ACCOUNTANTS AND AUDITORS

SYSTEM SERVICE

BOSTON 50 CONGRESS STREET

May 11, 1940.

Hon. Lewis O. Barrows Governor of the State of Maine and Members of Executive Council Augusta, Maine

In accordance with your instructions, we have examined the published balance sheets of the State of Maine as of June 30, 1938, and 1939, and the statements of revenue and expenditures for the fiscal years ended June 30, 1938, and 1939, have reviewed the system of internal control and accounting procedures and, without making a complete detailed audit of all transactions, have examined or tested accounting records of the State and other supporting evidence, by methods and to the extent we deemed appropriate. In view of developments during our examination, hereinafter referred to, you have since enlarged upon your original instructions by requesting us to extend our examination as indicated for the period from January 1, 1932, the date of adoption of the Administrative Code, to March 31, 1940. We are now engaged on this work and, at its conclusion, a supplementary report will be rendered thereon.

BALANCE SHEETS

We are submitting herewith comparative balance sheets at June 30, 1938, and 1939, in which we have shown, in the first column, the assets and liabilities stated in the amounts appearing in the published reports, as prepared by the State Controller, and, in the second column, as determined by us. We have reclassified and combined some of the accounts appearing in the published statements, but the items have been identified with those appearing in the published report at June 30, 1939, in the following explanatory comments. We have followed the policy in preparation of the balance sheets of giving effect to the correction of accounting errors, but have not made provision for valuation of assets, nor have we included therein assets of the State which have not customarily been included in the general books of the State, with the exception of the Liquor Commission, for which separate accounting records are maintained. We invite your attention to the following comments and explanations as to the extent of our verification of the assets and liabilities appearing in the balance sheet at June 30, 1939:

ASSETS

CASH IN TREASURY

We have classified the cash resources of the State as f	ollows:
On deposit:	
Unrestricted \$3,67	79,033.07
Restricted 18	37,873.64
Federal funds for specific purposes	14,941.31
	\$4,411,848.02
In transit	
On hand	27,368.12
	\$4,457,065.27

We counted all funds in the hands of the State Treasurer on the morning of March 1, 1940. The total of the cash and cash items was found to be in agreement with the general books. Sealed statements from all depository banks were delivered to us, and we reconciled the balances in all depository banks as of February 29, 1940. In addition,

In compliance with footnote on page three of original report on file with the Secretary of State, permission has been given by Ernst & Ernst to reproduce report in this form.

we corresponded with all banks and received direct confirmation of the balances on deposit at June 30, 1939, and February 29, 1940. We reviewed reconciliations of the bank accounts as of June 30, 1939, prepared by the State Controller. We found that no accurate reconciliations of the principal active bank account were on file. In the reconciliation of this account as of December 31, 1938, there appeared an amount for unreconciled differences existing as of that date, which amount was used consistently in all subsequent reconciliations of this particular bank account. A similar situation existed with respect to one of the other principal accounts which partially offset the differences in the first account referred to. The effect of adjusting the net amount of unreconciled differences in these two accounts is to increase the cash on deposit in the amount of \$17,950.89.

We have eliminated from the cash on deposit and reclassified as accounts receivable the amount of \$6,219.32, representing the total amount of protested checks charged back to the State's accounts by the depository banks and not adjusted on the Treasurer's books. It has been the policy of the Treasurer to refer all protested checks to the departments in which they originated, and the responsibility has been placed on the departments to collect such items. Many of them are, however, not collected, and the list of protested checks amounting to \$6,219.32 submitted to us and included in the Treasurer's balances of cash on deposit disclosed items for each year from 1933 to date. Obviously, these old protested checks are of little, if any, value.

We have not segregated amounts due from the general funds to the Teachers Retirement Fund and to the Trust Fund for Lands Reserved for Public Uses, which amounts at June 30, 1939, were as follows:

Due to Trust Funds—Lands Reserved for Public	
Uses\$166,765.10	
Due to other trust funds	
	$$175,\!117.24$
Due to Teachers Retirement Fund	26,878.93
	\$201,996.17

As hereinafter commented upon, the amount due to the Trust Funds for Lands Reserved for Public Uses represents cash belonging to the Trust Fund which was withdrawn and used for general purposes in past years. At June 30, 1937, the amount due the Trust Fund for Lands Reserved for Public Uses was \$180,442.57. The amount due the Teachers Retirement Fund is provided for in the balance sheet in the appropriation balances, and represents amounts collected but not transferred to the Teachers Fund at June 30, 1939.

The amount shown for federal funds for specific purposes represented the total of eleven accounts restricted to the payment of certain classes of expenditures to which the federal government is a contributor.

BALANCES IN CLOSED BANKS

The bank balances in this classification represented the amounts due from closed or reorganized banks. The State has from time to time received dividends in liquidation, and the amount shown is the total of the unpaid balances at June 30, 1939. From the information available to us, it would appear that there will be a substantial loss to the State in the final liquidation of these accounts.

Attention is invited to the fact that no securities have been deposited with the State by depository banks to insure the State against loss.

ACCOUNTS RECEIVABLE

We are including as part of this report a summary of accounts receivable showing by classes of accounts the balances due for taxes from cities and towns, corporations, and others at June 30, 1939. There is also included a supporting schedule showing in detail the accounts included therein and the age of the unpaid balances. It will be noted that the total amount shown in the published balance sheet as of June 30, 1939, for the accounts included under this caption was \$1,781,093.14. The amount we have included in the adjusted balance sheet is \$1,769,102.95, a decrease of \$11,990.19. The details of the adjustments to which we have given effect, resulting in this net decrease, are explained in a separate exhibit entitled "Reconciliation of Accounts Receivable Differences."

We were unfavorably impressed with the records in the Treasurer's office pertaining to tax accounts receivable committed for collection. It was apparent that trial balances had not been proved for several years and the State could have lost substantial amounts through irregularities or failure to follow and enforce collections. Our comments on the extent of our verification of the accounts are as follows:

<u>Cities and towns</u>: At our request, detailed schedules of all unpaid accounts of cities and towns were prepared for us, and we sent by mail to the respective cities and towns a request that they confirm direct to us the correctness of the balances due as of June 30, 1939. At the date of writing this report replies have not been received from all cities and towns to which these requests were mailed, but no material differences have been reported to us by those from which replies have been received. In the preparation of the detailed list of unpaid balances, it was found that some accounting errors had been made in entering collections, and these adjustments are fully explained in the schedule above referred to.

Wild lands

Forestry districts

<u>Personal property</u>: It has not been customary for itemized trial balances to be prepared of the unpaid balances in these tax accounts for the reason that amounts involved are small and those not collected within two years are considered of doubtful value. At our request, detailed schedules of the unpaid taxes in each of these classifications were prepared for the three years 1937, 1938 and 1939. We have not attempted to establish the validity of these accounts by direct correspondence with taxpayers, and express no opinion as to their collectibility.

<u>Railroad companies</u>: We mailed requests for confirmation to all railroad companies whose accounts showed unpaid balances, as itemized on the schedule submitted herewith. The amounts due for 1939 taxes, with one exception, were paid in full before February 29, 1940. The amount due from the Lime Rock Railroad Co. is believed collectible, but no steps have been taken by the State Treasurer to enforce collection, as required by provisions of Section 75, Chapter 12, Revised Statutes of 1930.

<u>Corporations</u>: The published balance sheet at June 30, 1939, showed a total of \$67,354.56 for uncollected taxes assessed against corporations, representing assessments for the years 1929 to 1938, inclusive, as shown on the itemized schedule submitted herewith. Each year at August 1st a list of all unpaid corporation taxes assessed during the prior year is compiled and referred to the Attorney General for appropriate legal action. In a great majority of cases the amounts involved are small, and we are informed that the expense of collection does not warrant legal action. The policy of the Attorney General's office is to follow the procedure provided by statute with respect to suspension of the delinquent corporations from doing business within the State. Our examination of the tax accounts included in this classification was limited to a review of the procedures followed in compiling the lists of unpaid accounts submitted to us.

Insurance companies: The amount shown in the published balance sheet for unpaid taxes due from insurance companies has been adjusted to correct accounting errors in the amount of \$29,879.01. The principal error was one made in recording a transfer of \$29,181.12 from general revenues to the appropriation for the Insurance Department to cover additional expenses incurred by that department. Instead of being charged to general revenues, this amount was established as an asset, the effect being to relieve the budget for the fiscal year ended June 30, 1939, from the charge for this approved transfer. We corresponded with insurance companies to verify the other unpaid balances in the amount of \$693.03.

<u>Telephone companies</u>: We proved the amount due from telephone companies by listing the amounts shown in the subsidiary records, which were found to be in agreement with the total in the general ledger. We mailed a request to all telephone companies appearing on the list to confirm their unpaid balances, with only minor differences being reported.

<u>Trust and bauking companies</u>: The amounts shown as due from trust and banking companies for unpaid taxes were proved by us by listing the unpaid amounts in subsidiary records, which were found to be in agreement with the general ledger, with one exception. The unpaid balance appearing for the year 1934 represented an accounting error which has been adjusted by us. We mailed requests for confirmation of their accounts to all trust and banking companies whose accounts showed unpaid balances, of which \$71,742.94 represented assessments against closed banks for the years 1932 and 1933. Replies received from these banks indicate that the banks do not recognize these taxes as a liability. We found upon inquiry that the Attorney General had never been notified by the State Treasurer, as required by Section 75 of Chapter 12, Revised Statutes 1930, of these unpaid taxes. Upon the matter being called to his attention, he expressed the opinion that the collection of these taxes can be enforced, and he is now taking appropriate action for their collection. <u>Savings banks</u>: The amounts shown as due from savings banks represented the unpaid balances in the accounts of two savings banks, who replied to our request for confirmation that no liability existed. The Attorney General, however, has expressed to us the opinion that these accounts are collectible.

Cash advances: We have segregated from the cash in the treasury \$9,718.57, representing the amounts of advances for expenses and salary shown by the records in the Treasurer's offices as part of the office cash funds at June 30, 1939. The details of the items comprising this amount were not available at the date of our examination.

The policy of advancing money to officials and employees beyond actual requirements for official travel or expense has been subject to criticism. Council orders have recently been issued restricting the practice.

<u>Protested checks</u>: As hereinbefore commented upon, we have eliminated from the cash in treasury the amount of \$6,219.32 for protested checks of long standing included therein at June 30, 1939.

LIQUOR COMMISSION

The operations of this department are under the direct independent control of the Liquor Commission. Separate accounting books and records are maintained, and all purchases are made direct and not through the central purchasing bureau. The financial accounts of this department are kept on an accrual basis, although the earnings are taken up in the general funds on a cash basis as transferred. As a result of this difference in accounting procedure, the earnings as shown by the reports of the Liquor Commission differ from the earnings, representing cash receipts only, included in the general funds. These differences for the two years under review are as follows:

	Earnings Per Liquor Commission	Taken Into General Funds	Difference
1938 1939	\$3,299,036.14* 3,173,055.89*	\$3,295,598.11* 3,054,169.23*	\$ 3,438.03 118,886.66
TOTAL	\$6,472,092.03	\$6,349,767.34	\$122,324.69

*Includes deficiency tax.

Differences resulting from the same cause have existed in prior years, with the result that at June 30, 1939, the balance sheet separately prepared by the Liquor Commission indicates that at that date there was a total of \$700,431.86 of accumulated earnings retained by it since the inception, on November 10, 1934, of the Commission. Of this amount \$364,372.18, representing the accumulated earnings to June 30, 1935, was by statute established as the working capital of the Liquor Commission, leaving \$336,059.68 for free accumulated and retained earnings, determined under the accrual basis of accounting adopted by the Commission, which had not at June 30, 1939, been taken up in the general funds of the State.

All cash, on deposit and in transit, appearing upon the statement of the Liquor Commission at June 30, 1939, was verified by us by direct correspondence with the depository banks, and by tracing such funds in their later transfers to the general funds. We did not visit the stores operated by the Commission throughout the State to verify the cash funds in the individual stores, which amounted to \$6,900.00. We reviewed a list of the accounts receivable included in the statement of the Commission in the total amount of \$13,809.57, representing charges to vendors for inferior goods, claims for shortages, etc. We noted that, with the exception of one item of \$6,374.07, all of these accounts were subsequently cleared, either through the receipt of cash or credit memos. applied against subsequent purchases. With respect to the item referred to, we were informed that the vendor against which the claim had been made in the amount of \$6,374.07 was in bankruptcy and the probabilities of collection were not good. We made no test of the quantities of the merchandise owned by the Commission at June 30, 1939, but limited our examination to inspection of individual store reports and a review of the accounting control maintained of the operations of the stores. We were favorably impressed with the accounting control and procedures followed, the completeness of the reports and statistical information made available to us, and the comparisons which are made between stores as a check against their operations. We also visited a representative store, counted the cash, verified the inventory against the running book inventory, and generally observed procedures.

We examined the list of unpaid accounts with vendors in the amount of \$45,049.26 and inspected all vouchers entered in the month of July to satisfy ourselves that a proper cut-off had been made at June 30, and that the liability for all merchandise included in the inventories at June 30 and expenses accrued to that date were properly provided for in the books before closing. We made a test check of the income from the tax on beer and the fees received from licenses issued.

BANK STOCK SECURITIES

We personally inspected the stocks of Maine trust companies included in the balance sheet at June 30, 1939, at \$34,412.50. These stocks were acquired in partial liquidation of balances in closed banks and are carried on the general books at their cost.

CASH AND SECURITIES IN SPECIAL AND TRUST FUNDS, GUARANTY AND

TRUST DEPOSITS

CASH IN SINKING FUNDS

These accounts appeared as assets in the published balance sheet at June 30, 1939, in the following amounts:

Cash and securities in special and trust funds, guaranty and trust deposits Cash in sinking funds	\$2,979,070.70 152,435.41
	\$3,131,506.11
These fund asset accounts are offset in the published balance sheet	by:
Reserve—special and trust funds, guaranty and trust deposits Reserve for sinking funds	

We found that there was a duplication in the listing as a separate asset and separate liability account the amount of \$152,435.41, as the cash in the sinking funds in this amount was included in the item of \$2,979,070.70. We have also eliminated the amount of \$181,931.36, representing a duplication in the published balance sheet of cash in savings banks in the amount of \$177,531.36, and trust fund stock securities of \$4,400.00, which also appear as a separate item on the published balance sheet.

\$3,131,506.11

We are submitting herewith as part of this report a summary of the trust funds and guaranty deposits included in this classification, and a separate exhibit setting forth the details of the cash and securities. We personally inspected all securities in the possession of the Treasurer at March 1, 1940, for the account of the special and trust funds and guaranty and trust deposits, and reconciled the securities examined with the accounts at June 30, 1939. We found differences to exist between the securities on hand and the balances shown in the general books, and, in order to reconcile these differences, it became necessary for us to review some of the trust fund accounts from July 1, 1932 to date. As a result of this examination of the accounts, we found that the general books were understated in the net amount of \$21,665.45, the principal explanation for this difference being that at various times in the past cash had been withdrawn from the special cash deposits of the trust funds for the purchase of securities. At the time of such withdrawal the trust funds were reduced by the amount of the withdrawals. Subsequently, when securities were purchased with the cash so withdrawn, corresponding entries increasing the trust funds for the securities purchased were not made. Other minor adjustments resulted from the policy of using the proceeds from the sales or maturities of securities towards the purchase of other securities without proper recognition being given to the profits or losses on the securities disposed of.

It has been the policy of the State Treasurer generally, when trust fund securities mature or are sold, to credit the proceeds to a special account "State Trust Fund." The proceeds of securities belonging to one or more trust funds may be credited to this account and commingled therein. When securities are purchased for the respective trust funds from the proceeds deposited in this special account, an exact accounting to the respective trust funds is not made. It would appear that through this procedure some trust funds have benefited at the expense of others, but these differences have not been material in amount. At June 30, 1939, there appeared in the published statement among the liabilities, an item of \$5,120.29 designated "State Trust Fund," and another entitled "Levi M. Stewart Fund Income \$2,000.00." These accounts represented, as above explained, the proceeds from the disposition of trust fund securities, the cash from which was included in the Treasurer's general cash funds.

All cash in savings banks and time deposits included in the trust fund assets were verified by us by direct correspondence with the depository banks. We also corresponded with insurance companies to verify the cash and securities deposited by those companies under the legal requirements in connection with their doing business within the State. In our verification of the securities we found that there had been returned to an insurance company prior to June 30, 1939, \$25,000.00 in securities, and also that \$10,000.00 of Workmen's Compensation deposits had been returned to the depositing company, and these changes had been properly reflected in the general ledger accounts. However, in preparing the published statement the amount of \$35,000.00 was included in the amount of \$2,979,070.70 for "Cash and Securities in Special and Trust Funds, Guaranty and Trust Deposits," and the corresponding liability account was also overstated in the same amount.

We verified all changes in trust fund investments during the two years ended June 30, 1939, and accounted for all income earned. We examined a list of the balances to the credit of teachers who have contributed to the investment fund under the Teachers Retirement Plan. We did not correspond with the teachers nor otherwise confirm their credit balances.

There was included in the published statement in the liabilities, an account entitled "Interest on State Trust Funds," \$129,259.33. We found that this account represented accumulated interest earned on trust fund assets since 1934. Of this amount \$127,164.84 represented interest earned on Permanent School Fund, which should, in our opinion, have been credited each year to general revenues inasmuch as general revenues have been charged annually with the appropriation for the purposes for which this fund was created. We have also eliminated other small credits included in this account in error.

LANDS RESERVED FOR PUBLIC USES

There were included in the published statement at June 30, 1939, the following accounts, which we have reclassified and adjusted as follows:

ASSETS	Per Published Report	As Adjusted	Difference
Cash in savings banks	\$177,531.36	\$177,531.36	\$0
Investments	239,354.25	191,750.00	(47,604.25)
Trust fund—stock securities	4,400.00	4,400.00	0
Farm Lands Loan Commission— loans Foreclosed property	318,976.27 0	$223,650.31 \\ 100,390.43 $	5,064.47
	\$740,261.88	\$697,722.10	\$(42,539.78)
LIABILITIES			
Trust Fund-principal	864,487.20	864,487.20	0
Trust fund-suspense	45,685.41	0	(45,685.41)
	\$910,172.61	\$864,487.20	\$(45,685.41)
AMOUNT DUE FROM GENERAL FUND	\$169,910.73	\$166,765.10	\$(3,145.63)

Our comments on our verification of the trust fund assets and the explanations for the differences set forth above between the published statement and as adjusted are as follows:

We verified all deposits in savings banks segregated for this fund by direct communication, and we also confirmed the deposits in closed banks. We personally examined all securities held by the Treasurer for the account of this trust fund, and audited the transactions in securities for the two years ended June 30, 1939. We noted that there were included therein two investments which were not legal investments for the purposes of this fund, as follows:

City	\mathbf{of}	Manchester, New Hampshire	\$11,000.00
City	of	Newport News, Virginia	500.00

\$11,500.00

We have adjusted the investment account as shown in the published statement, as follows:

Investment account per published statement Deduct:		\$239,354.25
Cash in closed banks (also included in the		
	\$45,685.41	
To eliminate savings account in the Lincoln Trust Co., which was closed into general		
funds in April, 1938. An attempt was made to correct this error in August, 1938, by		
increasing the investment account by this amount	5,920.00	
To eliminate premiums paid on investment, adjusted subsequent to June 30	50.20	
	\$51,655.61	
Add accumulated interest on savings accounts which was credited in error to the invest- ment account	4,051.36	\$ 47,604.25
AS ADJUSTED		\$191,750.00

Our verification of the mortgage loans included correspondence with the mortgagors with respect to the total amount of \$223,650.31, represented by mortgage notes which we personally inspected. We examined the record of interest payments and noted that interest was in arrears on these mortgage loans in the amount of \$11,250.84 at February 28, 1940. There was included in the published report in "Farm Lands Loan Commission —Loans," foreclosed property in the amount of \$100,390.43, which we have segregated. Our examination with respect to the foreclosed property was limited to an inspection of documents on file supporting the foreclosures. We found that a net profit of \$5,064.47, accumulated over the years from 1932 to 1939 inclusive on sales of foreclosed property, had been credited to the loan account. We have increased the book carrying value of the loan account in this amount. With respect to the trust fund accounts, our examination was limited to listing the amounts to the credit of various political subdivisions of the State, the total of which accounts agreed with the principal amount of the trust funds shown above as \$864,487.20.

The amount of \$166,765.10 due from General Fund represents amounts of trust fund assets which presumably have been taken into the general funds of the State in past years and not re-invested. At June 30, 1937, this difference was \$180,442.57. The decrease in the deficiency in this trust fund during the two years is explained by additional investments which have been made from the general funds.

We have reviewed the position of this trust fund from July 1, 1921, to June 30, 1939, and are submitting as part of this report an exhibit showing the amounts due from and to General Funds during this period.

We verified the income earned on savings accounts and securities for the two years ended June 30, 1939, and found that all net income earned on this trust fund was credited to the Department of Education, departmental operating account.

LIABILITIES

We have classified and summarized the liabilities, other than funded debt, specific funds and unexpended appropriations, at June 30, 1939, as follows:

Accounts payable	\$1,160,253.19
Tax payments received in advance	
Unemployment compensation fund	97,602.83
Dog licenses to be refunded to cities and towns	$53,\!453.69$
Public administrator's fund	34,780.08
Receivers' fund for defunct banks	18,646.12
	\$1,464,335.13

Accounts Payable

The State laws provide that all unpaid bills incurred by all State departments prior to June 30 of each year, for which invoices are received in July, shall be provided for at June 30, and the proper appropriations charged. We examined all of the items comprising the total amount of \$348,297.19 provided on the books, and found that all came within the provisions of the statutes. However, we generally reviewed all warrants entered after July 1, 1939, giving consideration only to those in excess of \$25.00, and found that there were additional warrants in the total amount of \$811,956.00, the liability for which, in our opinion, should have been provided for before the books were closed at June 30 and included in the published statement. We have included in this amount of additional liabilities only those invoices, claims, etc., received by the departments or by the Controller's office prior to August 1, 1939, as evidenced by dating stamps, examination of which indicated that the liabilities had been incurred prior to June 30 for expenses, etc., which should have been charged to the appropriations for the fiscal year then ended. Similar adjustments have been made by us for the unentered invoices at June 30, 1937, and June 30, 1938, as shown on a separate schedule attached hereto.

Tax Payments Received in Advance

We have included in the amount of \$99,599.22 three items shown separately in the published statement, as follows:

Tax on bank stocks—1939	\$89,025.18
State tax on cities and towns-1939	
Tax on wild lands—suspense	2,296.61
	·

\$99,599.22

We verified the amounts shown as prepayments of tax on bank stocks by examination of the records in the Treasurer's office of payments received in June from national banks and trust companies in the State on assessments made as of June 1st. This assessment, while made at that date, is not set up on the books as an account receivable at June 30. The revenue from this source is later distributed in full to cities and towns under the provisions of Section 78, Chapter 12, 1930. The prepayments of the State tax on cities and towns, shown above in the amount of \$8,277.43, were verified in a similar manner. This tax assessment is made as of April 1st, payable on or before December 1st, but the assessments are not entered on the books as tax accounts receivable until December 31. The item of "Tax on Wild Lands—Suspense" in the amount of \$2,296.61 represented partial payments received against assessments included in unpaid taxes on wild lands. When the balance of amounts due is received proper credit will be applied to the respective asset account. We were furnished with a list of the tax payments included in this suspense account, but made no further verification thereof.

Unemployment Compensation Fund

The amount of \$97,602.83 included as a liability to the Unemployment Compensation Fund represented amounts received in payment for unemployment taxes which at June 30, 1939, had not been transferred for deposit in the Federal Reserve Bank.

Dog Licenses to be Refunded to Cities and Towns

We have included in one amount two items appearing in the published statement, as follows:

Dog licenses to be refunded	\$49,197.69
Dog licenses—1939	4,256.00
	\$53,453.69

The larger amount represents the amount of dog licenses collected in 1938 which had been definitely pro-rated or allocated to cities and towns under the appropriate statute. We verified this amount by examination of detailed lists of the credits to the various cities and towns in the State and also by correspondence in those cases where cities and towns had unpaid balances of taxes due the State against which these credits for dog license refunds are deductible when taxes are paid. The smaller amount of \$4,256.00 represents collections received in advance on 1939 dog licenses, which we verified by examination of appropriate cash records.

Public Administrator's Fund

This amount of \$34,780.08 represents estates of decedents deposited with the State Treasurer in those cases where rightful heirs were unknown. These funds are held until such time as claimants establish their legal right to the estates and are then distributed by the State Treasurer upon legal authority of the Council, as approved by the Governor. A list of such deposits is published annually in the report of the Treasurer of State, which we verified by comparison with the records in the State Treasurer's office.

Receivers' Fund for Defunct Banks

This amount represented the deposits transferred to the State by receivers of closed banks for the account of depositors in those banks who could not be identified or located. We examined detailed lists of depositors, as certified by the Clerks of Court, covering the original amounts paid into the State on nine banks, all prior to June 30, 1937. The State Treasurer's office does not maintain detailed depositors' accounts, but as withdrawals are from time to time properly authorized, the amounts of such authorized withdrawals are noted on the original list. We examined the warrants and authorities for such withdrawals for the two years ended June 30, 1939.

APPROPRIATION BALANCES

On the published balance sheet at June 30, 1939, the unexpended appropriation balances appeared as follows:

Unexpended	balances—appropriations	\$5,374,887.08
Less special	accounts receivable (Highway Loan Fund due)	245,225.52

\$5,129,661.56

We are submitting herewith an exhibit in which appear the appropriation balances as reclassified and adjusted by us. The changes which we have made in the appropriation balances are fully set forth in a separate exhibit entitled "Reconciliation of Unexpended Balances". It will be noted that the principal changes result from the provision made for additional accounts payable at June 30, 1939, upon which we have hereinbefore commented.

FUNDED DEBT

We have prepared and attached hereto a condensed statement of funded debt indicating changes therein for the period from July 1, 1937, to June 30, 1939; also is included an exhibit showing the maturities of the issues outstanding at the latter date. Opinions were furnished us by the Attorney General covering the legality of bonds issued during this period, and we traced the proceeds of new issues to the funds for which they were designated, noting that the proceeds credited to highway funds included the premium realized from the sale. We examined bonds called or matured during the period from July 1, 1937, to March 27, 1940, and reconciled the principal amount of bonds outstanding, as shown by the bond registers, with the bonds outstanding per the general books at June 30, 1939.

The above-mentioned statement of funded debt also includes a summary indicating outstanding bonds of each classification at June 30, 1937, 1938 and 1939. No temporary borrowings were made during the two years under review.

In general, the State does not provide for accrued interest on its funded debt, but charges to expense each month coupons presented for payment. We have computed accrued interest at the end of each of the last three fiscal years on the amount of bonds outstanding, without consideration of matured coupons which had not been presented for payment, as follows:

	June 30, 1939	June 30, 1938	June 30, 1937
Computed accrued interest Accrued interest included in unexpended appropriation bal-	\$349,953.33	\$373 ,0 28.32	\$391,689.15
ances	8,253.00	44,468.00	33,608.00
LIABILITY NOT REFLECTED ON BOOKS	\$341,700.33	\$328,560.32	\$358,081.15

On June 30, 1939, the appropriation balances for accrued interest of \$21,650.00 on Maine Improvement bonds and \$11,460.00 on State Pier bonds were transferred to the State Contingent Fund. There was also transferred to the Contingent Fund a balance of \$60,000.00 in the reserve to retire State Pier bonds, notwithstanding there were still outstanding at that date \$60,000.00 principal amount of State Pier bonds which matured, \$20,000.00 March 1, 1936, and \$40,000.00 March 1, 1937, which had not been presented for payment. The resulting balances of these three accounts at June 30, 1937, 1938 and 1939 are presented below, indicating an inconsistency of treatment:

	June 30, 1939	June 30, 1938	June 30, 1937
Reserve to retire State Pier bonds	-0-	\$68,000.00	\$73,000.00
Accrued interest — Improvement bonds Accrued Interest — State Pier	-0-	21,500.00	21,520.00
bonds	-0-	11,260.00	11,820.00

The effect of the entry transferring the June 30, 1939, balances in these accounts to the State Contingent Fund was to add \$93,110.00 to the balance of the sinking fund reserve, but had no effect on budget balances.

While we did not make an audit of coupons redeemed by the State Treasurer, we noted that coupons had been paid in error on bonds of an issue of November 1, 1926, which were called May 1, 1939. Ten coupons on bonds No. 901-910 inclusive were paid as of November 1, 1939. Apparently a charge of \$200.00 should have been made against the bank presenting the coupons for payment, but we were informed that up to March 27, 1940 adjustment had not been made.

DEFICIENCY-1936-7

In our balance sheet at June 30, 1939, appears an account "Deficiency 1936-7"— \$1,092,111.29, which does not appear in the published report, and arises from correcting the books to conform to the action of the State Legislature. At its meeting in February, 1937, the Legislature appropriated the total sum of \$2,044,383.16 for various purposes, the amount to be charged to "1937 Deficiency Account". It was further provided that this deficiency account be annually amortized by the application of part of the excise tax on malt beverages.

This action of the Legislature was not supported by the accounting records, with the result that no "1937 Deficiency Account" appeared on the books at June 30, 1939; neither had it been fully amortized by income from excise taxes on malt beverages. We have reviewed the records of the Legislature and the accounts with respect to this "1937 Deficiency Account" and have adjusted and corrected the figures accordingly by charging "1937 Deficiency Account" and crediting "Sinking Fund Reserve" with the sum of \$1,092,111.29, being the correct balance at June 30, 1939, which conforms to the action of the Legislature. The analysis of this account is as follows:

Deficiency to be recovered	\$2,044,383.16
Apportionment of 1936-7 deficiency tax revenue: From February 25, 1937, to June 30, 1937 \$356,926.08 For the year ended June 30, 1938 495,345.79	852,271.87
BALANCE JUNE 30, 1938	\$1,192,111.29
Apportionment of 1936-7 deficiency tax revenue: For the year ended June 30, 1939	100,000.00
BALANCE JUNE 30, 1939	\$1,092,111.29

REVENUE, RECEIPTS, AND EXPENDITURES

We have prepared and included herewith a comparative summary statement of revenue, receipts and expenditures for the two years ended June 30, 1939. Also are included itemized schedules which set forth the details of the various sources of revenue and receipts, and a schedule of expenditures by departments. From this exhibit of revenue, receipts and expenditures, it will be noted that there was an excess of revenue and receipts over expenditures (budget balance) for the two years under review, as follows:

Year	ended	June	30,	1938	 \$209,639.47
"	"	"	"	1939	 96,265.13

The principal difference between our schedules and those appearing in the published report are that we have included revenue or credits accruing to the State during each fiscal year, whereas, the published reports are on a cash basis; also, we have included in our figures only revenue receipts, whereas, the published reports included all receipts whether they were revenue receipts or payments in settlement of outstanding balances owing the State at the beginning of each of the respective years.

We have made two general classifications in our schedules; those amounts credited to general funds, and those amounts credited to specified appropriation accounts. The first classification represents revenue and credits which become available to meet general appropriations made by the Legislature for each year. The amounts credited to specified appropriation accounts represent receipts which, by law, become available exclusively for the use of certain departments. We have indicated by asterisks those items included under this classification which cannot be used for any other purpose than that specified in the law creating the tax. The other items are available to the department for its use, but at the end of the year any balances remaining may be lapsed to the sinking fund reserve to supplement general revenue in meeting legislative appropriations. One exception to this last statement is that all funds credited to the Highway Commission can be used only by that department and are never lapsed to the sinking fund reserve, and none were lapsed during the two years under review.

In connection with our examination, we checked all transfers of appropriations and found legal authority for all such transfers, with the exception of those itemized on a separate schedule submitted herewith. We received an opinion from the Attorney General that these transfers could legally have been made, but that there should have been Council orders to cover them. It would appear that the former controller was negligent in not having brought these journal transfers to the attention of the Governor and Council for appropriate action.

SINKING FUND RESERVE

We have included as part of this report an analysis of the Sinking Fund Reserve for the two years ended June 30, 1939, and a reconciliation of Sinking Fund Reserve, which explains the changes to which effect has been given in the adjusted balance sheet, as a result of which the Sinking Fund Reserve account shows a balance of \$1,817,847.92 at June 30, 1939, as compared with \$185,734.24 appearing in the published statement.

DEFALCATION

Soon after we began our examination, we visited the garage operated by the Highway department and began an examination of its accounts. This garage was permitted to sell automobile accessories and supplies to State employees and others, and a very active business has been carried on. This practice has now been discontinued by your order. Under the requirements of the Code, all cash receipts should have been regularly delivered to the State Treasurer for deposit. Instead of following this procedure, however, the daily cash collections of the garage were, at the request of the former Controller, improperly first turned over to his office. We found, as a result of our audit, that many of these collections never reached the office of the State Treasurer.

In addition, we found that a large number of checks made payable to the State Treasurer were cashed by the State Treasurer's office at the request of the former State Controller, and the money not accounted for by him. The total amount of all irregularities revealed to the date of preparing this report is approximately \$157,000.00, of which \$26,420.00 has been recovered from the former Controller.

We have prepared the following summary of defalcation, indicating that irregularities occurred at least as early as 1931 when the former Controller was bookkeeper in the highway garage prior to the inception of the administrative code, and continued up to the time of his leaving the office on April 1, 1940.

	Irregular Checks	Highway Garage Receipts Not Accounted For	Total
1931	\$ -0-	\$ 1,238.97	\$ 1,238.97
1932	-0-	-0-*	-0-
1933	-0-	3,264.28	3,264.28
1934	8,786.83	4,687.23	$13,\!474.06$
1935	17,951.71	7,338.27	$25,\!289.98$
1936	20,871.70	$6,\!573.49$	$27,\!445.19$
1937	$13,\!240.91$	$8,\!696.34$	21,937.25
1938	14,984.48	8,782.92	23,767.40
1939	$23,\!167.45$	$13,\!622.63$	36,790.08
1940	3,502.30	804.67	4,306.97
	\$102,505.38	\$55,008.80	\$157,514.18

*Not audited because of missing and poor records available.

We also have reviewed in a preliminary way the records for the year 1930, and it would appear that there were receipts from the garage sales not accounted for in that year.

In addition to unaccounted for funds of the highway garage and State Treasurer's checks, there are claims against the former Controller for personal bills charged to State expense and for irregular expense vouchers. Our work covering the defalcation has not yet been completed, and when it is, a full supplementary report will be rendered on this phase of our examination.

UNRECOGNIZED ASSETS, LIABILITIES AND RESERVES

The adjustments made by us in the published balance sheet are only those necessary to correct accounting errors and for failure to recognize the requirements of existing statutes. Other adjustments, in our opinion, would be required to correctly show the financial condition of the State. In the absence of appropriate action by the State Legislature, we have made none of such further adjustments in the balance sheet presented.

However, as a matter of information, we have included an exhibit on which is set forth the more important of the unrecognized assets, liabilities and reserves at June 30, 1939, which we have summarized as follows:

Additional assets		\$1,591,436.83
Additional liabilities	\$341,700.33	
Reserves required	525,000.00	866,700.33
NET ADDITION		\$ 724,736,50
THE ADDITION		φ 124,130.00

We have not attempted to allocate such adjustments as they apply to revenue receipts, expenditures, or appropriation balances and may affect this or prior periods. We have not included in the unrecognized assets any amount for the claims now being made for losses resulting from defalcations of the former Controller, although more than \$26,000.00 has been recovered at this date.

ROBBERY OF AUBURN REGISTRY

As requested, we reviewed various records of the Auburn branch automobile registration office, including the report of the State Department of Audit, dated November 22, 1938, all pertaining to the robbery which took place at Auburn between Saturday night, February 26, 1938, and Monday morning, February 28, 1938. The audit report indicates a gross shortage of \$43,215.77. Our work has been directed toward ascertaining whether the office could reasonably have had that amount of money on hand at the time of the robbery.

Inasmuch as the applications accompanying payments by car owners were also stolen or destroyed before recording, the actual amount of undeposited collections could not be determined from the records. However, from other sources we have estimated that a substantial amount of undeposited collections was on hand. The heaviest collections of the year normally occur on the last few days of February, as the new plates must be used beginning March 1st.

The following table shows in comparative form collections deposited during the last eight days of February and the first six days of March for 1937, 1938 and 1939:

1939	1938	1937
\$ 8,603.75	\$ 5,976.51	\$ 6,862.25
10,210.66	4,696.62	5,683.11
9,310.75	5,803.96	8,062.23
10,883.76	9,286.71	5,285.95
14,683.31	8,258.63	7,807.03
13,516.18	8,168.60	13,383.40
17,335.28	-0-	12,950.08
16,863.36	9,934.07	10,728.58
10,154.11	5,862.74	4,988.75
7,085.71	4,605.19	14,889.60
4,337.51	5,043.21	14,666.69
5,331.43	4,638.88	17,241.42
2,359.79	4,458.17	10,151.28
2,658.21	3,310.16	7,319.18
\$133,333.81	\$80,043.45	\$140,019.55
	$\begin{array}{r cccccccccccccccccccccccccccccccccccc$	$\begin{array}{c ccccccccccccccccccccccccccccccccccc$

By comparison, it is apparent that collections for Saturday, and probably those of prior days not then deposited, were substantial. We were informed that the Department, due to heavy collections, was not able to deposit all receipts promptly and that sometimes several days elapsed before deposits were made. This is evident from the two deposits made on February 24 and February 25, 1938, as follows:

Collections of	Thursday Frid. February Febru 24 25	
February 19—Saturday 21—Monday 22—Tuesday 23—Wednesday	\$ 14.01 -0- -0- 8,242,62	\$-0- 13.30 953.56 5,019.41
23—Weinissday	\$8,258.63	\$8,168.60

These deposits evidently represent two or three days' collections.

Assuming collections of \$15,000.00 per day, except \$10,000.00 for Saturday, at that time a balance of undeposited collections on Saturday night, February 26, 1938, would have been at least \$37,816.00.

As a test, we communicated with five hundred car owners whose payments were stolen, asking them to advise us, if possible, the dates they made payments. The replies received indicate heavy payments subsequent to February 20, 1938, supporting the theory that a substantial amount of collections was on hand February 26, 1938.

From an examination of such information as we were able to obtain, we are of the opinion that the Auburn registration branch could have had on hand an amount of undeposited collections approximating the amount of money stolen in February, 1938.

Hon. Lewis O. Barrows Governor of the State of Maine Augusta, Maine

Dear Sir:

In connection with our examination of the published financial statements of the State of Maine, upon which we are currently engaged, we have developed a situation which we believe should be called to your immediate attention in advance of the completion of our work and final report.

We have included in our program of audit a test check of recorded revenues and expenditures and a review of the internal control. In connection with these tests we have made a comparison of the records in the highway department garage covering sales of automobile tires and accessories to cities and towns and State employees with the recorded receipts in the State Treasurer's office. This comparison indicates that for a long period of time, probably from the inception of the Code in 1932, substantial amounts of currency have not been accounted for. Our investigation indicates that the disappearance of the currency has occurred between the delivery to the Controller's office of the daily receipts of the garage and the deposit made by the Controller with the State Treasurer's office. These garage receipts are reported to us by various garage employees to have been delivered direct to Mr. William A. Runnells, Controller, or, in his absence, to his secretary who, in turn, has delivered the sealed envelopes from the garage to the Controller. We have, at the time of writing this preliminary report, reviewed the records for the period from January 1, 1936, to March 31, 1940. As a result of this audit it would appear that an amount in excess of \$35,000.00 is unaccounted for for the above stated period. We have instituted a search for garage records for the period from 1932 to 1935 inclusive. We have reviewed the Controller's deposits with the State Treasurer for 1932 to 1935 inclusive, and have satisfied ourselves that this situation with respect to unaccounted for cash sales of the garage has been a continuing affair since the inception of the Code in 1932.

We also have in process an investigation in the Controller's office of checks issued ostensibly in payment for inter-departmental charges for accounting machine rentals which we find were not in all cases re-deposited through the State Treasurer's office to the credit of the Bureau of Accounts and Control. Some of these checks were cashed at the State Treasurer's office and the cash delivered to the Controller. No satisfactory explanation has as yet been made to us as to why these checks were cashed, nor as to the disposition of the proceeds thereof. Information which we have at this date indicates that the total of these unaccounted for funds may be substantial in amount. There is every indication that this apparent mis-application of funds also extends back through earlier years. The possibility of other irregularities in the Controller's office is indicated, and these are receiving our attention. Will you please let us have your instructions as to the extension of our work to fiscal years prior to that ended June 30, 1938, which do not come within the scope of our present engagement. We believe, and recommend to you, that the period to be covered should extend back to the initiation of the Code in 1932 when the present Controller took office.

We are making this interim report so that you may be advised of the recent developments and can take such action as you deem appropriate.

Very truly yours,

ERNST & ERNST

April 11, 1940

Hon. Lewis O. Barrows Governor of the State of Maine Augusta, Maine

Dear Sir:

In our letter of April 9, 1940, we reported to you that checks issued in payment for inter-departmental charges had been cashed at the State Treasurer's office by William A. Runnells, former Controller. Several additional instances of these irregular transactions have been disclosed by our investigation since our previous letter to you. In every instance the checks were made payable to "Treas. of State", and underneath is designated the department to whose credit the check should be applied. A number of these checks are for substantial amounts, as one example of which we have a check dated April 24, 1939, for \$3,680.00. This check was cashed at the Treasurer's office by the former Controller, and the proceeds thereof are not accounted for. No satisfactory explanation has been made to us why the office of the Treasurer of State should cash checks made payable to the Treasurer of State and which should have been known to his office as transfers of funds between departments.

We believe that we should at this time bring to your attention the fact that the principal active bank account which the State carries in a local bank was not reconciled for the period from May 31, 1932, to December 31, 1938. There is an unreconciled difference, substantial in amount, in this account as of the latter date, which has not been adjusted on the books. A somewhat similar situation exists with respect to another account. We are informed that these facts were known in the Treasurer of State's office, to the State Auditor, and to the former Controller.

This information is submitted in advance of our full report.

Very truly yours,

ERNST & ERNST

April 17, 1940

Hon. Lewis O. Barrows Governor of the State of Maine Augusta, Maine

Dear Sir:

In connection with our examination we are submitting herewith a partial list of checks drawn to the order of the Treasurer of State, care Bureau of Accounts and Control, during the period from July 1, 1937, to March 31, 1940, which do not appear in the cash records maintained in the Treasurer of State's office as credits to the Bureau of Accounts and Control. We are informed that this type of Treasurer's check was customarily issued to cover inter-departmental charges. We have indicated on the attached schedule those checks which bear upon their face evidence of having been cashed. We have satisfied ourselves that the proceeds from none of these checks have been credited to the Bureau of Accounts and Control.

This schedule has been prepared at your request in advance of the completion of our examination and does not purport to include all checks of this character which may be found in the subsequent development of our examination.

We have in course of preparation a similar exhibit of checks of a like character, the proceeds from which were not accounted for during the period from January 1, 1932, to June 30, 1937.

Very truly yours,

ERNST & ERNST
