Report on the Legislative and Judicial Retirement Systems

Maine Legislative Retirement System	93
Maine Judicial Retirement System	97

REPORT FROM THE EXECUTIVE DIRECTOR FOR THE FISCAL YEAR ENDING JUNE 30, 1991

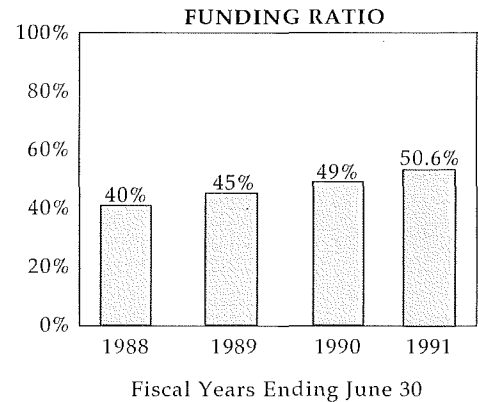

OVERVIEW

The fiscal year for the System ended on a mixed note. On the positive side, the System's financial condition continued to improve as indicated by the funding ratio calculated by the System's actuary. This ratio measures the relationship between the System's assets and liabilities. As such, an increasing funding ratio indicates that the System's financial condition is improving. Specifically, the funding ratio increased from 49% to 50.6% in the last fiscal year. Four years ago, the ratio stood at 40%.

Although this year's improvement in the ratio is encouraging, it does not foretell the future. The future improvement depends on the State's willingness to continue funding the program at required levels, and that willingness is uncertain. At year's end, \$13.5 million of contributions were deferred and additional deferrals of \$73.4 million were scheduled to occur during the next two years. These deferrals coupled with increases in liabilities due to retirement incentive programs and furlough days work to increase the System's unfunded liability near term and thereby reduce the funding ratio.

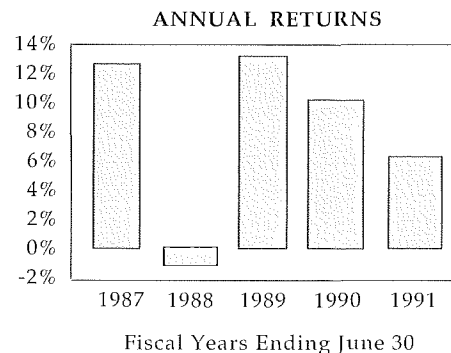

However, actual growth in assets is difficult to predict. Should investment returns exceed expectations in the next few years, the negative effects of the liability increases would be mitigated. Whether exceptional investment returns should be expected to make up for deferred contributions and other factors contributing to the System's unfunded liability is another question for State lawmakers, the Governor, System members, and others to consider when considering the future of the Maine State Retirement System.

During the upcoming budget cycle, we here at the Maine State Retirement System will endeavor to work closely with the Administration and the Legislature to help address these complex funding issues so that both the State's current needs and the System's future needs can be met.

INVESTMENTS

Investment returns for the year ended June 30, 1991, were 6.14%; for the five years preceeding June 30, 1991, they were 8.04%. Although the one-year returns were lower than expected, the long term returns as represented by the five-year period continue to meet expectations.

**ASSET ALLOCATION:
LONG-TERM TARGETS**

**ASSET ALLOCATION:
MARKET VALUE 06/30/91**

During the year, the Board of Trustees maintained a broadly diversified portfolio with holdings in domestic and international stocks, bonds, real estate, and cash. Index funds, which provide a broad market representation of securities at a relatively low cost, continue to be used along with an assortment of active managers who invest System assets.

Historically, the Board has been very active in monitoring the performance of its investment managers and over the past five years has replaced a number of firms as a result. The Board employs the services of an investment consultant to assist it in this process and to provide technical support as required.

As always, the Board will continue to explore various investment options presented to it in order to maintain its policy of diversification while earning the maximum return possible within acceptable limits of risk.

LIABILITIES

The System's unfunded accrued benefits liability (UBL), excluding the participating local districts (PLDs), was \$1.39 billion at year's end, representing an increase of \$86 million or 6.6% compared to the previous year. However, despite the UBL increasing during the year, the System's funding ratio improved. This indicates that System assets grew at a faster rate than liabilities, reflecting a positive trend that has developed during the past five years.

However, this positive trend does not mean there is not cause for some concern at the present time. A large one-time gain is reflected in the current figures (\$61 million) that resulted from plan modifications enacted by the Legislature during last year's special session. Prospectively, the Legislature has deferred a portion of employer contributions for the next two years, which will have a negative effect on the System's funding status. The "Actuaries' Report" provides further details regarding the System's funding situation.

An important objective adopted by the Board of Trustees when it formulated the System's investment strategy and actuarial assumptions was to develop a funding program that maintained a level percent of payroll over time. The underlying principle is that although payrolls are expected to increase over time, the employer's contribution rate, expressed as a percentage, will remain relatively constant.

INVESTED ASSETS VS. UNFUNDED LIABILITY

BENEFITS AND PLAN DESIGN

The Retirement System continues to provide a comprehensive package of employee benefits in the areas of retirement, life insurance, disability, and survivors' benefits.

Retirement is offered as a defined benefit program in which benefits are calculated at the point of retirement based on a prescribed formula. The Life Insurance Program provides term insurance with various supplemental options whereby an employee can increase coverage at a reasonable rate. Finally, the Disability and Survivors' Programs are designed to protect employees and their families in the event of death or illness prior to retirement.

During the 115th Legislative session, the Legislature enacted plan amendments modifying benefits of employees with less than seven years of creditable service as of December 1, 1991. As previously indicated, this change resulted in a decrease of \$61 million in the unfunded liability.

The Legislature also formed a commission to develop a plan to comply with recently enacted Federal mandates concerning disabled workers. The *Older Workers Benefit Protection Act* requires the State to expand its disability coverage for older workers and modify the manner in which it pays benefits. The commission is to report back to the Legislature with its recommendations and implementation program to insure compliance. The new program must be implemented by November 1992.

MEMBERSHIP

Membership in the Retirement System as of June 30, 1991, stood at 108,344, an increase of 840 over the previous year. In conjunction with the growth in membership, the number of participants receiving benefits (including retirement disability and survivor benefits) also continues to increase and approximated 23,791 as of June 1991, with a total of over \$184 million being disbursed in annual benefits.

The Retirement System continues to offer term life insurance coverage to all public sector employees as well as retirees throughout the State. Current coverage exceeds \$5 billion and is expected to increase into the future. The program offers low-cost coverage to all eligible employees as well as their spouses and dependents. The System's actuary has initiated an extensive review of the life insurance reserves to determine if they are adequate to meet current and future obligations. This review will ensure that benefits will be paid into the future at a reasonable expense to both the employers and employees.

The System also acts as the Social Security coverage agents for the State and local governments. Although its responsibilities were reduced by the Omnibus Budget Reconciliation Act of 1986, the legislation did not relieve the System from the administrative duties of phasing out collection and deposit responsibilities until April 1990. The System also continues to assist employers in applying for Social Security and Medicare coverages, and acting as intermediaries when questions arise.

Congress has mandated that all public sector employees not otherwise covered by a qualified pension plan be covered under Social Security. The Internal Revenue Service has also issued regulations further clarifying requirements for Social Security. The MSRS will make every effort to work with employers throughout the State in order to ensure compliance by year's end.

ADMINISTRATION

The Retirement System performs an important role as the administrator of the various State retirement, life insurance, disability and survivors' benefit programs. This role includes recordkeeping, counseling, determining eligibility and communicating with the System's members about their benefits.

Unfortunately, the System's ability to continue to improve service to its membership while maintaining adequate internal controls is now questionable in light of recent events. Furlough and shutdown days will reduce staff time

for performing these functions while benefit changes and retirement incentive programs add to the workload. The MSRS will make every effort to minimize the disruption to plan participants, but delays in responding to questions and processing retirement applications will be inevitable.

We here at the Retirement System continue to value our good relationship with all plan participants and their employers, and will continue to seek ways of maintaining that relationship through these difficult times.

Claude R. Perrier
Executive Director

OVERVIEW

The Maine State Retirement System was established by the legislature in 1942. It is a contributory retirement system covering all public school teachers, state employees (except members of the Judiciary and Legislature, who are covered under the Judicial and Legislative Retirement Systems), and the employees of 275 political subdivisions.

The responsibility for the operation of the Retirement System is vested in the Board of eight Trustees. The Board formulates policies for and exercises general supervision over the System under the provisions of 5 MRSA Chapters 421, 423, and 425, and appoints the Executive Director, who is charged with the administrative responsibility of the System, including approval of benefit payments.

The Board is comprised of members elected by the Maine State Employees Association (MSEA), the Maine Teachers Association (MTA), the Maine Municipal Association (MMA), four members appointed by the Governor—one who is a retired teacher nominated by the Maine State Retired Teachers Association (MSRTA) and one who is retired under the system and who is selected from a list or lists submitted by retired state employees and retired local district employees—and the State Treasurer, who serves as an ex-officio member.

MEMBERS OF THE BOARD OF TRUSTEES as of June 30, 1991

Jon A. Lund, Chairman
David S. Wakelin, Vice Chairman
George Burgoyne
William J. Deering, Ph.D.
Charles M. Jackson
John Kimball
Grover MacLaughlin
Samuel Shapiro

Governor's Appointment
Governor's Appointment
MSEA
Retired & Governor's Appt.
MMA
MTA
MSRTA & Governor's Appointment
State Treasurer, Ex-officio Member

The Board employs an actuary whose duties include making funding recommendations to the Legislature and preparing annual valuations of the assets and liabilities of the system on the basis of actuarial assumptions adopted by the Board. The actuary is also required to make such investigations of the experience of the System as deemed necessary.

A medical board composed of three physicians who are not eligible to participate in the System assist the Board in evaluating disability retirement claims.

As of June 30, 1991, there were 46,529 active members, including:

State Employees	14,658
Teachers	22,905
Participating Local Districts	8,966

In addition, there were 38,034 inactive accounts representing deposits by former members who have terminated service and whose contributions have been left on deposit with the System.

ASSETS

As of June 30, 1991, the book value of the total assets of the Maine State Retirement System amounted to \$1,892.5 million, an increase of \$130.0 million over assets at the beginning of the year. The composition of the assets is as follows:

Stock	\$1,041.3 million
Bonds	676.6 million
Mortgage-Type Investments	168.0 million
Cash Due from Other Funds	4.7 million
Other Assets	13.4 million
Due Other Funds (Judicial and Legislative Retirement Systems)	(11.7 million)

These assets had a market value of \$2,152 million at year end.

TRUST FUND RESERVES

The System's trust fund reserves were \$1,884.0 million as of June 30, 1991, an increase of \$127.5 million over reserves at the beginning of the year. A comparison of these reserves by membership grouping is as follows:

	<u>June 30, 1991</u>	<u>June 30, 1990</u>
State Employees	\$ 604.8 million	\$ 547.3 million
Teachers (post-July 1, 1924)	871.8 million	777.2 million
Teachers (pre-July 1, 1924)	(220.6) million	(189.0) million
Participating Local Districts	456.2 million	418.2 million
Consolidated (Disability and Survivor Benefits)	171.8 million	202.8 million
	<hr/>	<hr/>
TOTAL	\$1,884.0 million	\$1,756.5 million

The pre-July 1, 1924 teacher account deficit increased slightly this year. The accumulated deficit represents the excess of benefit payments with interest charges over any funding or contributions made by the State and individual teachers in this particular category.

Employer contributions to the System for benefits during the past fiscal year totaled \$168.8 million. They were made as follows:

State Employees	\$75.6 million
Teachers	64.3 million
Participating Local Districts	28.9 million

Individual member contributions totaled \$72.4 million, as compared with \$68.0 million during the previous year.

NET INCOME FROM INVESTMENTS

Net income from investments amounted to \$80.6 million, summarized as follows:

1. Net Gain/Sale of Securities		\$12.7 million
2. Income from Investments		
A. Bond Interest	\$59.8 million	
B. Stock Dividends	12.1 million	
C. Loan Premiums	0.2 million	
		<hr/>
TOTAL		\$72.1 million
3. Less: Investment/Management Fees		(\$3.9) million
		<hr/>
TOTAL INCOME FROM INVESTMENTS		\$80.9 million
4. Investment Income Distribution		
A. Maine State Retirement System	\$80.1 million	
B. Judicial Retirement System	0.7 million	
C. Legislative Retirement System	0.1 million	
		<hr/>
TOTAL DISTRIBUTION OF INVESTMENT INCOME		\$80.9 million

Expenditures and other charges to the fund totaled \$193.8 million during the year ended June 30, 1991. Retirement benefit payments totaled \$180.2 million; payments to survivors of former members were \$3.1 million; and refunds to former members and beneficiaries of former members were \$10.5 million.

RETIREMENT ALLOWANCE PAYROLL AND RETIREES

For the month of June 1991, the retirement allowance payroll totaled \$15.5 million and was distributed as follows:

	<u>Payroll Dollars</u>	<u>Number of Retirees</u>
Regular Benefit Recipients	\$13.0 million	19,237
Beneficiaries of Deceased Retirees	1.2 million	2,514
Disability Benefit Recipients	1.0 million	1,034
Survivor Benefit Recipients	0.3 million	1,006
		<hr/>
TOTAL	\$15.5 million	23,791

Retirement allowance payments during the recent fiscal year were \$13.3 million more than retirement allowance payments during the previous year. The increase in payments was due to a larger number of retirees, the statutory 4.0% cost-of-living increase granted in September 1990, and to higher average final compensation.

GROUP LIFE INSURANCE

The State Group Life Insurance Plan is administered by the Board of Trustees of the Maine State Retirement System and is available to all public school teachers, state employees, and the employees of those participating local districts that elect to provide the plan for their employees. There are three sections of the Group Life Insurance Program: basic, supplemental, and dependent plans. The basic plan offers insurance equal to the member's annual compensation, rounded up to the nearest \$1,000. Members can purchase supplemental insurance in increments equal to one, two, or three times their annual salary. There are two levels of benefits also available under dependent life insurance. Employee participation is optional under all plans.

The Group Life Insurance Fund assets, which are invested through a fund manager, totaled \$22.7 million at fiscal year end. The breakdown is as follows:

Cash	\$ 1.3 million
Bonds	21.0 million
Stocks	0.3 million
Accrued Interest	0.1 million

Funds received during fiscal year 1991 amounted to \$7.2 million. This included premiums from employees and employers amounting to \$5.5 million and earnings on investments of \$1.7 million.

Charges to the Group Life Insurance Program included payments in the following categories in fiscal year 1991:

Claims: Active Employees/Dependents	\$4.20 million
Retired Persons	1.92 million
Administrative Expenses	0.50 million

The Reserve for Future Premiums, which totaled \$11.9 million at June 30 1991, is held for the payment of premiums on account of retired State employees and teachers. Retired persons who participated in the Group Life Insurance Program for 10 continuous years prior to their retirement carry this insurance into retirement at no cost under the statute. Premiums for retired State employees and teachers are paid from the Reserve for Future Premiums. Premiums for retired PLD employees are paid by their former employers.

SOCIAL SECURITY

On October 17, 1986, Congress passed the Omnibus Budget Reconciliation Act of 1986, which transferred responsibility for depositing State and local government Social Security contributions from the individual State Social Security Agencies to the Internal Revenue Service, effective January 1, 1987. However, the budget reconciliation bill did not change the status of the State as the Social Security coverage agent for State and local government coverage. It also did not release the State from liability for the time up to and including tax year 1986 until April 15, 1990, when corrections become barred under the Federal Statute of Limitations. The legislation did not relieve the State from the administrative costs of phasing out the collection and deposit responsibilities until April 1990.

On April 7, 1986, the President signed Public Law 99-272, the Consolidated Omnibus Reconciliation Act of 1985. This law mandated that state and local employees hired after March 31, 1986, as well as employees hired prior to April 1, 1986, who were working in positions not considered to be substantial and regular, be covered by the Medicare portion of the Social Security tax if they were not already covered by Social Security. The collection of the tax and the audit of returns for this "Medicare only" coverage was also administered by this office.

When Congress initially enacted Section 218 of the Social Security Act providing Social Security coverage to state and local governments, it realized the need for the State Social Security Agencies to be funded for their intermediary role as collector, auditor, depositor, and liaison between the sub-state entities and the Social Security Administration. States were allowed to retain the investment earnings gained from their collections prior to deposit through the

Federal Reserve Banking System. Today all 50 states fund the operation of their Social Security Agencies directly or indirectly from these interest earnings.

In removing the Social Security collection and deposit responsibility for local government employees from the individual states, Congress eliminated a source of funding needed by states to continue their role in administering Section 218 Social Security coverage for state and local government employees. The wage and contributions for both Medicare and Social Security for all the years including 1986 for the State of Maine has been reconciled to the wage and tax statements (W-2s) and any and all necessary corrections have been made. It now remains a matter for the Federal government to balance its records with those of the State of Maine.

ACTUARIES' REPORT

The Maine State Retirement System has retained the firm of Milliman and Robertson, Inc., as consulting actuaries. The firm's report to the System on its actuarial valuation is what this section contains. The contents of this report include the following sections:

	Page
Executive Summary	39
Assets	47
Liabilities	51
Contributions	55
Reserves for Disability, Survivor, and Accidental Death Benefits	58
Membership Data	60
Summary of Plan Provisions for State Employees and Teachers	64
Actuarial Assumptions and Methods	68

EXECUTIVE SUMMARY

OVERVIEW

This report presents the results of our June 30, 1991, actuarial valuation of the Maine State Retirement System. These results provide a "snapshot" view of the System's financial condition on June 30, 1991, and do not reflect any factors which have occurred since then that could affect the System's finances.

Such factors include:

- the State not paying required contributions on schedule
- employee furloughs resulting in lower state and member contributions but not lower future benefits
- unanticipated future liabilities created by various retirement incentive programs being offered by the State and local boards of education

We are concerned about the future financial condition of the System. Following decades of underfunding, the State adopted a program to amortize the underfunding in an orderly manner. For several years the financial condition of the System has been improving and the State's contribution level has been relatively stable. However, if the State continues to defer the required contributions, the financial condition of the System will deteriorate. The situation is not yet critical and can be corrected, as long as there is a commitment by the State to pay required contributions on schedule.

The balance of this section summarizes recent trends in the System's finances, analyzes the actuarial experience in the System during the past year, and concludes with summary tables useful for reference purposes.

SYSTEM TRENDS

Retirement System Contribution Rates*

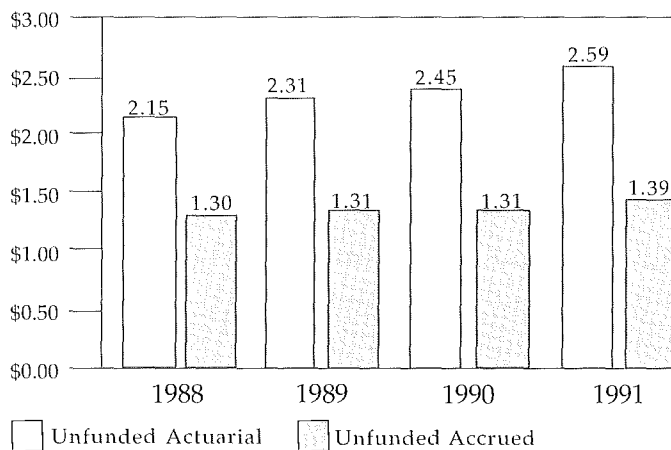

There was an increase in the System's contribution rate over the past year despite the fact that plan changes were made reducing future benefits. Without the plan change the contribution rate would have been 20.10%.

* Rates do not include retiree health insurance charges, administrative expenses or payments to fund Old System Teachers. Rates shown are composite rates for the State regular employees, MTRA teachers, and the State special groups: State Police, Game Wardens, Sea and Shore Wardens, Prison Wardens, Liquor Inspectors, and Forest Rangers.

The System's assets continue to grow. However, the increase from 1990 to 1991 was somewhat less than expected, reversing the pattern of asset gains experienced during the preceding several years.

System Assets**Unfunded Liabilities**

The unfunded actuarial liability increased by more than \$100 million over what was expected between 1990 and 1991. This "loss" will have to be funded by increased contributions over the next 26 years.

The downturn in 1991 of net cash flows to the System is cause for concern. If this trend continues, the System's financial condition may rapidly erode.

Cash Flows

SYSTEM EXPERIENCE

July 1, 1990 - June 30, 1991

The key indicator of overall experience in the System is the composite State contribution rate. The rate is set so that it will be stable from year to year if experience is exactly as expected. An increase in the rate indicates unfavorable experience and a decrease, favorable experience, during the previous year. Since the rate increased from 19.66% to 19.80%, the overall experience of the System during the year ending June 30, 1991, was less favorable than expected. If it were not for the plan change which resulted in a decrease in plan liabilities, the State contribution rate would have increased to 20.10%. The balance of this part examines the System's experience in more detail.

Assets

As of June 30, 1991, the System has present funds, when measured on a market value basis, of \$2.14 billion, an increase of \$0.17 billion from a 1990 figure of \$1.97 billion. When measured on an actuarial basis, using a method which smooths market fluctuations, System assets increased by \$.20 billion to \$2.16 billion in 1991 from \$1.96 billion in 1990. The components of this change are:

+	\$240 million from employer and member contributions
-	\$194 million from payment of benefits and expenses
+	\$168 million from expected investment experience (i.e., 8.5%)
-	\$ 10 million from investment loss (i.e., actual rate was 8.0%)
<hr/>	
=	\$204 million total increase in assets

The next section of this report presents more detailed information on System assets.

Liabilities

Throughout this report we discuss three types of liability: actuarial liability, accrued benefit liability, and pension benefit obligation.

Actuarial Liability

In general, actuarial liabilities are calculated for purposes of determining future contributions and are directly dependent upon the particular "funding method" used by the actuary. Use of different funding methods would provide entirely different results, when nothing else has changed (e.g., inflation, salaries, etc.). Unfunded actuarial liabilities include future anticipated increases in pay and service credits.

As of June 30, 1991, the State's unfunded actuarial liability was \$2.59 billion. This compares to a June 30, 1990, unfunded actuarial liability of \$2.45 billion, an increase of \$137 million. This compares with an expected increase of \$72 million. The components of this increase are as follows:

Unfunded Actuarial Liability, June 30, 1990	\$2,454million
• increase expected	72 million
• increase due to asset loss	10 million
• increase due to contributions less than expected	13 million
• other losses (see below)	103 million
• decrease due to plan amendment	(61) million
Unfunded Actuarial Liability, June 30, 1991	<u>\$2,591million</u>

The unexpected increase in unfunded liabilities from "other losses" is attributable to the combined effect of the following factors.

- salary increases greater than expected
- differences between assumed and actual rates of members retiring, terminating employment or dying
- growth in membership
- payment form selections made by retiring members

Accrued Benefit Liability

The second type of liability is the accrued benefit liability. This represents the liabilities for all future benefits, based on members' earnings and service credits as of the valuation date June 30, 1991. The difference between this figure and the market value of System assets represents the unfunded accrued benefit liability. As of June 30, 1991, the unfunded accrued benefit liability was \$1.39 billion, as compared to a June 30, 1990, unfunded accrued benefit liability of \$1.31 billion.

Pension Benefit Obligation

The third type of liability is the pension benefit obligation (PBO). This is similar to the accrued benefit liability, but it reflects anticipated pay increases. The PBO is a liability disclosure required by the Governmental Accounting Standards Board and is compared with the book value of System assets to determine the amount unfunded. The unfunded PBO was \$2.19 billion on June 30, 1990, and is \$2.39 billion on June 30, 1991.

Contributions

The "Contributions" section of this report, we present detailed information on the development of State contribution rates to the System, calculated as of June 30, 1991. In addition, this section discusses the application of the State contribution rate for fiscal year budget purposes.

Contributions to the System consist of:

- a "normal contribution" for the portion of projected liabilities attributable to service of members during the year following the valuation date
- an "unfunded actuarial liability contribution" for the excess of projected liabilities allocated to service to date over assets on hand

- a "disability benefit" contribution for the expected value of future disability (new law) benefits to be paid as a result of disablements occurring during the year following the valuation date
- a "death benefit" contribution (consisting of two parts: survivor benefits, and accidental death benefits) for the expected value of future death benefits to be paid as a result of deaths occurring during the year following the valuation date

The composite contribution rate for all State employees and teachers increased from 19.66% of payroll as of June 30, 1990, to 19.80% of payroll as of June 30, 1991. The primary components of this change are shown below.

Contribution Rate as of June 30, 1990	19.66 %
Contributions less than expected	0.06
Asset Loss	0.05
Net effect of plan amendment	(0.30)
Net effect Liability Losses, Membership Growth, and Shifts in Payroll Among the State Employee and Teacher Groups	0.33
Contribution Rate as of June 30, 1991	19.80 %

ASSETS

In this section we present the value assigned to assets held by the System. These assets are valued on three different bases: the book value, the market value, and the actuarial value.

Book Value of Assets

Table II-1 is a comparison, on a book value basis, of System assets as of June 30, 1991, and June 30, 1990, in total and by investment category. The book value is essentially the purchase price for equity investments and amortized value for fixed income investments such as bonds.

Market Value of Assets

For accounting statement purposes, System assets are valued at current market values. Briefly stated, these values represent the "snapshot" or "cash-out" value of System assets as of the valuation date. In addition, the market value of assets provides a reference point for comparison purposes. Table II-2 presents both book value and market value of total System assets by investment category as of June 30, 1991, and also shows the proportion of total assets by investment category for market value.

Actuarial Value of Assets

The market value of assets, representing a "liquidation" value of the funds, is not a good measure of the System's ongoing ability to meet its obligations. Ongoing funding requirements established using market values are subject to significant variability because of the volatility of market values.

As a consequence, actuarial valuations employ a technique for determining the actuarial value of assets which dampens the swings in market value. The specific technique adopted sets the actuarial value of assets by the following method:

Step 1: Determine the total yield on the investments of the System using the full investment return (including capital gains) measured by the difference in the actuarial value of the assets at the beginning of the fiscal year just ended and the market value of assets at the end of the year (7.01%).

Step 2: Calculate the excess of the yield determined in Step 1 over the expected yield for the same year according to the actuarial assumptions. ($7.01\% - 8.50\% = -1.49\%$)

Step 3: Calculate an adjusted rate equal to the expected rate plus one-third of the rate determined in step 2. ($8.50\% + (1/3 * -1.49\%) = 8.00\%$)

Step 4: The actuarial value of assets used in this valuation equals the amount that would have existed if the actual yield on the assets had been at the rate determined in Step 3.

Allocation by Group

Since retirement benefit costs are calculated separately for State Employees, Teachers and other Special Groups, total assets (market and actuarial values) must be allocated to each of these groups. We have made this allocation as of June 30, 1991, in proportion to System reserves (provided at book value). These are shown in Table II-3. The total for each group has been further allocated between the Member Contribution Fund and the Retirement Allowance Fund. The resulting allocations are shown in Tables II-4 and II-5.

LIABILITIES

Actuarial Liabilities

A fundamental principle in financing the liabilities of a retirement program is that the cost of its benefits should be related to the period in which benefits are earned, rather than to the period of benefit distribution. There are several methods currently used in making such a determination.

The method used for this valuation is referred to as the "entry age normal actuarial cost method." Under this method, a level-percent-of-pay employer cost is determined which, along with member contributions, will pay for projected benefits at retirement for a new entrant into the plan. It is assumed applicable to all active plan members. The level percent developed is called the normal cost rate and the product of that rate and payroll is the normal cost.

The actuarial liability is that portion of the present value of projected benefits that will not be paid by future employer normal costs or member contributions. The difference between this liability and funds accumulated as of the same date is referred to as the unfunded actuarial liability. If the employer's contributions exceed the employer's normal cost for the year, after allowing for interest earned on the previous balance of the unfunded actuarial liability, this liability will be reduced. Benefit improvements, actuarial gains and losses, and changes in actuarial procedures will also have an effect on the total actuarial liability and on the portion of it that is unfunded.

After the amount of the unfunded actuarial liability has been determined, a schedule of contributions is established to amortize that amount over a given period. Effective with the 1987 valuation, a thirty year amortization period was adopted for the Maine State Retirement System. Payments to fund the actuarial liability will be a level percentage of payroll.

In Table III-1 we have summarized the actuarial liabilities as of June 30, 1991, and the amounts that were unfunded.

Accounting Statement Information

Statement No. 35 of the Financial Accounting Standards Board requires the System to disclose certain information regarding its funded status.

Statement No. 5 of the Governmental Accounting Standards Board, issued during 1986, establishes standards for disclosure of pension information by public employee retirement systems and governmental employers in notes to financial statements and supplementary information. This statement specifies that a comparison of the present value of accrued (accumulated) plan benefits with the value of plan assets must be provided by the System.

As directed by the above referenced accounting statements, the liabilities shown in Table III-2, Accrued Benefit Liabilities, do not include any projections for future creditable service and pay increases. The liabilities shown in Table III-3, GASB Disclosure, are based on current creditable service but include future pay projections.

Both present values of accrued benefits are determined assuming that the plan is ongoing and participants continued to terminate employment, retire, etc. in accordance with the actuarial assumptions.

CONTRIBUTIONS

General Comments

Under established procedures, contribution rates based on this June 30, 1991, actuarial valuation will be used to determine Fiscal Year 1993 State appropriations to the Maine State Retirement System. In this context, the term "contribution rate" means the percentage which is applied to a particular active member payroll to determine the actual contribution amount (i.e., in dollars) for the group.

Description of Rate Components

Except for ancillary benefits (disability, survivors' and accidental death benefits), the entry age normal method was used to develop the contribution rates in this section. Under this funding method, as with most other actuarial funding methods, a total contribution rate is determined which consists of two elements: the normal cost rate and the unfunded actuarial liability rate. The contribution rates for ancillary benefits were determined separately using a term cost method. These elements are described in more detail below.

Normal Cost Rate

For State employees, teachers (MTRA) and each special group, an individual entry age normal cost rate was determined for a typical new entrant of each respective group. This rate was determined by taking the value, as of age at entry into the plan, of the member's projected future benefits, reducing it by the value of future member contributions, and dividing it by the value, also as of the member's entry age, of his expected future salary. The normal cost rate, so determined separately for each group, was assumed applicable to all active members of the group.

Unfunded Actuarial Liability Rate

The unfunded actuarial liability under the entry age normal method equals the present value, at time of valuation, of future benefits less the present value of future normal costs, future member contributions and current assets. The unfunded actuarial liability rate (or amortization rate) is the level percent of active member payroll which, when applied to each year's payroll, is sufficient to amortize the unfunded actuarial liability over 30 years from June 30, 1987.

Ancillary Benefit Rate

For each separate cost group (State employees, teachers, etc.) the cost of claims expected to be incurred during the year was determined as a percent of active member payroll. The State appropriation for ancillary benefits will then be determined by applying the ancillary benefit rate to the appropriate active member payroll.

Total Contribution Rate Summary

In Table IV-1 we present total contribution rates, determined as of June 30, 1991, applicable for determining the Fiscal Year 1993 State appropriations to the System, using the cost methods described above. These were developed using actuarial assumptions and methods described in the "Actuarial Assumptions and Methods" section.

The derivations of the unfunded actuarial liability rates for each group are shown in Table IV-2.

RESERVES FOR DISABILITY, SURVIVOR, AND ACCIDENTAL DEATH BENEFITS

Retirement benefits under the System are funded on a basis expected to result in level percent of pay contributions over the members' working lives. This funding method involves projecting the expected benefits payable in all future years and spreading the costs to produce a level pattern.

In contrast, employer contributions for certain ancillary benefits are determined on a "term cost" basis. Under this funding method, the annual cost for a year is determined as the value of benefit claims expected to be "incurred" during the year.

For example, the value (or cost) of a survivor pension expected to become payable during a year is the present value of all the future monthly payments expected because of a member's death. Under the term cost method, the employer contribution reflects only the cost of events (deaths or disabilities) expected to occur in the current year.

Types of benefits under the System which are funded using the term cost method are the "new" disability benefit (effective in 1977), survivor benefits, and accidental death benefits. The cost of benefits for members who became disabled under the old provisions is funded along with retirement benefits.

For each of these benefits funded by the term cost method, a separate trust fund reserve is maintained. Each fund is increased by employer contributions and investment earnings and decreased by benefits paid.

Each year, as a part of the actuarial valuation we compare the present value of benefits payable (theoretical reserve) with the trust fund reserve (actual reserve). Under ideal circumstances the actual reserve will exceed the theoretical reserve to allow for a margin or "cushion" to absorb future experience losses. We show the trust fund at "actuarial value", as described in the "Assets" section.

Trends in the ratio of actual to theoretical reserves may indicate a need to change the assumptions used to value benefits which, in turn, will lead to a change in employer contribution rates. For example, this year we reduced the calculated contribution rate for disability benefits by approximately 15% to reflect favorable experience in that fund.

The following sections compare the actual reserves with theoretical reserves based on an assumed rate of investment return of 8%.

A. Disability Benefits Reserve

1. Theoretical Reserve

a. State Employees	\$58,422,612
b. Teachers	\$51,313,096
c. Participating Districts	\$6,169,613
d. Total	\$115,905,321

2. Actual Reserve (Actuarial Value) \$144,054,135

3. Ratio: (2) / (1) 124.29%

B. Survivor Benefits Reserve

1. Theoretical Reserve

a. State Employees	\$18,761,579
b. Teachers	\$8,965,871
c. Participating Districts	\$3,078,544
d. Total	\$30,805,994

2. Actual Reserve (Actuarial Value) \$43,983,283

3. Ratio: (2) / (1) 142.78%

C. Accidental Death Benefit Reserve

1. Theoretical Reserve \$3,468,747

2. Actual Reserve (Actuarial Value) \$5,767,371

3. Ratio: (2) / (1) 166.27%

SUMMARY OF PLAN PROVISIONS FOR STATE EMPLOYEES AND TEACHERS

1. Membership

Membership is a condition of employment for state employees and teachers, and optional for elected and appointed officials. Membership ceases on the earlier of withdrawal of contributions, retirement, or death.

2. Member Contributions

Except as otherwise described below, members are required to contribute 6.5% of earnable compensation.

Contribution requirements for special groups:

- State police, inland fisheries and wildlife officers (game wardens), and marine resources officers (sea and shore wardens) employed before 9/1/84 - 7.5% of earnable compensation for 20 years; 6.5% thereafter.
- State police and prison employees employed after 8/31/84 - 7.5% of earnable compensation for 25 years; 6.5% thereafter.
- Forest rangers and state prison employees employed before 9/1/84 - 7.5% of earnable compensation until eligible for retirement; 6.5% thereafter.

3. Average Final Compensation

For purposes of determining benefits payable under the System, average final compensation is the average annual rate of earnable compensation for the 3 years of creditable service (not necessarily consecutive) which produce the highest such average.

4. Creditable Service

Creditable service includes service while a member, certain service prior to the establishment of the System, purchased military service credit, and service while receiving disability benefits under the System.

5. Service Retirement Benefits

Except as otherwise described below:

Eligibility for members in service - 25 years of creditable service, or attainment of age 60 with either 10 years of creditable service or one year of service immediately before retirement.

Eligibility for members not in service - 25 years of creditable service, or attainment of age 60 with 10 years of creditable service.

Benefit - $\frac{1}{50}$ of average final compensation multiplied by years of membership service and up to 25 years of prior service, reduced for retirement before age 60.

Form of payment - life annuity.

For participants entering the plan after 12/1/84 the eligibility age is increased to age 62 and early retirement benefits are reduced 6% for each year before 62.

If greater than the benefits produced by the standard formulas, the following benefits are available for special groups:

State police, inland fisheries and wildlife officers (game wardens), and marine resources officers (sea and shore wardens) employed before 9/1/84:

Eligibility - 20 years of creditable service in named positions.

Benefit - $1/2$ of average final compensation plus 2% for each year of service in excess of 20. If greater, the pro-rated portion of the benefit for service before July 1, 1976 is based on annual pay instead of average final compensation.

Form of payment - 50% joint and survivor annuity.

State police employed after 8/31/84:

Eligibility - 25 years of creditable service as a state police officer.

Benefit - same as for general employees, reduced for payment before age 55 rather than age 60.

Form of payment - life annuity.

Forest rangers employed before 9/1/84:

Eligibility - age 50 with 25 years of creditable service as a forest ranger.

Benefit - $1/2$ of average final compensation plus 2% for each year of service earned after qualification for retirement. If greater, the pro-rated portion of the benefit for service before July 1, 1976 is based on annual pay instead of average final compensation.

Form of payment - life annuity.

Airplane pilots employed before 9/1/84:

Eligibility - age 55 and 25 years of creditable service as an airplane pilot.

Benefit - greater of (1) $1/2$ of average final compensation plus 2% for each year of service earned after qualification for retirement, and (2) if retiring after age 60, the benefit under the general formula.

Form of payment - life annuity.

Liquor inspectors employed before 9/1/84:

Eligibility - age 55 and 25 years of creditable service as a liquor inspector.

Benefit - $1/2$ of average final compensation plus 2% for each year of service earned after qualification for retirement. If greater, the pro-rated portion of the benefit for service before July 1, 1976 is based on annual pay instead of average final compensation.

Form of payment - life annuity.

State prison employees employed before 9/1/84:

Eligibility - age 50 and 20 years of creditable service as a prison employee.

Benefit - $1/2$ of average final compensation plus 2% for each year of service earned after qualification for retirement.

Form of payment - life annuity.

State prison employees employed after 8/31/84:

Eligibility - 25 years of creditable service as a prison employee.

Benefit - same as for general employees, reduced for retirement before age 55 rather than age 60.

Form of payment - life annuity.

6. Disability Retirement Benefits

Eligibility - permanently mentally or physically incapacitated before normal retirement age while in service; unable to perform duties of own position.

Benefit - $66\frac{2}{3}\%$ of average final compensation, reduced by employment earnings over \$10,000, and to the extent that the benefit, in combination with worker's compensation and Social Security, exceeds 80% of average final compensation.

Form of payment - payment begins on termination of service and ceases on cessation of disability or after 5 years, unless the member is unable to engage in any gainful activity; in which case payments cease on the earlier of 10 years following normal retirement age or date the service retirement benefit exceeds the disability benefit.

Conversion to service retirement - during the period of disability average final compensation is increased with cost-of-living adjustments and service is credited. On the date when service benefits reach a level of $66\frac{2}{3}\%$ of average final compensation or 10 years after the normal retirement date, if earlier, the disability benefit converts to a service retirement benefit based on service and adjusted average final compensation at that point.

7. Ordinary Death Benefits Before Eligibility for Service Retirement

Eligibility - death while active or disabled before eligibility for service retirement.

Benefit - member's accumulated contributions at time of death. A surviving spouse, children, parents, or other beneficiaries may be eligible to elect (in lieu of contributions) survivor benefits in monthly amounts varying by number of eligible survivors.

8. Ordinary Death Benefits After Eligibility for Service Retirement

Eligibility - death while active or disabled after eligibility for retirement but before benefit commencement date.

Benefit - option 2 (see item 12) is automatically effective with benefits payable to designated beneficiary, spouse, or parents; however, beneficiary may elect benefit in item 7 instead. Otherwise, accumulated contributions are payable to the estate.

9. Accidental Death Benefits

Eligibility - death while active or disabled resulting from injury related to employment.

Benefit - if the member leaves no dependent children, 2/3 of the member's average final compensation to the surviving spouse until death; if there remain surviving dependent children, an annual sum of the member's final average compensation shared between dependent children and surviving spouse (if any). Benefits are reduced by amounts payable under worker's compensation.

10. Refund of Contributions

Eligibility - termination of service except by retirement or death.

Benefit - member's accumulated contributions (see definition of in 5 MRSA Section 17001(1)).

11. Cost-of-Living Adjustments

All retirement and survivor benefits are adjusted each year there is a percentage change in the Consumer Price Index, based on the change in the Index. Cost-of-living adjustments are effective September 1 and are applied to all benefits which have been in payment for six months. The maximum increase or decrease is 4%. Earnable compensation used in determining benefits for disabled members is indexed similarly.

12. Optional Methods of Payment

Option 1: Cash refund equal to the excess of accumulated contributions at date of retirement over total payments made to date of death which are attributable to member contributions.

Option 2: 100% joint and survivor annuity.

Option 3: 50% joint and survivor annuity.

Option 4: Any other benefit which is actuarially equivalent to the retirement allowance and is approved by the Board.

ACTUARIAL ASSUMPTIONS AND METHODS

A. Actuarial Assumptions

		<u>State Employees</u>	<u>Teachers</u>
1. Rate of Investment Return	1990-91	8.5%	8.5%
	1991 (ultimate)	8.0%	8.0%

	55		71.9		71.9
	60		124.2		124.2

** Members of special plans are assumed to retire when first eligible for unreduced benefits.

*** 10% assumed to receive Workers Compensation benefits of 66 2/3% of pay; also, rates for State special groups are higher by 7 per 10,000 at all ages. Note: Disability costs calculated using these rates were reduced 15% to reflect favorable experience.

- | | |
|---|---|
| 9. Family
Composition
Assumptions | 80% of active members are married with two children born at ages 24 and 28 (dependent until age 18); female spouse is three years younger than male spouse; no dependent parents; unmarried members have beneficiaries entitled to benefits worth 80% as much as those of married members' beneficiaries. |
|---|---|

B. Actuarial Methods

1. Funding Method

The aggregate entry age normal method is used to determine costs. Under this funding method, a total contribution rate is determined which consists of two elements, the normal cost rate and the unfunded actuarial liability (UAL) rate.

For teachers (MTRA) and State employees, including each of the eight State special groups, a normal cost rate is determined for a typical new entrant. This rate is determined by taking the value, as of age at entry into the plan, of the member's projected future benefits, reducing it by the value of future member contributions, and dividing it by the value, also as of the member's entry age, of his expected future salary.

In addition to contributions required to meet the System's normal cost, contributions will be required to fund the System's unfunded actuarial liability. The actuarial liability is defined as the present value of future benefits less the present value of future normal costs and future member contributions. The unfunded actuarial liability is the total of the actuarial liability for all members less the actuarial value of the System's assets. The actuarial liability includes projections of future member pay increases and future service credits and should not be confused with the accrued benefit liability.

The unfunded actuarial liability is amortized by annual payments over a 26 year period from July 1, 1991. The payments are determined so that they will be a level percentage of pay, assuming total pay increases 6% per year.

Costs for ancillary benefits (death and disability) are determined using a term cost method.

2. Asset Valuation Method

For purposes of the June 30, 1991, actuarial valuation, assets are valued at an "actuarial value" as described in the "Assets" section in this report.

FUNDING METHOD

1. Retirement Benefits: Aggregate
2. Ancillary Benefits: Term Cost Method
3. Amortization Period: Future Service Lifetime
(Level Percent of Payroll)

ASSET VALUATION METHOD

Assets are valued at actuarial value. See the "Assets" section of the "Actuaries Report" for a detailed description.

MAINE LEGISLATIVE RETIREMENT SYSTEM SUMMARY OF PLAN PROVISIONS

1. **MEMBERSHIP.** Membership is mandatory for legislators entering on or after December 3, 1986 (except for those granted a waiver by the presiding officer) and optional for those who were members of the Maine State Retirement System on December 2, 1986. Membership ceases on the earlier of withdrawal of contributions, retirement, or death.
2. **MEMBER CONTRIBUTIONS.** Members are required to contribute 4% of earnable compensation.
3. **AVERAGE FINAL COMPENSATION.** For purposes of determining benefits payable under the System, average final compensation is the average annual rate of earnable compensation for the three years of creditable service (not necessarily consecutive) which produce the highest such average.
4. **CREDITABLE SERVICE.** Creditable service includes the following:
 - A. All legislative service as a member after December 2, 1986
 - B. All legislative service before December 3, 1986, for which contributions are made at the rate applicable at the Maine State Retirement System, including appropriate interest
 - C. Service while receiving disability benefits under the System
 - D. All service creditable under the Maine State Retirement System, provided the member elects to have his own and the employer's contributions on behalf of the service transferred to the legislative system

5. **SERVICE RETIREMENT BENEFITS.**

Eligibility for members in service: 25 years of creditable service or attainment of age 60.

Eligibility for members not in service: attainment of age 60 with 10 years of creditable service (or five full terms as a legislator).

For the purpose of determining eligibility, creditable service includes service under the Maine State Retirement System after termination of legislative service.

Benefit: 1/50 of average final compensation multiplied by years of creditable service, reduced for retirement before age 60; minimum \$100 per month if there are at least 10 years of creditable service.

Form of payment: life annuity.

6. **DISABILITY RETIREMENT BENEFITS.**

Eligibility: permanent mental or physical incapacitation before normal retirement age while in service; unable to perform duties of own position.

Benefit: 66-2/3% of average final compensation, reduced by employment earnings over \$10,000, and to the extent that the benefit, in combination with worker's compensation and Social Security, exceeds 80% of average final compensation.

Form of Payment: payment begins on termination of service and ceases on cessation of disability or after five years, unless the member is unable to engage in any gainful activity; in which case payments cease on the earlier of 10 years following normal retirement age or date the service retirement benefit exceeds the disability benefit.

Conversion to Service Retirement: during the period of disability, average final compensation is increased with cost-of-living adjustments and service is credited. On the date when service benefits reach a level of 66-2/3% of average final compensation or ten (10) years after the normal retirement date, if earlier, the disability benefit converts to a service retirement benefit based on service and pay at that point.

MAINE LEGISLATIVE RETIREMENT SYSTEM SUMMARY OF PLAN PROVISIONS (Continued)

7. ORDINARY DEATH BENEFITS BEFORE ELIGIBILITY FOR SERVICE RETIREMENT

Eligibility: death while active or disabled before eligibility for service retirement.

Benefit: member's accumulated contributions at time of death. A surviving spouse, children, parents, or other beneficiaries may be eligible to elect (in lieu of contributions) survivor benefits in monthly amounts varying by number of eligible survivors.

8. ORDINARY DEATH BENEFITS AFTER ELIGIBILITY FOR SERVICE RETIREMENT

Eligibility: death while active or disabled after eligibility for retirement but before benefit commencement date.

Benefit: Option 2 (see item 12) is automatically effective with benefits payable to designated beneficiary, spouse, or parents; however, beneficiary may elect benefit described in item 7 instead. Otherwise, accumulated contributions are payable to the estate.

9. ACCIDENTAL DEATH BENEFITS

Eligibility: death while active or disabled resulting from injury related to employment.

Benefit: if the member leaves no dependent children, two-thirds of the member's average final compensation to the surviving spouse until death; if there remain surviving dependent children, an annual sum of the member's final average compensation shared between dependent children and surviving spouse (if any). Benefits are reduced by amounts payable under worker's compensation.

10. REFUND OF CONTRIBUTIONS

Eligibility: termination of service except by retirement or death.

Benefit: member's accumulated contributions.

11. COST-OF-LIVING ADJUSTMENTS

All retirement and survivor benefits are adjusted each year there is a percentage change in the Consumer Price Index, based on the Index. Cost-of-Living adjustments are effective September 1 and are applied to all benefits which have been in payment for six months. The maximum increase or decrease is 4%. Earnable compensation used in determining benefits for disabled members is indexed similarly.

12. OPTIONAL METHODS OF PAYMENT.

Option 1: Cash refund equal to the excess of accumulated contributions at date of retirement over total payments made to date of death which are attributable to member contributions.

Option 2: 100% joint and survivor annuity.

Option 3: 50% joint and survivor annuity.

Option 4: Any other benefit which is actuarially equivalent to the retirement allowance and is approved by the Board.

MAINE JUDICIAL RETIREMENT SYSTEM SUMMARY OF PLAN PROVISIONS

Retirement On or After December 1, 1984

1. **MEMBERSHIP.** Membership is a condition of employment for all judges serving on or after December 1, 1984. Membership ceases on the earlier of withdrawal of contributions, retirement, or death.
2. **MEMBER CONTRIBUTIONS.** Members are required to contribute 6.5% of earnable compensation.
3. **AVERAGE FINAL COMPENSATION.** For purposes of determining benefits payable under the System, average final compensation is the average annual rate of earnable compensation for the three years of creditable service as a judge (not necessarily consecutive) which produce the highest such average.
4. **CREDITABLE SERVICE.** Creditable service includes the following:
 - A. All judicial service as a member after November 30, 1984
 - B. All judicial service before December 1, 1984
 - C. Service while receiving disability benefits under the System
 - D. All service creditable under the Maine State Retirement System provided the member elects to have his own and the employer's contributions on behalf of the service transferred to the judicial system
5. **SERVICE RETIREMENT BENEFITS**

Eligibility: 25 years of creditable service, or attainment of age 60 with 10 years of creditable service, or attainment of age 70 and one year of service immediately before retirement.

Benefit: sum of (A) $1/50$ of average final compensation multiplied by years of membership service and creditable service transferred from the Retirement System, and (B) 75% of November 30, 1984 salary for the position held at retirement, pro-rated for prior service less than 10 years. The benefit is reduced for retirement before age 60.

Maximum Benefit: 60% of average final compensation.

Minimum Benefit: for a judge in service and age 50 on December 1, 1984, 75% of salary on June 30, 1984 for the position held at retirement.

Form of Payment: life annuity; except for a judge in service and age fifty (50) before December 1, 1984, 50% joint and survivor annuity.

6. **DISABILITY RETIREMENT BENEFITS**

Eligibility: permanently mentally or physically incapacitated while in service before eligibility for unreduced retirement; unable to perform duties of own position.

Benefit: $66 \frac{2}{3}\%$ of average final compensation, reduced by the amount by which employment earnings plus the disability allowance exceeds the current salary of the position held at disability, and to the extent that the benefit, in combination with Workers' Compensation, exceeds 80% of the average final compensation. A member in service on November 30, 1984, may elect benefits applicable for retirement before December 1, 1984.

Form of Payment: payment begins on termination of service and ceases on cessation of disability or after five years, unless the member is unable to engage in any gainful activity; in which case payments cease on the earlier of attainment of age 70 and date the service retirement benefit exceeds the disability benefit.

MAINE JUDICIAL RETIREMENT SYSTEM SUMMARY OF PLAN PROVISIONS (Continued)

Retirement On or After December 1, 1984

Conversion to Service Retirement: during the period of disability average final compensation is increased with cost-of-living adjustments and service is credited. On the date when service benefits reach a level of 66 2/3% of average final compensation or at age 70, if earlier, the disability benefit converts to a service retirement benefit based on service and pay at that point.

7. ORDINARY DEATH BENEFITS BEFORE ELIGIBILITY FOR SERVICE RETIREMENT

Eligibility: death while active or disabled before eligibility for service retirement.

Benefit: member's accumulated contributions at time of death. A surviving spouse, children, parents or other beneficiaries may be eligible to elect (in lieu of contributions) survivor benefits in monthly amounts varying by number of eligible survivors.

Minimum Benefit: for a judge in service prior to December 1, 1984, one-half of the judge's retirement benefit determined on date of death, payable to the spouse and/or dependent children.

8. ORDINARY DEATH BENEFITS AFTER ELIGIBILITY FOR SERVICE RETIREMENT

Eligibility: death after eligibility for retirement but before benefit commencement date.

Benefit: Option 2 (see item 12) is automatically effective with benefits payable to designated beneficiary, spouse, or parents; however, beneficiary may elect benefit described in item 7 instead. Otherwise, accumulated contributions are payable to the estate.

9. ACCIDENTAL DEATH BENEFITS

Eligibility: death while active or disabled resulting from injury related to employment.

Benefit: if the member leaves no dependent children, two-thirds of the member's average final compensation to the surviving spouse until death; if there remain surviving dependent children, an annual sum of the member's average final compensation shared between dependent children and surviving spouse (if any).

10. REFUND OF CONTRIBUTIONS

Eligibility: termination of service except by retirement or death.

Benefit: member's accumulated contributions.

11. COST-OF-LIVING ADJUSTMENTS. Except as described below, all retirement and survivor benefits are adjusted each year there is a percentage change in the Consumer Price Index (CPI), based on the CPI. Cost-of-living adjustments are effective September 1 and are applied to all benefits which have been in payment for six months. The maximum increase or decrease is 4%. Earnable compensation used in determining benefits for disabled members is indexed similarly.

Minimum benefits are increased 6% per year from July, 1985, through July, 1989, and as described above thereafter.

MAINE JUDICIAL RETIREMENT SYSTEM SUMMARY OF PLAN PROVISIONS (Continued)

Retirement On or After December 1, 1984

12. OPTIONAL METHODS OF PAYMENT

- Option 1: Cash refund equal to the excess of accumulated contributions at date of retirement over total payments made to date of death which are attributable to member contributions.
- Option 2: 100% joint and survivor annuity.
- Option 3: 50% joint and survivor annuity.
- Option 4: Any other benefit which is actuarially equivalent to the retirement allowance and is approved by the Board.

Retirement Prior to December 1, 1984 (Administered by the Court System)

1. CURRENTLY EFFECTIVE ANNUAL SALARY. For determination of benefit payments, currently effective annual salary is the salary on June 30, 1984 for the position last held, increased by 6% per year each July 1, beginning July 1, 1984.
2. REGULAR RETIREMENT BENEFITS
 - Eligibility: attainment of age 70 with seven years of service or attainment of age 65 with 12 years of service, or attainment of age 60 with 20 years of service.
 - Benefit: three-quarters of currently effective annual salary.
3. DISABILITY BENEFITS. Three-quarters of currently effective annual salary.
4. SURVIVOR BENEFITS. Three-eighths of current effective annual salary, payable to the surviving spouse of dependent children.
