### STATE OF MAINE

### Summary of Major State Funding Disbursed to Municipalities and Counties

Maine State Legislature Office of Fiscal and Program Review December 2022 Pub. #33

### SUMMARY OF MAJOR STATE FUNDING DISBURSED TO MUNICIPALITIES AND COUNTIES

This report summarizes the major state funding disbursed to municipalities and counties. These disbursements represent a substantial portion of the State's budget and significantly affect local government budgets as well. The State's support of municipal and county functions through these disbursements has a major impact on the amount of local property taxes assessed on Maine taxpayers to support municipal and county government. The report captures state funds, including bond proceeds, paid directly to municipalities and counties or paid on their behalf for a local governmental purpose. All major direct-disbursement programs/items are reflected, such as General Purpose Aid for Local Schools and State-Municipal Revenue Sharing, as well as certain indirect expenditures, most notably, Teachers' Retirement, which is paid by the State for the "employer share" of teacher retirement costs. The amounts in this report do not include federal funds that pass through state agencies to local units of government and do not reflect any benefit that local units might receive from the sales tax and fuel tax exemptions for local governmental purchases. The exclusion of federal funds is particularly noteworthy during the period from FY 2009 through FY 2011 when American Recovery and Reinvestment Act of 2009 federal stimulus funds passed through to local school units and in FY 2021 when significant federal money passed through to local units of government to mitigate the impact of the COVID pandemic. The summary data in this report also do not include amounts the State pays to individuals and businesses as reimbursement for local property taxes. Appendix A summarizes those expenditures separately.

FY 2022 was the fifth year in a row that state funding disbursed to municipalities reached a new all-time high (see the graph on page 3). The biggest increases in FY 2022 from the previous year were in funding for State-Municipal Revenue Sharing and education. Assuming disbursements in FY 2023 conform to budget, the average annual percent increase in all disbursements will be 3.5% over the 20-year period from FY 2004 to FY 2023. On an inflation-adjusted basis that would be an average annual increase of just under 0.9%.

The extent of the State's financial support of local governments can also be expressed as a percentage of state revenue. For FY 2022, disbursements to municipalities and counties from the General Fund represented 27.3% of General Fund revenue, less than the FY 2021 percentage because revenue was up more than disbursements were up. If State-Municipal Revenue Sharing expenditures are included as General Fund expenditures and the revenue set aside for revenue sharing is added back to General Fund revenue, the percentage of these disbursements would be 30.3%. When all state disbursements to municipalities and counties, excluding bond expenditures, are compared to total state operating revenue (which for the purposes of this analysis excludes all federal funds, enterprise funds, internal services funds, trust funds and bond funds), the State disbursed 26.4% of its adjusted operating revenue back to municipalities and counties, slightly lower than FY 2021.
