Every airmobile manufactured after July 1, 1979, and offered for sale or sold in this State shall be ~~constructed~~ ^{so} ~~as~~ to limit total vehicle noise to not more than 78 decibels of sound pressure level at 50 feet on the "A" scale as measured in this ^{subsection.} ~~No air-~~ mobile shall be modified by any person in any manner that shall amplify or otherwise increase total noise emission above that emitted by the airmobile as originally constructed, regardless of the date of manufacture.

It shall be unlawful to operate any airmobile which exceeds noise limit as set forth in this subsection, except:

D. Operation on railroad tracks. No person shall operate any airmobile along or adjacent and parallel to the tracks of any railroad within the limits of the railroad right-of-way without written permission from the railroad.

Statement of Fact

The purpose of this bill is to amend the statutes relating to airmobiles.

The 106th Legislature enacted Title 12, section 1990, et seq., by the public laws of 1973, chapter 238, which prohibited the operation of "airmobiles" pending a study by a committee which that statute established.

The reason for the outright ban on operation was that the "airmobiles" were an unknown quantity which might have the potential for damage and destruction to the natural environment and the plant and animal life therein, as well as the invasion of privacy.

The statute defined "airmobiles" as any vehicle propelled by mechanical power that is primarily designed to travel upon a cushion of air or within 2 feet of the water or land surface of the earth.

The ~~Committee to Study Airmobiles~~ was unable to develop the necessary data to prescribe legislation controlling airmobiles, so it recommended continuation of the outright prohibition against the use of airmobiles.

This bill is designed to permit the limited use of airmobiles in the State. Their use would be as recreational vehicles and would be under the same control as snowmobiles and watercraft. The Commissioner of Inland Fisheries and Wildlife would have the right to promulgate such regulations restricting operation as he deems necessary.

Since the proposed statute permits use as a recreational vehicle, the restrictions and controls are almost identical to those on watercraft. Since the airmobile has unique amphibious qualities, regulations similar to those imposed on snowmobiles have also been incorporated.
