements are \$81.9 million, with annual requirements up to \$6.8 million. Total federal highway transportation funds received in federal fiscal year 2022 were \$286.1 million. Current year payments to MMBB for GARVEE bonds were \$24.0 million (8.7 percent of federal highway transportation funds received).

Total principal and interest requirements over the life of the 2009A TransCap Revenue bond are \$139.3 million, with annual requirements up to \$10.1 million; for the 2015A TransCap Revenue bonds total principal and interest requirements are \$74.4 million, with annual requirements up to \$16.6 million; for the 2021A TransCap Revenue bonds total principal and interest requirements are \$43.1 million, with annual requirements up to \$18.1 million. Total revenue received for revenue sources used as pledged revenues were \$42.4 million in fiscal year 2022.

Total principal and interest requirements over the life of the 2013 Liquor Operation Revenue bond are \$273.7 million, with annual requirements up to \$26.8 million. Current year payments to MMBB for the Liquor Operation bonds were \$26.8 million. Total revenue received from revenue sources used as pledged revenue were \$62.1 million in fiscal year 2022.

MGFA REVENUE BONDS, COP'S AND OTHER FINANCING ARRANGEMENTS

MGFA revenue bonds will be liquidated by the MGFA Internal Service Fund, from revenues received through lease agreements with various governmental funds. The liability for loans payable to the component unit will be liquidated from the Federal Fund and Highway Fund. The vast majority of COP's and other financing arrangements will be liquidated by the internal service fund in which the leases are recorded; the General and Highway Funds will pay relatively small amounts.

CLAIMS PAYABLE

Claims payable that represent Medicaid claims will be paid from the General Fund and Federal Fund. Claims payable that represent workers' compensation and retiree/employee health will be liquidated by the applicable governmental and internal service funds that account for the salaries and wages of the related employees. Other claims and judgments attributable to governmental activities will be liquidated by the General Fund and related special revenue funds.

COMPENSATED ABSENCES

In the government-wide statements and proprietary fund financial statements, compensated absences are reported as long-term liabilities as required by GASB. In the governmental fund financial statements, vested or accumulated leave is reported as an expenditure and fund liability when incurred upon retirement, termination or death. Sick and vacation payments made to terminated employees as of June 30, 2022 but paid after the fiscal year end is also reported in the funds.

COMPONENT UNITS

Bonds payable of the discretely presented component units are legal obligations of the component units and are not general obligations of the State. The following table summarizes bonds outstanding for selected material balances of discretely presented component units, as reported in their separately issued financial statements, utilizing their respective fiscal year-ends:

Component Unit Bonds Outstanding
(Expressed in Thousands)

Component Unit	Interest Rates	Amount	Maturity Dates
Finance Authority of Maine	2.120% - 5.050%	\$ 74,119	2022 - 2041
Maine Community College System	3.000% - 5.000%	15,411	2022 - 2036
Maine Health and Higher Educational Facilities Authority	0.359% - 5.500%	600,295	2022 - 2053
Maine Municipal Bond Bank	0.350% - 6.120%	1,594,279	2022 - 2049
Maine State Housing Authority	0.000% - 5.000%	1,571,645	2022 - 2053
Maine Turnpike Authority	2.000% - 5.000%	636,082	2022 - 2050
University of Maine System	0.310% - 5.000%	151,893	2022 - 2037

In periods of declining interest rates, Maine Health and Higher Educational Facilities Authority (MHHEFA) has refunded certain bond obligations. The proceeds of any advance refunding bonds are primarily used to purchase U.S. Treasury obligations, the principal and interest on which will be sufficient to pay the principal and interest, when due, of the defeased bonds.

On June 2, 2022 Maine Health and Higher Educational Facilities Authority (MHHEFA) issued \$48.3 million in 2022A Reserve Resolution bonds with an average interest rate of 5.0 percent, a portion of which was used to in-substance defease \$1.1 million of 2012A Reserve Resolution bond series. A portion of the net proceeds of approximately \$52.1 million, including other sources of funds and after payment of underwriting fees and other issuance costs, were used to purchase U.S. Government securities which will provide for all future debt service payments on defeased bonds. The economic benefits associated with the refunding inure to the respective institutions and not the Authority.

At June 30, 2022, MHHEFA had approximately \$68.0 million of defeased bonds remaining outstanding with respect to all advance-refunding issues within the Reserve Fund Resolution.

In periods of declining interest rates, MMBB has refunded certain of its bond obligations, reducing aggregate debt service. Where allowed, the bank retires outstanding bonds prior to their contractual maturity. In other cases, the proceeds of the refunding bonds were principally used to purchase U.S. Government Treasury obligations that will provide for future payment on the debt. The U.S. Treasury obligations are deposited with the trustees of the in-substance defeased bonds.

On July 21, 2021, MMBB issued \$35.1 million in Transportation Infrastructure Revenue Refunding Series 2021 A bonds with an average interest rate of 5% to in-substance defease \$43.7 million of various outstanding maturities of the 2011 A bonds. The net proceeds of approximately \$44.6 million including \$7.1 million of premium and \$2.9 million released from debt service reserve funds, and after \$0.4 million payment of underwriting fees and other issuance costs, were used to purchase U.S. Government securities which were utilized to fund all required debt service on the defeased bonds through their call date on September 1, 2021. Although the in-substance defeasance resulted in the recognition of a deferred accounting loss of approximately \$6.6 million in the year ended June 30, 2022, MMBB in effect reduced the Transportation Infrastructure Fund Group's aggregate debt service by approximately \$9.3 million over the next five years and obtained an economic gain (difference between the present values of the old and new debt service payments) of approximately \$6.2 million after consideration of debt service reserve funds on hand utilized in the refunding. The gain and economic benefit of this transaction inure to the State of Maine and not MMBB.

At June 30, 2022, the remaining balances of the 2001D, 2002F and 2005D General Tax-Exempt Fund Group in-substance defeased bonds total approximately \$0.5 million.

For the year ended December 31, 2021, the Maine State Housing Authority (MHS) redeemed prior to maturity \$227.2 million of its Mortgage Purchase Fund Group bonds from recoveries of principal, reserve funds, mortgage prepayments, surplus revenues and the proceeds of refunded bonds. Mortgage Purchase Fund gains of \$798 thousand were attributed to recognition of the related bond premium.

For the year ended December 31, 2021, MSHA redeemed prior to maturity \$22.6 million of its Maine Energy, Housing, & Economic Recovery bonds from bond proceeds and debt service funds. Gains of \$90 thousand were attributed to the recognition of related bond premium.

The following table summarizes debt service requirements for outstanding bonds of the discretely presented component units:

NOTE 12 - RIGHT TO USE LEASED ASSETS

PRIMARY GOVERNMENT - GOVERNMENTAL ACTIVITIES

In the government-wide and proprietary fund statements, assets and liabilities resulting from right to use leased assets are recorded at lease inception. The principal portion of lease payments reduces the liability; the interest portion is expensed.

Most leases have cancellation clauses in the event that funding is not available. For reporting purposes, such cancellation clauses are not considered because the likelihood that they will be exercised is considered remote. Some lease agreements include renewal or purchase options. The effect of such options is reflected in the minimum lease payments only if it is considered reasonably assured that an option will be exercised.

Leases that exist between the State and the Maine Governmental Facilities Authority (MGFA), a blended component unit, are not recorded as leases in this report. In their separately issued financial statements, MGFA records a lease receivable from the State. Although payables and receivables technically exist between these parties, when combined for government-wide reporting, they are eliminated. A long-term liability exists on the government-wide statements for the bonds issued by MGFA to construct the assets associated with the leases. Future payments to MGFA are, therefore, not included in the schedule of lease commitments below. Note 11 provides information on the amount of MGFA bonds outstanding and a schedule of debt service requirements.

The Bureau of General Services (BGS) negotiates leases for most all state agencies. The accounting for BGS leases is recorded in an internal service fund.

The historical cost of assets acquired under leases, all of which are buildings, on the government-wide financial statements at June 30, 2022, is \$240.8 million. Accumulated amortization is \$9.5 million. Lease assets net of accumulated amortization is \$231.3 million.

Total Right to Use Assets, net	<u>\$ 11,393</u>	<u>\$ 455</u>	<u>\$ 219,436</u>	<u>\$ 231,284</u>

A summary of lease commitments to maturity is as follows:

Future Lease Payments
(Expressed in Thousands)

Fiscal Years Ending June 30	<u>Principal</u>	<u>Interest</u>
2023	\$ 6,872	\$ 3,984
2024	6,871	3,883
2025	7,020	3,780
2026	7,267	3,673
2027	7,324	3,562
2028-2032	35,829	16,080
2033-2037	32,244	13,216
2038-2042	25,903	10,687
2043-2047	26,812	8,343
2048-2052	25,604	5,930
2053-2057	18,041	3,962
2058-2062	16,811	2,363
2063-2067	13,449	958
2068-2072	4,461	94
Total	<u>\$ 234,508</u>	<u>\$ 80,515</u>

Lease liabilities are valued using discount rates between 0.67% and 1.81% based on the lease term, using State Specific Municipal Market Data.

The State of Maine, Bureau of General Services, negotiates leases on behalf of Child Development Services. At June 30, 2022, leases receivable from is \$4.5 million. Fiscal year 2022 lease revenue was \$301 thousand, interest revenue was \$48 thousand.

COMPONENT UNITS

The University of Maine System leases building space for various terms under long-term non-cancelable lease agreements. The original lease terms expire at various dates through 2036 and provide for renewal options (ranging from 1-15 years) which extend them to 2041. As of June 30, 2022, right of use lease assets acquired through outstanding leases consisting of building and office space totaled \$39.1 million less \$4.1 million in accumulated amortization.

A non-major discretely presented component unit, Midcoast Regional Redevelopment Authority (MRRRA), regularly operates and leases property and buildings within its jurisdiction to third parties. As of June 30, 2022, MRRRA reported a lease receivable, including accrued interest, of \$33.0 million. At June 30, 2022, MRRRA also had a \$32.3 million deferred inflow of resources balance associated with the leases that will be recognized as revenue over the lease terms that extend until 2067.

NOTE 13 - SELF - INSURANCE

A. RISK MANAGEMENT

The State maintains several types of insurance plans and accounts for them in two funds that are combined for financial statement purposes as the Risk Management Fund. The Risk Management Division provides insurance advice and services to State governmental agencies. The State-Administered Fund offers similar services to quasi-governmental entities. Statute requires the Self-Insurance Fund to be replenished by appropriation if the fund balance drops below \$1 million. The State-Administered Fund balance has no similar provision; however, statutes prevent it from being used for any purpose other than providing insurance services.

Insurance plans offered include property, vehicle, boat and aircraft, tort, civil rights, employee bonds, police professionals, and a variety of other insurance products. These plans have limits of liability of as much as \$2 million per occurrence.

In some cases, the State purchases excess insurance to limit the State's liability for insured events. For example, coverage for property damage is \$400 million per occurrence. The State retains \$2 million of this risk per occurrence. A private insurance carrier covers the remaining risk (excess insurance). Settled claims have not exceeded insurance coverage in any of the past three fiscal years.

Coverage, risk retention, and excess insurance amounts for major types of insurance are listed below:

Type of Insurance:	Coverage Per Occurrence	Risk Retention Per Occurrence	Excess Insurance Per Occurrence
Property*	\$400 million	\$2 million	\$400 million
Ocean Marine Boat Liability* ¹	10 million	10 thousand	10 million
Boiler and Machinery*	150 million	2 million	150 million
General Liability Including Employment Practices	400 thousand	400 thousand	none
Police Professionals	400 thousand	400 thousand	none
Vehicular Liability ²	400 thousand	400 thousand	600 thousand
Bonding	500 thousand	500 thousand	none
Foster Parents	300 thousand	300 thousand	none
Inland Marine (various policies)	500 thousand	500 thousand	none
Aircraft Liability* ³	3 million	none	3 million
Data Breach	400 thousand	10 thousand	none

*These lines of insurance have commercial excess insurance covering losses above the risk retention amount up to the per occurrence amount listed. All other insurance programs are wholly self-insured.

¹ 10 million is the maximum limit for per occurrence coverage. Some agencies have chosen \$400 thousand.

² Excess insurance is only for out of state travel.

³ \$3 million is the maximum limit for per occurrence coverage. Some agencies have chosen \$500 thousand.

The plan funds the cost of providing claims servicing and claims payment by charging a premium to each agency based on a review of past losses and estimated losses for the current period.

All risk-financing liabilities are reported when it is probable that a loss has occurred, and the amount of the loss can be reasonably estimated. Claims liabilities represent the estimated cost of claims as of March 31, 2022. This cost of claims includes case reserves, the development of known claims, and the direct administrative expenses for settling specific claims.

Claims liabilities are determined on an actuarial basis. Biennial re-evaluation occurs to take into consideration recently settled claims, the frequency of claims, and other economic and social factors. Because actual claims liabilities depend on such complex factors as inflation, changes in legal doctrines, and damage awards, the process used in computing claims liability does not necessarily result in an exact amount.

At March 31, 2022 and 2021 the present value of claims payable for the State's self-insurance plan was estimated at \$10.9 million and \$11.9 million, respectively. The actuary calculated this based on the State's rate on investments.

**Risk Management Fund
Changes in Claims Payable**
(Expressed in Thousands)

	<u>2022</u>	<u>2021</u>
Liability at Beginning of Year	\$ 11,901	\$ 11,702
Current Year Claims and Changes in Estimates	1,073	2,922
Claims/Fees Expense	2,076	2,723
Liability at End of Year	<u>\$ 10,898</u>	<u>\$ 11,901</u>

As of June 30, 2022, fund assets of \$27.7 million exceeded fund liabilities of \$12.2 million by \$15.5 million. The portion of this amount that may be reserved for catastrophic losses has not been determined.

B. UNEMPLOYMENT INSURANCE

The State is self-insured for unemployment compensation. As a direct reimbursement employer, the State recognizes all costs for unemployment compensation as claims are paid. These costs totaled \$878 thousand for the fiscal year ended June 30, 2022.

C. WORKERS' COMPENSATION

Workers' Compensation is accounted for in an Internal Service Fund. Interfund premiums are treated as quasi-external transactions. Each State agency is charged a premium based on the number of employees to be covered plus an added amount to reduce the unfunded liability. The Legislature, Legislative Council, and Law Library employees are self-insured for workers' compensation purposes. The State assumes the full risk of all claims filed for workers' compensation.

Claims liabilities are actuarially determined based on estimates of the ultimate cost of claims, including future claim adjustment expenses that have been incurred but not reported and claims reported but not settled. Because actual claims liabilities depend on such complex factors as inflation, changes in legal doctrines, and damage awards, the process used in computing claims liability does not necessarily result in an exact amount. Claims liabilities are re-evaluated periodically to take into consideration recently settled claims, the frequency of claims, and other economic and social factors.

The balance of claims liabilities as of June 30, 2022 and 2021:

Workers' Compensation Fund
Changes in Claims Payable
 (Expressed in Thousands)

	2022	2021
Liability at Beginning of Year	\$ 51,161	\$ 47,431
Current Year Claims and Changes in		
Estimates	12,285	13,509
Claims Payments	7,966	9,779
Liability at End of Year	\$ 55,480	\$ 51,161

Based on the actuarial calculation as of June 30, 2022, the State is liable for unfunded claims, and incurred but not reported claims, of approximately \$75.0 million. The discounted amount is \$55.5 million and was calculated based on a 3.0 percent interest rate on investments.

D. EMPLOYEE HEALTH INSURANCE

The employee health and retiree health insurance programs are accounted for in two Internal Service Funds. The State became self-insured for employee and retiree health care coverage on July 1, 2003. A stop loss agreement provides catastrophic coverage for individual claims exceeding \$750 thousand.

The State retained third-party administration (TPA) and pharmacy benefit management (PBM) services for claims administration, utilization review, case management services, and pharmacy fulfillment. Premium equivalents are developed with the technical assistance of the plan's consulting actuary and paid by subscribers and associated State departments.

There are two primary health plans available. A Preferred Provider Organization (PPO) plan is available to all active employees, early retirees, and grandfathered retirees not eligible for Medicare Part A as of July 1, 2019. A Medicare Advantage plan is available to age sixty-five or older retirees. Total enrollment averaged approximately 35,200 covered individuals. This total includes approximately 25,700 active employees, retirees and their dependents in the PPO plan and 9,500 Medicare Advantage retirees and dependents.

The State maintains PPO plan funding through the accumulation of premiums from employee contract holders and from the departments with whom they are employed. Claims and administrative expense are paid through these accumulated premiums based on invoices remitted from the TPA.

Expenses and liabilities for incurred but not reported claims, based on an actuarial analysis of claim lag pattern, have been recorded as liabilities in the amount of \$14.2 million. Changes in the Employee Health Insurance and Retiree Health Insurance claims liability for the fiscal year ending June 30, 2022 follows:

(Expressed in Thousands)

	Employee Health Fund	Retiree Health Fund
Liability at Beginning of Year	\$ 13,200	\$ 4,400
Claims and Changes in Estimate	128,608	63,867
Claims Payments	131,123	64,706
Liability at End of Year	<u>\$ 10,685</u>	<u>\$ 3,561</u>

The table above reflects actual activity of the employee health and retiree health insurance programs. In accordance with GASB Statement No. 75, certain costs reported above were reclassified for financial statement purposes. Retiree healthcare costs of \$48.2 million were reclassified from the internal service fund to the OPEB Trust Fund, a fiduciary fund. Additionally, \$26.9 million of active employee healthcare costs were reclassified from the internal service fund to the OPEB Trust Fund to reflect age-adjusted claims.

NOTE 14 - JOINT VENTURES

Joint ventures are independently constituted entities generally created by two or more governments for a specific purpose. The State of Maine participates in two separate joint venture arrangements: the Tri-State Lotto Commission (Commission) and the Multi-State Lottery Association (MUSL).

TRI-STATE LOTTO COMMISSION

The Commission was established in 1985 pursuant to passage into law of the Tri-State Lotto Compact by the States of Maine, New Hampshire, and Vermont. The Commission is authorized and empowered to promulgate rules and regulations regarding the conduct of lottery games, including ticket prices, prizes, and the licensing of agents under Title 8 MRSA C. 16.

The Commission is composed of one member from each of the participating states. Each member State's commission appoints one of its members to serve on the Commission and each member holds office at the pleasure of his or her appointing authority. The Commission annually elects a chairman from among its members. The Commission designated that 50 percent of its sales revenue be reserved for prize awards and agent bonuses.

A prize award liability is established when the winning ticket number is selected. If no winning ticket is selected, the available jackpot is carried over to the following drawing. The Tri-State Lotto Compact requires that prizes not claimed within one year from the date of the drawing be forfeited. All expired unclaimed prizes are credited to future prize pools. The Commission funds its jackpots through U.S. Government Treasury Strips.

A proportional share of revenues and expenses are allocated to each State based on ticket sales made by each State. Exceptions are the facility's management fee, which is based on a contracted percentage of operating revenue that varies from State to State, per diem charges, advertising, and certain printing, travel, and miscellaneous costs, which are allocated based on actual charges generated by each state.

The Tri-State Lotto Commission financial report for fiscal year 2022, which may be obtained from the Bureau of Alcoholic Beverages and Lottery Operations, 8 State House Station, Augusta, ME 04333-0008, includes the following selected financial information:

Change in Net Position	<u><u>\$ (2,004)</u></u>

Multi-State Lottery Association

The Maine State Lottery became a member of the Multi-State Lottery Association (MUSL) in July 2004. The MUSL currently has 38 member State lotteries, including the District of Columbia and the United States Virgin Islands. The MUSL is managed by a board of directors, which is comprised of the lottery directors or their designee from each of the party States, and authorized to initiate, promulgate, administer and carry out one or more lottery product offerings that will enhance the participating parties' lottery revenue.

Participating lotteries sell Powerball tickets, collect all revenues, and remit prize funds to the MUSL, net of lower tier prize awards. The operating costs of the board are divided equally among all of the participating lotteries. Jackpot prizes payable in installments are satisfied through investments purchased by the MUSL. The MUSL purchases US government obligations which are held in irrevocable trusts established by the MUSL for the benefit of participating State lotteries. Each week the MUSL allocates 50 percent of sales to the prize pool. If no winning ticket is selected, the available jackpot is carried over to the following jackpot drawing.

The table below was obtained from the Multi-State Lottery Association's draft financial report for fiscal year 2022. The final report, once received, will be available from the Bureau of Alcoholic Beverages and Lottery Operations, 8 State House Station, Augusta, ME 04333-0008.

NOTE 15 - RELATED PARTY TRANSACTIONS

PRIMARY GOVERNMENT

The State of Maine entered into a memorandum of understanding with the Wells National Estuarine Research Reserve Management Authority, a jointly governed organization, through the Bureau of Parks and Lands. These agreements outline each entity's responsibilities in relation to the operation of the Reserve and the management of the property included within the boundaries of the Reserve. The agreement continues in effect from year to year until termination by either the Bureau or the Authority pursuant to Articles 8 and 9.

Spurwink, a non-profit organization, received \$58 million in funding from Health and Human Services programs and \$2.6 million in funding from the Department of Education during fiscal year 2022. A member of the Maine Senate served on the board of directors during the fiscal year. This position receives no compensation.

Children's Center of Maine received \$2.8 million in funding from State of Maine, Department of Health and Human Services during fiscal year 2022. The spouse of an employee of the Department of Economic and Community Development served as the Director during the fiscal year. The Director's position is a full-time paid position.

The Maine Children's Trust received \$10.3 million in funding from various Health and Human Services programs during fiscal year 2022. The spouse of an employee of the Department of Economic and Community Development served on the Board of Directors during the fiscal year. The board member received no compensation.

Sweetser, a non-profit organization, received \$47.5 million in funding from Health and Human Services programs and \$1.3 million in funding from the Department of Education during fiscal year 2022. The spouse of an employee of the Department of Professional and Financial Regulation is a corporator for Sweetser.

Community Concepts received \$3.4 million in funding from the State of Maine, Department of Health and Human Services during fiscal year 2022. A member of the Legislature, an employee of Community Concepts Finance Corporation, oversees the organization's loan pools with funds lent by the Finance Authority of Maine (FAME) and housing counseling programs administered by the Maine State Housing Authority (MSHA) and the Bureau of Consumer Credit Protection. FAME and MSHA are component units of the State of Maine.

Waldo Community Action Partners received \$10.9 million in funding from the State of Maine during fiscal year 2022. A member of the Senate served as an uncompensated member on the Board of Directors of Waldo Community Action Partners.

Amistad, Inc., received \$1.1 million in payments from the State of Maine, Department of Health and Human Services during fiscal year 2022. A member of the Senate served as an uncompensated member on the Board of Directors of Amistad, Inc.

All Med Staffing of New England received \$996 thousand in payments from the State of Maine, Department of Health and Human Services during fiscal year 2022. A member of the Senate maintained a 50% ownership interest in the company.

The Maine Technology Institute (MTI) received \$12 million in funding from the Department of Economic and Community Development during fiscal year 2022. The Director of MTI is an employee of the State of Maine. One board member is a Commissioner of the State of Maine. One board member is a Deputy Commissioner of the State of Maine. The Board members receive no compensation.

COMPONENT UNITS

The State provided appropriations and grant monies to the following discretely presented component units: University of Maine System, \$284.8 million; Maine Community College System, \$86.8 million; Maine Municipal Bond Bank (MMBB), \$41.7 million; Finance Authority of Maine, \$31.0 million; and Maine State Housing Authority, \$322.3 million.

FAME administers several revolving loan funds on behalf of the State of Maine. FAME recorded these funds, which total \$26.9 million at June 30, 2022, as a liability in Amounts Held Under State Revolving Loan Programs in their fiduciary financial statements. The state reports the asset as a receivable in the Special Revenue Fund. During fiscal year 2022, the State expended \$1.0 million to FAME for State revolving loan funds.

Title 20-A MRSA Chapter 419-A established the Maine State Grant Program as a fund under the jurisdiction of the Finance Authority of Maine. All grant revenues under this fund must be distributed by FAME to students who meet the eligibility requirements for a grant under this chapter. FAME paid approximately \$26.3 million in grants to the University of Maine System (UMS) on behalf of eligible students. The UMS reflected these as grant revenues from the State.

The Maine Turnpike Authority (MTA) pays the State for services rendered by the Maine State Police (MSP). MSP has a separate troop responsible for patrolling the Maine Turnpike. MTA pays all costs associated with that troop. For fiscal year 2022, the amount billed totaled \$8.9 million.

NOTE 16 - DEFERRED OUTFLOWS AND DEFERRED INFLOWS

The following table provides additional detail regarding deferred outflows of resources and deferred inflows of resources reported on the government-wide Statement of Net Position:

(Expressed in Thousands)

	Primary Government			Component Units
	Governmental Activities	Business-Type Activities	Totals	
Deferred Outflows of Resources:

Tax Revenue or Assessments	\$ 337,133	\$ 362	\$ 46,608	\$ 3,030	\$ -	\$ 387,133
Settlements **	-	-	-	90,634	-	90,634
Total Deferred Inflows of Resources	<u>\$ 337,133</u>	<u>\$ 362</u>	<u>\$ 46,608</u>	<u>\$ 93,664</u>	<u>\$ -</u>	<u>\$ 477,767</u>

** Please refer back to Note 6 and Note 18 for information on the Opioid settlement and the Tobacco settlement, respectively

NOTE 17 - TAX ABATEMENTS

For financial reporting purposes, a tax abatement is defined as an agreement between the government and an individual or entity through which the government promises to forgo tax revenues and the individual or entity promises to subsequently take a specific action that contributes to the economic development or otherwise benefits the government or its citizens.

As of June 30, 2022, the State provided tax abatements through the following programs:

<u>Program Name</u>	<u>Pine Tree Development Zone Tax Credit</u>	<u>Employment Tax Increment Financing</u>	<u>New Markets Capital Investment Tax Credit</u>
Program Purpose	The program encourages capital investment and job creation in designated industries and geographic areas within the state.	The program is designed to create and prevent loss of employment in designated industries and geographic areas within the state.	The program is designed to encourage investment in qualified businesses located in economically distressed areas within the state.
Tax Types Abated	Personal income, corporate income, insurance premiums, bank franchise and sales taxes.	State income tax withholding from employee salary.	Personal income, corporate income, insurance premiums, and bank franchise taxes.
Statutory Authority	36 M.R.S. §5219-W	36 M.R.S. §6754	36 M.R.S. §5219-HH
Eligibility Criteria	Businesses apply to be certified as a qualified business, agree to conduct a qualified business activity, and hire at least one net new employee within two years.	Businesses apply for certification and agree to hire at least five net new employees within two years.	A person must make a qualified equity investment that has been certified by the Finance Authority of Maine, and execute a memorandum of agreement with the state.
Abatement Method	Allowance of credit against taxes attributable to qualified business activity, up to the amount of tax liability (nonrefundable credit).	Qualified business applies for annual reimbursement payment independent of any other tax reporting requirements.	Allowance of credit against taxes. Taxpayer receives full amount of annual credit regardless of tax liability (refundable credit).
Abatement Computation	Credit equals 100 percent of the tax liability attributable to the qualified activity of a certified business for a period of five years. Businesses located in certain areas receive a 50 percent credit for an additional five years.	Reimbursement equals 30 - 80 percent of qualified state-withheld taxes, depending on the unemployment rate in the area where the employee works, for a period of ten years.	The credit amount equals a total of 39 percent of the qualified investment, spread over a period of seven years in varying amounts each year.
Recapture Provisions	None.	Any overpayment must be applied to reduce future reimbursement payments. Overpayments must be repaid if the business no longer qualifies for future payments.	The abatement amount may be recaptured upon 1) recapture of any amount of the related federal NMTC credits; 2) early repayment of any portion of the principle amount that forms the qualified equity investment, or 3) failure to reinvest less than 85% of the qualified equity investment into a qualified business.
Estimated Revenue Reduction for FYE 6/30/2022	\$5,601,779	\$9,685,148	\$4,439,785

Note: An estimate of PTDZ sales tax exemptions claimed at the point of purchase cannot be determined.

Source: Maine Revenue Services

NOTE 18 - COMMITMENTS AND CONTINGENCIES**PRIMARY GOVERNMENT****LITIGATION**

The State of Maine, its units, and its employees are parties to numerous legal proceedings, many of which are the result of normal governmental operations. In the opinion of the Attorney General and other legal counsel representing the State, in all of the cases listed, the State or its agencies or employees have valid defenses. Certain cases have the potential for liability in excess of \$1 million. Even if liability is found, the State should not expect to pay out the full amounts being sought against it in all of the cases. In any given case, however, the State could incur a large judgment.

Bryan C. v. Lambrew, et al. Plaintiffs are six foster children in the Department of Health & Human Services (DHHS) custody and their guardians ad litem. They make various allegations regarding the administration of psychotropic drugs to these six foster children and a putative class of all other foster children in DHHS's custody, including overmedication, a lack of informed consent, inadequate record-keeping and an inadequate secondary review process. Plaintiffs are seeking declaratory and injunctive relief. Plaintiffs are not seeking monetary damages but, if they prevail, they could be awarded attorneys' fees in excess of \$1 million. The probability that this case will result in future losses to the State in excess of \$1 million is undetermined at this time.

Carson, et al. v. Makin. Three families filed a lawsuit against the Commissioner of the Maine Department of Education alleging that a state program that pays tuition for certain children who attend private schools violates the First Amendment and the Equal Protection Clause because sectarian schools are excluded from the program. The case was argued at the United States Supreme Court on December 8, 2021. On June 21, 2022, the Supreme Court issued a decision holding that the exclusion of sectarian schools violates the First Amendment's Free Exercise Clause. Although no monetary damages are sought, the plaintiffs, as prevailing parties, may be entitled to attorneys' fees. Because of the duration of this litigation, such fees could be significant. The probability that this case will result in future losses to the State in excess of \$1 million is undetermined at this time.

Deferral of Federal Financial Participation. On December 28, 2020, the Centers for Medicare and Medicaid Services (CMS) issued a deferral notice to Maine DHHS for approximately \$4.2 million in federal financial participation (FFP) for Medicaid expenditures for the third quarter of 2020 (7/1-9/30/2020). CMS issued six additional deferrals, totaling approximately \$24.3 million, for FFP for Medicaid expenditures during the fourth quarter of 2020, all four quarters of 2021, and the first quarter of 2022 (10/1/2020-3/31/2022). The basis for the deferral is CMS's contention that a service provider tax imposed on, among others, Private Non-Medical Institutions (36 M.R.S. §2552) is an impermissible source of non-federal share. In September 2022, CMS advised DHHS that rather than issuing deferrals for subsequent quarters, it will begin issuing disallowances. To date, CMS has not issued such disallowances. DHHS intends to appeal the deferrals, and the probability that the case will result in future losses to the State in excess of \$1 million is undetermined at this time.

Deferral of Federal Financial Participation. On September 26, 2022, the Centers for Medicare and Medicaid Services (CMS) issued a deferral notice to Maine DHHS for approximately \$2.4M in federal financial participation (FFP) for Medicaid expenditures for the second quarter of 2022 (4/1 – 6/30/2022). CMS alleges that DHHS violated the Medicaid requirements for adjustments to claims that were greater than two years old, and DHHS did not meet any exceptions set forth in 45 CFR 95.19. This deferral involves disproportionate share (DSH) payments to state psychiatric hospitals. DHHS is preparing to respond to this deferral. We anticipate that CMS will issue additional deferrals on the same basis for future quarters. The extended deadline for response is Jan. 24, 2023. The probability that this case will result in future losses to the State in excess of \$1 million is undetermined at this time.

Dr. Doe v. Maine Board of Dental Practice, et al. Dr. Doe has filed a lawsuit against the Maine Board of Dental Practice and 11 individuals in connection with the Board's emergency suspension of his license to practice medicine and subsequent disciplinary proceedings. Dr. Doe alleges that agents and employees of the Board violated his due process rights. The probability that this case will result in future losses to the State in excess of \$1 million is undetermined at this time.

Mascal v. DOC, et al: Alexander Mascal alleges that while he was housed at Long Creek Youth Development Center and Mountain View Youth Development Center from 2012 to 2016, he was subject to excessive use of isolation, excessive use of force and restraint, sexual assault, and other violations of his statutory and constitutional rights. The probability that this case will result in future losses to the State in excess of \$1 million is undetermined at this time.

Westcott v. DOC, et al. Michael Westcott alleges that while he was housed at Long Creek Youth Development Center (then called Maine Youth Center), between 1995 and 2001, he was sexually assaulted by multiple unnamed staff members during unclothed body searches and that he was subject to unconstitutional restraint, force, isolation and other abuses. The probability that this case will result in future losses to the State in excess of \$1 million is undetermined at this time.

The Office of the Attorney General is representing Maine Revenue Services (MRS) in a number of cases in which taxpayers are challenging the assessment of taxes. In most of these cases, the taxpayers are not seeking refunds of taxes previously paid, but are

instead challenging taxes that were assessed but which the taxpayers have not paid. In some cases, the assessment at issue exceeds \$1 million. The cases listed below are the only ones we are aware of in which taxpayers are seeking refunds that could exceed \$1 million.

Express Scripts, Inc. v. State Tax Assessor. Taxpayers are challenging the method by which they are required to apportion certain sales to Maine under the Maine Corporate Income Tax. If the taxpayers prevail, they may be entitled to a refund of approximately \$1 million from the State. The probability that this case will result in future losses to the State in excess of \$1 million is undetermined at this time.

NextEra Energy Maine, LLC v. Maine Revenue Services. NextEra has appealed to the Maine Board of Tax Appeals two MRS decisions denying corporate tax refunds totaling \$4.6 million for tax years 2013, 2014 and 2015. NextEra claims that a Florida affiliate was not part of its unitary business and that the affiliate's income should not have been included in NextEra's apportionable Maine income. The probability that this case will result in future losses to the State in excess of \$1 million is undetermined at this time.

The Hershey Company et al. v. State Tax Assessor. Hershey has filed a Petition for Review against the State Tax Assessor challenging the denial of a refund of all corporate taxes paid between 2014 and 2017, which totaled in excess of \$2.8 million. Hershey claims that under federal law, its limited activities in Maine, during the years at issue, protect it from state corporate income taxes. The probability that this case will result in future losses to the State in excess of \$1 million is undetermined at this time.

There are various lawsuits in which plaintiffs seek damages in excess of \$1 million against the State or against State officials, and there are various notices of claim which also specify damages in excess of \$1 million where no lawsuit has been filed. In none of these instances, in the view of the Attorney General, is there any reasonable possibility that the State's liability could reach or exceed \$1 million. Therefore, these suits have not been individually identified.

There are also, now pending, numerous workers' compensation claims against various State agencies. Since most claims involve the possibility for significant long-term damages, and since the test for demonstrating a causal relationship between the employment and the illness or injury is not as rigorous as in ordinary civil cases, these cases involve the possibility of significant liability for the State. Since possible damages include future medical costs and wage replacements for the employee (and in some cases spouse), it is difficult to estimate the total potential liability to the State.

All other legal proceedings are not, in the opinion of management after consultation with the Attorney General, likely to have a material adverse effect on the financial position of the State.

ENCUMBRANCES

Encumbrances are reported in the restricted, committed, and assigned fund balances of the governmental funds. General fund, highway fund, federal fund, other special revenue fund and other governmental funds encumbrance balances are \$96.8 million, \$4.3 million, \$985.0 million, \$64.8 million and \$10.5 million, respectively.

FEDERAL GRANTS

The State receives significant financial assistance from the federal government. The receipt of grants is generally dependent upon compliance with terms and conditions of the grant agreements and applicable federal regulations, including the expenditure of resources for allowable purposes. Grants are subject to the Federal Single Audit Act. Disallowances by federal officials as a result of these audits may become liabilities of the State. The amount of expenditures that may be disallowed by the grantor agencies cannot be determined at this time.

POLLUTION REMEDIATION

The Department of Environmental Protection (DEP) and Department of Transportation (DOT) have pollution remediation obligations as defined by Governmental Accounting Standards Board (GASB) Statement No. 49. The State's total amount of pollution remediation obligation as of June 30, 2022 is \$20.6 million. Superfund sites account for approximately \$7.1 million. Superfund is the federal government program to clean up hazardous waste sites.

The following are Superfund sites for which the State has recorded a liability for pollution remediation activities:

Eastland Woolen Mill – The State recorded a liability for pollution remediation activities of approximately \$611 thousand. Currently the State shares the costs with Environmental Protection Agency (EPA) in a cost-sharing ratio of 10 percent State, 90 percent EPA. Beginning in September of 2018, the State assumed 100 percent of the operation and maintenance and long-term monitoring costs.

Eastern Surplus – The State recorded a liability for pollution remediation activities of approximately \$2.0 million. Beginning in August of 2012, the State assumed 100 percent of the operation, maintenance and monitoring costs. As of June 30, 2022, the State has received \$2.1 million in recoveries from the Department of Defense. The State expects to recover additional costs of \$14 thousand.

Callahan Mine – The State recorded a liability for pollution remediation activities of approximately \$4.5 million. Currently the State shares the costs with EPA in a cost-sharing ratio of 10 percent State, 90 percent EPA. The State will assume 100 percent of the cost for the operation and maintenance of the site.

The State recorded a liability for pollution remediation activities of approximately \$13.2 million (net of unrealized recoveries of \$298

thousand) related to five uncontrolled hazardous substance sites. The State expects to recover \$268 thousand in costs. The Uncontrolled Hazardous Substance Sites Program was created in response to the threats and potential threats to human health and the environment posed primarily by abandoned hazardous waste sites. The Uncontrolled Hazardous Substance Sites program is the State's equivalent to the Federal Superfund Program.

The State has the knowledge and expertise to estimate the remediation obligation based on prior experience in identifying and funding similar remediation activities. The standard requires the liability to be measured using the expected cash flow technique. The remediation obligation estimates are subject to change over time. Cost may vary due to price fluctuations, changes in technology, changes in potential responsible parties, results of environmental studies, changes to statutes or regulations and other factors that could result in revisions to these estimates. Prospective recoveries from responsible parties may reduce the State's obligation.

MUNICIPAL SOLID WASTE LANDFILLS

Dolby Landfills – On September 16, 2011 the State entered into an agreement with Katahdin Paper Company (KPC) to acquire the Dolby Landfill, a solid waste disposal facility, located in the Town of East Millinocket. The State, as a holder of the permits, is responsible for closure and post closure monitoring and maintenance activities and costs.

The Dolby Landfill no longer accepts solid waste. In Calendar Year 2016, the first phase of a multi-year plan to cap approximately 100 acres at the facility was completed. The State originally allocated \$6 million of bond funds to pay for the first phase of capping. In fiscal year 2022, the State issued an additional \$7 million in bonds to complete the capping of the landfill. In addition to the closure of the facility, the State anticipates additional post-closure maintenance and monitoring costs of approximately \$20 million over the next 30 years based on current annual expense. However, the State anticipates a significant reduction in post closure costs due to the reduction in the amount of the leachate from the site that must be treated after the capping is complete. The State has entered into a cost sharing agreement with the Town of E. Millinocket to treat the leachate at the town's wastewater treatment facility. The State will likely renegotiate the cost sharing agreement once the amount leachate, subsequent to the completion of the capping can be determined or estimated. The State's total obligation related to the Dolby Landfill as of June 30, 2022 is \$27.1 million.

Title 38 M.R.S.A., §1310-F establishes within the Department of Environmental Protection (DEP) a cost-sharing program for the closure and remediation of municipal solid waste landfills that pose a potential hazard and that meet other qualifying criteria. The law provides for reimbursement of 75% of a municipality's closure expenses. If initial closure of a landfill fails to protect public health and the environment, DEP is obligated to reimburse up to 90% of a municipality's subsequent remediation expenses. However, these obligations are subject to the availability of funds approved for that purpose. In 2012, DEP through bonds had paid all of the outstanding match requirements for closure, but had \$2.6 million in outstanding match obligation for remediation. Additionally, several Municipalities needed to close their failing landfills early, but could not afford to do so without the state match for closure, which had expired. To address this, in 2013 the legislature enacted a fee on disposal of certain Construction and Demolition Debris (CDD), and in 2015 extended the eligibility date for reimbursement of closure costs from 2015 to 2025. There is no eligibility end date for reimbursement of remediation costs. Therefore, DEP continues to incur new match cost obligations as additional qualifying landfills close before the 2025 date, and as others undertake necessary remediation actions. As the CDD fee does not generate enough funding to pay the Department's cost share obligations in their entirety, the Department provides partial payments to municipalities on a quarterly basis.

In FY22 the DEP received \$1.2 million from the CDD fee. As required, the entirety of this fee was used to reimburse municipalities for eligible expenses. At the beginning of FY22, DEP's total outstanding reimbursement obligation to municipalities was \$2.2 million. At the end of FY22, the outstanding match obligation was \$1.1 million. Although the overall outstanding debt during the year decreased, additional debt was incurred due to qualifying closure and remediation expenses which were submitted by municipalities over the course of the year. DEP incurred the oldest outstanding match obligations in 2008.

SAND AND SALT STORAGE PROGRAM

The State estimates the potential aggregate cost to comply with the environmental requirements associated with the Sand and Salt Storage program to be \$800,000 thousand. The state no longer provides funding for municipal facilities.

POLLUTION ABATEMENT PROGRAM

Title 38 MRSA §411, §411-A, and §412 establish within DEP cost-sharing programs for pollution abatement projects. Subject to funding by the Legislature and the approval of the Commissioner, the State may contribute to the planning of municipal pollution abatement facilities; the design, engineering, and construction of private, commercial, and municipal pollution abatement facilities; and make payments to the Maine Municipal Bond Bank to supply the State's share of the revolving loan fund established by Title 30A §6006-A. During the 2022 fiscal year, \$5.17 million of general obligation bond funds and \$3.17 million of Liquor Operation Revenue Funds were expended for pollution abatement projects. As of June 30, 2022, amounts encumbered for pollution abatement projects totaled \$7.47 million, and general obligation bonds authorized for these projects, but not yet encumbered, totaled \$10.92 million. As of June 30, 2022, DEP estimates the total cost (federal, State, and local) of future projects to be \$1 billion.

GROUND WATER OIL CLEAN-UP FUND

The Maine Ground and Surface Waters Clean-up and Response Fund is established in Title 38 MRSA § 551. Fund activities include, but are not limited to, providing insurance to public and private entities for cleanup of oil spills. The program is funded by a per barrel

assessment on petroleum products imported into the State. Coverage is up to \$750 thousand per occurrence for aboveground storage tanks and \$1 million per occurrence for underground storage tanks. Third party injury coverage may not exceed \$200 thousand per claimant.

**Number of Priority Sites
Requiring Long-term Remediation
Calendar Year Ended December 31**

	<u>Completed</u>	<u>Remaining</u>
2021	127	440
2020	156	494
2019	137	530
2018	91	540
2017	117	519

The annual average cost per spill over the past five years is \$9,150. The cost per spill can vary significantly based on the location and type of fuel discharged.

CONSTRUCTION COMMITMENTS

A portion of the payment that is made to municipalities for General Purpose Aid to Local Schools is allocated for debt service. Although the outstanding indebtedness for school construction projects is debt of the municipalities, the State subsidizes 55.07 percent of the annual payments. As of June 30, 2022, outstanding commitments by municipalities for school bond issues that are eligible for State subsidy totaled \$1.039 billion.

At June 30, 2022, the Department of Transportation had contractual commitments of approximately \$475.0 million for construction of various highway projects. The State's share of that amount is expected to be approximately \$117.7 million. Of these amounts, \$10.0 million has already been accrued. Federal and State funds plus bond proceeds are expected to fund these future expenditures.

TOBACCO SETTLEMENTS

On November 23, 1998, Maine along with 45 other states and six civil jurisdictions, collectively known under the Master Settlement Agreement (MSA) as the "Settling States", entered into the MSA with certain Participating Tobacco Manufacturers (PMs). The MSA is a settlement of lawsuits brought by many States against the four largest tobacco companies alleging multiple counts of misconduct and claiming punitive and compensatory damages, including a claim for all the States' Medicaid costs caused by or related to tobacco use. The MSA includes provisions to annually compensate the State for smoking-related Medicaid costs and to impose marketing and advertising restrictions on PMs to protect public health. In this settlement, the PMs agreed, among other things, to make annual payments to the states and jurisdictions based on their allocable share of the market. In return, the states agreed to relinquish claims to further damages resulting from, among other things, Medicaid costs. Annual payments fluctuate subject to various adjustments and are partially contingent on the passage and enforcement of a State statute imposing economic conditions related to the State's public health claims on the Nonparticipating Manufacturers (NPMs) in the form of an annual escrow payment due from each NPM with in-state sales. The NPM Adjustment is set forth in the Master Settlement Agreement (MSA). If the PMs claim an NPM Adjustment for a given year and prove that they lost market share to the NPMs and it is determined that the MSA was a significant factor contributing to that lost market share then an NPM Adjustment 'shall apply' unless a Settling State passed a qualifying statute and 'diligently enforced' that statute. In effect this means that the Allocated Payment to a Settling State that diligently enforced will not be reduced, but a Settling State that did not diligently enforce its qualifying statute will be subject to a reduction in its payment due to the NPM Adjustment. NPM Adjustment Due to the provisions of the MSA, if a State that is found not to have diligently enforced its qualifying statute may lose up to its entire annual payment amount due to the NPM Adjustment for a given year.

The NPM Adjustment may be claimed each year and has been claimed for each completed calendar year since 2003. Frequently PMs claim entitlement to the NPM Adjustment and either withhold the amount from their annual payments, or place the amount in what is known as a 'disputed payment account'. Each year beginning in 2003 Maine's annual payments have been lower than calculated because many of the PMs have claimed entitlement to the NPM Adjustment and either withheld money or routed it to the disputed payments account. For the year 2003, the Adjustment claimed by the PMs, and calculated as set forth in the MSA, was approximately 18 percent of the total amount paid by the PM's and distributed among the Settling States. However, the total amount related to the NPM Adjustment to which the PMs are entitled is dependent on the number of non-diligent states.

In addition, in the MSA, the PMs agreed to pay \$8.6 billion in Strategic Contribution Payments (SCP) to certain states and jurisdictions as compensation for their contribution to the overall settlement. Maine's share of this total amount was approximately \$114 million. Maine received this amount in ten annual SCP payments which began in 2008 and ended in 2017.

In April 2022, Maine received an annual tobacco settlement payment of \$49.9 million.

CONTINGENT LIABILITIES

Overpayments made by the Office for Family Independence (OFI) client services are recorded as accounts receivable in the State financial statements. The total overpayments for Temporary Assistance for Needy Families (TANF) and Supplemental Nutrition Assistance Program (SNAP), applicable to federal funds, are \$25.6 million as of June 30, 2022. All overpayments that are outstanding for more than one year, \$21.1 million, are fully reserved.

Federal regulations in the former Aid to Families with Dependent Children (AFDC) require States to continue collection efforts until the full amount is recovered. The AFDC Program was repealed and replaced with the TANF Program effective October 1, 1996. The federal portion of any AFDC overpayments (made prior to October 1, 1996) that are recovered, must be returned to the federal government. For AFDC and TANF overpayment recoveries, made from October 1, 1996 and forward, States are not required to repay any portion to the federal government. Instead, the full amount of the recovered overpayments is to be retained by the State and used for TANF program costs during the grant year in which they are recovered, or later.

The liability for TANF and SNAP overpayments that may be recovered and remitted to the federal government or retained for program costs cannot be determined at this time.

Overpayments made by the Department of Labor are recorded as accounts receivable in the State financial statements. The total overpayments for Unemployment Benefits applicable to federal funds, are \$56.4 million as of June 30, 2022. All overpayments that are outstanding for more than one year, \$9.8 million, are fully reserved. The liability for Unemployment Benefit overpayments that may be recovered and remitted to the Unemployment Insurance Trust Fund cannot be determined at this time..

ESCHEAT PROPERTY

The State Abandoned Property Statute requires the deposit of certain defined and unclaimed assets into a state-managed Abandoned Property Fund (Private Purpose Trust Fund). The State Statute provides that whenever the cash balance of the fund exceeds \$.5 million at fiscal year-end, the excess must be remitted to the General Fund where it is reported as operating transfers from other funds. At June 30, 2022, the Fund included \$3.3 million of securities not yet liquidated that were not subject to transfer to the General Fund. Net collections from inception (1979) to June 30, 2022 of approximately \$291.3 million represent a contingent liability to the State since claims for refund may be filed by the owners of such property.

A liability representing the probable amount of escheat property that will be reclaimed and paid to claimants and other third parties is reported in the Fund. To the extent that the assets in the Fund are less than the claimant liability, a receivable (due from other funds) is reported in that Fund and an equal liability (due to other funds) is reported in the General Fund. At June 30, 2022, the amount reported in the Fund for claimant liability is \$68.8 million. The General Fund shows a \$65.0 million payable to the Escheat Fund.

CONSTITUTIONAL OBLIGATIONS

The State of Maine's constitutional obligations represent nonexchange financial guarantees, as defined by GASB Statement No. 70, *Accounting and Financial Reporting for Nonexchange Financial Guarantees*. The State acts as the guarantor for these ongoing insurance and loan programs operated by 2 discrete component units. The Finance Authority of Maine's mission covers commercial financing and loan insurance to Maine businesses and assistance to Maine students and their parents to finance costs of attendance at institutions of higher education. Maine State Housing Authority's mission encompasses loans to Maine veterans and members of Indian tribes or reservations. Details of the nonexchange financial guarantees are provided below.

Article 9, § 14-A, C, and D of the Maine State Constitution provides that the State may insure the payment of mortgage loans for industrial, manufacturing, fishing, agricultural and recreational enterprises; mortgage loans for the acquisition, construction, repair and remodeling of houses owned or to be owned by members of two tribes on several Indian reservations; and mortgage loans to resident Maine veterans of the Armed Forces of the United States, including loans to a business organization owned in whole or in part by resident Maine veterans. The aggregate of these obligations, at any one time, may not exceed \$90 million, \$1 million, and \$4 million, respectively. At June 30, 2022, loans outstanding pursuant to these authorizations are \$87.0 million, \$0 and less than \$0.1 million, respectively. The State has not paid, nor does it expect to pay, any amounts as a result of these authorizations as of June 30, 2022.

Article 8, § 2, of the Maine State Constitution provides that the State may secure funds, through the issuance of bonds authorized by the Governor, for loans to Maine students attending institutions of higher education. The amount of bonds issued and outstanding shall not at any one time exceed \$4 million in the aggregate. At June 30, 2022, no bonds were outstanding. The State has not paid, nor does it expect to pay, any amount as a result of this authorization as of June 30, 2022.

MORAL OBLIGATIONS

The State of Maine, through statute, enables certain Authorities to establish capital reserve funds. These funds may be used to secure a variety of financial undertakings including the issuance of bonds. The minimum amount of the capital reserve fund may be determined

by statute or set by the Authority. The statutes may also limit the amount of debt that may be secured by the capital reserve funds, and allow the Authority to issue debt that is not secured by these funds.

On or before December first of each year, the Authorities are required to certify to the Governor the amount, if any, necessary to restore any capital reserve fund to its required minimum. If there is a shortfall, the Governor is required to pay first from the "Contingent Account" the amounts necessary for restoration. The Governor shall certify any remaining unpaid amounts to the Legislature, which is then required to appropriate and pay the remaining amounts to the Authority during the then-current State fiscal year.

These moral obligations are not considered to be "full faith and credit" obligations of the State, and voter approval of the underlying bonds is not required. No capital reserve fund restorations have been made in the current or previous years.

The following summarizes information regarding outstanding moral obligations:

Moral Obligation Bonds
(Expressed in Thousands)

<u>Issuer</u>	<u>Bonds Outstanding</u>	<u>Required Debt Reserve</u>	<u>Obligation Debt Limit ¹</u>	<u>Legal Citation</u>

¹ NIL indicates a "no limit" obligation.

COMPONENT UNITS

CONSTRUCTION CONTRACTS

At June 30, 2022, UMS and MCCA had outstanding commitments on uncompleted construction contracts. They totaled \$69.2 million and \$3.3 million, respectively. A non-major discretely reported component unit, Maine Maritime Academy, had commitments on construction projects at June 30, 2022 totaling \$66.8 million.

At December 31, 2021, the Maine Turnpike Authority had \$77.7 million remaining in commitments on outstanding construction projects for improvements and maintenance.

MORTGAGE COMMITMENTS

Mortgage commitments are agreements to lend provided there is no violation of any term or condition of the agreement. Generally, once exercised, the loans made under the terms of such commitments are secured by a lien on the related property and other collateral as deemed necessary. At December 31, 2021 Maine State Housing Authority (MSHA) had outstanding commitments to originate multi-family loans of approximately \$241.3 million.

MSHA, under its single-family program, enters into purchase agreements to lenders to purchase mortgage loans. At December 31, 2021, single-family loans being processed by lenders totaled \$33.5 million.

INSURED LOAN COMMITMENTS

The Finance Authority of Maine (FAME) insures loans made by financial institutions to qualifying businesses under various insurance programs. FAME is contingently liable for the insured portion of payments due on these loans. At June 30, 2022, FAME had insurance outstanding for commercial loans under the Loan Insurance Program totaling approximately \$126.5 million. At June 30, 2022, FAME was insuring loans with an aggregate outstanding principle balance approximating \$752 thousand which were 90 or more days delinquent. The aggregate insured balance of these loans was approximately \$443 thousand at June 30, 2022. In addition, FAME has entered into commitments to insure loans at some future date. At June 30, 2022, these commitments under the Loan Insurance Program were approximately \$14.3 million. FAME provides loan insurance on direct educational loans and consolidation loans made by participating financial institutions in the Maine Private Education Loan Network. At June 30, 2022, approximately \$20.4 million of loans were insured under this program. Such loans are unsecured.

NOTE 19 - SUBSEQUENT EVENTS**PRIMARY GOVERNMENT**

On July 14, 2022, the State issued \$85.5 million in General Obligation Bonds, of which \$66.9 million was tax exempt and \$18.6 million was taxable. The bonds bear interest rates from 3.75 percent to 5.00 percent and maturities from 2023 to 2032.

On August 15, 2022, the State issued \$3.0 million of certificates of participation (COP's) for the purpose of financing the modernization of the Division of Liquor Licensing and Enforcement's liquor licensing, enforcement and excise tax collection system. The COP's carry interest rates of 3.26 percent and maturities from 2023 to 2029.

On August 26, 2022, the State issued \$7.5 million of certificates of participation (COP's) for the purpose of financing an estimated 275 motor vehicle purchases for the Department of Administrative Services, Central Fleet Management division. The COP's carry interest rates of 2.92 percent and maturities from 2023 to 2029.

On November 10, 2022, the Maine Municipal Bond Bank (MMBB) issued \$47.2 million of Series 2022A Grant Anticipation Bonds on behalf of the Maine Department of Transportation. The bonds bear an interest rate of 5.00 percent and have maturities from 2024 to 2035.

COMPONENT UNITS

Maine State Housing Authority (MSHA), has a December 31 fiscal year end. During calendar year 2022, MSHA issued at par \$393.3 million of bonds in the General Mortgage Purchase Bond Resolution. MSHA redeemed, at par, \$216.6 million of bonds in the General Mortgage Purchase Bond Resolution during calendar year 2022. MSHA redeemed \$3.4 million of bonds, in the Maine Energy, Housing & Economic Recovery Bond Resolution.

On July 20, 2022 the University of Maine System (UMS) issued \$120.3 million of Series A Revenue Bonds at a premium of \$12.0 million. The purpose was to currently refund a \$43.0 million bond anticipation note, and to provide \$86.4 million for new projects, \$2.2 million for capitalized interest and \$598 thousand for issuance costs. The bonds mature from 2023 to 2062 with annual principal payments from \$1.2 million to \$6.1 million and coupon interest rates from 5.0 percent to 5.5 percent.

On August 15, 2022, UMS, as a lessor, entered into an agreement with a lessee and a tenant called a public private partnership agreement. The \$28.0 million project includes renovations of two halls and the construction of a parking lot and new building adjacent to a hall for the creation of boutique hotels. The University is leasing the grounds and buildings for 99 years with an annual base rent of \$38 thousand per year.

On November 3, 2022, the Maine Municipal Bond Bank (MMBB) issued \$8.7 million of Series 2022 B General Resolution Bonds with interest rates ranging from 4.25% to 5.00% with principal payments beginning 2024, and maturing 2053.

On November 15, 2022, Maine Health and Higher Education Facilities Authority (MHHEFA) issued \$85.6 million of Series 2022 C Reserve Fund Resolution Bonds with an interest rate of 5.29% with principal payments beginning 2024, and maturing 2043.

Maine Turnpike Authority (MTA) has a December 31 fiscal year end, In December 2021, the MTA signed a forward delivery agreement to refund \$124.9 million of the Series 2012 outstanding bonds in April 2022. MTA will issue \$102.3 million of new bonds that defease \$124.9 million of outstanding bonds for a net present value savings of \$25.4 million.

BUDGETARY REPORTING

Fiscal Year Ended June 30, 2022

Statutory/Budgetary Presentation

In accordance with statute, the Governor presents a biennial budget for the General Fund and special revenue funds to the Legislature for enactment or revision. Effective November 27, 1995, a State Constitutional Amendment provided the Governor a “line item” veto of dollar amounts, allowing a dollar substitution for those amounts disapproved, as long as an appropriation or allocation is not increased (or a deappropriation or deallocation decreased) either in the specified line or in any other line in the legislative document. Another Constitutional Amendment requires the State to fund at least 90 percent of the annual cost of future mandates imposed on local governments; any exception requires a two-thirds vote of the elected members of the House and Senate.

Once passed and signed, the budget becomes the financial plan for the next biennium. It includes proposed expenditures for all departments and agencies, interest and debt redemption charges, and expenditures for capital projects to be undertaken and executed during each fiscal year. The budget also includes anticipated revenues and any other means of financing expenditures. The State Budget Officer is required to use the revenue projections of the Revenue Forecasting Committee in preparing the General Fund and Highway Fund budgets.

Exceptional circumstances do not apply to new programs or program expansions that go beyond existing program criteria and operation.

Detailed budgetary control is maintained at the program and line category level at which appropriations and allocations are approved by the Legislature, principally through a quarterly allotment system. The State Budget Officer and the Governor must approve budget revisions during the year, reflecting program changes or intradepartmental administrative transfers. Except in specific instances, only the Legislature may transfer appropriations between departments. Increases in appropriation, allocation, or funding for new programs are presented to the Legislature as a supplemental budget or separate pieces of legislation. For the year ended June 30, 2022, the legislature decreased appropriations to the General Fund by \$94.9 million.

Governmental funds use encumbrance accounting, under which purchase orders, contracts, and other commitments for the expenditure of funds are recorded to reserve a portion of the applicable appropriation or allocation. Unencumbered appropriations in the General Fund and Highway Fund lapse at June 30 unless, by law, they are carried forward to a subsequent year. For financial statement purposes, unless amounts would create deficits, fund balance is classified based on existing resources, if any, which will liquidate the encumbrances outstanding at June 30 (shown as restrictions, commitments or assignments of fund balance).

The State’s budget is prepared primarily on a cash basis. Sales, income, corporate and fuel taxes include a modified accrual basis adjustment to recognize revenues that are expected to be collected within 60 days of the end of the fiscal year. The Budgetary Comparison Schedule is presented as Required Supplementary Information (RSI) in this report. Actual amounts in this schedule are presented on a budgetary basis. Because this basis differs from accounting principles generally accepted in the United States of America (GAAP), a reconciliation between the budgetary and GAAP basis is presented in the RSI.

The various funds and programs within funds utilize a number of different budgetary control processes. Annual legislative appropriations and revenue estimates are provided for most “operating” funds.

The original executive budget and original legislative appropriations provide general purpose (unrestricted) revenue estimates in order to demonstrate compliance with constitutional provisions. Revenues restricted by law or outside grantors to a specific program are estimated at a level of detail consistent with controlling related expenditure accounts.

For programs financed from restricted revenues, spending authorization is generally contingent upon recognition of the related revenue. Reductions of spending authority occur if revenues fall short of estimates. If revenues exceed the estimate, supplemental appropriations are required before the additional resources can be spent.

The budgetary comparison schedule presented for the General Fund, the Highway Fund, the Federal Fund, and the Other Special Revenue Fund presents the original and final appropriated budgets for fiscal year 2022 - 2023, as well as the actual resource inflows, outflows and fund balances stated on the budgetary basis.

The original budget and related estimated revenues represent the spending authority enacted into law by the appropriation bills as of June 29 2021, and includes encumbrances carried forward from the prior year.

STATE OF MAINE
NOTES TO REQUIRED SUPPLEMENTARY INFORMATION
BUDGETARY REPORTING

Fiscal Year Ended June 30, 2022

Generally accepted accounting principles (GAAP) require that the final legal budget be reflected in the “final budget” column. Therefore, updated revenue estimates available for appropriations as of June 30, 2022 rather than the amounts shown in the original budget, are reported.

The final appropriations budget represents original and supplemental appropriations, carry-forwards, approved transfers, and executive order reductions. Expenditures, transfers out, other financing uses, and encumbrances are combined and classified by policy area rather than being reported by character and function as shown in the GAAP statements. This policy area classification is used to better reflect organizational responsibility and to be more consistent with the budget process.

Compliance at the Legal Level of Budgetary Control

The Budgetary Comparison Schedules by Agency depict budgeted to actual expenditures at the Department level, which is the legal level of budgetary control for all governmental funds. The schedules provide further detail at the agency level within departments for transparency.

STATE OF MAINE
SCHEDULE OF STATE CONTRIBUTIONS
SINGLE EMPLOYER DEFINED BENEFIT PENSION PLANS - EMPLOYER CONTRIBUTIONS (CONTINUED)

A complete description of the methods and assumptions used to determine contribution rates for the year ending June 30, 2022 can be found in the June 30, 2020 actuarial valuation report.

Notes to Schedule

Key Methods and Assumptions Used to Determine Contribution Rates

Valuation date	June 30, 2019
	June 30, 2022 actuarially determined contribution rates are calculated based on 2020 liabilities developed as a roll-forward of the 2019 actuarial valuation, adjusted for expected experience and any assumption or methodology changes during fiscal year end 2020 using assets as of June 30, 2020.
Actuarial cost method	Entry age normal
Asset valuation method	3-Year smoothed market
Amortization method	Level percent of payroll, open 10-year amortization
Discount rate	6.75%
Amortization growth rate	2.75%
Price inflation	2.75%
Salary increases	2.75%
Retirement age	Normal retirement age for State employees and teachers is age 60, 62 or 65. The normal retirement age is determined by whether a member had met certain creditable service requirements on specific dates, as established by statute.
Most recent review of plan experience	2020
Mortality	104 percent and 120 percent of the RP-2014 Total Dataset Healthy Annuitant Mortality Table, respectively, for males and females.

Former and future actuarial assumptions:

Discount rate and other information

Change in assumptions 2021: Demographic assumptions were changed based on recommendations from the July 1, 2015 to June 30, 2020 experience study as well as the actuarial audit completed of the June 30, 2020 actuarial valuation, first effective with the development of the NPL as of June 30, 2021. The annual rate of investment interest was also reduced from 6.75 percent to 6.50 percent effective as of this same date.

Discount rate

Change in assumptions 2018: The annual rate of investment return was reduced from 6.875 percent used at funding to 6.75 percent. The impact of this change is included in the TPL reconciliation as a change in assumptions.

Other information

Change in assumptions 2016: the amounts reported as changes of assumptions were due to assumptions that were updated based on the experience study covering the period from June 30, 2012 through June 30, 2015.

Benefit changes. By law, the COLA is based on the Consumer Price Index for Urban Consumers (CPI-U) as of June 30th applied to the statutory COLA base. If the percentage is negative, then no adjustment is made in that year. In subsequent years the adjustment that would have been made will be adjusted downward to the extent necessary to recoup the full actuarial value of not having made the previous year's negative adjustment. This process of adjustment may occur over a multi-year period if needed to recoup the full actuarial value of the negative CPI-U. Cost-of-living adjustments are effective September 1. Retirees are eligible to receive a cost-of-living adjustment after being retired for at least 12 months, except that retirees with less than 10 years of service on July 1, 1993 who retire prior to normal retirement age are not eligible to receive a cost-of-living adjustment until 12 months after reaching normal retirement age. The maximum annual limit is 3% of up to the first \$20,000 of annual benefit, indexed. This is a permanent increase in retiree's benefit. The \$20,000 COLA base is indexed each year going forward by the same percentage as the COLA that is paid.

Per GASB Statement No. 68, governments should present information for those years for which information is available. If information is not available, the government may implement them prospectively.

STATE OF MAINE
SCHEDULE OF STATE CONTRIBUTIONS
COST-SHARING MULTIPLE EMPLOYER DEFINED BENEFIT PENSION PLANS - EMPLOYER CONTRIBUTIONS
STATE EMPLOYEES AND TEACHERS PLAN - STATE EMPLOYEES ONLY (CONTINUED)

Notes to Schedule:

The SETP includes the State, 1 major component unit, 1 non-major component unit and 1 formerly reported component unit in its definition of state employees. Totals for the non-major and formerly reported component unit have been combined.

Valuation date	June 30, 2019
	June 30, 2022 actuarially determined contribution rates are calculated based on 2020 liabilities developed as a roll-forward of the 2019 valuation liability, adjusted for expected experience and any assumption or methodology changes during fiscal year end 2020 using actual assets at June 30, 2020.
Actuarial cost method	Entry age normal
Asset valuation method	3-Year smoothed market
Amortization method	Level Percentage of payroll, closed periods. Cumulative UAL amortized over a remaining 7 years from July 1, 2021. Subsequent layers of UAL are amortized over individual 20-year periods.
Discount rate	6.75%
Amortization growth rate	2.75%
Price inflation	2.75%
Salary increases	2.75% plus merit component based on employee's years of service.
Retirement age	Normal retirement age for State employees and teachers is age 60, 62 or 65. The normal retirement age is determined by whether a member had met certain creditable service requirements on specific dates, as established by statute.
Mortality	104 percent and 120 percent of the RP-2014 Total Dataset Healthy Annuitant Mortality Table, respectively, for males and females.

A complete description of the methods and assumptions used to determine contribution rates for the year ending June 30, 2022 can be found in the June 30, 2020 actuarial valuation report.

Former and future actuarial assumptions:

Discount rate and other assumptions

Change in assumptions 2021: Demographic assumptions were changed based on recommendations from the July 1, 2015 to June 30, 2020 experience study as well as the actuarial audit completed of the June 30, 2020 actuarial valuation, first effective with the development of the NPL as of June 30, 2021. The annual rate of investment interest was also reduced from 6.75 percent to 6.50 percent effective as of this same date.

Discount rate

Change in assumptions 2018: The annual rate of investment return was reduced from 6.875 percent used at funding to 6.75 percent. The impact of this change is included in the TPL reconciliation as a change in assumptions.

Other information

Change in assumptions 2016: the amounts reported as changes of assumptions were due to assumptions that were updated based on the experience study covering the period from June 30, 2012 through June 30, 2015.

Benefit changes. By law, the COLA is based on the Consumer Price Index for Urban Consumers (CPI-U) as of June 30th applied to the statutory COLA base. If the percentage is negative, then no adjustment is made in that year. In subsequent years the adjustment that would have been made will be adjusted downward to the extent necessary to recoup the full actuarial value of not having made the previous year's negative adjustment. This process of adjustment may occur over a multi-year period if needed to recoup the full actuarial value of the negative CPI-U. Cost-of-living adjustments are effective September 1. Retirees are eligible to receive a cost-of-living adjustment after being retired for at least 12 months, except that retirees with less than 10 years of service on July 1, 1993 who retire prior to normal retirement age are not eligible to receive a cost-of-living adjustment until 12 months after reaching normal retirement age. The maximum annual limit is 3% of up to the first \$20,000 of annual benefit, indexed. This is a permanent increase in retiree's benefit. The \$20,000 COLA base is indexed each year going forward by the same percentage as the COLA that is paid.

Per GASB Statement No. 68, governments should present information for those years for which information is available. If information is not available, the government may implement them prospectively.

Mortality	99 percent of the RP-2014 Total Dataset Healthy Annuitant Mortality Table for males and females.
 A complete description of the methods and assumptions used to determine contribution rates for the year ending June 30, 2022 can be found in the June 30, 2020 actuarial valuation report.	
Discount rate and other information	Change in assumptions 2021: Demographic assumptions were changed based on recommendations from the July 1, 2015 to June 30, 2020 experience study as well as the actuarial audit completed of the June 30, 2020 actuarial valuation, first effective with the development of the NPL as of June 30, 2021. The annual rate of investment interest was also reduced from 6.75 percent to 6.50 percent effective as of this same date.
Discount rate	Change in assumptions 2018: The annual rate of investment return was reduced from 6.875 percent used at funding to 6.75 percent. The impact of this change is included in the TPL reconciliation as a change in assumptions.
Other information	Change in assumptions 2016: the amounts reported as changes of assumptions were due to assumptions that were updated based on the experience study covering the period from June 30, 2012 through June 30, 2015.

Benefit changes. By law, the COLA is based on the Consumer Price Index for Urban Consumers (CPI-U) as of June 30th applied to the statutory COLA base. If the percentage is negative, then no adjustment is made in that year. In subsequent years the adjustment that would have been made will be adjusted downward to the extent necessary to recoup the full actuarial value of not having made the previous year's negative adjustment. This process of adjustment may occur over a multi-year period if needed to recoup the full actuarial value of the negative CPI-U. Cost-of-living adjustments are effective September 1. Retirees are eligible to receive a cost-of-living adjustment after being retired for at least 12 months, except that retirees with less than 10 years of service on July 1, 1993 who retire prior to normal retirement age are not eligible to receive a cost-of-living adjustment until 12 months after reaching normal retirement age. The maximum annual limit is 3% of up to the first \$20,000 of annual benefit, indexed. This is a permanent increase in retiree's benefit. The \$20,000 COLA base is indexed each year going forward by the same percentage as the COLA that is paid.

Per GASB Statement No. 68, governments should present information for those years for which information is available. If information is not available, the government may implement them prospectively.

Notes to Schedule:

Actuarial assumptions for both plans:

Costs are developed using the individual entry age normal cost method based on a level percentage of payroll. Price inflation is estimated at 2.75 percent and salary increases mirror that rate plus a merit component. Their investment advisor changes interest rates simultaneously. The investment rate of interest declined from 6.75 from 2018 to 2021 to 6.50 percent in the year ended June 30, 2022. Prior to 2021, valuations were based on the July 1, 2012 to June 30, 2015 experience study and the RP2014 Total Dataset Healthy Annuitant Mortality table. 2021 and demographic assumptions changed based on recommendations from the July 1, 2015 to June 30, 2020 experience study as well as the actuarial audit completed of the June 30, 2020 actuarial valuation. Mortality rates were revised using the 2010 Public Plan General Benefits-Weighted Healthy Retiree Mortality Table, for males and females, projected generationally using the RPEC_2020 model. The unfunded actuarial liability is being amortized as a level percentage of payroll over a 30-year period on a closed basis. The unfunded liability will be fully recognized by June 30, 2037.

State Health Insurance

The valuation date is June 30, 2022. The participation rate for future retirees is 95 percent of active participants currently enrolled. Experience losses (gains) are amortized over a 10-year fixed period. Assumption changes and plan changes are amortized over a period to June 30, 2037. The medical trend rate had been 6.80 at June 30, 2016. Every year thereafter through June 30, 2020, the medical trend rate dropped by .20. At June 30, 2021, the medical trend rate was 5.90. For June 30, 2022, the initial medical trend rate increased to 7.63 percent. The ultimate medical trend rate of 4.29 percent in prior years decreased to 4.19 percent at 2075. The State actively manages premium increases within the statutory cap, so healthcare cost increases are limited to no more than inflation plus 3 percent in any year. Beginning with this fiscal year, June 30, 2021, management adopted a change in methodology recommended by the actuary. The new methodology better estimates actual self-insured plan premiums covered by the State on behalf of participants (explicit subsidy). Total claims allocated to retirees represents the total benefit payment amount and the implied subsidy payments represent the difference.

Group Life Insurance

The valuation date is June 30, 2022. The ADC is calculated in advance of the completion of the prior biennial valuation and thus rolled forward from prior results. In this case, the ADC for 2022 is based on the June 30, 2018 valuation rolled forward and adjusted for changes in assumptions. The ADC for 2021 was based on the June 30, 2016 valuation rolled forward and adjusted for changes in assumptions. The participation rate for future retirees is 100 percent of those currently enrolled.

Per GASB Statement No. 74, governments should present information for those years for which information is available. If information is not available, the government may implement them prospectively.

Notes to Schedule:

Per GASB Statement No. 74, governments should present information for those years for which information is available. If information is not available, the government may implement them prospectively.

STATE OF MAINE
INFORMATION ABOUT INFRASTRUCTURE ASSETS REPORTING USING THE MODIFIED APPROACH

As allowed by GASB Statement No. 34, the State has adopted an alternative process for recording depreciation expense on selected infrastructure assets. Under this process, the State does not record depreciation expense nor are amounts capitalized in connection with improvements to those assets, unless the improvements expand the capacity or efficiency of an asset. Assets accounted for under the modified approach include 8,789 highway miles or 17,851 lane miles of roads and 3,019 bridges having a total deck area of 12.4 million square feet that the State is responsible to maintain.

In order to utilize the modified approach, the State is required to:

- Maintain an asset management system that includes an up-to-date inventory of eligible infrastructure.
- Perform condition assessments of eligible assets and summarize the results using a measurement scale.
- Estimate each year the annual amount to maintain and preserve the assets at the condition level established and disclosed by the State.
- Document that the assets are being preserved at, or above, the established condition level.

Roads and bridges maintained by the Department of Transportation are accounted for using the modified approach.

HIGHWAYS

Measurement Scale for Highways

The Maine Department of Transportation (MDOT) uses six indicators to determine the condition of highway adequacy. The six indicators and their relative point weighting are listed in the table below.

Data Element	Point Rating (%)	Description
Pavement Condition Rating (PCR)	45	PCR is defined as the composite condition of the pavement on a roadway only, and is compiled from the severity and extent of pavement distresses such as cracking, rutting and patching. It is the key indicator used to determine the optimum time to treat a particular section of road. Points decrease as PCR decreases
Safety	20	Statewide crash rates are used to allocate points. Locations with high rates get fewer points.
Backlog (Built vs. Unbuilt roadway)	15	A “Built” road is one that has been constructed to a modern standard, usually post 1950. This includes adequate drainage, base, and pavement to carry the traffic load, and adequate sight distance and width to meet current safety standards. “Unbuilt” (backlog) is defined as a roadway section that has not been built to modern standards. Yes or No (15 or 0).
Annual Average Daily Traffic divided by the hourly highway capacity (AADT/C)	10	This ratio measures how intensely a highway is utilized. As a highway facility’s AADT/C ratio increases, the average speed of vehicles on that facility tends to decrease. This decrease in average speed is evidence of reduced mobility. As congestion increases, points decrease (0-10).
Posted Speed	5	Lower speeds equal fewer points
Paved Shoulder	5	In general, roadways with paved shoulders perform at a higher level and last longer than those without shoulders or with only gravel shoulders. Yes or No (5 or 0).
<hr/> <hr/> 100 <hr/> <hr/>		

STATE OF MAINE
INFORMATION ABOUT INFRASTRUCTURE ASSETS REPORTING USING THE MODIFIED APPROACH

BRIDGES

MDOT uses four separate factors to obtain a numerical value used to indicate the ability of bridges to remain in service at the current level of usage. The numeric value is a percentage ranging from 0 percent to represent an entirely insufficient or deficient bridge, and 100 percent to represent an entirely sufficient bridge. The four indicators and their relative point weighting are listed in the table below. The composite numeric value is based on the sufficiency rating formula in the Recording and Coding Guide for Structure Inventory and Appraisal of the Nation's Bridges.

Data Element	Point Rating (%)	Description
Structural Adequacy and Safety	55	This category considers inventory rating, superstructure, substructure and culverts.
Serviceability and Functional Obsolescence	30	Serviceability and functional obsolescence that addresses the number of lanes, average daily traffic, roadway width, bridge width, deck condition, under clearances, waterway adequacy, alignment, and defense highway designation.
Essentiality for Public Use	15	This considers detour length, average daily traffic, and defense highway designation.
Special Reduction	(13)	The sufficiency rating also includes consideration of special reductions for detour length, safety features, and type of structure.

Assessed Conditions

The following table shows adequacy ratings for maintenance levels from Excellent to Poor.

Adequacy Rating	Total
Excellent	80 - 100
Good	70 - 80
Fair	60 - 70
Poor	0 - 60

MDOT intends to maintain highways and bridges at an adequacy rating of 60 or higher. The following table shows adequacy ratings achieved by MDOT.

Fiscal Year	Highways	Bridges
2022	76.2	74.0
2021	74.0	74.7
2020	74.0	75.0

STATE OF MAINE
INFORMATION ABOUT INFRASTRUCTURE ASSETS REPORTING USING THE MODIFIED APPROACH

Comparison of Estimated-to-Actual Preservation Costs

The following table presents the State’s preservation costs for the past five fiscal years. It also shows the estimate of spending necessary to preserve and maintain the roads and bridges at, or above, a sufficiency rating of 60 for both highways and bridges (in millions).

Actual Preservation Costs					
(Expressed in millions)

NON-MAJOR GOVERNMENTAL FUNDS

Special Revenue Funds - include operating fund activities financed by specific revenue sources that are legally restricted for specified purposes.

Capital Projects Funds - account for the acquisition or construction of major capital assets and other programs financed by bond proceeds.

Permanent Trust Funds - report resources that are legally restricted to the extent that only earnings, and not principal, may be used for purposes that benefit the government or its citizenry.

OTHER GOVERNMENTAL FUNDS

SPECIAL REVENUE FUNDS

Baxter Park Fund – This fund accounts for a gift to the State of Maine by former Governor Baxter, which allows for the principal and interest to be used to purchase public reserved lands. Interest income may also be used for operations of the Baxter State Park.

Revenue on Permanent Funds – This fund accounts for expendable earnings on permanent fund balances.

PERMANENT FUNDS

Baxter Park Trust Fund – This fund accounts for a gift to the State of Maine by former Governor Baxter, calling for principal to be maintained intact and income to be used for park operations.

Other Trust Funds – These funds are comprised of numerous small Permanent Funds, the income from which may be used for specified purposes.

Permanent School Fund – Established in 1828, the fund generates income used to support schools through the Department of Education.

NON-MAJOR ENTERPRISE FUNDS

Lottery Fund – This fund was established to account for all operations of the Maine State Lottery. This includes the Tri-State Lotto Commission and the Multi-State Lottery Association. The Tri-State Lotto Commission was established in 1985 and is a joint venture between the States of Maine, New Hampshire, and Vermont. The Commission is authorized and empowered to promulgate rules and regulations regarding the conduct of lottery games, including the prices of tickets, the number and size of prizes for winning tickets, and the licensing of agents. The Multi-State Lottery Association was established in July 2004 and is authorized to initiate, promulgate, administer and carry out one or more lottery product offerings.

Alcoholic Beverages Fund - This fund was established to license and regulate the sale of alcoholic beverages. During fiscal year 2014, the State entered into a ten-year contract with a vendor to manage and operate wholesale liquor distribution as the State's agent.

Maine Military Authority Fund – This fund was created for the purpose of operating the Maine Readiness Sustainment Maintenance Center. The Center maintains, rebuilds, repairs, stores and manufactures equipment for the United States Departments of Defense, Army, Air Force, Navy and Treasury.

State Ferry Service Fund – This fund accounts for the operation of ferry services between the mainland and various islands for the purpose of transporting vehicles, freight, and passengers to and from those islands.

Prison Industries Fund – This fund accounts for a self-supporting program of job training through the employment of inmates in manufacturing and selling products.

Dirigo Health Agency – This fund was created to arrange for the provision of comprehensive, affordable health care coverage to eligible small employers, including the self-employed, their employees and dependents, and individuals on a voluntary basis.

Consolidated Emergency Communications Fund – This fund accounts for payments made by municipal, county, and state governmental entities towards the implementation and on-going costs of the Statewide Communication System.

Competitive Skills Scholarship Fund – This fund provides scholarships to eligible Maine residents to access post-secondary education including certificate programs and two- and four-year degrees.

Maine Retirement Savings Program Fund – The fund accounts for administrative costs and expenses of the Maine Retirement Savings Program which is to promote individual retirement savings through a Public-Private partnership.

INTERNAL SERVICE FUNDS

Motor Transport Service Fund – This fund accounts for all the equipment and vehicle operations of the Department of Transportation.

Postal, Printing and Supply Fund – This fund accounts for the purchase of general office supplies, materials and photocopiers required by any State department or agency, the purchase of and contract for all postal and mailing services, duplicating needs, and the acquisition and disposition of State and federal surplus property. This fund is also used to administer the State's Procurement Card Program.

Information Services Fund – This fund accounts for the costs of providing information services in data processing and telecommunications and for coordinating data processing services including computer operations, programming and applications systems development, technical support and networking services.

Risk Management Fund – This fund accounts for resources generated and used to provide insurance advice and services for all forms of insurance except health and workers' compensation. This includes insurance for automobile, fire, liability and any other type of coverage that may be necessary to protect the State against financial loss.

Workers' Compensation Fund – This fund accounts for resources generated and used to provide workers compensation advice and insurance services.

Central Fleet Management Fund – This fund accounts for the cost of administering a uniform program for the operation and maintenance of all State vehicles except those of the Department of Transportation and Public Safety.

Leased Space Fund – This fund accounts for State facilities leasing activities and maintains records of State agency property, leasing needs and all available space owned, leased and potentially available for lease.

Revenue Services Fund – This fund accounts for the resources generated and used to provide up-to-date information to facilitate compliance with Maine tax law and to help reduce common mistakes in filing tax forms.

Retiree Health Insurance Fund – This fund accounts for post retirement health care premiums and benefits for most retired state employees and Legislators, for a portion of the premiums for teachers, and for a portion of the premiums for county and municipal law enforcement officers and firefighters (First Responders).

Employee Health Insurance Fund – This fund accounts for health care premiums and benefits for most state employees.

Statewide Radio & Network Systems Fund – This fund accounts for resources generated and used to acquire, expand, upgrade and replace a statewide radio and network system for use by State agencies.

Financial & Personnel Services Fund – This fund accounts for centralized services provided by the Department of Administrative and Financial Services. Services provided include personnel administration, employee relations, budget management, general administration, and accounting.

Transportation Facilities Fund – This fund accounts for the purchase, operation, maintenance, improvement, repair, construction, and management of buildings owned by the Department of Transportation.

Governmental Facilities Authority Fund – This fund includes the operations of the Maine Governmental Facilities Authority, a blended component unit. The Authority was created to assist in the financing, equipping, improvement, reconstruction, acquisition, and construction of additions to structures designed for use as a court facility, State office or State activity space.

Industrial Drive Facility Fund – This fund accounts for the managing and operation of the facility at 66 Industrial Drive in Augusta. The facility consolidates agencies performing similar work in an effort to promote resource sharing.

FIDUCIARY FUNDS

Pension (and Other Employee Benefits) Trusts

This fund accounts for all of the trust activity occurring in the employees defined benefit pension plan, healthcare and group life insurance other postemployment benefits trusts and defined contribution plans.

Private Purpose Trust Funds

Abandoned Property Fund – This fund accounts for unclaimed property receipts. All holders of property presumed abandoned must report these properties to the Treasurer annually. The Treasurer will honor claims indefinitely.

Revenue on Private Purpose Trusts Fund – This fund accounts for expendable earnings on private purpose trust fund balances.

Lands Reserved Trust Funds – These funds were established to account for revenue derived from the sale of timber from public lands and from appreciation on investments. The income is to be used for school purposes by townships when they become organized towns or plantations.

Maine Universal Service Trust Fund – This fund provides universal land-line service to the poor and to otherwise underserved rural areas.

Maine Telecommunications Education Access Trust Fund – This fund provides schools and qualified libraries with resources to provide computer-based and network services.

Custodial Funds

Bureau of Insurance and Other Custodial Funds – Almost half of these funds represent deposits held for entities that are self-insured for worker's compensation and/or unemployment claims. About one quarter of the funds represent assets held for DHHS clients. Most of the remaining monies include Attorney General's Office anti-trust escrow accounts and balances held for multi-state cost sharing lawsuits.

Self-Insured and Other Custodial Funds – This fund holds worker's compensation deposits for entities that have ceased to exist. Natural resources also holds deposits for municipalities and other entities.

Non-Entitlement Units – This fund accounts for American Rescue Plan (ARP) awards from the federal government that pass through the State of Maine to municipalities that qualify as non-entitlement units.

NON-MAJOR COMPONENT UNIT FINANCIAL STATEMENTS

Efficiency Maine Trust – was established for the purpose of administering programs for energy efficiency and alternative energy resources to help individuals and businesses in Maine meet their energy needs at the lowest cost.

Maine Connectivity Authority – was established for the purpose of achieving the universal access of affordable high-speed broadband in Maine.

Maine Maritime Academy – is a college specializing in ocean and marine programs at the undergraduate and graduate levels. The operation of the Academy is subject to review by the federal government.

Midcoast Regional Redevelopment Authority – is responsible for acquiring and managing Naval Air Station Brunswick properties in both Brunswick and Topsham and implementing the Reuse Master Plans for each.

Northern New England Passenger Rail Authority – initiates, establishes and maintains regularly scheduled passenger rail service between points within Maine to points within and outside of Maine.

STATISTICAL SECTION
TABLE OF CONTENTS**

This part of the State of Maine's annual comprehensive financial report presents detailed information as a context for understanding what the information in the financial statements, note disclosures and required supplementary information says about the State's overall financial health.

Financial Trends

These schedules contain trend information to help the reader understand how the State's financial performance and fiscal health have changed over time. Fund perspective schedules are presented for the last ten years. Schedules included are:

Entity Wide Perspective

Schedule 1 - Net Position by Activities.....	240
Schedule 2 - Changes in Net Position By Activities.....	242

Fund Perspective

Schedule 3 - Fund Balances - Governmental Funds.....	246
Schedule 4 - Changes in Fund Balances - Governmental Funds.....	248
Schedule 5 - Changes in Fund Balances - General Fund.....	250

Revenue Capacity

These schedules contain information to help the reader assess the State's most significant revenue sources:

Schedule 6 - Individual Income Tax and Tax Rates on Taxable Income.....	252
Schedule 7 - Individual Income Tax Filers and Tax Liability by Maine Adjusted Gross Income.....	255
Schedule 8 - Taxable Sales and Sales Tax Rates.....	256

Debt Capacity

These schedules present financial information to help the reader assess the affordability of the State's current levels of outstanding debt and the State's ability to issue additional debt in the future.

Schedule 9 - Calculation of Legal Debt Margin.....	259
Schedule 10 - Ratios of Outstanding Debt by Type.....	260
Schedule 11 - Pledged Future Revenue Coverage.....	262

Demographic and Economic Information

These schedules offer demographic and economic indicators to help the reader understand the environment in which the state operates. Schedules included are:

Schedule 12 - Demographic Information.....	264
Schedule 13 - Principal Employers - Top 10.....	267
Schedule 14 - State Government Full Time Equivalent Employees by Policy Area.....	268
Schedule 15 - Operating Indicators and Capital Information.....	270
Schedule 16 - Capital Assets by Function.....	272

Individual income tax brackets are indexed for inflation beginning in tax year 2003.

Inflation adjustments were suspended for tax years 2014 and 2015.

Personal income totals were restated back to 2017.

¹ Amounts shown are for single and married filing separate returns.

For joint filers, approx. double the income amounts, for head of household filers multiply the brackets by approx 1.5.

STATE OF MAINE
CALCULATION OF LEGAL DEBT MARGIN

SCHEDULE 9

Last Ten Fiscal Years
(Expressed in Thousands)

Pursuant to Article IX, Section 14 of the Maine Constitution, the Legislature shall not create any debt or debts on behalf of the State, which shall exceed \$2,000,000 in the aggregate, except to suppress insurrection, to repel invasion, or for purposes of war, and except for temporary loans to be paid out of money raised by taxation during the fiscal year in which they are made. Whenever 2/3 of both Houses shall deem it necessary, by proper enactment ratified by a majority of the electors voting thereon at a general or special election, the Legislature may authorize the issuance of bonds on behalf of the State as approved by such action. Temporary loans to be paid out of moneys raised by taxation during any fiscal year shall not exceed in the aggregate during the fiscal year in question an amount greater than 10 percent of all the moneys appropriated, authorized and allocated by the Legislature from undedicated revenues to the General Fund and dedicated revenues to the Highway Fund for that fiscal year, exclusive of proceeds or expenditures from the sale of bonds, or greater than 1 percent of the total valuation of the State of Maine, whichever is the lesser.

There were no temporary loans outstanding at June 30, for the years presented below, which were subject to the Constitutional limitations.*

All other general long-term bonds outstanding at June 30, for the years presented below, were issued pursuant to properly ratified legislation.

Calculations of temporary loans made during the year, yet paid back prior to year end are:

¹ Federal and other revenue streams associated with qualified transportation projects are pledged as security for GARVEE and TransCap bonds. These pledged future revenues offset the unspent proceeds of the bond received by a component unit. Profit from the Alcoholic Beverages Enterprise Fund are pledged as security for the Liquor bonds. See Schedule 11.

² Personal income data can be found in Schedule 12.

³ Population data can be found on Schedule 12.

⁴ Estimated property value can be found on Schedule 9.

⁵ As restated. GASB 87 was implemented in FY2022, which required a restatement of the lease liability.
