This report has been produced as required by 5 MRSA 17102 (10), which states that the MSRS Board of Trustees must publish an annual report showing "the fiscal transactions of the retirement system for the fiscal year and the assets and liabilities of the retirement system at the end of the fiscal year; and [t]he actuary's report on the actuarial valuation of the financial condition of the retirement system for the fiscal year."

Costs for producing this report were paid from the Administrative Fund of the Maine State Retirement System.

This report is printed on recycled paper that can be recycled again.

EXECUTIVE DIRECTOR'S REPORT

It is fair to say that the single most important factor affecting the Maine State Retirement System in fiscal 1992 and 1993 was the downturn in the Maine economy that began in the late 1980s. Notable for its intensity, breadth of impact, and duration, the economic slide touched every aspect of life in Maine and had measurable and significant effects on some.

For the Retirement System, the effects of the downturn were major, though caused indirectly. They impacted the System's funding and benefit structure and altered, albeit for the short term, the process by which one of the System's fundamental actuarial assumptions is established. The impacts were the result of the absolutely central place held by the State's budget in the attention of the executive and legislative branches of Maine State government. This focus of attention was commanded by the precipitous decline in State tax revenues. The gulf between the State's revenues and expenditures, and the fact that retirement costs for the State's employees and teachers accounted for a significant and growing portion of the State's budget in fiscal 1992 and 1993 meant that reducing the State's retirement contributions was irresistibly attractive to the executive and legislative branches in the two-years-and-counting budget crisis—irresistible, despite an increasingly sophisticated understanding of the troublesome short- and long-term implications that some of the steps taken to reduce contributions would have for

the System.

The details of the steps ultimately adopted by the Legislature and signed by the Governor as part of the State's biennial budget are described in the separate Legislative Summary set out below and on the next page. In summary, the amount of required State contributions, as calculated by the System's actuary on the basis of System assets, liabilities, and actuarial assumptions adopted by the System's Board of Trustees in consultation with the actuary, was reduced by \$200 million. The reduced funding requirement was arrived at through the combination of a legislatively-mandated investment earnings assumption, the extension to 35 years of the amortization schedule for the System's unfunded liability and accompanying inclusion of the "old system teachers" liability, and extensive benefit modifications. The benefit modifications produced a reduction in the unfunded actuarial liability of \$544 million.

The role of the System's Trustees and staff with respect to the State's budget concerns and the steps taken by the Legislature and the Governor that impacted the System was to provide sound actuarial and financial information as a basis for decision-making. Further, the Board and staff insisted that the executive and legislative branches did not overlook or ignore the impacts of proposed approaches and actual decisions on the System's present and future soundness and on the Sys-

Legislative Summary

The following brief summary provides an overview of the statutory changes made by Maine's State Legislature during the 1992 and 1993 fiscal years. It focuses on those changes that affect major portions of the MSRS membership and does not describe every change made by every bill. More thorough reviews of legislative changes can be obtained from the MSRS's Public Information Division.

During Fiscal 1992

- The supplemental budget bill passed in 1992 provided for a 1% increase in the employee contribution rate for State and teacher members hired after July 1, 1992. The effect of this change for most of these new hires was to make their employee contribution rate 7.5% (rather than 6.5%).
- Emergency legislation was passed in response to federal law requiring that all states eliminate age discrimination from their disability retirement plans. The bill passed by the Maine Legislature provided for all those MSRS members (including State, teacher, PLD, Legislative System, and Judicial System members) hired for MSRS-covered employment on or after October 16, 1992, to be eligible for coverage under the State's disability retirement plans regardless of age. Active members who were in the MSRS before October 16, 1992, had the option either to be grandparented in the existing (age-discriminatory) plan or to move into the new (non-age discriminatory) plan.
- The division of a member's rights and benefits under a qualified domestic relations order (QDRO)

tem's members. The Trustees remain very concerned on both of these counts, particularly as to the long-term costs of contribution deferrals and as to matters of equity among the System's State and teacher members (and among the Legislative and Judicial Retirement System members also), who now are relegated into two very different benefit structures on the basis of their years of creditable service as of June 30, 1993. The fact that the biennial budget bill also created a four-person independent Committee to Study the Retirement System suggests that there is some legislative and executive uneasiness with the steps taken and recognition of a need for a more coherent, thoughtful, and thorough assessment than is possible during legislative sessions.

Participating Local Districts

The System's participating local districts (PLDs) are, of course, unaffected by the changes discussed above. While in many respects PLDs' benefit structures are very similar to the benefit structure of the State and teacher plan, PLDs' investment assets and benefit liabilities exist entirely separate from the assets and liabilities of the State and teacher plan. When the State revises its funding plan and benefit structure for purposes having to do with the State budget, the revisions do not take into account and do not affect the PLDs or their members. In fact, the biennium that was so difficult for the State/teacher plan produced a major

and positive change for the System's PLDs. The Consolidated Plan for Participating Local Districts, under discussion since 1987 and in the hands of the legislatively established Participating Local District Advisory Committee since late 1989, became a formal Advisory Committee proposal in November 1992 and a rule adopted by the Board in the spring of 1993. It now stands ready to be implemented on July 1, 1993.

The Consolidated Plan positively affects PLD employees and employers alike. It establishes consistency of benefits between what were formerly 250 different plans for 250 different districts. It will provide portability of benefits for PLD employees, pooling and accompanying leveling of costs for employers, and simpler plan provisions for both employees and employers to understand and for Retirement System staff to administer. The work of the PLD Advisory Committee, the Board of Trustees, and the MSRS staff has been invaluable in bringing this complex project to fruition.

The Consolidated Plan rule provides a three-year window, beginning July 1, 1993, and ending July 1, 1996, during which PLDs may join the Consolidated Plan. To support this period of decision-making, the System began an intensive communication and education effort in the spring of 1993. The effort is designed to provide PLDs and their members with

Legislative Summary (continued)

was made possible by the enactment of a bill held over from the prior session.

During Fiscal 1993

The prime bill of general interest passed in 1993 was the budget bill, which made significant benefit changes affecting State, teacher, Legislative System, and Judicial System members. (These benefit changes did not affect PLD members.) The changes include:

- The employee contribution rates were increased 1.15% so that most State employees and all teachers, legislators, and judges started paying 7.65%.
- A new cap was put on the amount of a State or teacher member's earnable compensation that is used to calculate that member's average final compensation. In brief, the new cap allows the inclusion in earnable compensation of no more than a 5% increase between each of the three high years with a total increase of no more than 10% over those three years.
- Except for members of special plans, all State, teacher, Legislative System, and Judicial System members with less than 10 years of service as of July 1, 1993, had their normal retirement age set at age 62. Those with 10 years as of that date continue to have the normal retirement age of 60.
- State and teacher members with less than 10 years of service on July 1, 1993, became ineligible to have payments for vacation and sick leave

information about the Consolidated Plan so they can make informed choices, and it will continue throughout the three-year decision-making period.

Investments

All of the System's employers and all of their employees are affected by the performance of the System's investments. The System's portfolio has performed very well over the last five years. Its biennial performance was better still than its five-year performance, but investment performance assessments over so short a period as two years are more a matter of interest than a basis for any conclusion. Over the five-year period, annualized returns were 11.5%, ranking the Retirement System in the top 34% of all public pension funds in the country.

The System's Board of Trustees has adopted a well-balanced investment portfolio designed to take advantage of market conditions without assuming undue or excessive risk. The Board also continues to explore new investment opportunities for the future. Prior to making any investment, the Board enters into an extensive process that combines information-gathering and analysis in order to make well-informed decisions. Comparison of recent years' investment performance with that of the past indicates that the process established by the Board has resulted in greatly improved performance. Although

this recent history of investment performance cannot be used to predict future returns, the Board of Trustees believes that the current investment structure has been carefully planned so that it will continue to perform well in the future on a relative basis, whatever the market environment.

Administrative and Operational Changes

The 1993-95 State budget bill also made the MSRS a public instrumentality of the State, a status with greater independence than that afforded State agencies and departments. The change reflects the position of the System's Trustees and staff and the conclusion of the Legislature that the System can administer its own affairs better as an independent entity than as part of State government.

With this legislation, a process that began a few years ago with greater independence in financial management is now complete. The System's independent management of most of its financial affairs has proven effective and efficient. It now has the ability to structure and manage its own personnel and will use the tools of financial, administrative, and operational independence to improve its internal operations for the purpose of improving its service to members, retirees, and employers. Faster payment of retirement benefits, a program already targeted to begin on July 1, 1994, will be one of the first improvements. The System also

Legislative Summary (continued)

included in their earnable compensation. Those with 10 years as of that date continue to be eligible for this inclusion, but the payments are included under the compensation cap described above.

- Cost-of-living adjustments (COLAs) (which may be awarded each year up to 4%) were changed from being applied to the benefits of those retirees who have been receiving a retirement benefit for at least six months to those who have been receiving a retirement benefit for at least 12 months.
- The benefit reduction for members who retire before reaching normal retirement age was changed for members with less than 10 years of service as of July 1, 1993, from being an amount based on actuarial tables (which is approximately 2-1/8% per

year for each year before normal retirement age) to 6% per year. Members with 10 years of service continue to have the actuarial tables used for benefit reduction.

The budget bill also made some other changes, some of which affect all of the MSRS, notably:

- It continued to provide that compensation that would have been received by State employees during unpaid furlough and shutdown days would be included in the calculation of State members' average final compensation at retirement. But it did not extend this provision for teacher and PLD members.
- It required that employers pay the additional actuarial and/or administrative costs related to early retirement incentives they offer their employees.

expects to make internal organizational changes to improve productivity, accountability, and accuracy.

The System's ongoing effort to automate its records, its record-keeping, and its processes will continue to receive the highest priority as the single most significant step toward improved service and improved employee job performance and satisfaction. No one is more aware than the System's employees of the complexity of the System's programs and of the challenges and frustrations of working with and understanding them. No one is more aware of the difficulties and time delays involved in managing vast numbers of paper records and of researching those records in order to provide the System's constituents with accurate information, advice, and decisions. Automation is as absolutely essential for our staff as it is for our members, retirees, and employers and, in the interest of all, we intend to proceed at an accelerated pace toward completion of this effort.

maintain a well-balanced and well-positioned investment portfolio that will produce better-than-average returns with lower-than-average risk. It will continue to analyze proposals to change the Retirement System and to point out the implications and impacts of those proposals. It will continue to advocate for soundness, equity, and coherence in benefit design and System structure. It will continue to work to provide accurate and complete data to the executive and legislative branches so that decision-making is sound and well informed. It will continue to consider and implement administrative and operational changes to improve services. The System's staff recognizes and fully accepts its charge to help shape, to support, and to implement the Board's vision of the System's mission and goals.

Claude R. Perrier
Executive Director

Looking Ahead

It is fair to say that the time of change and challenge is not over for the Retirement System. Through these times, the System's Board of Trustees will continue to carry out its fundamental responsibility of serving the System's members, retirees, and employers as objective fiduciaries overseeing the operations of the Retirement System. The Board will continue to work to

Legislative Summary (continued)

- It lengthened the amortization schedule the State is to follow in paying money it owes to the MSRS for payment of the System's unfunded liability. The former amortization schedule had been down to 25 years, and the schedule for paying the unfunded liability related to the "old system" for teachers had been down to less than a decade. The budget bill combined both of these under one amortization schedule of 35 years.
- It changed the investment earnings assumption from 8% to 8.2%, substituting a legislative mandate for the analytical process carried out by the Board in setting the investment earnings assumption.
- It established a four-person committee to review all aspects of the MSRS to ensure its present and future fiscal soundness. The bill specified that the committee would look at several specific points, including the underlying causes of the unfunded liability, the equity of the current benefit structure, the affordability of the current benefit structure, and the Legislature's obligations and rights concerning benefit modifications, in view of the *Spiller* decision made by the Maine Supreme Court on earlier benefit modifications made by the State.
- It made the MSRS a public instrumentality of the State. While the MSRS remains a public entity administering and following the laws that govern the System, it became independent of the State's administration.

System Summary

INTRODUCTION

As of June 30, 1993, the Maine State Retirement System administered over two hundred retirement systems. These include the Legislative Retirement System, the Judicial Retirement System, the system that covers both public school teachers and State employees, and the approximately 250 separate systems covering various political subdivisions that choose to participate in the MSRS, which under MSRS law are called participating local districts (PLDs). The MSRS is also responsible for the payment of benefits from the Governors Retirement Fund.

In addition to administering these public pension systems, the MSRS is also responsible for administering the State Group Life Insurance Program. This program provides life insurance benefits for both active and retired State employees, public school teachers, and many PLD employees, and for members and retirees of the Legislative and Judicial Retirement Systems.

RETIREMENT PROGRAM

As the chart below shows, the membership in the MSRS has continued to increase during the last few years. The membership includes both active and inactive members. Active members are those who are currently working for an MSRS participating employer and who are, therefore, contributing to the MSRS. Inactive members are those who have contributed in the past and whose contributions remain with the System but who are not contributing presently because they are not working for an MSRS participating employer.

ACTIVE MEMBERS			
	<u>1991</u>	<u>1992</u>	<u>1993</u>
State Employees*	14,658	15,064	14,723

	<hr/>	<hr/>	<hr/>
TOTAL	84,735	88,116	91,379

*This includes both regular and special plan members.

The MSRS benefits payroll has also increased slightly during the last two years. Those on the benefits payroll include four categories of recipients:

- those who are receiving a service (or "regular") retirement benefit.
- those who are beneficiaries either of deceased service retirees or of active members and disability retirees who died from a work-related injury.
- those who are receiving a disability retirement benefit.
- those who are beneficiaries of active members or disability retirees who died before service retirement benefits became effective.

Below are the figures for the last three fiscal years for the MSRS benefits payroll:

MONTHLY BENEFITS PAYROLL

	<u>1991</u>		<u>1992</u>		<u>1993</u>	
	Number of People	Payroll Dollars	Number of People	Payroll Dollars	Number of People	Payroll Dollars
Service Retirees	19,237	\$13.0 million	19,827	\$14.5 million	20,190	\$15.3 million

Ordinary Death Beneficiaries	1,006	0.3 million	1,010	.3 million	1,003	.3 million
TOTAL	23,791	\$15.5 million	24,613	\$17.3 million	25,127	\$18.4 million

Financial Summary

ASSETS

The following financial summaries are meant to provide a brief overview of the retirement program's financial picture. Detail about the MSRS's finances for 1992 and 1993 can be found in the "Statistical and Financial Information" sections of the 1992 and 1993 reports, respectively.

As of June 30, 1993, the book value of the total assets of the Maine State Retirement System was \$2,293.7 million, an increase of \$228.9 million over the assets at the beginning of the fiscal year. The breakdown of the book value of assets as of the end of the last two fiscal years is as follows:

	<u>1992</u>	<u>1993</u>
Stocks	\$1,125.9 million	\$1,296.5 million
Bonds	729.3 million	763.6 million
Mortgage-Type Investments	185.2 million	199.7 million
Cash Due from Other Funds	27.0 million	31.6 million
Other Assets	10.2 million	16.0 million
Assets Due the Legislative and Judicial Retirement Systems	(12.8) million	(13.7) million
TOTAL	\$2,064.8 million	\$2,293.7 million

TRUST FUND RESERVES

The System's trust fund reserves were \$2,279.5 million as of June 30, 1993, an increase of \$221.6 million over reserves at the beginning of the fiscal year. A comparison of these reserves by membership groups for the last two fiscal years is as follows:

	<u>June 30, 1992</u>	<u>June 30, 1993</u>
State Employees	\$ 646.4 million	\$ 688.3 million
Teachers (post-July 1, 1924)	936.8 million	1,050.3 million
Teachers (pre-July 1, 1924)*	(216.4) million	(207.8) million
Participating Local Districts	497.2 million	535.5 million
Consolidated (Disability and Survivor Benefits)	193.9 million	213.2 million
TOTAL	\$2,057.9 million	\$2,279.5 million

* This deficit represents the excess of benefit payments with interest charges over any funding or contributions made by the State and individual teachers in this particular category.

Employer contributions to the System for benefits during the past two years were made as follows:

	1992	1993
State Employees	\$57.4 million	\$64.5 million
Teachers	85.4 million	139.4 million
Participating Local Districts	29.2 million	28.2 million

Individual member contributions totaled \$78.5 million in 1992 and the same amount in 1993.

STATE GROUP LIFE INSURANCE PROGRAM

The State Group Life Insurance Program is available to all public school teachers, State employees, and the employees of those PLDs that elect to provide the coverage for their employees, as well as members of the Legislative and Judicial Retirement Systems. In addition to basic coverage for the employee, supplemental coverage for the employee as well as coverage for dependents is also available to the program's participants.

Some specifics concerning the State Group Life Insurance Program's assets for the last two fiscal years are as follows:

	<u>1992</u>	<u>1993</u>
Cash	\$ 1.6 million	\$ 0 million
Bonds	21.7 million	23.1 million
Stocks	.3 million	.3 million
Accrued interest	.1 million	.1 million
TOTAL	\$23.7 million	\$23.5 million

Funds received during the last two fiscal years are as follows:

	<u>1992</u>	<u>1993</u>
Premiums from employees and employers	\$5.8 million	\$5.6 million
Earnings on investments	.8 million	.8 million
TOTAL	\$6.6 million	\$6.4 million

Charges to the program included:

Claims from active employees/dependents	\$2.9 million	\$4.0 million
Claims from retired persons	1.9 million	2.2 million
Administrative expenses	.5 million	.5 million

The Reserve for Future Premiums, which totaled \$7.9 million as of June 30, 1993, is held for payment of premiums of retired State employees and teachers. Retired persons who participated in the Group Life Insurance Program for 10 continuous years prior to their retirement carry into retirement approximately 40% of the level of life insurance coverage they had when employed at no cost. Premiums for retired State employees and teachers are paid from the Reserve for Future Premiums. Premiums for retired PLD employees are paid by their former employers.

Detail about the State Group Life Insurance Program's finances for 1992 and 1993 can be found on the respective statements of operations and balance sheets on the program provided in the "Statistical and Financial Information" sections of the 1992 and 1993 reports.

BOARD OF TRUSTEES

The responsibility for the operation of the Maine State Retirement System, including all the various retirement systems and the State Group Life Insurance Program, is held by the MSRS Board of Trustees, which is composed of eight members. State law specifies the Board's composition. The State Treasurer fills the one non-voting position. The seven voting positions include three positions that are to be filled by MSRS members. One of these three is to be a teacher member elected by the Maine Education Association; the second is to be a State employee elected by the Maine State Employees' Association; the third is to be a PLD member appointed by the Maine Municipal Association.

The remaining four voting Board members are all appointed by the Governor. Two of them are to have training or experience in investments, accounting, banking, or insurance, or as actuaries; one is to be chosen from a list of nominees submitted by the Maine Retired Teachers' Association; and one is to be an MSRS retiree, chosen from nominees of State and PLD retirees.

The Board members as of June 30, 1993 are:

David S. Wakelin, Chair
John H. Kimball, Vice Chair

Ex-officio Member

The Board employs an actuary, which as of June 30, 1993, is the firm of Milliman and Robertson. The actuary prepares annual valuations of the assets and liabilities of each of the more than two hundred systems administered by the Board. For the State employee and teacher system, and for the Judicial and Legislative systems, the actuary also provides information and recommendations as to sound and appropriate actuarial assumptions, which the Board utilizes, together with valuation information, to determine the Systems' funding requirements.

The Board's management of MSRS investments is governed by its detailed investment policy, which states the Board's underlying investment philosophy and goals and establishes guidelines and criteria for choice of investment types, for asset allocation among investment types, for investment manager selection and evaluation, and for allotment of investment funds to investment managers. The Board employs the firm of Ennis and Knupp to assist in development and implementation of investment policy.

The Board is the final administrative decision-maker in matters involving the rights, credits, and benefits of members. It has established an administrative appeals process for the making of such decisions, through which the relevant factual information and legal requirements are identified and analyzed. In decisions on disability retirement appeals, a statutorily created three-person Medical Board provides recommendations as to the medical aspects of disability.

ADMINISTRATION

The Board of Trustees appoints the Executive Director of the MSRS, who is responsible for the work of the MSRS staff. The Executive Director oversees the System's investments and the work of the System's investment advisors and coordinates actuarial work with the System's actuary. The personnel, building, and other staff-related functions are also the concern of the MSRS's executive offices. In addition to these responsibilities, the Executive Director oversees the following divisions of the MSRS:

Benefits

Retirement claims for both service retirement and disability retirement are handled in this division. Retirement claims specialists offer informational assistance to individuals within one year of service retirement and ensure the proper handling of service retirement paperwork. Disability claims specialists likewise provide information to those applying for disability retirement benefits and coordinate review of both disability applications and benefit continuance.

Accompanying the retirement and disability claims units is the calculations unit, which calculates and verifies all benefits payable for both service and disability retirements as well as for death and survivor benefits.

The processing of claims for the State Group Life Insurance Program, along with the associated information and assistance, is handled through a unit devoted to the life insurance program within this division.

Data Processing

Responsibility for computer systems and programming is one of the three major charges of this division. Continuing to work on the MSRS's complete automation continues to be a high priority for this division while its staff also maintains the System's computer equipment. The division also has responsibility for entering data into its current systems and for managing the MSRS's microfilm records.

Finance

This division's work includes handling the monthly benefits payroll for approximately 25,000 recipients (as of June 30, 1993). This division is also responsible for the accounting and bookkeeping functions needed to process and post monthly payroll reports and payments from approximately 250 participating local districts and 165 school administrative units, in addition to the State's payrolls and payments. The audit unit within the division follows up with each employer reporting unit to help business managers, payroll clerks, and others who work with the MSRS to understand and meet the applicable reporting requirements.

Public Information

All publications as well as most mass mailings are produced by this division. Materials produced include the System's forms, lawbook, rulebook, annual report, and several newsletters. Brochures for members and an up-to-date employer manual are planned for the near future. Media contacts, informational meetings, and training sessions are also part of this division's responsibilities.

Report for 1992

STATISTICAL AND FINANCIAL INFORMATION—1992

ACTUARIES' REPORT: MSRS—1992

The Maine State Retirement System has retained the firm of Milliman and Robertson, Inc., as consulting actuaries. The following report is Milliman and Robertson's actuarial valuation of the Maine State Retirement System, which covers the system for State and teacher members. This report includes the following sections:

	Page
Executive Summary	37
Assets	45
Liabilities	49
Contributions	52
Reserves for Disability, Survivor, and Accidental Death Benefits	55
Membership Data	56
Summary of Plan Provisions for State Employees and Teachers	57
Actuarial Assumptions and Methods	61

EXECUTIVE SUMMARY

Overview

This report presents the results of our June 30, 1992, actuarial valuation of the Maine State Retirement System. These results provide a "snapshot" view of the System's financial condition on June 30, 1992, and do not reflect the following factors which have occurred since then that could affect the System's finances.

Such factors include:

- the State not paying required contributions on schedule
- employee furloughs resulting in lower state and member contributions but not lower future benefits
- unanticipated future liabilities created by various retirement incentive programs being offered by the various employers

We continue to be concerned about the future financial condition of the System. The combination of missed contributions and adverse experience has caused a weakening of the financial condition of the System and a sharp increase in the State's contribution level.

Two specific areas of adverse experience were analyzed: (1) the impact of vacation/sick leave credits, and (2) unanticipated pay increases at career end. As a result, actuarial assumptions were modified to reflect the added future costs of both factors. Details on the assumptions changes are presented in the Actuarial Assumptions and Methods section.

The balance of this section summarizes recent trends in the System's finances, analyzes the actuarial experience in the System during the past year, and concludes with summary tables useful for reference purposes.

System Trends

The contribution rate jumped sharply in the past year after years of stability. Should the State continue to contribute less than the required amount, we would expect this rate to continue to escalate.

**Rates do not include retiree health insurance charges, administrative expenses or payments to fund Old System Teachers. Rates shown are composite rates for the State regular employees, MTRA teachers, and the State special groups: State Police, Game Wardens, Sea and Shore Wardens, Prison Wardens, Liquor Inspectors, and Forest Rangers.*

The System's assets grew slightly more than expected from 1991 to 1992 due to an asset gain. This continues a trend of superior investment performance over the past several years.

Unfunded Liabilities (in billions)

The unfunded actuarial liability increased by \$513 million over what was expected between 1991 and 1992. This amount will have to be funded by increased contributions over the next 25 years.

Cash Flows

The net cash flows to the System have been sharply reduced over the past year. Should this trend continue, there may be an impact on investment decisions, as liquidation may be necessary.

System Experience

July 1, 1991 - June 30, 1992

The key indicator of overall experience in the System is the composite State contribution rate. The rate is set so that it will be stable from year to year if experience is exactly as expected. An increase in the rate indicates unfavorable experience and a decrease, favorable experience, during the previous year.

Since the rate increased from 19.80% to 22.09%, the overall experience of the System during the year ending June 30, 1992, was less favorable than expected.

The balance of this part examines the System's experience in more detail.

Assets

As of June 30, 1992, the System has present funds, when measured on a market value basis, of \$2.46 billion, an increase of \$0.32 billion from a 1991 figure of \$2.14 billion. When measured on an actuarial basis, using a method which smooths market fluctuations, System assets increased by \$.24 billion to \$2.40 billion in 1992 from \$2.16 billion in 1991. The components of this change are:

- + \$248 million from employer and member contributions
- \$214 million from payment of benefits and expenses
- + \$174 million from expected investment experience (i.e., 8.0%)
- \$ 29 million from investment loss (i.e., actual rate was 9.32%)

= \$237 million total increase in assets

The asset gain for state and teachers excluding participating local districts was \$20 million.

The next section of this report presents more detailed information on System assets.

Liabilities

Throughout this report we discuss three types of liability: actuarial liability, accrued benefit liability, and pension benefit obligation.

Actuarial Liability

In general, actuarial liabilities are calculated for purposes of determining future contributions and are directly dependent upon the particular "funding method" used by the actuary. Use of different funding methods would provide entirely different results, when nothing else has changed (e.g., inflation, salaries, etc.). Unfunded actuarial liabilities include future anticipated increases in pay and service credits.

As of June 30, 1992, the State's unfunded actuarial liability was \$3.18 billion. This compares to a June 30, 1991, unfunded actuarial liability of \$2.59 billion, an increase of \$586 million. This compares with an expected increase of \$73 million. The components of this increase are as follows:

Unfunded Actuarial Liability, June 30, 1991	\$2,591 million
• increase expected	73 million
• increase due to asset loss	(20) million
• increase due to contributions less than expected	83 million
• other losses (see below)	90 million
• increase due to change in assumptions	360 million
Unfunded Actuarial Liability, June 30, 1992	<u>\$3,177 million</u>

The unexpected increase in unfunded liabilities from "other losses" is attributable to the combined effect of the following factors.

- differences between assumed and actual rates of members retiring, terminating employment or dying
- growth in membership
- payment form selections made by retiring members

Accrued Benefit Liability

The second type of liability is the accrued benefit liability. This represents the liabilities for all future benefits, based on members' earnings and service credits as of the valuation date June 30, 1992. The difference between this figure and the market value of System assets represents the unfunded accrued benefit liability. As of June 30, 1992, the unfunded accrued benefit liability was \$1.49 billion, as compared to a June 30, 1991, unfunded accrued benefit liability of \$1.39 billion.

Pension Benefit Obligation

The third type of liability is the pension benefit obligation (PBO). This is similar to the accrued benefit liability, but it reflects anticipated pay increases. The PBO is a liability disclosure required by the Governmental Accounting Standards Board and is compared with the book value of System assets to determine the amount unfunded. The unfunded PBO was \$2.39 billion on June 30, 1991, and is \$2.83 billion on June 30, 1992.

Contributions

The "Contributions" section of this report, we present detailed information on the development of State contribution rates to the System, calculated as of June 30, 1992. In addition, this section discusses the application of the State contribution rate for fiscal year budget purposes.

Contributions to the System consist of:

- a "normal contribution" for the portion of projected liabilities attributable to service of members during the year following the valuation date
- an "unfunded actuarial liability contribution" for the excess of projected liabilities allocated to service to date over assets on hand
- a "disability benefit" contribution for the expected value of future disability (new law) benefits to be paid as a result of disablements occurring during the year following the valuation date

- a result of disablements occurring during the year following the valuation date a "death benefit" contribution (consisting of two parts: survivor benefits and accidental death benefits) for the expected value of future death benefits to be paid as a result of deaths occurring during the year following the valuation date

The composite contribution rate for all State employees and teachers increased from 19.80% of payroll as of June 30, 1991, to 22.09% of payroll as of June 30, 1992. The primary components of this change are shown below.

Contribution Rate as of June 30, 1991	19.80 %
Contributions less than expected	0.40
Asset Gain	(0.10)
Net effect Liability Losses, Membership Growth, and Shifts in Payroll Among the State Employee and Teacher Groups	0.68
Change in assumptions/procedures	-1.31
Contribution Rate as of June 30, 1992	22.09 %

SUMMARY OF PRINCIPAL RESULTS

* Excludes eight special groups and charges for retiree health insurance and administrative expenses.

ASSETS

In this section we present the value assigned to assets held by the System. These assets are valued on three different bases: the book value, the market value, and the actuarial value.

Book Value of Assets

Table II-1 is a comparison, on a book value basis, of System assets as of June 30, 1992, and June 30, 1991, in total and by investment category. The book value is essentially the purchase price for equity investments and amortized value for fixed income investments such as bonds.

Market Value of Assets

For accounting statement purposes, System assets are valued at current market values. Briefly stated, these values represent the "snapshot" or "cash-out" value of System assets as of the valuation date. In addition, the market value of assets provides a reference point for comparison purposes. Table II-2 presents both book value and market value of total System assets by investment category as of June 30, 1992, and also shows the proportion of total assets by investment category for market value.

Actuarial Value of Assets

The market value of assets, representing a "liquidation" value of the funds, is not a good measure of the System's ongoing ability to meet its obligations. Ongoing funding requirements established using market values are subject to significant variability because of the volatility of market values.

As a consequence, actuarial valuations employ a technique for determining the actuarial value of assets which dampens the swings in market value. The specific technique adopted sets the actuarial value of assets by the following method:

Step 1: Determine the total yield on the investments of the System using the full investment return (including capital gains) measured by the difference in the actuarial value of the assets at the beginning of the fiscal year just ended and the market value of assets at the end of the year (11.96%).

Step 2: Calculate the excess of the yield determined in Step 1 over the expected yield for the same year according to the actuarial assumptions. ($11.96\% - 8.00\% = -3.96\%$)

Step 3: Calculate an adjusted rate equal to the expected rate plus one-third of the rate determined in step 2. ($8.00\% + (1/3 * 3.96\%) = 9.32\%$)

Step 4: The actuarial value of assets used in this valuation equals the amount that would have existed if the actual yield on the assets had been at the rate determined in Step 3.

Allocation by Group

Since retirement benefit costs are calculated separately for State employees, teachers and other special groups, total assets (market and actuarial values) must be allocated to each of these groups. We have made this allocation as of June 30, 1992, in proportion to System reserves (provided at book value). These are shown in Table II-3. The total for each group has been further allocated between the Member Contribution Fund and the Retirement Allowance Fund. The resulting allocations are shown in Tables II-4 and II-5.

LIABILITIES

Actuarial Liabilities

A fundamental principle in financing the liabilities of a retirement program is that the cost of its benefits should be related to the period in which benefits are earned, rather than to the period of benefit distribution. There are several methods currently used in making such a determination.

The method used for this valuation is referred to as the "entry age normal actuarial cost method." Under this method, a level-percent-of-pay employer cost is determined which, along with member contributions, will pay for projected benefits at retirement for a new entrant into the plan. It is assumed applicable to all active plan members. The level percent developed is called the normal cost rate and the product of that rate and payroll is the normal cost.

The actuarial liability is that portion of the present value of projected benefits that will not be paid by future employer normal costs or member contributions. The difference between this liability and funds accumulated as of the same date is referred to as the unfunded actuarial liability. If the employer's contributions exceed the employer's normal cost for the year, after allowing for interest earned on the previous balance of the unfunded actuarial liability, this liability will be reduced. Benefit improvements, actuarial gains and losses, and changes in actuarial procedures will also have an effect on the total actuarial liability and on the portion of it that is unfunded.

After the amount of the unfunded actuarial liability has been determined, a schedule of contributions is established to amortize that amount over a given period. Effective with the 1987 valuation, a thirty year amortization period was adopted for the Maine State Retirement System. Payments to fund the actuarial liability will be a level percentage of payroll.

In Table III-1 we have summarized the actuarial liabilities as of June 30, 1992, and the amounts that were unfunded.

Accounting Statement Information

Statement No. 35 of the Financial Accounting Standards Board requires the System to disclose certain information regarding its funded status.

Statement No. 5 of the Governmental Accounting Standards Board, issued during 1986, establishes standards for disclosure of pension information by public employee retirement systems and governmental employers in notes to financial statements and supplementary information. This statement specifies that a comparison of the present value of accrued (accumulated) plan benefits with the value of plan assets must be provided by the System.

As directed by the above referenced accounting statements, the liabilities shown in Table III-2, Accrued Benefit Liabilities, do not include any projections for future creditable service and pay increases. The liabilities shown in Table III-3, GASB Disclosure, are based on current creditable service but include future pay projections.

Both present values of accrued benefits are determined assuming that the plan is ongoing and participants continue to terminate employment, retire, etc. in accordance with the actuarial assumptions.

**TABLE III-2

(c) Total Pension Benefit Obligation	\$1,627,523,223	\$2,547,947,627	\$22,501,639	\$4,197,972,489
2. Net Assets Available for Benefits (at cost)	\$646,383,300	\$936,787,759	(\$216,386,499)	\$1,366,784,560
3. Unfunded Pension Benefit Obligation (not less than \$0)	\$981,139,923	\$1,611,159,868	\$238,888,138	\$2,831,187,929

CONTRIBUTIONS

General Comments

Under established procedures, contribution rates based on this June 30, 1992, actuarial valuation will be used to determine Fiscal Year 1994 State appropriations to the Maine State Retirement System. In this context, the term "contribution rate" means the percentage which is applied to a particular active member payroll to determine the actual contribution amount (i.e., in dollars) for the group.

Description of Rate Components

Except for ancillary benefits (disability, survivors' and accidental death benefits), the entry age normal method was used to develop the contribution rates in this section. Under this funding method, as with most other actuarial funding methods, a total contribution rate is determined which consists of two elements: the normal cost rate and the unfunded actuarial liability rate. The contribution rates for ancillary benefits were determined separately using a term cost method. These elements are described in more detail below.

Normal Cost Rate

For State employees, teachers (MTRA) and each special group, an individual entry age normal cost rate was determined for a typical new entrant of each respective group. This rate was determined by taking the value, as of age at entry into the plan, of the member's projected future benefits, reducing it by the value of future member contributions, and dividing it by the value, also as of the member's entry age, of his expected future salary. The normal cost rate, so determined separately for each group, was assumed applicable to all active members of the group.

Unfunded Actuarial Liability Rate

The unfunded actuarial liability under the entry age normal method equals the present value, at time of valuation, of future benefits less the present value of future normal costs, future member contributions, and current assets. The unfunded actuarial liability rate (or amortization rate) is the level percent of active member payroll which, when applied to each year's payroll, is sufficient to amortize the unfunded actuarial liability over 30 years from June 30, 1987.

Ancillary Benefit Rate

For each separate cost group (State employees, teachers, etc.) the cost of claims expected to be incurred during the year was determined as a percent of active member payroll. The State appropriation for ancillary benefits will then be determined by applying the ancillary benefit rate to the appropriate active member payroll.

Total Contribution Rate Summary

In Table IV-1 we present total contribution rates, determined as of June 30, 1992, applicable for determining the Fiscal Year 1994 State appropriations to the System, using the cost methods described above. These were developed using actuarial assumptions and methods described in the "Actuarial Assumptions and Methods" section.

The derivations of the unfunded actuarial liability rates for each group are shown in Table IV-2.

TABLE IV-1
RECOMMENDED STATE CONTRIBUTION RATES*
FOR FISCAL YEAR 1993/1994

	RETIREMENT BENEFITS		ANCILLARY BENEFITS			
	Normal Cost**	Unfunded Actuarial Liability	Disability	Survivor Benefits	Accidental Death	All Benefits
State Employees	5.91%	11.04%	1.30%	0.32%	0.12%	18.69%
Special Groups						
State Police (Closed Plan)	20.00%	40.20%	0.82%	0.23%	0.26%	61.51%
State Police (Open Plan)	20.00%	0.00%	0.77%	0.11%	0.17%	21.05%
Sea and Shore Wardens (Closed Plan)	17.50%	37.87%	0.76%	0.21%	0.23%	56.57%
Game Wardens (Closed Plan)	20.00%	43.52%	0.58%	0.17%	0.19%	66.26%
Prison Wardens (Closed Plan)	8.00%	16.44%	1.59%	0.52%	0.54%	27.09%
Prison Wardens (Open Plan)	8.00%	0.00%	1.21%	0.19%	0.34%	9.74%
Liquor Inspectors (Closed Plan)	8.00%	17.63%	1.23%	0.35%	0.45%	27.66%
Forest Rangers (Closed Plan)	7.50%	19.16%	1.33%	0.45%	0.46%	28.90%
MTRA Teachers	6.29%	15.68%	1.30%	0.25%	0.08%	23.60%

* These rates do not include charges to cover retiree health insurance or administrative expenses.

** Includes cost of Automatic Option 2.

** Does not include cost of Automatic Option 2

RESERVES FOR DISABILITY, SURVIVOR, AND ACCIDENTAL DEATH BENEFITS

Retirement benefits under the System are funded on a basis expected to result in level percent of pay contributions over the members' working lives. This funding method involves projecting the expected benefits payable in all future years and spreading the costs to produce a level pattern.

In contrast, employer contributions for certain ancillary benefits are determined on a "term cost" basis. Under this funding method, the annual cost for a year is determined as the value of benefit claims expected to be "incurred" during the year.

For example, the value (or cost) of a survivor pension expected to become payable during a year is the present value of all the future monthly payments expected because of a member's death. Under the term cost method, the employer contribution reflects only the cost of events (deaths or disabilities) expected to occur in the current year.

Types of benefits under the System which are funded using the term cost method are the "new" disability benefit (effective in 1977), survivor benefits, and accidental death benefits. The cost of benefits for members who became disabled under the old provisions is funded along with retirement benefits.

For each of these benefits funded by the term cost method, a separate trust fund reserve is maintained. Each fund is increased by employer contributions and investment earnings and decreased by benefits paid.

Each year, as a part of the actuarial valuation we compare the present value of benefits payable (theoretical reserve) with the trust fund reserve (actual reserve). Under ideal circumstances the actual reserve will exceed the theoretical reserve to allow for a margin or "cushion" to absorb future experience losses. We show the trust fund at "actuarial value", as described in the "Assets" section.

Trends in the ratio of actual to theoretical reserves may indicate a need to change the assumptions used to value benefits which, in turn, will lead to a change in employer contribution rates. For example, this year we reduced the calculated contribution rate for disability benefits by approximately 15% to reflect favorable experience in that fund.

The following sections compare the actual reserves with theoretical reserves based on an assumed rate of investment return of 8%.

A. Disability Benefits Reserve		
1. Theoretical Reserve		
a. State Employees		\$66,360,603
b. Teachers		\$58,848,446
c. Participating Districts		N/A
d. Total		N/A
2. Actual Reserve (Actuarial Value)		\$166,762,875
3. Ratio: (2) / (1)		N/A
B. Survivor Benefits Reserve		
1. Theoretical Reserve		
a. State Employees		\$22,326,691
b. Teachers		\$10,369,424
c. Participating Districts		\$3,193,232
d. Total		\$35,889,347
2. Actual Reserve (Actuarial Value)		\$48,209,977
3. Ratio: (2) / (1)		134.33%
C. Accidental Death Benefit Reserve		
1. Theoretical Reserve		\$3,566,774
2. Actual Reserve (Actuarial Value)		\$7,081,942
3. Ratio: (2) / (1)		198.55%

SUMMARY OF PLAN PROVISIONS FOR STATE EMPLOYEES AND TEACHERS

1. Membership.

Membership is a condition of employment for state employees and teachers, and optional for elected and appointed officials. Membership ceases on the earlier of withdrawal of contributions, retirement, or death.

2. Member Contributions.

Except as otherwise described below, members are required to contribute 6.5% of earnable compensation.

Contribution requirements for special groups:

- State police, inland fisheries and wildlife officers (game wardens), and marine resources officers (sea and shore wardens) employed before 9/1/84—7.5% of earnable compensation for 20 years; 6.5% thereafter.
- State police and prison employees employed after 8/31/84—7.5% of earnable compensation for 25 years; 6.5% thereafter.
- Forest rangers and state prison employees employed before 9/1/84—7.5% of earnable compensation until eligible for retirement; 6.5% thereafter.

3. Average Final Compensation.

For purposes of determining benefits payable under the System, average final compensation is the average annual rate of earnable compensation for the 3 years of creditable service (not necessarily consecutive) which produce the highest such average.

4. Creditable Service.

Creditable service includes service while a member, certain service prior to the establishment of the System, purchased military service credit, and service while receiving disability benefits under the System.

5. Service Retirement Benefits.

Except as otherwise described below:

Eligibility for members in service: 25 years of creditable service, or attainment of age 60 with either 10 years of creditable service or one year of service immediately before retirement.

Eligibility for members not in service: 25 years of creditable service, or attainment of age 60 with 10 years of creditable service.

Benefit: 1/50 of average final compensation multiplied by years of membership service and up to 25 years of prior service, reduced for retirement before age 60.

Form of payment: life annuity.

For participants entering the plan after 12/1/84* the eligibility age is increased to age 62 and early retirement benefits are reduced 6% for each year before 62.

* i.e., those with less than seven years of service as of December 1, 1991

SUMMARY OF PLAN PROVISIONS FOR STATE EMPLOYEES AND TEACHERS (Continued)

If greater than the benefits produced by the standard formulas, the following benefits are available for special groups:

State police, inland fisheries and wildlife officers (game wardens), and marine resources officers (sea and shore wardens) employed before 9/1/84.

Eligibility: 20 years of creditable service in named positions.

Benefit: $1/2$ of average final compensation plus 2% for each year of service in excess of 20. If greater, the pro-rated portion of the benefit for service before July 1, 1976, is based on annual pay instead of average final compensation.

Form of payment: 50% joint and survivor annuity.

State police employed after 8/31/84.

Eligibility: 25 years of creditable service as a state police officer.

Benefit: same as for general employees, reduced for payment before age 55 rather than age 60.

Form of payment: life annuity.

Forest rangers employed before 9/1/84.

Eligibility: age 50 with 25 years of creditable service as a forest ranger.

Benefit: $1/2$ of average final compensation plus 2% for each year of service earned after qualification for retirement. If greater, the pro-rated portion of the benefit for service before July 1, 1976, is based on annual pay instead of average final compensation.

Form of payment: life annuity.

Airplane pilots employed before 9/1/84.

Eligibility: age 55 and 25 years of creditable service as an airplane pilot.

Benefit: greater of (1) $1/2$ of average final compensation plus 2% for each year of service earned after qualification for retirement, and (2) if retiring after age 60, the benefit under the general formula.

Form of payment: life annuity.

Liquor inspectors employed before 9/1/84.

Eligibility: age 55 and 25 years of creditable service as a liquor inspector.

Benefit: $1/2$ of average final compensation plus 2% for each year of service earned after qualification for retirement. If greater, the pro-rated portion of the benefit for service before July 1, 1976, is based on annual pay instead of average final compensation.

Form of payment: life annuity.

SUMMARY OF PLAN PROVISIONS FOR STATE EMPLOYEES AND TEACHERS (Continued)

State prison employees employed before 9/1/84.

Eligibility: age 50 and 20 years of creditable service as a prison employee.

Benefit: $1/2$ of average final compensation plus 2% for each year of service earned after qualification for retirement.

Form of payment: life annuity.

State prison employees employed after 8/31/84.

Eligibility: 25 years of creditable service as a prison employee.

Benefit: same as for general employees, reduced for retirement before age 55 rather than age 60.

Form of payment: life annuity.

6. Disability Retirement Benefits.

Eligibility: permanently mentally or physically incapacitated before normal retirement age while in service; unable to perform duties of own position.

Benefit: $66\frac{2}{3}\%$ of average final compensation, reduced by employment earnings over \$10,000, and to the extent that the benefit, in combination with Workers' Compensation and Social Security, exceeds 80% of average final compensation.

Form of payment: payment begins on termination of service and ceases on cessation of disability or after 5 years, unless the member is unable to engage in any gainful activity; in which case payments cease on the earlier of 10 years following normal retirement age or date the service retirement benefit exceeds the disability benefit.

Conversion to service retirement: during the period of disability average final compensation is increased with cost-of-living adjustments and service is credited. On the date when service benefits reach a level of $66\frac{2}{3}\%$ of average final compensation or 10 years after the normal retirement date, if earlier, the disability benefit converts to a service retirement benefit based on service and adjusted average final compensation at that point.

7. Ordinary Death Benefits Before Eligibility for Service Retirement.

Eligibility: death while active or disabled before eligibility for service retirement.

Benefit: member's accumulated contributions at time of death. A surviving spouse, children, parents, or other beneficiaries may be eligible to elect (in lieu of contributions) survivor benefits in monthly amounts varying by number of eligible survivors.

8. Ordinary Death Benefits After Eligibility for Service Retirement.

Eligibility: death while active or disabled after eligibility for retirement but before benefit commencement date.

Benefit: option 2 (see item 12) is automatically effective with benefits payable to designated beneficiary, spouse, or parents; however, beneficiary may elect benefit in item 7 instead. Otherwise, accumulated contributions are payable to the estate.

SUMMARY OF PLAN PROVISIONS FOR STATE EMPLOYEES AND TEACHERS (Continued)

9. Accidental Death Benefits.

Eligibility: death while active or disabled resulting from injury related to employment.

Benefit: if the member leaves no dependent children, $\frac{2}{3}$ of the member's average final compensation to the surviving spouse until death; if there remain surviving dependent children, an annual sum of the member's final average compensation shared between dependent children and surviving spouse (if any). Benefits are reduced by amounts payable under Workers' Compensation.

10. Refund of Contributions.

Eligibility: termination of service except by retirement or death.

Benefit: member's accumulated contributions with interest.

11. Cost-of-living Adjustments

All retirement and survivor benefits are adjusted each year there is a percentage change in the Consumer Price Index, based on the Index. Cost-of-living adjustments are effective September 1 and are applied to all benefits which have been in payment for six months. The maximum increase or decrease is 4%. Earnable compensation used in determining benefits for disabled members is indexed similarly.

12. Optional Methods of Payment

Option 1: Cash refund equal to the excess of accumulated contributions at date of retirement over total payments made to date of death which are attributable to member contributions.

Option 2: 100% joint and survivor annuity.

Option 3: 50% joint and survivor annuity.

Option 4: Any other benefit which is actuarially equivalent to the retirement allowance and is approved by the Board.

ACTUARIAL ASSUMPTIONS AND METHODS

Actuarial Assumptions

		<u>State Employees</u>	<u>Teachers</u>
1. Rate of Investment Return		8.0%	8.0%
2. Cost-of-living Increases in Benefits		4.0%	4.0%
3. Rates of Salary Increase (% at Selected Ages)	<u>Age</u>		
	20	10.0	10.0
	25	8.8	8.8
	30	7.7	7.7
	35	7.2	7.2
	40	6.7	6.7
	45	6.2	6.2
	50	6.0	6.0
	55	6.0	6.0
	60	6.0	6.0
	65	6.0	6.0

The above rates include a 6% across-the-board increase at each age. Also, average final compensation for retiring teachers is increased by an additional 5.5% to reflect actual pay patterns near retirement.

		<u>State Employees</u>			<u>Teachers</u>		
4. Rates of Termination at Select and Ultimate Service (% at Selected ages)*	<u>Age</u>	<u>Service</u>			<u>Service</u>		
		0-1	1-2	2+	0-1	1-2	2+
	20	40.0	20.0	15.0	30.0	20.0	15.0
	25	35.0	20.0	10.0	25.0	20.0	10.0
	30	30.0	15.0	8.0	25.0	20.0	8.0
	35	25.0	15.0	6.0	25.0	20.0	6.0
	40	25.0	15.0	4.5	25.0	20.0	4.5
	45	25.0	10.0	3.0	25.0	20.0	3.0
	50	25.0	10.0	2.5	25.0	20.0	2.5
	55	20.0	10.0	2.0	25.0	20.0	2.0

* Members with ten or more years of service and whose age plus service totals 60 or more are assumed to elect deferred vested benefits; other terminations are assumed to elect refunds.

	<u>Age</u>	<u>Male</u>	<u>Female</u>	<u>Male</u>	<u>Female</u>
5. Rates of Healthy Life Mortality at Selected Ages (number of deaths per 10,000 members)*	20	5	3	5	2
	25	6	3	6	3
	30	8	5	7	4
	35	11	7	10	6
	40	16	9	14	8
	45	29	14	23	12
	50	53	22	42	18
	55	85	33	71	27
	60	131	55	109	44
	65	213	96	174	77
	70	361	165	292	129

* For State Regular and Teachers, 5% of deaths assumed to be accidental; for State Special, 20% of deaths assumed to be accidental.

6. Rates of Disabled Life Mortality at Selected Ages (number of deaths per 10,000 members)	<u>Age</u>	<u>State Employees</u>		<u>Teachers</u>	
		<u>Male</u>	<u>Female</u>	<u>Male</u>	<u>Female</u>
	45	349	191	349	191
	50	376	207	376	207
	55	420	240	420	240
	60	488	288	488	288
	65	595	366	595	366
	70	763	487	763	487

7. Rates of Retirement at Selected Ages (number retiring per 1,000 members)	<u>Age</u>	<u>State Employees*</u>	<u>Teachers</u>
	45	25	38
	50	38	50
	55	100	126
	59	120	146
	60	150	200
	61	100	150
	62	350	400
	63	250	250
	64	250	250
	65	750	750
	70	1000	1000

8. Rates of Disability at Selected Ages (members becoming disabled per 10,000 members)**			
	25	5.7	5.7
	30	6.3	6.3
	35	7.3	7.3
	40	11.0	11.0
	45	22.0	22.0
	50	42.0	42.0
	55	71.9	71.9
	60	124.2	124.2

*Members of special plans are assumed to retire when first eligible for unreduced benefits.

**10% assumed to receive Workers' Compensation benefits of 66-2/3% of pay; also, rates for State special groups are higher by 7 per 10,000 at all ages. Note: Disability costs calculated using these rates were reduced 15% to reflect favorable experience.

9. Family Composition Assumptions 80% of active members are married with two children born at ages 24 and 28 (dependent until age 18); female spouse is three years younger than male spouse; no dependent parents; unmarried members have beneficiaries entitled to benefits worth 80% as much as those of married members' beneficiaries.
10. Vacation/Sick Leave Credits Within certain limits, credits for unused vacation and sick leave may be used to increase average final compensation and/or creditable service. In order to reflect this, projected benefits are increased by 3.9% for state employees and 3.6% for teachers.

Actuarial Methods

1. Funding Method

The aggregate entry age normal method is used to determine costs. Under this funding method, a total contribution rate is determined which consists of two elements, the normal cost rate and the unfunded actuarial liability (UAL) rate.

For teachers (MTRA) and State employees, including each of the eight State special groups, a normal cost rate is determined for a typical new entrant. This rate is determined by taking the value, as of age at entry into the plan, of the member's projected future benefits, reducing it by the value of future member contributions, and dividing it by the value, also as of the member's entry age, of his expected future salary.

In addition to contributions required to meet the System's normal cost, contributions will be required to fund the System's unfunded actuarial liability. The actuarial liability is defined as the present value of future benefits less the present value of future normal costs and future member contributions. The unfunded actuarial liability is the total of the actuarial liability for all members less the actuarial value of the System's assets. The actuarial liability includes projections of future member pay increases and future service credits and should not be confused with the accrued benefit liability.

The unfunded actuarial liability is amortized by annual payments over a 25 year period from July 1, 1992. The payments are determined so that they will be a level percentage of pay, assuming total pay increases 6% per year.

Costs for ancillary benefits (death and disability) are determined using a term cost method.

2. Asset Valuation Method

For purposes of the June 30, 1992, actuarial valuation, assets are valued at an "actuarial value" as described in the "Assets" section in this report.

ACTUARIES' REPORT: LEGISLATIVE RETIREMENT SYSTEM—1992

The Maine State Retirement System has retained the firm of Milliman and Robertson, Inc., as consulting actuaries. The following report is Milliman and Robertson's actuarial valuation of the Maine Legislative Retirement System for the fiscal year ending June 30, 1992. The report includes the following sections:

	Page
Participant Data	67

COST RESULTS

1. Retirement Benefits	
A. Employer Normal Cost	10.03%
B. Unfunded Actuarial Liability	0.00%
Total Retirement Cost	10.03%
2. Disability Cost	1.77%
3. Survivor Benefit Cost	1.03%
Total Costs	12.83%

ACCOUNTING INFORMATION

1. GASB Disclosure	
A. Pension Benefit Obligation:	
1. Retirees and beneficiaries currently receiving benefits and terminated employees not yet receiving benefits	\$ 141,574
2. Current employees	
- Accumulated employee contributions including allocated investment earnings	215,278
- Employer-financed vested contributions	(69,815)
- Employer-financed non-vested contributions	748,947
Total Pension Benefit Obligation	\$1,035,984
B. Net Assets Available for Benefits(at cost)	\$1,127,985
Unfunded Pension Benefit Obligation (not less than \$0)	0
2. Other Accounting Information	
A. Actuarial Value of Assets	\$1,290,146
B. Unfunded Actuarial Liability	0
C. Market Value of Assets	1,318,556
D. Unfunded Accrued Liability	0
E. Amortization Period	N/A

SUMMARY OF PLAN PROVISIONS

1. Membership.

Membership is mandatory for legislators entering on or after December 3, 1986 (except for those granted a waiver by the presiding officer) and optional for those who were members of the Maine State Retirement System on December 2, 1986. Membership ceases on the earlier of withdrawal of contributions, retirement, or death.

2. Member Contributions.

Members are required to contribute 4% of earnable compensation.

3. Average Final Compensation.

For purposes of determining benefits payable under the System, average final compensation is the average annual rate of earnable compensation for the three years of creditable service (not necessarily consecutive) which produce the highest such average.

4. Creditable Service.

Creditable service includes the following:

- A. All legislative service as a member after December 2, 1986.
- B. All legislative service before December 3, 1986, for which contributions are made at the rate applicable at the Maine State Retirement System, including appropriate interest.
- C. Service while receiving disability benefits under the System.
- D. All service creditable under the Maine State Retirement System, provided the member elects to have his own and the employer's contributions on behalf of the service transferred to the legislative system.

5. Service Retirement Benefits.

Eligibility for members in service: 25 years of creditable service or attainment of age 60.

Eligibility for members not in service: attainment of age 60 with 10 years of creditable service (or five full terms as a legislator).

For the purpose of determining eligibility, creditable service includes service under the Maine State Retirement System after termination of legislative service.

Benefit: $1/50$ of average final compensation multiplied by years of creditable service, reduced for retirement before age 60; minimum \$100 per month if there are at least 10 years of creditable service.

Form of payment: life annuity.

6. Disability Retirement Benefits.

Eligibility: permanent mental or physical incapacitation before normal retirement age while in service; unable to perform duties of own position.

Benefit: $66\frac{2}{3}\%$ of average final compensation, reduced by employment earnings over \$10,000, and to the extent that the benefit, in combination with worker's compensation and Social Security, exceeds 80% of average final compensation.

Form of Payment: payment begins on termination of service and ceases on cessation of disability or after five years, unless the member is unable to engage in any gainful activity; in which case payments cease on the earlier of 10 years following normal retirement age or date the service retirement benefit exceeds the disability benefit.

SUMMARY OF PLAN PROVISIONS (Continued)

Conversion to Service Retirement: during the period of disability, average final compensation is increased with cost-of-living adjustments and service is credited. On the date when service benefits reach a level of 66-2/3% of average final compensation or ten (10) years after the normal retirement date, if earlier, the disability benefit converts to a service retirement benefit based on service and pay at that point.

7. Ordinary Death Benefits Before Eligibility for Service Retirement.

Eligibility: death while active or disabled before eligibility for service retirement.

Benefit: member's accumulated contributions at time of death. A surviving spouse, children, parents, or other beneficiaries may be eligible to elect (in lieu of contributions) survivor benefits in monthly amounts varying by number of eligible survivors.

8. Ordinary Death Benefits After Eligibility for Service Retirement.

Eligibility: death while active or disabled after eligibility for retirement but before benefit commencement date.

Benefit: Option 2 (see item 12) is automatically effective with benefits payable to designated beneficiary, spouse, or parents; however, beneficiary may elect benefit described in item 7 instead. Otherwise, accumulated contributions are payable to the estate.

9. Accidental Death Benefits.

Eligibility: death while active or disabled resulting from injury related to employment.

Benefit: if the member leaves no dependent children, two-thirds of the member's average final compensation to the surviving spouse until death; if there remains surviving dependent children, an annual sum of the member's final average compensation shared between dependent children and surviving spouse (if any). Benefits are reduced by amounts payable under worker's compensation.

10. Refund of Contributions.

Eligibility: termination of service except by retirement or death.

Benefit: member's accumulated contributions.

11. Cost-of-living Adjustments.

All retirement and survivor benefits are adjusted each year there is a percentage change in the Consumer Price Index, based on the Index. Cost-of-living adjustments are effective September 1 and are applied to all benefits which have been in payment for six months. The maximum increase or decrease is 4%. Earnable compensation used in determining benefits for disabled members is indexed similarly.

12. Optional Methods of Payment.

Option 1: Cash refund equal to the excess of accumulated contributions at date of retirement over total payments made to date of death which are attributable to member contributions.

Option 2: 100% joint and survivor annuity.

Option 3: 50% joint and survivor annuity.

Option 4: Any other benefit which is actuarially equivalent to the retirement allowance and is approved by the Board.

SUMMARY OF ACTUARIAL ASSUMPTIONS

This schedule summarizes the actuarial assumptions and methods used in the valuation.

ACTUARIAL ASSUMPTIONS

1. Annual Rate of Investment Return: 8.0%
2. Annual Rate of Salary Increase: 6.0%
3. Annual Cost-of-living Increase: 4.0%
4. Expense Allowance: None
5. Retirement Age: 60
6. Probabilities of employment termination:

<u>at Age</u>	<u>due to:</u>	<u>Death</u>	<u>Disability</u>	<u>Quitting</u>

E. Amortization Period	25 years

SUMMARY OF PLAN PROVISIONS

Retirement On or After December 1, 1984

1. Membership.

Membership is a condition of employment for all judges serving on or after December 1, 1984. Membership ceases on the earlier of withdrawal of contributions, retirement, or death.

2. Member Contributions.

Members are required to contribute 6.5% of earnable compensation.

3. Average Final Compensation.

For purposes of determining benefits payable under the System, average final compensation is the average annual rate of earnable compensation for the three years of creditable service as a judge (not necessarily consecutive) which produce the highest such average.

4. Creditable Service.

Creditable service includes the following:

- A. All judicial service as a member after November 30, 1984.
- B. All judicial service before December 1, 1984.
- C. Service while receiving disability benefits under the System.
- D. All service creditable under the Maine State Retirement System provided the member elects to have his own and the employer's contributions on behalf of the service transferred to the judicial system.

5. Service Retirement Benefits.

Eligibility: 25 years of creditable service, or attainment of age 60 with 10 years of creditable service, or attainment of age 70 and one year of service immediately before retirement.

Benefit: sum of (A) $1/50$ of average final compensation multiplied by years of membership service and creditable service transferred from the Retirement System, and (B) 75% of November 30, 1984 salary for the position held at retirement, pro-rated for prior service less than 10 years. The benefit is reduced for retirement before age 60.

Maximum Benefit: 60% of average final compensation.

Minimum Benefit: for a judge in service and age 50 on December 1, 1984, 75% of salary on June 30, 1984 for the position held at retirement.

Form of Payment: life annuity; except for a judge in service and age fifty (50) before December 1, 1984, 50% joint and survivor annuity.

6. Disability Retirement Benefits.

Eligibility: permanently mentally or physically incapacitated while in service before eligibility for unreduced retirement; unable to perform duties of own position.

Benefit: $66\frac{2}{3}\%$ of average final compensation, reduced by the amount by which employment earnings plus the disability allowance exceeds the current salary of the position held at disability, and to the extent that the benefit, in combination with Workers' Compensation, exceeds 80% of the average final compensation. A member in service on November 30, 1984, may elect benefits applicable for retirement before December 1, 1984.

SUMMARY OF PLAN PROVISIONS

Retirement On or After December 1, 1984

(Continued)

Form of Payment: payment begins on termination of service and ceases on cessation of disability or after five years, unless the member is unable to engage in any gainful activity; in which case payments cease on the earlier of attainment of age 70 and date the service retirement benefit exceeds the disability benefit.

Conversion to Service Retirement: during the period of disability average final compensation is increased with cost-of-living adjustments and service is credited. On the date when service benefits reach a level of 66 2/3% of average final compensation or at age 70, if earlier, the disability benefit converts to a service retirement benefit based on service and pay at that point.

7. Ordinary Death Benefits Before Eligibility for Service Retirement.

Eligibility: death while active or disabled before eligibility for service retirement.

Benefit: member's accumulated contributions at time of death. A surviving spouse, children, parents or other beneficiaries may be eligible to elect (in lieu of contributions) survivor benefits in monthly amounts varying by number of eligible survivors.

Minimum Benefit: for a judge in service prior to December 1, 1984, one-half of the judge's retirement benefit determined on date of death, payable to the spouse and/or dependent children.

8. Ordinary Death Benefits After Eligibility for Service Retirement.

Eligibility: death after eligibility for retirement but before benefit commencement date.

Benefit: Option 2 (see item 12) is automatically effective with benefits payable to designated beneficiary, spouse, or parents; however, beneficiary may elect benefit described in item 7 instead. Otherwise, accumulated contributions are payable to the estate.

9. Accidental Death Benefits.

Eligibility: death while active or disabled resulting from injury related to employment.

Benefit: if the member leaves no dependent children, two-thirds of the member's average final compensation to the surviving spouse until death; if there remain surviving dependent children, an annual sum of the member's average final compensation shared between dependent children and surviving spouse (if any).

10. Refund of Contributions.

Eligibility: termination of service except by retirement or death.

Benefit: member's accumulated contributions.

11. Cost-of-living Adjustments.

Except as described below, all retirement and survivor benefits are adjusted each year there is a percentage change in the Consumer Price Index (CPI), based on the CPI. Cost-of-living adjustments are effective September 1 and are applied to all benefits which have been in payment for six months. The maximum increase or decrease is 4%. Earnable compensation used in determining benefits for disabled members is indexed similarly.

Minimum benefits are increased 6% per year from July, 1985, through July, 1989, and as described above

SUMMARY OF PLAN PROVISIONS

Retirement On or After December 1, 1984

(Continued)

12. Optional Methods of Payment.

- Option 1: Cash refund equal to the excess of accumulated contributions at date of retirement over total payments made to date of death which are attributable to member contributions.
- Option 2: 100% joint and survivor annuity.
- Option 3: 50% joint and survivor annuity.
- Option 4: Any other benefit which is actuarially equivalent to the retirement allowance and is approved by the Board.

Retirement Prior to December 1, 1984

(Administered by the Court System)

1. Currently Effective Annual Salary.

For determination of benefit payments, currently effective annual salary is the salary on June 30, 1984 for the position last held, increased by 6% per year each July 1, beginning July 1, 1984.

2. Regular Retirement Benefits.

Eligibility: attainment of age 70 with seven years of service or attainment of age 65 with 12 years of service, or attainment of age 60 with 20 years of service.

Benefit: three-quarters of currently effective annual salary.

3. Disability Benefits.

Three-quarters of currently effective annual salary.

4. Survivor Benefits.

Three-eighths of current effective annual salary, payable to the surviving spouse of dependent children.

SUMMARY OF ACTUARIAL ASSUMPTIONS

This schedule summarizes the actuarial assumptions and methods used in the valuation.

ACTUARIAL ASSUMPTIONS

1. Annual Rate of Investment Return: 8.0 percent
2. Annual Rate of Salary Increase: 6.0 percent
3. Annual Cost-of-living Increase: 4.0 percent
4. Expense Allowance: None
5. Retirement Age: 60
6. Probabilities of employment termination:

ACTUARIES' REPORT: MSRS—1993

The Maine State Retirement System has retained the firm of Milliman and Robertson, Inc., as consulting actuaries. The following report is Milliman and Robertson's actuarial valuation of the Maine State Retirement System, which covers the system for State and teacher members. This report include the following sections:

	Page
Executive Summary	115
Assets	123
Liabilities	127
Contributions	130
Reserves for Disability, Survivor, and Accidental Death Benefits	133
Membership Data	134
Summary of Plan Provisions for State Employees and Teachers	135
Actuarial Assumptions and Methods	139

Note: The "Actuaries' Report: MSRS—1993" reflects the legislative action that combined into a single 35-year amortization schedule the debt and related amortization schedule associated with the "old system" teachers. The legislative action was effective July 1, 1994; therefore, the System's financial statements in the "Statistical and Financial Information—1993" section separately reflect the "old system" teachers.

EXECUTIVE SUMMARY

Overview

This report presents the results of our June 30, 1993, actuarial valuation of the Maine State Retirement System. These results provide a "snapshot" view of the System's financial condition on June 30, 1993, including the effect of recently instituted changes in benefits and assumptions.

There were a number of legislated changes effective July 1, 1993, that affect the System. Some of these changes affect the timing of contributions to the System while others serve to reduce the ultimate overall cost.

Changes affecting only the timing include:

- an increase in valuation interest from 8.0% to 8.2%
- an extension of the amortization period to 35 years
- a change to paying expenses out of the System's assets rather than out of the General Fund

The legislated changes in benefit provisions will result in reduced costs and liabilities for the System. These modifications are also reflected and include the following:

- an increase of 1.15% in employee contributions
- cap on compensation increases used in average final compensation
- COLA not applied to benefits until participant has been on retiree payroll for 12 months
- Additional changes for members who did not have 10 years of service as of July 1, 1993:
 - Normal retirement age increased to 62
 - COLA eliminated until normal retirement age
 - Early retirement reduction of 6% per year from age 62
 - Vacation and sick pay are no longer includable in average final compensation

Absent the assumption changes, these benefit reforms would have served to reduce the contribution rate by 1.98%. In combination with the assumption changes the combined rate for the System drops from 22.52% to 16.49% for a total reduction of 6.03% of payroll.

We are concerned that the procedures used to change actuarial assumptions, (i.e., by legislation and not by objective evaluation) will seriously weaken the System's funding in the future. Current cost reductions produced by the legislated assumption changes are only a deferral of costs to future years. Legislated changes to benefits will produce actual reductions in costs but these only account for one third of the total projected drop in contributions.

The balance of this section summarizes recent trends in the System's finances, analyzes the actuarial experience in the System during the past year, and concludes with summary tables useful for reference purposes.

System Trends

Retirement System Contribution Rates*

The contribution rate dropped sharply in the past year due to legislated changes to the benefits as well as the actuarial assumptions. Without these changes the contribution rate would have increased over the 1992 rate to 22.52%.

**Rates do not include retiree health insurance charges or administrative expenses. Rates shown are composite rates for the State regular employees, MTRA teachers, Old System Teachers, and the State special groups: State Police, Game Wardens, Sea and Shore Wardens, Prison Wardens, Liquor Inspectors, and Forest Rangers.*

The System's assets grew slightly more than expected from 1992 to 1993 due to an asset gain. This continues a trend of superior investment performance over the past several years.

**System Assets
(in billions)**

**Unfunded Liabilities
(in billions)**

The unfunded liability decreased by \$618 million over what was expected between 1992 and 1993. This was primarily due to legislated changes in benefits and actuarial assumptions.

Contributions over the past year approached their normal levels as the State ceased its deappropriations from the pension budget. Contributions are still below their normal levels due to forced furloughs decreasing the payroll base.

System Experience

July 1, 1992 - June 30, 1993

The key indicator of overall experience in the System is the composite State contribution rate. The rate is set so that it will be stable from year to year if experience is exactly as expected. An increase in the rate indicates unfavorable experience and a decrease, favorable experience or specific changes, during the previous year.

The rate decreased from 22.09% to 16.49% mostly due to legislated changes in benefit provisions and assumptions. The overall experience of the System during the year ending June 30, 1993, was slightly better than expected as explained in the following sections.

The balance of this part examines the System's experience in more detail.

Assets

As of June 30, 1993, the System has present funds, when measured on a market value basis, of \$2.92 billion, an increase of \$0.46 billion from a 1992 figure of \$2.46 billion. When measured on an actuarial basis, using a method which smooths market fluctuations, System assets increased by \$0.36 billion to \$2.76 billion in 1993 from \$2.40 billion in 1992. The components of this change are:

- + \$311 million from employer and member contributions
- \$231 million from payment of benefits and expenses
- + \$195 million from expected investment experience (i.e., 8.0%)
- + \$ 82 million from asset gain (i.e., actual rate was 11.36%)

= \$357 million total increase in assets

The asset gain for state and teachers excluding participating local districts was \$55 million.

The next section of this report presents more detailed information on System assets.

Liabilities

Throughout this report we discuss three types of liability: actuarial liability, accrued benefit liability, and pension benefit obligation.

Actuarial Liability

In general, actuarial liabilities are calculated for purposes of determining future contributions and are directly dependent upon the particular "funding method" used by the actuary. Use of different funding methods would provide entirely different results, when nothing else has changed (e.g., inflation, salaries, etc.). Unfunded actuarial liabilities include future anticipated increases in pay and service credits.

As of June 30, 1993, the State's unfunded actuarial liability was \$2.64 billion. This compares to a June 30, 1992, unfunded actuarial liability of \$3.18 billion, a decrease of \$534 million. This compares with an expected increase of \$84 million. The components of this increase are as follows:

Unfunded Actuarial Liability, June 30, 1992	\$3,177million
increase expected	84 million
decrease due to asset gain	(55) million
increase due to contributions less than expected	17 million
other gains (see below)	(36) million
decrease due to legislative changes in benefits and assumptions	(544) million
	<hr/>
Unfunded Actuarial Liability, June 30, 1993	\$2,643million

The unexpected decrease in unfunded liabilities from "other gains" is attributable to the combined effect of the following factors.

- differences between assumed and actual rates of members retiring, terminating employment or dying
- shrinkage in membership
- salary increases lower than expected

Accrued Benefit Liability

The second type of liability is the accrued benefit liability. This represents the liabilities for all future benefits, based on members' earnings and service credits as of the valuation date June 30, 1993. The difference between this figure and the market value of System assets represents the unfunded accrued benefit liability. As of June 30, 1993, the unfunded accrued benefit liability was \$1.25 billion, as compared to a June 30, 1992, unfunded accrued benefit liability of \$1.49 billion.

Pension Benefit Obligation

The third type of liability is the pension benefit obligation (PBO). This is similar to the accrued benefit liability, but it reflects anticipated pay increases. The PBO is a liability disclosure required by the Governmental Accounting Standards Board and is compared with the book value of System assets to determine the amount unfunded. The unfunded PBO was \$2.83 billion on June 30, 1992, and is \$2.57 billion on June 30, 1993.

Contributions

In the "Contributions" section of this report, we present detailed information on the development of State contribution rates to the System, calculated as of June 30, 1993. In addition, this section discusses the application of the State contribution rate for fiscal year budget purposes.

Contributions to the System consist of:

- a "normal contribution" for the portion of projected liabilities attributable to service of members during the year following the valuation date
- an "unfunded actuarial liability contribution" for the excess of projected liabilities allocated to service to date over assets on hand
- a "disability benefit" contribution for the expected value of future disability (new law) benefits to be paid as a result of disablements occurring during the year following the valuation date
- a "death benefit" contribution (consisting of two parts: survivor benefits and accidental death benefits) for the expected value of future death benefits to be paid as a result of deaths occurring during the year following the valuation date

The composite contribution rate for all State employees and teachers decreased from 22.09% of payroll as of June 30, 1992, to 16.49% of payroll as of June 30, 1993. The primary components of this change are shown below.

Contribution Rate as of June 30, 1992	22.09 %
Contributions less than expected	0.08
Asset Gain	(0.27)
Net effect Liability Gains, Membership Growth, and Shifts in Payroll Among the State Employee and Teacher Groups	0.62
Legislated change in assumptions/benefits	(6.03)
Contribution Rate as of June 30, 1993	16.49 %

The net effect liability gains results in an increase in contribution rates due to the shrinkage in payroll. While there was a decrease in unfunded liability, the fact that the unfunded liability is amortized as a level percentage of payroll means that payroll shrinkage causes increases in contribution rates.

SUMMARY OF PRINCIPAL RESULTS

TOTAL* (State and Teacher)

1. Participant Data	<u>June 30, 1993</u>	<u>June 30, 1992</u>

Accidental Death	0.12%	0.12%
Total	13.53%	18.69%

* Excludes eight special groups and charges for retiree health insurance and administrative expenses.

ASSETS

In this section we present the value assigned to assets held by the System. These assets are valued on three different bases: the book value, the market value, and the actuarial value.

Book Value of Assets

Table II-1 is a comparison, on a book value basis, of System assets as of June 30, 1993, and June 30, 1992, in total and by investment category. The book value is essentially the purchase price for equity investments and amortized value for fixed income investments such as bonds.

Market Value of Assets

For accounting statement purposes, System assets are valued at current market values. Briefly stated, these values represent the "snapshot" or "cash-out" value of System assets as of the valuation date. In addition, the market value of assets provides a reference point for comparison purposes. Table II-2 presents both book value and market value of total System assets by investment category as of June 30, 1993, and also shows the proportion of total assets by investment category for market value.

Actuarial Value of Assets

The market value of assets, representing a "liquidation" value of the funds, is not a good measure of the System's ongoing ability to meet its obligations. Ongoing funding requirements established using market values are subject to significant variability because of the volatility of market values.

As a consequence, actuarial valuations employ a technique for determining the actuarial value of assets which dampens the swings in market value. The specific technique adopted sets the actuarial value of assets by the following method:

Step 1: Determine the total yield on the investments of the System using the full investment return (including capital gains) measured by the difference in the actuarial value of the assets at the beginning of the fiscal year just ended and the market value of assets at the end of the year (18.08%).

Step 2: Calculate the excess of the yield determined in Step 1 over the expected yield for the same year according to the actuarial assumptions. $(18.08\% - 8.00\% = 10.08\%)$

Step 3: Calculate an adjusted rate equal to the expected rate plus one-third of the rate determined in step 2. $(8.00\% + (1/3 * 10.08\%) = 11.36\%)$

Step 4: The actuarial value of assets used in this valuation equals the amount that would have existed if the actual yield on the assets had been at the rate determined in Step 3.

Allocation by Group

Since retirement benefit costs are calculated separately for State Employees, Teachers and other Special Groups, total assets (market and actuarial values) must be allocated to each of these groups. We have made this allocation as of June 30, 1993, in proportion to System reserves (provided at book value). These are shown in Table II-3. The total for each group has been further allocated between the Member Contribution Fund and the Retirement Allowance Fund. The resulting allocations are shown in Tables II-4 and II-5.

LIABILITIES

Actuarial Liabilities

A fundamental principle in financing the liabilities of a retirement program is that the cost of its benefits should be related to the period in which benefits are earned, rather than to the period of benefit distribution. There are several methods currently used in making such a determination.

The method used for this valuation is referred to as the "entry age normal actuarial cost method." Under this method, a level-percent-of-pay employer cost is determined which, along with member contributions, will pay for projected benefits at retirement for a new entrant into the plan. It is assumed applicable to all active plan members. The level percent developed is called the normal cost rate and the product of that rate and payroll is the normal cost.

The actuarial liability is that portion of the present value of projected benefits that will not be paid by future employer normal costs or member contributions. The difference between this liability and funds accumulated as of the same date is referred to as the unfunded actuarial liability. If the employer's contributions exceed the employer's normal cost for the year, after allowing for interest earned on the previous balance of the unfunded actuarial liability, this liability will be reduced. Benefit improvements, actuarial gains and losses, and changes in actuarial procedures will also have an effect on the total actuarial liability and on the portion of it that is unfunded.

After the amount of the unfunded actuarial liability has been determined, a schedule of contributions is established to amortize that amount over a given period. Effective with the 1987 valuation, a thirty year amortization period was adopted for the Maine State Retirement System. Effective with this valuation the amortization period has been extended to 35 years, from 1993. Payments to fund the actuarial liability will be a level percentage of payroll.

In Table III-1 we have summarized the actuarial liabilities as of June 30, 1993, and the amounts that were unfunded.

**TABLE III-1
ACTUARIAL LIABILITIES**

	<u>State Employees</u>	<u>MTRA* Teachers</u>	<u>All State Employees</u>

Accounting Statement Information

Statement No. 35 of the Financial Accounting Standards Board requires the System to disclose certain information regarding its funded status.

Statement No. 5 of the Governmental Accounting Standards Board, issued during 1986, establishes standards for disclosure of pension information by public employee retirement systems and governmental employers in notes to financial statements and supplementary information. This statement specifies that a comparison of the present value of accrued (accumulated) plan benefits with the value of plan assets must be provided by the System.

As directed by the above referenced accounting statements, the liabilities shown in Table III-2, Accrued Benefit Liabilities, do not include any projections for future creditable service and pay increases. The liabilities shown in Table III-3, GASB Disclosure, are based on current creditable service but include future pay projections.

Both present values of accrued benefits are determined assuming that the plan is ongoing and participants continue to terminate employment, retire, etc. in accordance with the actuarial assumptions.

**TABLE III-2

* Includes Old System Teachers.

CONTRIBUTIONS

General Comments

Under established procedures, contribution rates based on this June 30, 1993, actuarial valuation will be used to determine Fiscal Year 1995 State appropriations to the Maine State Retirement System. In this context, the term "contribution rate" means the percentage which is applied to a particular active member payroll to determine the actual contribution amount (i.e., in dollars) for the group.

Description of Rate Components

Except for ancillary benefits (disability, survivors' and accidental death benefits), the entry age normal method was used to develop the contribution rates in this section. Under this funding method, as with most other actuarial funding methods, a total contribution rate is determined which consists of two elements: the normal cost rate and the unfunded actuarial liability rate. The contribution rates for ancillary benefits were determined separately using a term cost method. These elements are described in more detail below.

Normal Cost Rate

For State employees, teachers (MTRA) and each special group, an individual entry age normal cost rate was determined for a typical new entrant of each respective group. This rate was determined by taking the value, as of age at entry into the plan, of the member's projected future benefits, reducing it by the value of future member contributions, and dividing it by the value, also as of the member's entry age, of his expected future salary. The normal cost rate, so determined separately for each group, was assumed applicable to all active members of the group.

Unfunded Actuarial Liability Rate

The unfunded actuarial liability under the entry age normal method equals the present value, at time of valuation, of future benefits less the present value of future normal costs, future member contributions and current assets. The unfunded actuarial liability rate (or amortization rate) is the level percent of active member payroll which, when applied to each year's payroll, is sufficient to amortize the unfunded actuarial liability over 35 years from June 30, 1993.

Ancillary Benefit Rate

For each separate cost group (State employees, teachers, etc.) the cost of claims expected to be incurred during the year was determined as a percent of active member payroll. The State appropriation for ancillary benefits will then be determined by applying the ancillary benefit rate to the appropriate active member payroll.

Total Contribution Rate Summary

In Table IV-1 we present total contribution rates, determined as of June 30, 1993, applicable for determining the Fiscal Year 1995 State appropriations to the System, using the cost methods described above. These were developed using actuarial assumptions and methods described in the "Actuarial Assumptions and Methods" section.

The derivations of the unfunded actuarial liability rates for each group are shown in Table IV-2.

TABLE IV-1

* Includes liabilities for both closed and open plans. Unfunded actuarial liability is attributable to closed plan only.

** Does not include cost of Automatic Option 2.

RESERVES FOR DISABILITY, SURVIVOR, AND ACCIDENTAL DEATH BENEFITS

Retirement benefits under the System are funded on a basis expected to result in level percent of pay contributions over the members' working lives. This funding method involves projecting the expected benefits payable in all future years, and spreading the costs to produce a level pattern.

In contrast, employer contributions for certain ancillary benefits are determined on a "term cost" basis. Under this funding method, the annual cost for a year is determined as the value of benefit claims expected to be "incurred" during the year.

For example, the value (or cost) of a survivor pension expected to become payable during a year is the present value of all the future monthly payments expected because of a member's death. Under the term cost method, the employer contribution reflects only the cost of events (deaths or disabilities) expected to occur in the current year.

Types of benefits under the System which are funded using the term cost method are the "new" disability benefit (effective in 1977), survivor benefits, and accidental death benefits. The cost of benefits for members who became disabled under the old provisions is funded along with retirement benefits.

For each of these benefits funded by the term cost method, a separate trust fund reserve is maintained. Each fund is increased by employer contributions and investment earnings and decreased by benefits paid.

Each year, as a part of the actuarial valuation we compare the present value of benefits payable (theoretical reserve) with the trust fund reserve (actual reserve). Under ideal circumstances the actual reserve will exceed the theoretical reserve to allow for a margin or "cushion" to absorb future experience losses. We show the trust fund at "actuarial value", as described in the "Assets" section.

Trends in the ratio of actual to theoretical reserves may indicate a need to change the assumptions used to value benefits which, in turn, will lead to a change in employer contribution rates. For example, this year we continue to reduce the calculated contribution rate for disability benefits by approximately 15% to reflect ongoing favorable experience in that fund.

The following sections compare the actual reserves with theoretical reserves based on an assumed rate of investment return of 8%.

A. Disability Benefits Reserve

1. Theoretical Reserve	
a. State Employees	\$73,801,631
b. Teachers	\$61,218,764
c. Participating Districts	\$7,762,329
d. Total	\$142,782,724
2. Actual Reserve (Actuarial Value)	\$191,073,957
3. Ratio: (2) / (1)	133.82%

B. Survivor Benefits Reserve

1. Theoretical Reserve	
a. State Employees	\$22,441,463
b. Teachers	\$10,815,126
c. Participating Districts	\$3,154,504
d. Total	\$36,411,093
2. Actual Reserve (Actuarial Value)	\$53,274,203
3. Ratio: (2) / (1)	146.31%

C. Accidental Death Benefit Reserve

1. Theoretical Reserve	\$3,578,165
2. Actual Reserve (Actuarial Value)	\$8,566,379
3. Ratio: (2) / (1)	239.41%

SUMMARY OF PLAN PROVISIONS FOR STATE EMPLOYEES AND TEACHERS

1. Membership.

Membership is a condition of employment for state employees and teachers, and optional for elected and appointed officials. Membership ceases on the earlier of withdrawal of contributions, retirement, or death.

2. Member Contributions.

Except as otherwise described below, members are required to contribute 7.65% of earnable compensation.

Contribution requirements for special groups:

- State police, inland fisheries and wildlife officers (game wardens), and marine resources officers (sea and shore wardens) employed before 9/1/84—8.65% of earnable compensation for 20 years; 7.65% thereafter.
- State police and prison employees employed after 8/31/84—8.65% of earnable compensation for 25 years; 7.65% thereafter.
- Forest rangers and state prison employees employed before 9/1/84—8.65% of earnable compensation until eligible for retirement; 7.65% thereafter.

3. Average Final Compensation.

For purposes of determining benefits payable under the System, average final compensation is the average annual rate of earnable compensation for the 3 years of creditable service (not necessarily consecutive) which produce the highest such average.

For compensation paid on or after July 1, 1993, increases in compensation of greater than 5% per year or 10% over the highest 3 years will not be included in calculating average final compensation unless the employer pays the cost of including such compensation.

The definition of compensation will no longer include sick and vacation pay for those members who have less than 10 years of service at July 1, 1993.

4. Creditable Service.

Creditable service includes service while a member, certain service prior to the establishment of the System, purchased military service credit, and service while receiving disability benefits under the System.

5. Service Retirement Benefits.

Except as otherwise described below:

Eligibility for members in service: 25 years of creditable service, or attainment of age 60 with either 10 years of creditable service or one year of service immediately before retirement.

Eligibility for members not in service: 25 years of creditable service, or attainment of age 60 with 10 years of creditable service.

Benefit: $1/50$ of average final compensation multiplied by years of membership service and up to 25 years of prior service, reduced for retirement before age 60.

Form of payment: life annuity.

SUMMARY OF PLAN PROVISIONS FOR STATE EMPLOYEES AND TEACHERS (Continued)

For participants who have less than 10 years of service at July 1, 1993, the eligibility age is increased to age 62 and early retirement benefits are reduced 6% for each year before 62.

If greater than the benefits produced by the standard formulas, the following benefits are available for special groups:

State police, inland fisheries and wildlife officers (game wardens), and marine resources officers (sea and shore wardens) employed before 9/1/84:

Eligibility: 20 years of creditable service in named positions.

Benefit: $1/2$ of average final compensation plus 2% for each year of service in excess of 20. If greater, the pro-rated portion of the benefit for service before July 1, 1976, is based on annual pay instead of average final pay.

Form of payment: 50% joint and survivor annuity.

State police employed after 8/31/84:

Eligibility: 25 years of creditable service as a state police officer.

Benefit: same as for general employees, reduced for payment before age 55 rather than age 60.

Form of payment: life annuity.

Forest rangers employed before 9/1/84:

Eligibility: age 50 with 25 years of creditable service as a forest ranger.

Benefit: $1/2$ of average final compensation plus 2% for each year of service earned after qualification for retirement. If greater, the pro-rated portion of the benefit for service before July 1, 1976, is based on annual pay instead of average final pay.

Form of payment: life annuity.

Airplane pilots employed before 9/1/84:

Eligibility: age 55 and 25 years of creditable service as an airplane pilot.

Benefit: greater of (1) $1/2$ of average final compensation plus 2% for each year of service earned after qualification for retirement, and (2) if retiring after age 60, the benefit under the general formula.

Form of payment: life annuity.

Liquor inspectors employed before 9/1/84:

Eligibility: age 55 and 25 years of creditable service as a liquor inspector.

Benefit: $1/2$ of average final compensation plus 2% for each year of service earned after qualification for retirement. If greater, the pro-rated portion of the benefit for service before July 1, 1976 is based on annual pay instead of average final pay.

Form of payment: life annuity.

SUMMARY OF PLAN PROVISIONS FOR STATE EMPLOYEES AND TEACHERS (Continued)

State prison employees employed before 9/1/84:

Eligibility: age 50 and 20 years of creditable service as a prison employee.

Benefit: $1/2$ of average final compensation plus 2% for each year of service earned after qualification for retirement.

Form of payment: life annuity.

State prison employees employed after 8/31/84:

Eligibility: 25 years of creditable service as a prison employee.

Benefit: same as for general employees, reduced for retirement before age 55 rather than age 60.

Form of payment: life annuity.

6. Disability Retirement Benefits.

Eligibility: permanently mentally or physically incapacitated before normal retirement age while in service; unable to perform duties of own position; employed prior to October 16, 1992, and did not elect no-age disability option.

Benefit: $66\frac{2}{3}\%$ of average final compensation, reduced by employment earnings over \$10,000, and to the extent that the benefit, in combination with worker's compensation and Social Security, exceeds 80% of average final compensation.

Form of payment: payment begins on termination of service and ceases on cessation of disability or after 5 years, unless the member is unable to engage in any gainful activity; in which case payments cease on the earlier of 10 years following normal retirement age or date the service retirement benefit exceeds the disability benefit.

Conversion to service retirement: during the period of disability average final compensation is increased with cost-of-living adjustments and service is credited. On the date when service benefits reach a level of $66\frac{2}{3}\%$ of average final compensation or 10 years after the normal retirement date, if earlier, the disability benefit converts to a service retirement benefit based on service and pay at that point.

7. No-age Disability Retirement Benefits.

Eligibility: permanently mentally or physically incapacitated while in service; unable to perform duties of own position; employed on or after October 16, 1992, or employer prior to October 16, 1992, and elected the provisions of No Age Disability.

Benefit: 59% of average final compensation, reduced by employment earnings over \$10,000, and to the extent that the benefit, in combination with Workers' Compensation and Social Security, exceeds 80% of average final compensation.

Form of payment: payment begins on termination of service and ceases on cessation of disability or after 5 years, unless the member is unable to engage in any gainful activity; in which case payments cease on the date the service retirement benefit exceeds the disability benefit.

Conversion to service retirement: during the period of disability average final compensation is increased with cost-of-living adjustments and service is credited. On the date when service benefits reach a level of 59% of average final compensation the disability benefit converts to a service retirement benefit based on service and pay at that point.

SUMMARY OF PLAN PROVISIONS FOR STATE EMPLOYEES AND TEACHERS (Continued)

8. Ordinary Death Benefits.

Eligibility: death while active or disabled.

Benefit: option 2 (see item 12) is automatically effective with benefit payable to designated beneficiary, spouse, or parents; however, beneficiary may elect survivor benefits payable to a surviving spouse, children, parents, or other beneficiaries in monthly amounts varying by number of eligible survivors. Otherwise, accumulated contributions are payable to the estate.

9. Accidental Death Benefits.

Eligibility: death while active or disabled resulting from injury related to employment.

Benefit: if the member leaves no dependent children, 2/3 of the member's average final compensation to the surviving spouse until death; if there remain surviving dependent children, an annual sum of the member's final average compensation shared between dependent children and surviving spouse (if any). Benefits are reduced by amounts payable under Workers' Compensation.

10. Refund of Contributions.

Eligibility: termination of service except by retirement or death.

Benefit: member's accumulated contributions with interest.

11. Cost-of-living Adjustments.

All retirement and survivor benefits are adjusted each year there is a percentage change in the Consumer Price Index, based on the Index. Cost-of-living adjustments are effective September 1 and are applied to all benefits which have been in payment for twelve months. The maximum increase or decrease is 4%. Earnable compensation used in determining benefits for disability members is indexed similarly.

Member who did not have 10 years of service on July 1, 1993, will not receive a cost-of-living adjustment until they reach their normal retirement age.

12. Optional Methods of Payment.

Option 1: Cash refund equal to the excess of accumulated contributions at date of retirement over total payments made to date of death which are attributable to member contributions.

Option 2: 100% joint and survivor annuity.

Option 3: 50% joint and survivor annuity.

Option 4: Any other benefit which is actuarially equivalent to the retirement allowance and is approved by the Board.

ACTUARIAL ASSUMPTIONS AND METHODS

Actuarial Assumptions

		<u>State Employees</u>	<u>Teachers</u>
1. Rate of Investment Return		8.2%	8.2%
2. Cost-of-living Increases in Benefits		4.0%	4.0%
3. Rates of Salary Increase (% at Selected Ages)	<u>Age</u>		
	20	10.0	10.0
	25	8.8	8.8
	30	7.7	7.7
	35	7.2	7.2
	40	6.7	6.7
	45	6.2	6.2
	50	6.0	6.0
	55	6.0	6.0
	60	6.0	6.0
	65	6.0	6.0

The above rates include a 6% across-the-board increase at each age. Calculations have been adjusted to account for the 5%-per-year/10%-over-three-years cap on final pay.

		<u>State Employees</u>			<u>Teachers</u>		
4. Rates of Termination at Select and Ultimate Service (% at Selected ages)*	<u>Age</u>		<u>Service</u>			<u>Service</u>	
		0-1	1-2	2+	0-1	1-2	2+
	20	40.0	20.0	15.0	30.0	20.0	15.0
	25	35.0	20.0	10.0	25.0	20.0	10.0
	30	30.0	15.0	8.0	25.0	20.0	8.0
	35	25.0	15.0	6.0	25.0	20.0	6.0
	40	25.0	15.0	4.5	25.0	20.0	4.5
	45	25.0	10.0	3.0	25.0	20.0	3.0
	50	25.0	10.0	2.5	25.0	20.0	2.5
	55	20.0	10.0	2.0	25.0	20.0	2.0

* Members with ten or more years of service and whose age plus service totals 60 or more are assumed to elect deferred vested benefits; other terminations are assumed to elect refunds.

5. Rates of Healthy Life Mortality at Selected Ages (number of deaths per 10,000 members)*	<u>Age</u>	<u>Male</u>	<u>Female</u>	<u>Male</u>	<u>Female</u>
	20	5	3	5	2
	25	6	3	6	3
	30	8	5	7	4
	35	11	7	10	6
	40	16	9	14	8
	45	29	14	23	12
	50	53	22	42	18
	55	85	33	71	27
	60	131	55	109	44
	65	213	96	174	77
	70	361	165	292	129

* For State Regular and Teachers 5% of deaths assumed to be accidental; for State Special 20% of deaths assumed to be accidental.

6. Rates of Disabled Life Mortality at Selected Ages (number of deaths per 10,000 members)	Age	State Employees		Teachers	
		Male	Female	Male	Female
	45	349	191	349	191
	50	376	207	376	207
	55	420	240	420	240
	60	488	288	488	288
	65	595	366	595	366
	70	763	487	763	487

7. Rates of Retirement at Selected Ages (number retiring per 1,000 members)	Age	State Employees*	Teachers
	45	25	38
	50	38	50
	55	100	126
	59	120	146
	60	150	200
	61	100	150
	62	350	400
	63	250	250
	64	250	250
	65	750	750
	70	1000	1000

8. Rates of Disability at Selected Ages (members becoming disabled per 10,000 members)**	Age	State Employees*	Teachers
	25	5.7	5.7
	30	6.3	6.3
	35	7.3	7.3
	40	11.0	11.0
	45	22.0	22.0
	50	42.0	42.0
	55	71.9	71.9
	60	124.2	124.2

* Members of special plans are assumed to retire when first eligible for unreduced benefits.

** 10% assumed to receive Workers Compensation benefits of 66-2/3% of pay; also, rates for State special groups are higher by 7 per 10,000 at all ages. Note: Disability costs calculated using these rates were reduced 15% to reflect favorable experience.

9. Family Composition Assumptions 80% of active members are married with two children born at ages 24 and 28 (dependent until age 18); female spouse is three years younger than male spouse; no dependent parents; unmarried members have beneficiaries entitled to benefits worth 80% as much as those of married members' beneficiaries.
10. Vacation/Sick Leave Credits For members who had 10 years of service on July 1, 1993, credits for unused vacation and sick leave may be used to increase average final compensation and/or creditable service. In order to reflect this, projected benefits are increased by 1.0% for state employees and 1.3% for teachers.

Actuarial Methods

1. Funding Method

The aggregate entry age normal method is used to determine costs. Under this funding method, a total contribution rate is determined which consists of two elements, the normal cost rate and the unfunded actuarial liability (UAL) rate.

For teachers (MTRA) and State employees, including each of the eight State special groups, a normal cost rate is determined for a typical new entrant. This rate is determined by taking the value, as of age at entry into the plan, of the member's projected future benefits, reducing it by the value of future member contributions, and dividing it by the value, also as of the member's entry age, of his expected future salary.

In addition to contributions required to meet the System's normal cost, contributions will be required to fund the System's unfunded actuarial liability. The actuarial liability is defined as the present value of future benefits less the present value of future normal costs and future member contributions. The unfunded actuarial liability is the total of the actuarial liability for all members less the actuarial value of the System's assets. The actuarial liability includes projections of future member pay increases and future service credits and should not be confused with the accrued benefit liability.

The unfunded actuarial liability is amortized by annual payments over a 35 year period from July 1, 1993. The payments are determined so that they will be a level percentage of pay, assuming total pay increases 6% per year.

Costs for ancillary benefits (death and disability) are determined using a term cost method.

2. Asset Valuation Method

For purposes of the June 30, 1993, actuarial valuation, assets are valued at an "actuarial value" as described in the "Assets" section in this report.

ACTUARIES' REPORT: LEGISLATIVE RETIREMENT SYSTEM—1993

The Maine State Retirement System has retained the firm of Milliman and Robertson, Inc., as consulting actuaries. The following report is Milliman and Robertson's actuarial valuation of the Maine Legislative Retirement System for the fiscal year ending June 30, 1993. The report includes the following sections:

	Page
Participant Data	145
Cost Results	145

B. Unfunded Actuarial Liability	0
C. Market Value of Assets	1,834,276
D. Unfunded Accrued Liability	0
E. Amortization Period	N/A

SUMMARY OF PLAN PROVISIONS

1. Membership.

Membership is mandatory for legislators entering on or after December 3, 1986 and optional for those who were members of the Maine State Retirement System on December 2, 1986. Membership ceases on the earlier of withdrawal of contributions, retirement, or death.

2. Member Contributions.

Members are required to contribute 7.65% of earnable compensation. Prior to July 1, 1993, members were required to contribute 4% of earnable compensation.

3. Average Final Compensation.

For purposes of determining benefits payable under the System, average final compensation is the average annual rate of earnable compensation for the three years of creditable service (not necessarily consecutive) as a legislator which produce the highest such average.

4. Creditable Service.

Creditable service includes the following:

- A. All legislative service as a member after December 2, 1986.
- B. All legislative service before December 3, 1986, for which contributions are made at the rate applicable at the Maine State Retirement System, including appropriate interest.
- C. Service while receiving disability benefits under the System.
- D. All service creditable under the Maine State Retirement System, provided the member elects to have his own and the employer's contributions on behalf of the service transferred to the legislative system.

5. Service Retirement Benefits.

Eligibility for members with more than 10 years of creditable service on July 1, 1993: 25 years of creditable service, or attainment of age 60.

Eligibility for members with less than 10 years of service on July 1, 1993: 25 years of creditable service, or attainment of age 62.

Eligibility for members not in service: attainment of age 60 with 10 years of creditable service (or five full terms as a legislator).

For eligibility, creditable service includes service under the Maine State Retirement System after termination of legislative service.

Benefit: $1/50$ of average final compensation multiplied by years of creditable service, reduced for retirement before age 60 for members with at least 10 years creditable service on July 1, 1993; reduced for retirement before age 62 for members with less than 10 years creditable service on July 1, 1993; minimum \$100 per month if at least 10 years of creditable service.

Form of payment: life annuity.

6. Disability Retirement Benefits.

Eligibility: permanently mentally or physically incapacitated before normal retirement age while in service; unable to perform duties of own position; employed prior to October 16, 1992, and did not elect no-age-disability option.

SUMMARY OF PLAN PROVISIONS (Continued)

Benefit: 66-2/3% of average final compensation, reduced by employment earnings over \$10,000, and to the extent that the benefit, in combination with Workers' Compensation and Social Security, exceeds 80% of average final compensation.

Form of payment: payment begins on termination of service and ceases on cessation of disability or after five years, unless the member is unable to engage in any gainful activity; in which case payments cease on the earlier of 10 years following normal retirement age or date the service retirement benefit exceeds the disability benefit.

Conversion to service retirement: during the period of disability average final compensation is increased with cost-of-living adjustments and service is credited. On the date when service benefits reach a level of 66-2/3% of average final compensation or 10 years after the normal retirement date, if earlier, the disability benefit converts to a service retirement benefit based on service and pay at that point.

7. No-age Disability Retirement Benefits.

Eligibility: permanently mentally or physically incapacitated while in service; unable to perform duties of own position; employed on or after October 16, 1992, or employed prior to October 16, 1992, and elected the no-age-disability option.

Benefit: 59% of average final compensation, reduced by employment earnings over \$10,000, and to the extent that the benefit, in combination with Workers' Compensation and Social Security, exceeds 80% of average final compensation.

Form of payment: payment begins on termination of service and ceases on cessation of disability or after five years, unless the member is unable to engage in any gainful activity; in which case payments cease on the date the service retirement benefit exceeds the disability benefit.

Conversion to service retirement: during the period of disability average final compensation is increased with cost-of-living adjustments and service is credited. On the date when service benefits reach a level of 59% of average final compensation the disability benefit converts to a service retirement benefit based on service and pay at that point.

8. Ordinary Death Benefits Before Eligibility for Service Retirement.

Eligibility: death while active or disabled before eligibility for service retirement.

Benefit: member's accumulated contributions at time of death. A surviving spouse, children, parents, or other beneficiaries may be eligible to elect (in lieu of contributions) survivor benefits in monthly amounts varying by number of eligible survivors.

9. Ordinary Death Benefits After Eligibility for Service Retirement.

Eligibility: death while active or disabled after eligibility for retirement but before benefit commencement date.

Benefit: Option 2 (see item 13) is automatically effective with benefits payable to designated beneficiary, spouse, or parents; however, beneficiary may elect benefit described in item 7 instead. Otherwise, accumulated contributions are payable to the estate.

10. Accidental Death Benefits.

Eligibility: death while active or disabled resulting from injury related to employment.

SUMMARY OF PLAN PROVISIONS (Continued)

Benefit: if the member leaves no dependent children, two-thirds of the member's average final compensation to the surviving spouse until death; if there remain surviving dependent children, an annual sum of the member's final average compensation shared between dependent children and surviving spouse (if any). Benefits are reduced by amounts payable under Workers' Compensation.

11. Refund of Contributions.

Eligibility: termination of service except by retirement or death.

Benefit: member's accumulated contributions.

12. Cost-of-living Adjustments.

All retirement and survivor benefits are adjusted each year there is a percentage change in the Consumer Price Index, based on the Index. Cost-of-living adjustments are effective September 1 and are applied to all benefits which have been in payment for six months. For members with less than 10 years creditable service on July 1, 1993, who were active on July 1, 1993, cost-of-living adjustments are applied to all benefits which have been in payment for 12 months. The maximum increase or decrease is 4%. Earnable compensation used in determining benefits for disabled members is indexed similarly.

13. Optional Methods of Payment.

Option 1: Cash refund equal to the excess of accumulated contributions at date of retirement over total payments made to date of death which are attributable to member contributions.

Option 2: 100% joint and survivor annuity.

Option 3: 50% joint and survivor annuity.

Option 4: Any other benefit which is actuarially equivalent to the retirement allowance and is approved by the Board.

SUMMARY OF ACTUARIAL ASSUMPTIONS

This schedule summarizes the actuarial assumptions and methods used in the valuation.

ACTUARIAL ASSUMPTIONS

1. Annual Rate of Investment Return: 8.0%
2. Annual Rate of Salary Increase: 6.0%
3. Annual Cost-of-living Increase: 4.0%
4. Expense Allowance: None
5. Retirement Age:
 - Age 60 for members with at least 10 years creditable service on July 1, 1993.
 - Age 62 for members with less than 10 years creditable service on July 1, 1993.
6. Probabilities of employment termination:

<u>at Age</u>	<u>due to:</u>	<u>Death</u>	<u>Disability</u>	<u>Quitting</u>
25		.0006	.0006	.07
30		.0008	.0006	.06

SUMMARY OF PLAN PROVISIONS

Retirement On or After December 1, 1984

1. Membership.

Membership is a condition of employment for all judges serving on or after December 1, 1984. Membership ceases on the earlier of withdrawal of contributions, retirement, or death.

2. Member Contributions.

Members are required to contribute 7.65% of earnable compensation. Prior to July 1, 1993, members were required to contribute 6.5% of earnable compensation.

3. Average Final Compensation.

For purposes of determining benefits payable under the System, average final compensation is the average annual rate of earnable compensation for the three years of creditable service (not necessarily consecutive) which produce the highest such average.

4. Creditable Service.

Creditable service includes the following:

- A. All judicial service as a member after November 30, 1984.
- B. All judicial service before December 1, 1984.
- C. Service while receiving disability benefits under the System.
- D. All service creditable under the Maine State Retirement System provided the member elects to have his own and the employer's contributions on behalf of the service transferred to the judicial system.

5. Service Retirement Benefits.

Eligibility: 25 years of creditable service, or attainment of age 60 (62 if less than 10 years creditable service on July 1, 1993) with 10 years of creditable service, or attainment of age 70 and one year of service immediately before retirement.

Benefit: sum of (A) $1/50$ of average final compensation multiplied by years of membership service and creditable service transferred from the Retirement System, and (B) 75% of November 30, 1984, salary for the position held at retirement, pro-rated for prior service less than 10 years. The benefit is reduced for retirement before age 60 if at least 10 years creditable service on July 1, 1993; reduced before age 62 if less than 10 years creditable service on July 1, 1993.

Maximum Benefit: 60% of average final compensation.

Minimum Benefit: for a judge in service and age 50 on December 1, 1984, 75% of salary on June 30, 1984, for the position held at retirement.

Form of Payment: life annuity; except for a judge in service and age 50 before December 1, 1984, 50% joint and survivor annuity.

6. Disability Retirement Benefits.

Eligibility: permanently mentally or physically incapacitated while in service before eligibility for unreduced retirement; unable to perform duties of own position, a member prior to October 16, 1992, and did not elect no-age disability option.

SUMMARY OF PLAN PROVISIONS

Retirement On or After December 1, 1984 (Continued)

Benefit: $66\frac{2}{3}\%$ of average final compensation, reduced by the amount by which employment earnings plus the disability allowance exceeds the current salary of the position held at disability, and to the extent that the benefit, in combination with Workers' Compensation, exceeds 80% of the average final compensation. A member in service on November 30, 1984, may elect benefits applicable for retirement before December 1, 1984.

Form of Payment: payment begins on termination of service and ceases on cessation of disability or after five years, unless the member is unable to engage in any gainful activity; in which case payments cease on the earlier of attainment of age 70 and date the service retirement benefit exceeds the disability benefit.

Conversion to Service Retirement: during the period of disability average final compensation is increased with cost-of-living adjustments and service is credited. On the date when service benefits reach a level of $66\frac{2}{3}\%$ of average final compensation or at age 70, if earlier, the disability benefit converts to a service retirement benefit based on service and pay at that point.

7. No-age Disability Retirement Benefits.

Eligibility: permanently mentally or physically incapacitated while in service; unable to perform duties of own position; employed on or after October 16, 1992 or employed prior to October 16, 1992 and elected the no-age-disability option.

Benefit: 59% of average final compensation, reduced by the amount by which employment earnings plus the disability allowance exceeds the current salary of the position held at disability, and to the extent that the benefit, in combination with Workers' Compensation exceeds 80% of average final compensation. A member in service on November 30, 1984 may elect benefits applicable for retirement before December 1, 1984.

Form of Payment: payment begins on termination of service and ceases on cessation of disability or after five years, unless the member is unable to engage in any gainful activity; in which case payments cease on the date the service retirement benefit exceeds the disability benefit.

Conversion to Service Retirement: during the period of disability average final compensation is increased with cost-of-living adjustments and service is credited. On the date when service benefits reach a level of 59% of average final compensation the disability benefit converts to a service retirement benefit based on service and pay at that point.

8. Ordinary Death Benefits Before Eligibility for Service Retirement.

Eligibility: death while active or disabled before eligibility for service retirement.

Benefit: member's accumulated contributions at time of death. A surviving spouse, children, parents or other beneficiaries may be eligible to elect (in lieu of contributions) survivor benefits in monthly amounts varying by number of eligible survivors.

Minimum Benefit: for a judge in service prior to December 1, 1984, one-half of the judge's retirement benefit determined on date of death, payable to the spouse and/or dependent children.

9. Ordinary Death Benefits After Eligibility for Service Retirement.

Eligibility: death after eligibility for retirement but before benefit commencement date.

Benefit: Option 2 (see item 13) is automatically effective with benefits payable to designated beneficiary, spouse, or parents; however, beneficiary may elect benefit described in item 7 instead. Otherwise, accumulated contributions are payable to the estate.

SUMMARY OF PLAN PROVISIONS

Retirement On or After December 1, 1984

(Continued)

10. Accidental Death Benefits.

Eligibility: death while active or disabled resulting from injury related to employment.

Benefit: if the member leaves no dependent children, two-thirds of the member's average final compensation to the surviving spouse until death; if there remain surviving dependent children, an annual sum of the member's average final compensation shared between dependent children and surviving spouse (if any).

11. Refund of Contributions.

Eligibility: termination of service except by retirement or death.

Benefit: member's accumulated contributions.

12. Cost-of-living Adjustments.

Except as described below, all retirement and survivor benefits are adjusted each year there is a percentage change in the Consumer Price Index, based on the Index. Cost-of-living adjustments are effective September 1 and are applied to all benefits which have been in payment for six months. For members with less than 10 years creditable service on July 1, 1993, who were active on July 1, 1993, the cost-of-living adjustments are applied to all benefits which have been in payment for 12 months. The maximum increase or decrease is 4%. Earnable compensation used in determining benefits for disabled members is indexed similarly.

Minimum benefits are increased 6% per year from July, 1985, through July, 1989, and as described above thereafter.

13. Optional Methods of Payment.

Option 1: Cash refund equal to the excess of accumulated contributions at date of retirement over total payments made to date of death which are attributable to member contributions.

Option 2: 100% joint and survivor annuity.

Option 3: 50% joint and survivor annuity.

Option 4: Any other benefit which is actuarially equivalent to the retirement allowance and is approved by the Board.

Retirement Prior to December 1, 1984

(Administered by the Court System)

1. Currently Effective Annual Salary.

For determination of benefit payments, currently effective annual salary is the salary on June 30, 1984, for the position last held, increased by 6% per year each July 1, beginning July 1, 1984.

2. Regular Retirement Benefits.

Eligibility: attainment of age 70 with seven years of service or attainment of age 65 with 12 years of service, or attainment of age 60 with 20 years of service.

Benefit: three-quarters of currently effective annual salary.

SUMMARY OF PLAN PROVISIONS
Retirement Prior to December 1, 1984
(Administered by the Court System)
(Continued)

3. Disability Benefits.

Three-quarters of currently effective annual salary.

4. Survivor Benefits.

Three-eighths of currently effective annual salary, payable to the surviving spouse or dependent children.

SUMMARY OF ACTUARIAL ASSUMPTIONS

This schedule summarizes the actuarial assumptions and methods used in the valuation.

ACTUARIAL ASSUMPTIONS

1. Annual Rate of Investment Return: 8.0 percent
2. Annual Rate of Salary Increase: 6.0 percent
3. Annual Cost-of-living Increase: 4.0 percent
4. Expense Allowance: None
5. Retirement Age: 60
6. Probabilities of employment termination:

<u>at Age</u>	<u>due to:</u>	<u>Death</u>	<u>Disability</u>	<u>Quitting</u>
25		.0006	.0006	.07
