FEDERAL FUNDS JN MAINE

# STATE OF MAINE OFFICE OF THE GOVERNOR AUGUSTA, MAINE 04990

January 15, 1973

Governor Kenneth M. Curtis and the Maine Legislature:

The Cabinet subcommittee on Federal Grants is pleased to present this report for consideration by Administrative and Legislative agencies.

Since its inception during June, 1972, the Committee has initiated several actions to improve the use of federal grants.

First, the Department of Finance and Administration has agreed to publish a monthly summary of federal grants approved by federal agencies. In cooperation with the federal government we will continue this informational service.

Secondly, the Executive Order of July 28, 1972, started a reporting system for applications for grants by state agencies. The State Planning Office processes this information and will keep the 50 review coordinators within state agencies advised on a weekly basis.

Thirdly, the subcommittee has prepared the accompanying report, "Federal Funds in Maine", which analyzes Maine's use of federal grants and expenditures and recommends several ways by which increased federal funds could be received by Maine agencies and institutions. In preparing the report the subcommittee conducted a survey of state agencies and reviewed all known reports and sources of statistical data. Credit should be given to Janice O'Connell, summer intern from Colby College, and Roy A. Whitcomb, Jr., Special Assistant for Urban Affairs, for writing the first and second drafts of the report. The subcommittee is particularly indebted to Robert W. Harding, Analyst, State Budget Office, for providing both the style and substance of the final draft as approved by the subcommittee.

The subcommittee report found that Maine is making good use of available federal funds but that there are both specific and general recommendations for increasing Maine's income from the federal government. These include (1) larger state appropriations to match selected federal programs, (2) better communication of available grants, and (3) increased qualified staff to help potential applicants.

We hope this report, which to our knowledge is the first comprehensive attempt to analyze Maine's use of federal dollars, will be both informative and useful in achieving maximum assistance from desirable federal programs. We appreciated this opportunity to be of service.

Transmitted by,

Allen G. Pease, Chairman of

The Subcommittee on Federal Grants

# A Quick Look ....

More than 784 million dollars came into Maine in 1971 – from the Federal Government. That's three-quarters of a billion dollars. If divided amongst us we'd get nearly \$800 apiece. If we had been given this 3/4 billion dollars at the birth of Christ and had spent \$1,000 each day for the last 1972 years – we'd still have \$65,000,000 left. A lot of money?

Perhaps it is.

At any rate it seems that such a significant flow of money has long enough been a little understood phenomenon to the thinking people in the street – so we looked into it and tried to arrange the data so it would be useful. We made some observations as we went along...

We found that 45 States get more than we do, but if the Federal award received by each State and Local government was divided equally among its people – each person in Maine would get \$20.00 more than the National average.

We found that nearly 80% of what gets here is not too controllable - that is, we don't have a whole hat-full of ways to increase or decrease the flow - since it is things like social security checks, veteran's affairs, post office, and defense.

We found that the other 20% - \$163,000,000 - that is awarded to State and Local governments - can be - and has been - boosted by the efforts of Maine's public officials. It has doubled in the last 5 years - to become nearly 1/3 of our State government operating funds.

But we also found that the Federal Government is actively supporting over 1,000 defined types of programs – which means that we are "going it alone" in programs where the Federal Government will help – if we present the right problem in the right way to the right people.

We found that we are not well-organized to do this.

We need to develop a well-organized Service Unit that is.

A Unit that will pull together the know-how we have, increase our expertise in the application process, maximize the assistance in currently shared efforts, explore areas so far untouched, and report problem areas to those branches who can fix them - the Executive and Legislative.

A Unit that will think big enough to have men – the dig-into-it, monitor-it, evaluate-it, fix-it, make-it-happen type of men – at the scene where the decision to help – or not help – is being made. People whose single purpose is to get financial support for good Maine ideas designed to fill Maine needs. People who will help replace a good track record with a better one....

#### FEDERAL FUNDS IN MAINE

# THE PURPOSE AND SCOPE

T.T. Pits (The Thinking Person in the Street) reads newspapers and magazines and watches television and is aware that federal funds flow from Washington, D.C. to Maine.

Logical questions for him to ask are:

How much do we get?
Does Maine get its fair share?
What do we do with what we get?
Can we get any more?
How?

This report has been prepared to help T.T. Pits arrange available information in ways that will allow him to arrive at some useful answers to these questions.

# HOW MANY FEDERAL DOLLARS DOES MAINE RECEIVE?

Let's start with "How much do we get?"

For the fiscal year ending June 30, 1971:

Federal Outlays in Maine reports	\$784 <b>,</b> 899 <b>,</b> 537
Federal Aid to States reports	\$163,990,062
State of Maine Financial Report says	\$126,144,206

Why the difference? Is any one report correct? Are they all?

Let's look a little deeper into each report.

THE REPORTS WE USE

# Federal Outlays in Maine

This is the most wide-swinging report of the three. It is assembled annually by the Office of Economic Opportunity for the Executive Office of the President. It is based on reported "obligations" – money legally set aside to be spent – not actual expenditures. Nevertheless, most obligations reported as current fiscal year outlays do accurately represent the level of Federal spending during the year.

Some reporting is incomplete because of security reasons. Outlays made to States by the Executive Branch of the Federal Government are included; those from the Legislative and Judicial Branches are not.

But, incompleteness does not mean a report is not useful.

In this report Federal outlays to all States are recorded in the same way - thus certain comparisons are possible. It records federal money that comes into Maine for individuals (like Social Security checks), for State government projects, for local government, students, business operations, and, of course, Federal operations like the post office and military activities.

Since this report covers the most ground, it gives us the best opportunity to see the over-all picture.

We'll use this data a little later on in this report.

#### Federal Aid to States

This report is prepared by the U.S. Treasury and, to the extent possible, is based on checks actually issued. It covers a lot less ground than the Federal Outlays record since it reports only that portion of federal funds which is awarded to State governments and local governments.

While this report does not reflect even the bulk of federal funds that flow into Maine, it may provide T.T. Pits with some of his most useful answers.

We'll examine this in another section of this report.

# State of Maine Financial Report

This document cuts the smallest circle of the three since it records only the federal funds that are actually awarded to a department of the State of Maine Government. It is assembled annually by the State Controller, is the official record of State government finances, and is at the scene – the state office building in Augusta.

And it, too, gives T.T. some answers.

These, then, are some of the basic documents from which figures in newspapers, magazines, and television are taken. These reports cover different areas and help answer questions.

And usefully.

# DOES MAINE GET ITS FAIR SHARE OF FEDERAL DOLLARS?

The Federal Outlays in Maine reports the most dollars of federal money coming to Maine. It is the most available, comprehensive, complete and most understandable record assembled by the Federal Government and distributed to most key people involved in Federal, State and Local government.

And, as we said, it allows for comparisons - to an extent.

Comparisons like "Does Maine get its fair share?" for instance.

Here is a composite chart of data that appears in Federal Outlays in Maine FY 1971:

# Federal Information Exchange System FY 1971 Federal Outlays State Comparison – Federal Funds

	FY 1971		Maine's % of Total
MAINE	Outlay	Maine's	Federal
		Position 39th	Awards .49
Population	-	37th 37th	.49
Number of poor Total Funds received from Federal Agencies	\$784,899,537	37 th 45th	. 37
Total Pollas received from Pederal Agencies	\$704,077,337	45m	. 37
Breakdown by funds by Federal Agency:			
Department of Agriculture	31,040,847	45th	.22
Department of Commerce	30,174,917	10th	2.27
Department of Defense	125,808,000	48th	.21
Department of Health, Education and Welfare	307,111,387	38th	.49
Department of Housing and Urban Development	9,677,909	40th	.49

Post Office Department	41,815,943	37th	.50
Department of State	25 <b>,</b> 760	34th	.01
Department of Transportation	49,461,635	41st	.63
Treasury Department	42,775,584	39th	.26
Agency for International Development	338,158	45th	.02
Atomic Energy Commission	87,671	44th	.003
Civil Service Commission	19,332,144	39th	.41
Environmental Protection Agency	10,860,341	32nd	.93
Federal Communications Commission	70,109	21st	.26
Federal Home Loan Bank Board	52,513	34th	.04
General Services Administration	5,339,862	40th	<b>.</b> 27
Interstate Commerce Commission	28,370	42nd	.04
National Aeronautics and Space Administration	2,484,945	29th	.08
National Foundation on Arts and Humanities	345,443	24th	1.01
Office of Economic Opportunity	5,000,619	40th	.56
Office of Emergency Preparedness	2,821,452	10th	1.87
Peace Corps	12,968	40th	.02
Railroad Retirement Board	10,644,760	39th	.52
Small Business Administration	2,806,772	32nd	.48
Veterans Administration	63,223,969	39th	.58
Water Resources Council	61,000	38th	.69
Federal Mediation and Conciliation Service	84 <b>,</b> 527	23rd	.87
National Science Foundation	927,248	46th	.19
Selective Service System	379 <b>,</b> 677	44th	.54
Tennessee Valley Authority	923	46th	.0001

Let's sift this data just a little.

Maine with its just-under-a million people ranks 39th in population among the 50 states. Of every 204 people in the United States, 1 lives in Maine.

And the \$784,899,537 in federal funds we receive places us, in terms of aid dollars, in position number 45. Of every \$254 awarded, Maine gets \$1.

In thirty-three other comparisons our position, in terms of dollars, ranges from 10th for the Department of Commerce funds we received, to 50th for the Department of the Interior.

Question: Since we rank 39th in population, shouldn't we rank 39th in each comparison?

Wouldn't we in fact be kind of measuring mileage with a thermometer? By what logic would we relate our 39th position-by-population to the \$923 which we received from the Tennessee Valley Authority and which, incidently, placed us in the 46th position? And four States received less.

But what happens when we compare apples with apples----the "people-related items" to "population," for instance:

		Position	Federal Funds
Federal Agency Maine'	s Position by Population>	- 39th	\$784 <b>,899,</b> 537
Health, Education and Welfare	\$>	- 38th	307,111,387
Veterans Administration		39th	63,223,969
Civil Service Commission		39th	19,332,144
Housing and Urban Developmen	t	40th	9,677,909
Railroad Retirement Board		39th	10,644,760
Office of Economic Opportunity	,	40†h	5,000,619

The total received from these agencies is \$414,990,788 which is 53% of the total we receive from all agencies. Our rank in these people-related areas is about 39th—the same as our population rating (39th) – seems like "fair share."

But when we look at the \$49,461,635 we receive from the Department of Transportation our rank is 41st which, compared to population (39th), implies we are running two places behind.

However, Maine, with its 21,356 miles of roads ranks 43rd when compared to the number of miles of roads in all States, and highway aid might more usefully be related to "miles of road" than to population of the State.

In this comparison, Maine's 41st position in aid looks good when balanced with 43rd for miles of roads – better than "fair share." With .57% of the roads in the U.S. we get .63% of the Federal dollars awarded by the Department of Transportation.

From the Department of Agriculture we receive \$31,040,847 and 45th position. When our population position (39th) is viewed as the "target" – we missed by six positions.

However, Maine with its 2,300,000 acres of farms ranks 42nd when compared to the acres of farms in all States. And agricultural aid <u>might</u> more <u>usefully</u> be related to "acres of farms" than to population of the State.

In this comparison, Maine's 45th position in aid shows improvement when balanced with 42nd for acres of farms – yet with .20% of the farm acreage we get .22% of the Federal dollars awarded by the Department of Agriculture – slightly better than "fair share."

The 8 comparisons made above account for \$495,493,270 - about 63% of the Federal funds Maine receives on a basis which looks like "fair share."

What about the other 25 comparisons?

If the population position is used as a "target" we are between 1 and 29 points <u>better</u>-than 39th in 14 places for a total of \$138,991,723 - 18% of Federal funds we receive.

And, if the population position is used as a "target," we are between 1 and 11 points worse—than 39th in 11 places for a total of \$150,414,544 - 19% of the Federal funds we receive.

The picture, then, indicates more-than-fair share for 18% of our aid and less-than-fair share for 19% of our aid - an approximate balance. The bulk - 63% of our aid is at the "fair share" target figure - 39th.

Do we get our fair share? It seems so.

#### WHAT DO WE DO WITH THE FEDERAL DOLLARS WE GET?

It also seems reasonable that T.T. might logically ask "What do we do with this fair share we get?"

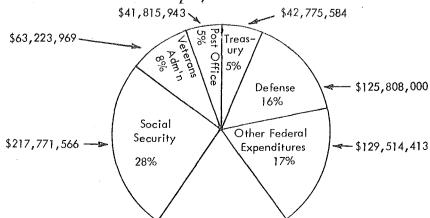

In order to arrive at an answer that may be useful, let's establish "who" controls "what" and recognize that there are three "we's" - the Federal Government and the State/Local governments.

#### THE SEVENTY-NINE PERCENT PIECE....

Of the \$784,899,537 federal funds distributed in Maine, \$163,990,062 went through levels of State government – the balance did not. The bulk – 79% or \$620,909,475 went directly from the Federal Government to, or on behalf of, T.T. Pits.

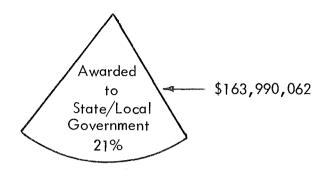

#### We - the Federal Government

Here's a pie which points out some of the big money areas where this 79% goes – the 79% distributed directly by "we – the Federal Government."

#### THE TWENTY-ONE PERCENT PIECE....

Here's the piece- the 21% - which was awarded to - and was distributed by - "we - the State and Local government of Maine."

There is a point of interest here which shouldn't pass unnoticed. Much of the 79% distributed directly by "we - the Federal Government" is based on nationwide consistent criteria - like social security checks and defense installation costs.

The 21% which is awarded to State and Local governments means somebody worked. Since this "somebody" had to be a public official, the amount of federal funds awarded to State and Local governments does provide T.T. with some measure of the effectiveness of the effort expended by our public officials.

Let's look at the reports again:

#### All States:

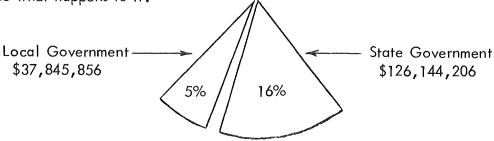

Total federal funds distributed (OEO Report)	\$208,848,148,087
Amount awarded to State/Local Gov'ts (Treas. Report)	29,844,721,665
Percentage of total awarded to State/Local Gov'ts	14%

#### Maine:

Total federal funds distributed	\$ 784,899,537
Amount awarded to State/Local Gov'ts	163,990,062
Percentage of total awarded to State/Local Gov'ts	21%

Weighing these two percentages (21% against 14%) T.T. might very well feel that our public officials in Maine put in 50% more effort than the nationwide average. This may or may not be true – but they are evidently 50% more effective.

Now let's take the \$163,990,062 - the "we - the State/Local government" portion - apart to see what happens to it.

# We - the Local Government

The \$37,845,856 awarded to local governments is, on a local level, used on programs highly visible to T.T. Pits. Model Cities, urban renewal, low income housing, harbor modernization, economic development projects, the "head start" program, community action programs (CAP), the "neighborhood facilities program" which helps build or modernize city buildings or structures, and the University of Maine – are examples.

The benefits from the "We - the Local Government" portion are local, evident, visible, recognizable.

The benefits from the "We - the State Government" portion are not.

#### We - the State Government

Perhaps one of the biggest reasons is that the State government recognizes federal funds as only another source of money to be used to provide <u>more</u> of a service already underway. Thus, a single dollar from Washington becomes merged with a lot of other Maine dollars to do a job. There are, of course, rules and judgments involved, but, nevertheless, in the operation of most State-operated programs the money comes from several pockets.

Here's a look at the kinds and amount of money that the State government gets to use in the three General Operating Funds – the General Fund, the Highway Fund and the Special Revenue Fund – the funds that do the jobs T.T. says he wants done:

Revenue	1971 (Millions)	1970 (Millions)
Sales and Use Tax	\$ 92.0	\$ 83.2
Gas Tax	39.3	37.2
Income Tax	32.4	27.1
Motor Vehicle Registration and	14.2	14.0
Drivers' Licenses		
Cigarette Tax	15.5	14.7
Inheritance and Estate Taxes	6.0	4.9
All Other Taxes	21.4	19.9
From Federal Government	121.1	<del>&gt;</del> 85.3
From Liquor Commission	18.4	17.6
Other Revenue	25.1	24.0
TOTAL	\$385.4	\$327.9

# Here's a breakdown of where the "From Federal Government" money comes "To":

# State of Maine Distribution Of Federal Revenue To All Funds By Department Or Agency Fiscal Year Ending June 30, 1971

	\$49,299,206	\$291,741	\$37,368,937	\$34,102,883

And here's where all the "kinds" of money went:

	1971	Per Cent	1970	Per Cent
Function	(Million)	Of Total	(Million)	Of Total
General Administration	\$ 13.8	3.6	\$ 12.1	3,8
Protection of Persons and Property	14.6	3.8	12.2	3.8
Development and Conservation	15.6	4.1	13.7	4.3
Health and Sanitation	4.4	1.1	4.8	1.5
Social Services	94.1	24.6	70.3	22.1
Mental Health and Corrections	25.5	6.6	23.8	7.5
Education	104.4	27.3	93.7	29.5
Highway and Bridges	86.8	22.7	67.6	21.2
Culture, History and Recreation	3.2	.8	2.8	.9
Debt Service (Principal and Interest)	15.3	4.0	11.9	3.8
All Other	5.4	1.4	5.1	1.6
TOTAL	\$ 383.1	100.0	\$ 318.0	100.0

To do a \$383 million job in Maine, with federal money being about one dollar out of every three available, it seems evident that there must be federal money in nearly every program.

There are also some other useful answers T.T. Pits may recognize if we sort out these tables a little and do a little arithmetic. Let's look at it in two pieces - coming and going.

Revenue from all sources increased approximately 18% from 1970 to 1971, but federal fund income increased from \$85 million in 1970 to \$121 million in 1971 – a 42% boost. Federal funds jumped from 26% of our income to 31.4%. In other words, the \$35.8 million increase in federal funds accounted for over 62% of our gain in 1971. Or, looking at it in an uncomplicated way: for every \$5 of all kinds of income we received in 1970 we received \$5.90 in 1971 and 56¢ of this 90¢ increase was federal funds – more than 6¢ out of every dime.

Or, looking at it from another direction: for every additional dollar spent treating Maine's problems in 1971, T.T. Pits chipped in about 38¢ – and he did this mostly by buying more things (sales tax) and earning more money (income tax).

The combination of no tax increase plus significant effectiveness in acquiring federal funds gave us a buck's worth of program for 38¢.

A good value? Perhaps. It depends on who's measuring.

The middle-income, healthy, well-educated, home-owning taxpayer may question whether or not the job that was done with the buck was a job that needed to be done. If it was not - it was a bad value. If it was - it was a good value.

The unemployed, sick, under-educated, desperate, hungry, cold and discouraged citizen is not impressed with the 38¢ dollar we bought. He has needs that are not met.

Valid concerns? The Governor thinks so. The Legislature thinks so. And things are happening.

Even now analysts are talking with more and more of the people who contribute to and/or benefit from State government programs. The aim is to be sure that what seem to be the desires of the people are in fact the desires.

Even now current methods of paying for services are being re-evaluated - new methods, better balances, removing inequities - all are being reviewed- but to be done right it will take time.

But the people-problems exist now.

And more money is needed now.

This kind of concern prompted the Governor to launch a rather dynamic probe throughout the State agencies.

# CAN WE GET MORE FEDERAL ASSISTANCE?

The questions were blunt:

How much federal money do you get? What are we doing that makes it hard for you to get more?

YES, BUT....

The answers to the last question were rather blunt, too:

We need more 'matching" money.

We need law changes.

We need more knowledge of what's available.

We need training in "how to apply."

It seems that the answer to T.T.'s question "Can we get any more Federal Funds?" is <u>yes</u>. To answer the "How?" question, let's look at this Federal/State push-pull relationship.

# Problem One: Balancing Federal and State Wants

Each year the Federal Office of Management and Budget issues the "Catalog of Federal Domestic Assistance." This catalog lists and describes Federal programs and activities which provide assistance or benefits to the American public. The latest edition describes 1051 programs administered by 61 different Federal departments, commissions, and councils.

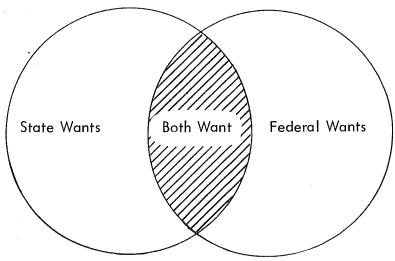

There are programs available for individuals, organizations, and any level of government except a Federal Agency.

The Federal assistance available varies from giving free advice to paying 100% of the cost of program – depending on how badly the Federal Government wants the job to be done.

The State government, too, has an array of programs that it wants to accomplish.

Quite naturally there are programs only the <u>State</u> wants to accomplish, programs only the <u>Federal</u> people want to accomplish, and, of course, programs they both want to accomplish.

Programs in the "both want" area have the interest of each government. If the State wants to do the job, the Federal Government will help. The key word is "help." Normally the Federal feeling is that the State must put some of its own money into the program.

At this point some basic truths seem to stand out. Truths like:

If we alone want to do it, we pick up the tab.

If the Federal Government alone wants to do it, they pick up the tab.

If we both want to do it, we split the tab.

Sprinkling a fair amount of logic over these truths, T.T. rather abruptly realizes three more:

If the Federal Government does it alone, they will decide how, how much, and how often.

If we do it alone, we decide.

If we do it together, the how, how much, and how often reflects the feelings of both.

And, just as logically, a conclusion:

The more State and Federal "wants" coincide, the more mileage we're going to get for each State dollar – a bigger bang for each buck.

If any one statement - a handful of words - reflects the concept which can rack up the most concentrated assault on available Federal funds - this is it.

Should we choose to implement such a bold approach?

Does this sound a little like we'd be doing things for the wrong reason? Shouldn't the emphasis be on finding support for Maine ideas – not on performing projects simply because Federal money is advertised as available?

Naturally. But the fact is that if we want help from the Federal Government we must recognize which conditions build bridges - and which conditions build walls.

And there are walls - conditions which make doing business difficult.

# Problem Two: The Applicant Needs Help

The Governor's survey of State departments emphasized: "lack of expertise"; "lack of staff"; lack of knowledge of what's available"; "anxious to learn of additional available funding"; "wish we had a central distribution point for federal program information plus technical assistance in preparing applications..."

# Problem Three: Seeing "Effects" in the Proper Perspective

And there are a host of other "difficulties..." Current federal practices, for instance, which result in a State being thankful or bitter because its allocation of a certain type of Federal fund was affected significantly by one or more of the "effects."

As an example: "There are "population effects" that reach the Maine State government through the Federal Government. The major such effect is the change in the ratio of Maine's population to the national population. In 1910... Maine's population was eight-tenths of one percent of the Nation, including Alaska and Hawaii. In 1960, Maine's resident population represented only fifty-four hundredths of one percent of the national population. In 1970, Maine's population represented less than one-half of one percent of the total national population. To the extent that fiscal assistance from the Federal Government is based on population, Maine, in the years from 1970 through 1977 will automatically receive lesser proportionate amounts in the form of Federal grants."

Thus the "population effect" influences the distribution of Federal funds – as does the "big city effect," the "acreage effect," the "Applachia effect," the defense industry effect" – and any one of a myriad of factors the Federal Government builds into any of its distribution bases.

# Problem Four: The "Matching" Money — A Balancing of Priorities

Then there are the "matching" difficulties – where the program cost <u>must be shared</u> by Federal and State. This means the State must put some of its own <u>money</u> in.

The Governor's survey reflected this as a concern of some agencies: "lack of enough matching funds to absorb all federal funds available," "there isn't enough State money to match," – additional funds easily obtainable had they had additional State money.

A memo details: "...matching opportunities for the financing of various projects may be missed for technical reasons or simply because the circumstances or resources necessary for the operation of some projects may not exist in a given area. Certain programs where Federal matching is available may not exist in a given State.

"An instance of this kind of loss exists in the State of Maine where our Title XIX Medical Care Program does not include the medically indigent. If it would, we would probably be providing services for a large number of people at a total annual cost of some \$10,000,000, of which 2/3 would be Federal. Obviously, the remaining 1/3 would have to be State funds. If the legislature does not choose to finance the medically indigent care program, obviously we are losing some \$6,000,000 to \$8,000,000 per year.

"As a further example of the circumstances under which Federal funds are not granted, we might look at our public assistance grants. All of these Federal appropriations are open-ended and therefore total Federal funds come into the State and are determined purely in the extent to which State legislation is willing to appropriate matching funds that, again, need to be no more than about 30% of the grant expenditure. On this basis, if the State legislature tries to keep the grant expenditures to absolutely minimum levels, then it will simultaneously be losing Federal revenue."

# Problem Five: Dedicated Funds — Specific Dollars Do Specific Jobs

And occasionally the "plenty - in the wrong pocket" difficulty results from a grant structure. For example, the Department of Education, under certain "title" grants has inadequate money to complete existing programs, while under other "titles" there are excess funds. These excess funds may not be reallocated to the programs in need of more funds - but must either be returned to the Federal Government or spent in its own "title" area. If T.T. Pitts assumed that, as a result of this condition, money is spent because it is present for certain "titles" - spent regardless of need - while other projects must remain incomplete due to a shortage of dollars, it may be difficult to successfully argue with his line of logic.

The new "revenue sharing" program may reduce the importance of this problem...

# Problem Six: Explaining the Irrelevant

And the "Irrelevant" difficulties like: States with no disasters receive no "disaster money," those with no floods no "flood money," landlocked States no "harbor-development money," areas with no Federal installations no "Federal impact money."

# Problem Seven: Know-how is a Personal Thing

Difficulties? Perhaps. But solving difficulties is only a matter of priorities.

And resources.

Organized for action.

It is interesting to note that the State government spends over \$2 million annually to effectively handle the collection of the State's tax income. These resources gather, record, measure, recommend – and do everything possible to make it easy for the taxpayer to do business with the State. This concentration of effort collects about \$200 million each year.

To collect an amount approaching \$150 million each year in Federal funds, we have nothing comparable to the State tax machinery. The procedure is to teach-yourself, catch-as-catch-can, learn-by-doing, help-your-buddy process. Prepare a proposal then chip away everything that doesn't look like "acceptance."

Despite the fact that this technique works, perhaps it is time to replace it with something that works better.

But just so we act for the right reason.....

It is not the intent of this analysis to, in any way, admit, acknowledge, indicate or imply that increasing the flow of Federal <u>funds</u> is the answer to Maine's problems – since it is not. We solve problems by initiating <u>corrective action</u> – the best of the implementable alternatives.

Whenever the selected alternative is in need of support beyond that which is readily available, it seems appropriate to ask for help – from anyone who can provide the needed ingredients.

But asking for help is not enough.

Getting the help is what counts.

To the extent we may ask the Federal Government for help, it seems reasonable to assume that the success of such a mission will be in direct relationship to our ability to develop good ideas and our willingness to spell them out and present them well to the right agency in step with their thinking.

To the extent that this is our target, it seems logical to seriously evaluate any suggestion which can improve our aim.

# RECOMMENDATION: ACTIVATE A FEDERAL/STATE SERVICE UNIT

Activating a professional Federal/State service unit looks like a reasonable move in this direction.

We need a service unit to help get Federal support for good Maine programs that need more resources than we can provide. A unit made up of specialists who identify, investigate, interpret, evaluate, inform, advise, assist – and report. Specialists who get the facts, get them fast, and present them well..

#### WHAT CAN A FEDERAL/STATE SERVICE UNIT DO?

Let's take a look at some "for instance" services.

#### Function I: Assist in Grant Application Process.

Actual assistance in the grant application process is perhaps the most immediate action which will create the most visible value of such a unit – an increase in submitted applications. And, if professionally prepared, the batting average for acceptance should be enhanced and evident – by the increase in Federal support.

Professionally prepared applications will, at the outset, touch all the bases which should be touched. If cost-sharing is involved it will be handled; unrecognized costs will not be included; - all the data to present the proposal properly to the right Federal agency will be built in.

It is conceivable that such a service could encourage some agencies to review their thinking – especially in those cases where 'no where to go to get help" developed into "no reason to go there" – and a good idea died – and Maine lost.

#### Function 2: Organize and Evaluate Data

Organization and thoughtful evaluation of appropriate data reflecting our standing relative to other States, trends, and problem areas – thought-provoking arrays – will help management make more informed judgments.

For instance, certain data from "Federal Aid to States" - when arrayed beside the broader coverage pictured by OEO's "Federal Outlays in Maine" - points out that while Maine's overall position hasn't changed much (Table 2), the more controllable State/Local award figures (Table 1) moved up by twice the percentage of additional funds Washington made nationally available in 1971. Our population, as pointed out earlier, is declining - and will affect certain types of Federal awards to Maine - unless we alter our population trend or alter the criteria for such awards. Our "number of poor" trend invites attention.

Such an array may help the decisionmakers focus their attention on both the effect of past effort and the need now:

1968	44th	37th	38th		
1969	43rd	39th	38th		
1970	47th	39 th	37th		
1971	45th	39th	37th		

Another such compilation from "Federal Aid to States" compares Maine's 39th position with several adjacent positions each way. If Maine had received another million dollars, we would have been 38th. To move up three positions would have required an additional \$81,000,000 - half again what we received. Doubling our receipts would have given us 32nd place. Doubling our receipts over the last 4 year period moved us up 5 places.

But, from another direction.... had we not generated the spectacular increase of \$51.5 million in 1971 (as shown in the previous chart) and had remained static at the \$112 million of the year before, we would be in 46th position. An increase of the Federal's 23.36% would have given us only \$26.2 million on top of our \$112 for a total of \$138.7 and 42nd place.

Such comparisons suggest different things to different analysts and one job for the service unit would be to look at available data in many ways. For example – this chart is arranged in order of "dollars received" by the State/Local government.

#### DATA FROM "FEDERAL AID TO STATES"

	Federal Awards Received During 1971	Position	Amount By Which Maine Missed Being In That Position
Arkansas	\$ 321,235,399	32nd	\$ 157,245,337

Rearranging the chart on a "per capita basis" (that is, assuming the Federal dollars received were divided equally among the State's population, the per capita figure is the \$ amount each person would get) the order for this group of States is:

		State/Local	V		Per Capita Change needed by Maine
	Population	Gov't	Per Capita	Position	to move to Position
Arkansas	1,923,000	\$321,235,399	\$167.05	8	2.07
lowa	2,825,000	302,291,958	107.01	15	<del>-</del> 57.97
Kansas	2,249,000	265,884,951	118.22	13	<del></del> 46.76
New Mexico	1,016,000	258,239,811	254.17	2	89.19
Arizona	1,772,000	244,837,464	138.17	12	<b>—</b> 26.81
Utah	1,059,000	185,021,630	174.71	6	9.73
Montana	694,000	164,965,571	237.70	3	72.72
Maine ———	> 994,000 -	<b>→</b> 163,990,062 ·	<del>→</del> 164.98 -	<del></del>	
Nebraska	1,484,000	161,791,923	109.02	14	<del></del> 55.96
Alaska	302,000	159,849,904	529.30	1	364.32
Rhode Island	950,000	138,179,513	145.45	11	<del>-</del> 19.53
Hawaii	770,000	132,839,182	172.52	7	7.54
South Dakota	666,000	116,778,369	175.34	5	10.36
North Dakota	618,000	113,513,958	183.68	4	18.70
Idaho	713,000	108,037,130	151.52	10	<del>-</del> 13.46

Thus Arkansas with <u>double</u> the grant funds Maine receives provides only \$2.07 more per capita than does Maine. We could overtake this position with a total increase of \$2 million—not the \$157 million indicated by previous chart. And, since effort by public officials is reflected by these <u>Federal Aid to States</u> figures, such a step is a possible target.

But, before we become concerned about using the Arkansas per capita figure as a target, let's take a look at how Maine's per capita figure stacks up with all the other States.

59			W		Per Capita Change needed by Maine
State	Population	State/Local Gov't	Per Capit	a Position	to move to Position
Alaska	302,000	\$ 159,849,904	529,30	1	364.32
Wyoming	332,000	85,876,432	258.66	2	93.68
New Mexico	1,016,000	258,239,811	254.17	3	89.19
Montana	694,000	164,965,571	237.70	4	72,72
Mississippi	2,217,000	524,570,398	236,61	5	71.63
West Virginia	1,744,000	405,148,223	232.31	6	67.33

Indiana	5,194,000	431,228,655	83.02	50	- 81.96

Thus in a field of 50 States, Maine State and Local government has attracted \$23.39 more per person than the U.S. average. Of the New England States only Vermont scored higher – the others between 10% and 24% less.

Even though these funds – those granted to State and Local government – can more readily be influenced by the work done by public officials than the federal funds that flow directly to other recipients in the State – if we are thinking in terms of the total population, perhaps we should also compare the total federal funds the States receive. Federal Outlays in Maine provides us with the following:

State	Population		Federal Funds	Per Capita	Position
Alaska	302,000	\$	852,931,468	2824,28	1
New Mexico	1,016,000		1,575,234,814	1550.43	2
North Dakota	618,000		935,834,929	1514.30	3

Michigan	8,875,000	5,549,633,254	625.31	50
24 States	102,491,000	\$ 81,292,753,667		

Since the total amount of Federal funds awarded to the 50 States is \$199,260,828,853 and the total United States population is 202,425,000, the per capita distribution is \$984.37.

The 50 States are listed in order of their per capita receipts. Alaska leads the list with \$2824.28 per person while Michigan holds down position 50 with only \$625.31.

Maine, with \$789.64 stands 43rd. To move Maine up to the national per capita average of \$984.37 means our Federal fund total would have to approach a billion dollars - \$193,564,243 more than we get now - a 24% increase.

A couple of points of interest: 26 States receive more, and 24 States receive less, than the average. The States getting less account for 50% of the population but only 40% of the Federal funds.

Analysis by such a service unit as is suggested might justify such a balance or indicate avenues to explore.

# Function 3: Analyze Federal Circulars

Since dealing with the Federal Government is such a complex business, a significant function of the service unit would be to interpret, evaluate and report the probable impact of Office of Management and Budget Circulars. For example:

<u>Circular A-87</u> established uniform Government-wide guidelines for identifying costs under grants and contracts to States. The Circular is designed to provide that Federally assisted programs bear their fair share of costs except where restricted or prohibited by law. It removes several restrictions that had formerly been prevalent in the cost reimbursement policies of Federal sponsors, by providing that, except where otherwise restricted by the Circular:

- (1) All indirect costs of the grantee State Department allowable providing they are necessary for the efficient conduct of the grant program.
- (2) A necessary cost of a grant program is allowable <u>regardless</u> of where it is incurred within the State complex.
- (3) The cost of services provided by central service type agencies to grantee State departments are allowable and need not be supported by a transfer of funds between the departments involved.

Since many Federal programs require a "percentage" of participation by the State, it seems useful to be able to identify the 100% cost of the program – then there is a more realistic appraisal of the State's actual "matching effort."

<u>Circular A-95</u> furnishes guidance to Federal agencies for added cooperation with State and Local governments in the evaluation, review and coordination of Federal assistance programs and projects. This circular encourages the establishment of a "project notification and review" system – so coordinated planning is possible on an intergovernmental basis – Federal, State, Local, Regional. Thus, prior to actual implementation, the comments and views of State and local units charged with environmental protection are sought. Duplication of effort will come to light before it's too late. Mutually exclusive projects will not collide.

<u>Circular A-102</u> – the product of an interagency task force, is designed to simplify and standardize requirements imposed by the Federal agencies upon State and Local governments under grant-in-aid programs. Among other things, this task force established:

- 1. Standards for grantee financial management systems
- 2. Financial reporting requirements
- 3. Procedures for monitoring and reporting of program performance
- 4. Grant payment requirements
- 5. Budget revision procedures
- 6. Grant closeout procedures
- 7. Standard forms for applying for Federal assistance
- 8. Property management standards
- 9. Procurement standards

T.T. Pits might wonder about the make-up of this task force - wonder - if Maine thinking had any influence on the final establishment of these standards. Perhaps wonder if Maine's position is to be one of follow, comply, accept - or one of initiate, innovate, suggest, alter, modify, and influence.

# Function 4: Establish a Washington Office

Perhaps this service unit should add a dynamic new tool to the State's decision—making process by putting expertise at the Washington end.

If such an office can include Maine thinking in new Federal legislation.....

If Maine thinking can affect proposed regulations..... If Maine thinking can help alter criteria for qualifications in areas where we need help but do not quite fit..... If such an office can provide the State with good analyses so they can weigh wisely the probable affect of certain legislation.... If such an office will result in timely application for Federal assistance..... If such an office can accomplish one-half of these things..... If we seek not a destination but, rather, a better manner of travelling – why not get started now?

# Function 5: Utilize the Catalog of Federal Domestic Assistance

And yet another benefit which our service unit would provide would be to maintain, evaluate and distribute data from the "Catalog of Federal Domestic Assistance." The primary purpose of the Catalog is to aid potential beneficiaries in identifying and obtaining available assistance. Each program (and there are 1051) is described in terms of the specific type of assistance provided, the purpose for which it is available, who can apply for it, how to apply, who to contact for additional information – and the current level of effort being devoted to it.

Here's a reproduction of one such program:

#### 13.250 DISEASE CONTROL—SMOKING AND HEALTH

FEDERAL AGENCY: HEALTH SERVICES AND MENTAL HEALTH ADMINISTRATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

AUTHORIZATION: Public Health Service Act, Section 301, 42 U.S.C. 241.

OBJECTIVES: To reduce the death and disability associated with cigarette smoking by encouraging young people not to start smoking, by reducing the number of persons now smoking and by encouraging less hazardous ways of smoking.

TYPES OF ASSISTANCE: Project Grants (and Contracts).

USES AND USE RESTRICTIONS: As determined by specific program objectives, scope of work, and negotiated budget; for example (1) conduct pilot projects in schools, communities, and hospitals or within a national professional organization attempting to demonstrate effective smoking control programs, and (2) research into the mechanisms of uptake and cessation of smoking. Technical information is available to anyone.

#### ELIGIBILITY REQUIREMENTS:

Applicant Eligibility: Voluntary health agencies, community agencies, research organizations; unrequested proposals amenable to program objectives are reviewed in terms of program priorities and availability of funds.

Beneficiary Eligibility: Same as applicant eligibility.

Credentials/Documentation: Not applicable.

#### APPLICATION AND AWARD PROCESS:

Preapplication Coordination: None.

Application Procedure: By contacting the National Clearinghouse for Smoking and Health, Unrequested proposals amenable to program objectives are reviewed in terms of program priorities and availability of funds.

Award Procedure: Contracts for approved proposals that are to be funded are negotiated and awarded by the HSMHA Contracts Office.

Deadlines: None.

Range of Approval/Disapproval Time: 90 to 170 days.

Appeals: Not applicable. Renewals: Not applicable.

ASSISTANCE CONSIDERATIONS:

Formula and Matching Requirements: None.

Length and Time Phasing of Assistance: Fiscal year or less. POST ASSISTANCE REQUIREMENTS:

Reports: Quarterly or semiannual reports are usually requested as an integral part of the scope of work of these contracts.

Audits: A Federal audit will be made of records upon the completion of the contract.

Records: Normal requirements call for maintenance of records for approximately 3 years after completion of contract.

#### FINANCIAL INFORMATION:

Account Identification: 09-20-0343-0-1-653.

Obligations: (Grants and contracts) FY 71 \$1,309,000; FY 72 \$1,380,605; and FY 73 est \$1,568,000.

Range and Average of Financial Assistance: \$30,000 to \$200,000; \$65,000.

PROGRAM ACCOMPLISHMENTS: The Clearinghouse conducts its programs in the area of public information, and community program development, works with health professionals, and provides program research. It supports about 20 contracts involving schools, medical groups, interagency councils, and communities. Specific projects undertaken with PTA, American College of Radiology, NEA, as well as a community training center in San Diego, California.

REGULATIONS, GUIDELINES, AND LITERATURE: "Directory of Ongoing Research" PSH Pub. 1665, Government Printing Office, \$2.00; "Bibliography on Smoking and Health," PHS Pub. HSM-72-7518, Government Printing Office, \$2.75; "The Health Consequences of Smoking," 1971 edition, DHEW Pub. No. (HSM) 71-7513, \$1.75; 1972 edition, DHEW Pub. No. (HSN) 72-7516, \$0.75 Government Printing Office; Smoking and Health Bulletin (HSM) 72-7504. Numerous pamphlets on various aspects of the smoking and health problem, no charge.

#### INFORMATION CONTACTS:

Regional or Local Office: Not applicable.

Headquarters Office: Director, National Clearinghouse for Smoking and Health, Center for Disease Control, Health Service and Mental Health Administration, 5401 Westward Blvd., Bethesda, Maryland 20016. Telephone: (301) 496-7921.

RELATED PROGRAMS: 13.200 Disease Control—Consultation and Technical Assistance; 13.312, Cancer-Research Centers.

Such a service unit could sift the Catalog on a continual basis selecting likely programs for Maine and submitting them to the appropriate State or Local units for consideration, and, should the State or Local unit want to act, provide whatever assistance is necessary to get results. Perhaps even create such a catalog which describes types of aid available from State and Local agencies....

#### REPORT CONCLUSIONS:

#### WHAT TO DO....

It seems the answer to T.T. Pits question "How can we get more Federal help for Maine?" is simply: Eliminate conditions which make Federal participation difficult and establish conditions which make Federal participation desirable.

If we change "interfering" laws, provide "match" money, know our "total" cost, know the program, know the application process, and apply – we will, in all probability, find that there is Federal support available for any good idea.

Any good idea presented.

If we have the know-how and don't use it, we're no better off than those who don't have the know-how.

If we don't have the know-how - let's get it.

And make it useful.....

#### HOW TO DO IT....

Activate a Federal/State Service Unit that will:

- a. Put expertise on the scene where the federal thinking is converted to action – Washington.
- b. Build a unit of experts in grantsmanship the know-how required to present it right the first time.
- Direct analysts to sort the thousand or so federal aid programs into "fit" Maine and don't "fit" Maine – and suggest the "fit" ones to the right State department.
- d. Help coordinate Executive and Legislative planning so the "match" effort will get the most useful allocation.
- Train key departmental staff in the application and administration process as it applies to Federal requirements.

#### BASES TO TOUCH....

Then - when a good program needs extra support:

- a. Select the innovative alternative there are more wild cards.
- b. Deliver more than proposed.
- c. Keep in step with federal thinking the "now" needs.
- d. Encourage Federal participation but cut the cards—
- e. And for T.T. Pits provide him with understandable, updated reports at least annually reports that present data usefully....

<sup>1/</sup> Mileage in Federal parks, forests, and reservations that are not a part of the State highway

Includes 76 miles of streets in Federal parks.

system.

2/ Includes all roads, streets, and public ways not under State control in: Municipalities; delimited unincorporated places having an estimated population of 1,000 or more; areas which comprise the unincorporated fringe around cities of 50,000 population or greater, defined as urbanized areas by the Bureau of the Census

in the latest emmerstion or as determined by the State highway departments.

3/ Includes mileare of county roads under State control in all counties of Delevare, Morth Carolina, and Wort Virginia; 10 counties in Alaboms; all bet 2 counties in Virginia; seem county mileage in Nevada,

and in Kentucky; mileage designated as farm-to-market in Louisians; and the State-aid system in Maine. 4/ Includes mileage of State park, forest, institutional, toll and other roads that are not a part

of the State or local highway system.

5/ Includes mileage in Special Righway Districts and mileage not identified by administrative muthority.

6/ This mileage was erroneously emitted in prior years, since it was believed to be included in other systems.
