SPECIAL SUPPLEMENT

TO THE

ANNUAL REPORT

OF THE

**MAINE UNEMPLOYMENT
COMPENSATION COMMISSION**

TO

**HIS EXCELLENCY,
GOVERNOR SUMNER SEWALL**

Being a Study of Merit Rating as Required by Section
7 (c) (2) of the Maine Unemployment Compensation
Law as Enacted in December, 1936.

JANUARY 15, 1941

KF
3679
.M3
M22
1941

JAN 13 1985

As required by section 7 (c) (2) of the Maine Unemployment Compensation Law, enacted in December, 1936, this Commission herewith respectfully submits a review of the benefit payment experience of employers subject to the Maine Unemployment Compensation Law, together with the Commission's recommendations as to the advisability of establishing a system of merit rating, or "experience rating," as it is now termed.

The section of law referred to reads as follows:

"The Commission shall classify employers in accordance with their actual experience in the payment of contributions on their own behalf and with respect to benefits charged against their accounts and shall submit in its report to the Governor, not later than the first day of February, 1941, the result of the actual experience in payment of contributions on behalf of the individual employers and with respect to benefits charged to their accounts, together with its recommendations relative to the advisability of the adoption of the merit rating system as a design to encourage and reward steadier employment with a view to reducing contribution rates for those employers that have reduced their unemployment hazard as reflected by each employer's contributions and unemployment benefit experience."

The study herein considered is based on two and one-half years experience in the payment of unemployment benefits, commencing January 1, 1938, when benefits first became payable in Maine, and continuing through June 30, 1940. Complete data as to employer contributions and benefit payments during the latter part of 1940 will not be available until late February or March, but available data are sufficient for general purposes of this study and as a basis upon which the Commission submits its accompanying recommendations.

Over the period covered by this study the Commission has maintained, as required by paragraph "c" of said section 7, a separate account for each employer subject to the Maine Unemployment Compensation Law, and has credited the employer's account with all the contributions he has paid on his own behalf, and further, has charged employers' accounts with benefits

paid to eligible individuals in the manner stipulated by this section of the law.

Supplementing this report are several statistical tables which serve to bring out some of the more interesting aspects of the study made.

Table 1, for example, classifies individual employers in major industry groups. The table includes all active employer accounts as well as those accounts which have become inactive during the period of study. Analysis of this table shows that employers in the construction group had the most unfavorable benefit payment experience while employers in the group embracing financial services, insurance and real estate brokers had the most favorable benefit payment experience. It shows that \$1.79 was paid out on account of unemployment due to the construction industry against every dollar received in contributions from that industry, while only \$0.16 was paid out in benefits on account of unemployment in the financial services, insurance and real estate group as against each dollar paid in contributions by employers in that grouping.

TABLE I

Classification of all accounts by major industry groups.

| Classification | No. of Accounts | % of Accounts Ben. Charged | % of Total Contr. Pd. | % of Total Ben. Charged | % of Ben. To Contributions |
|---|-----------------|----------------------------|-----------------------|-------------------------|----------------------------|
| Total | 4806 | 77 | 100 | 100 | 67.3 |
| Agriculture, Forestry and Fisheries | 20 | 90 | .19 | .23 | 87 |
| Mining | 9 | 100 | .20 | .44 | 147 |
| Construction | 437 | 83 | 2.95 | 7.84 | 179 |
| Manufacturing | 1341 | 88 | 58.85 | 72.86 | 83 |
| Trans., Comm., and Other | | | | | |
| Public Utilities | 260 | 85 | 11.91 | 5.99 | 34 |
| Wholesale and Retail Tr. | 1983 | 70 | 19.35 | 9.14 | 32 |
| Financial, Insurance and | | | | | |
| Real Estate | 280 | 47 | 3.09 | .75 | 16 |
| Service Industries | 473 | 78 | 3.43 | 2.65 | 52 |
| Establishments Not Classified | 3 | 100 | .03 | .10 | 225 |

As indicated by columns 3 and 4 of this table, the construction group contributed less than 3% of contributions received from all employers whereas unemployment in the same group accounted for nearly 8% of all benefits paid out to all benefit claimants. The financial group, on the other hand, contributed

slightly over 3% of all contributions collected but unemployed workers in that group received in benefits only three-fourths of one percent of all benefits paid.

A study of all overdrawn accounts by major industry groups and average annual pay rolls revealed that 26% of all accounts have been overdrawn, in other words that the amount of contributions made by 26% of the employers were exceeded by the amount of unemployment benefits paid out against those employers' accounts. The total amount overdrawn from all such accounts amounted to \$2,555,913.

The manufacturing group, with a total of 549 overdrawn accounts, had the highest overdraft of any major industry classified, the overdraft amounting to \$1,959,388. A breakdown of the overdrafts in the manufacturing group showed that Textile Mill Products accounted for an overdraft of \$408,243.

Table 2 represents a breakdown of the major industrial groups covered in Table 1, major industries being classified in this table as to the total number of accounts, the amounts of contributions credited and benefits charged, the proportion of the total contributions collected and the benefits paid, and the ratio of benefits charged to contributions received.

TABLE II

Classification of All Accounts by Major Industry Groups as to the Percent of Contributions Credited. Benefits Charged, and Ratio of Benefits to Contributions.

| Major Industry Group | Number of Accounts | Contributions Credited | TOTAL Percent of Total | Benefits Charged | Percent of Total | Ratio Percent |
|--|--------------------|------------------------|---------------------------|------------------|------------------|---------------|
| TOTAL | 4,806 | 13,927,770 | 100 | 9,375,106 | 100 | 67.3 |
| 00 General Farms | | | | | | |
| 01 Dairy Farms | | | | | | |
| 02 Cash-Grain Farms | | | | | | |
| 03 Cotton Farms | | | | | | |
| 04 Fruit and Nut Farms | | | | | | |
| 05 Livestock and Poultry Farms | | | | | | |
| 06 Truck Farms, spec's and Misc. Agriculture | | | | | | |
| 77 Agr. and Sim. Ser. Est. | 12 | 11,935 | .09 | 14,916 | .16 | 124 |
| 08 Forestry | 8 | 13,163 | .10 | 7,004 | .07 | 53 |
| 09 Fishery | | | | | | |
| 10 Metal Mining | | | | | | |
| 11 Anthracite Mining | | | | | | |
| 12 Bituminous and Other Soft-Coal Mining | 2 | 1,437 | .01 | 3,529 | .04 | 245 |
| 13 Crude Petro and Nat-Gas Prod. | | | | | | |

| Major Industry Group | Number of Accounts | Contributions Credited | TOTAL | | | Ratio Percent |
|--|--------------------|------------------------|------------------|------------------|------------------|---------------|
| | | | Percent of Total | Benefits Charged | Percent of Total | |
| TOTAL | 4,806 | 13,927,770 | 100 | 9,375,106 | 100 | 67.3 |
| 14 Non-Metallic Mining and Quarrying | 7 | 26,533 | .19 | 37,521 | .40 | 141 |
| 15 Bldg. Const.—Gen. Contr. | 153 | 134,774 | .97 | 211,658 | 2.26 | 157 |
| 16 Gen. Contr. other than Bldg. Const.—Special Trade | 85 | 190,539 | 1.37 | 404,143 | 4.31 | 212 |
| 17 Contr's—Special Trade | 199 | 84,360 | .61 | 119,224 | 1.27 | 141 |
| 20 Food and Kindred Products | 149 | 500,439 | 3.59 | 419,862 | 4.48 | 84 |
| 21 Tobacco Manufacturers | 3 | 3,313 | .02 | 3,315 | .04 | 100 |
| 22 Textile-mill products | 77 | 2,090,953 | 15.01 | 2,577,493 | 27.49 | 123 |
| 23 Apparel and Other Fin. Prod's made from Fabrics and Similar Materials | 41 | 107,397 | .80 | 86,180 | .92 | 80 |
| 24 Lumber and Timber Basic Prods' | 596 | 598,557 | 4.30 | 752,341 | 8.02 | 125 |
| 25 Furniture and Fin. Lumber Prod's. | 107 | 382,060 | 2.74 | 192,410 | 2.05 | 50 |
| 26 Paper and Allied Prod's. | 30 | 1,772,579 | 12.72 | 487,237 | 5.14 | 27 |
| 27 Printing, Pub. and Allied Ind's. | 62 | 203,936 | 1.46 | 46,677 | .50 | 23 |

| 52 Other Wholesale and Retail Trades | 177 | 347,986 | 2.50 | 113,084 | 1.21 | 32 |
| 60 Banks and Trust Companies | 32 | 77,258 | .55 | 5,371 | .06 | 7 |
| 61 Security Dealers and Inv. Banking | 41 | 52,284 | .38 | 1,720 | .02 | 3 |

A study of this table reveals some interesting facts, among them being that Textile Mill Products contributed 15% of the total contributions but were charged over 27% of all benefits paid out, while Paper and Allied Products paid approximately 12% of all contributions but were charged only 5% of all benefits paid.

Table 3 is a classification of all accounts by average annual pay roll groups, showing the percentage of contributions credited, benefits charged, and ratio of benefits charged to contributions credited. This table indicates that there is but a slight difference in ratios so far as average annual pay roll is concerned. It is noticeable that accounts in the \$5,000 to \$10,000 classification and the accounts in the \$100,000 to \$1,000,000 classification have the least favorable ratio, while pay rolls in the classification on \$20,000 to \$30,000 show more favorable ratios than the majority.

TABLE III

Classification of all accounts by average annual pay roll groups as to the percentage of contributions credited, benefits charged, and ratio of benefits to contributions.

| Pay Roll Class | No. of Accounts | Contributions Credited | % of Total | Benefits Charged | % of Total | Ratio % |
|--------------------------|-----------------|------------------------|------------|------------------|------------|---------|
| Total | 4,806 | 13,929,770 | 100 | 9,375,106 | 100 | 67.3 |
| Not Classified | 1,656 | 648,428 | 4.7 | 529,600 | 5.6 | 82 |
| Below 5,000 | 773 | 177,032 | 1.2 | 122,107 | 1.4 | 69 |
| 5,000 — 9,999 | 651 | 408,004 | 2.9 | 310,905 | 3.4 | 76 |
| 10,000 — 19,999 | 756 | 943,722 | 6.8 | 570,702 | 6.1 | 60 |
| 20,000 — 29,999 | 305 | 657,147 | 4.7 | 333,241 | 4.1 | 58 |
| 30,000 — 39,999 | 146 | 451,159 | 3.2 | 305,775 | 3.2 | 68 |
| 40,000 — 49,999 | 91 | 364,868 | 2.6 | 225,768 | 2.5 | 62 |
| 50,000 — 99,999 | 204 | 1,248,636 | 9.0 | 813,169 | 8.6 | 65 |
| 100,000—999,999 | 203 | 5,196,123 | 37.3 | 3,978,995 | 42.4 | 77 |
| 1,000,000 and over | 21 | 3,834,670 | 27.5 | 2,134,756 | 22.7 | 56 |

A further study of accounts by average annual pay roll revealed that the accounts between \$100,000 and \$1,000,000 had the greatest overdraft, whereas accounts with an average pay roll of \$40,000 to \$50,000 had the lowest amount of overdraft.

Table 4, which is attached as an appendix to this report, shows the individual experience of all active employers subject to the law during the two and a half years covered by the study and is made a part of this report as required by Section 7 (c) (2) of the Unemployment Compensation Law. Employers listed in this

table are identified by numerical code rather than by name in deference to Section 11 (g) of the Law which appears to prohibit the disclosure of any information obtained from employers which will in any way reveal the employers' identity.

This table shows the amount of contributions credited to each employer's account, the benefits charged against such accounts, the ratio of benefits charged against contributions credited, and the reserve ratio of the balance between accumulated contributions credited from January 1, 1936 to July 1, 1940 and the accumulated benefits charged from January 1, 1938 to July 1, 1940, divided by the 3-year average pay roll for the period 1937-39, inclusive.

A detailed analysis of this table would show that of the 3,574 active accounts listed, 62% had a benefit payment ratio of less than 60% (23% having none at all); 7% had ratios between 60% and 79%; and 31% had ratios of 80% or more; 8% ranged from 100% to 149%; 5% ranged from 150% to 199%; and 13% had ratios of 200% or higher.

Before considering the feasibility of adopting an experience rating system as part of the Maine Unemployment Compensation Law it is essential that we study the solvency of the unemployment compensation trust fund out of which unemployment benefits are paid.

In some States, notably the large industrial States, there is considerable public agitation over the fact that the unemployment funds of those States appear to be accumulating excessive reserves. This cannot be said of the Maine unemployment compensation trust fund. When this Commission began paying unemployment benefits in January, 1938, the fund then available for benefits was slightly less than \$4,000,000, representing the accumulated contributions from subject employers for the years 1936 and 1937. Today, at the time of writing this report, the fund is still slightly below \$4,000,000, and considerably under the total of \$4,535,000 in benefits paid out in one year alone, the year 1938.

It is a fact that the ratio of benefit disbursements as against accumulated tax contributions and interest since benefit payments first began has been higher in Maine than in any State in the Union. As of July, 1940, for example, again using the period

of two and one-half years covered by our study, the Maine ratio of benefit disbursements was 68.1 per cent against the national average of 39.2 per cent. In other words, over 68 per cent of the total tax collected in Maine since 1936, plus accumulated interest, has been paid out in the form of benefits to unemployed workers.

The principal reasons for this high ratio of disbursements are three: first, that Maine pays benefits to partially unemployed workers and has a proportionately heavy volume of partial unemployment due to the highly seasonal nature of many of our year around industries; second, the relatively large extent of purely seasonal employment which closes down for extended recurring periods; third, the liberality of our benefit payment structure, notably in that unemployed workers in Maine become eligible for benefits if they have earned only \$144 in the preceding calendar year, which is a lower minimum base than in a majority of States.

It should be understood that funds for the payment of unemployment benefits are derived from the 2.7 per cent pay roll tax levied on employers subject to the Maine law. Actually the pay roll tax is three per cent but in this State, as in all others, the State collects 2.7 per cent of the total tax and earmarks it exclusively for the payment of unemployment benefits, while the remaining 0.3 per cent of the tax is collected directly by the Federal Government and is re-allocated to the State in the form of direct grants for payment of administrative costs.

It follows that in years when employment and pay rolls are high the tax revenue is high and payments for unemployment benefits are proportionately low, while in years when unemployment is high the revenue from pay roll tax is lowered and disbursements for unemployment benefits are high.

In 1938, when employment fell off rather sharply after an upturn in 1937 this department disbursed \$4,535,000 in benefits, or nearly \$700,000 more than was collected during the same period. In 1939, however, conditions were substantially improved and benefit disbursements dropped to slightly over \$3,000,000, while collections for pay roll taxes in the same period slightly exceeded \$4,000,000, thereby more than replenishing the overdraft upon the reserve fund in the preceding year.

In 1940 benefit disbursements approximated \$3,470,000,

whereas contributions for the same year may reach \$3,700,000, although this amount cannot be definitely determined as collections for the last quarter of 1940 are not received until January 31 of this year.

The foregoing year by year figures should not be regarded as a fair index of the rise and fall of employment conditions in the State during the past three years because substantial changes in the Federal and State laws the past two years, have materially reduced the amount of revenue collected from employers.

An Act of Congress in 1939 transferred from the jurisdiction of the State to the Federal Railroad Retirement Board all railroad employer accounts and their pay roll contributions. This meant a loss of between \$250,000 and \$300,000 annually to the Maine Unemployment Trust Fund. As of 1940 an amendment to the Maine law, enacted at a special session of the legislature, limited the tax rate of 2.7 per cent to the first \$3,000 of an individual's salary. This change probably will reduce the 1940 income by at least \$150,000, although the exact amount will not be known definitely until tax collections for the last calendar quarter of 1940 are fully received.

The comparative year by year figures do illustrate the close relationship existing between income and disbursement, and that our benefit fund is not accumulating an excessive reserve. In actual figures over the period covered by the study our accumulated income to July 1, 1940 was \$13,929,770, while benefit disbursements to that date equalled \$9,481,198.

The difference between these amounts is \$4,448,572, showing that in the two and one-half years of benefit payment experience up to July 1, 1940, we built up our reserve by approximately half a million dollars over the nearly \$4,000,000 in the fund in January, 1938, when we began benefit payments.

The study, and this analysis of our income as against benefit disbursements, demonstrate clearly that the immediate establishment of an experience rating system is financially impossible unless a "penalty structure" is adopted, which means that some employers would be required to pay contributions at a rate considerably higher than 2.7% in order to offset income losses through any reduced rates granted to employers with a favorable experience.

Such penalty rates, these of course to be imposed upon employers with a bad employment experience, would be necessary in order to maintain an average income of approximately 2.7% and pay current disbursements for unemployment benefits without dipping into the reserve. To put into effect, at this time, a type of experience rating which carries no penalty rates would immediately deplete the reserve.

The maintenance of the reserve at a substantially higher level is considered necessary to guarantee that sufficient funds will be available to meet all claims on account of unemployment in the event of a sudden economic depression resulting in widespread unemployment.

Actuaries differ as to the amount of reserve that should be maintained, their estimates ranging from one and a half times to two and one-half times, either the largest amount of income received in any one year, or the largest amount of disbursements for benefit purposes in any one year.

Forty State legislatures already have considered and adopted experience rating systems as integral parts of their unemployment compensation programs. This fact alone should, in the opinion of this Commission, entitle experience rating, at least in principle, to careful consideration by your Excellency and the Legislature.

In view of the present state of our reserve fund, however, this Commission does not feel that experience rating should be attempted in Maine until the reserve reaches a much safer margin, perhaps twice its present size.

To build the fund up to adequate size quickly and make a lower tax available this year to employers with a good employment experience would require the immediate imposition of a maximum tax rate of 4% or higher upon many employers with a poor employment experience. This course, in our opinion, would be extremely unwise, primarily because it would place an excessive tax burden upon a substantial number of employers and might lead either to insolvency for many or their outright removal to other States.

At the present rate of disbursement as compared with income it is true that it will take two years or longer, and under excellent employment conditions, to build up the fund without increasing

the present maximum rate of 2.7%. Nevertheless we feel that this course is preferable to the immediate adoption of a rating system with a high penalty structure, for several reasons:

First, the Social Security Board plans to ask Congress this year to adopt certain Federal "standards" governing all States in the payment of unemployment benefits. These "standards" as already outlined by the Social Security Board will be more liberal than the present benefit formulas in most States;

Second, the possible collapse of improved employment conditions in the next two or three years, because of a sudden termination of war overseas would throw a terrific strain on the reserve funds of this and all other States.

Either of the foregoing developments would completely unbalance any present consideration of what might be a safe reserve or a fair and reasonable experience rating plan.

Finally, as already stated, there is an extremely limited amount of experience available as to the real results of experience rating plans now in existence. Only one State, Wisconsin, has had two full years of experience; three others have had only one year. The remainder are starting their systems either this year or in 1942.

RECOMMENDATIONS

On these grounds, therefore, this Commission recommends that the following courses be carefully considered by your Excellency and the Legislature:

(1) Adopt experience rating in principle as part of the Maine Unemployment Compensation Law but defer its effective date until the present reserve fund is built up to a much safer margin; or,

(2) Adopt experience rating in principle and direct this Commission to continue its study of the subject and report to the next regular legislative session as to the feasibility of adopting a system based on the cumulative benefit payment experience of at least three full years.

Either recommendation, we believe, would have two highly desirable effects, first, by encouraging employers to more fully stabilize their employment, and second, by discouraging a prac-

tice prevalent among some employers of “rotating” their work so that employes are forced to accept lay offs and draw unemployment benefits in lieu of regularized employment.

The accomplishment of these two objectives is highly to be desired and, in our opinion, are the greatest benefits held out by any effective plan of experience rating.

The ultimate objectives of unemployment compensation as outlined in the preamble of the Maine Unemployment Compensation Act—namely, to encourage employers to provide more steady work, and to lessen the serious social effects of unemployment—will be more fully achieved when and if the desirable features of experience rating are made effective.

MAINE UNEMPLOYMENT COMPENSATION COMMISSION

CLIFFORD A. SOMERVILLE, *Chairman*

MYRON E. BENNETT, *Representative of Employers*

CHARLES E. FORTIN, *Representative of Labor*

APPENDIX

TABLE IV

LIST OF ALL ACCOUNTS BY NUMERICAL ORDER

For identification purposes the list only gives the account number. The data for each account includes accumulated contributions credited and benefits paid through the second quarter of 1940. It also includes the ratios and the percentage of excess (reserve ratio or index) in all cases where the accounts have two and one-half years experience. The active accounts also show the years of experience on which the ratio is based while the inactive accounts show the month and year in which the account became inactive.

*Benefit payment experience is two and one-half years except when otherwise specified.

| CODE | Contributions Credited | Benefits Charged | Ratio | Reserve Ratio | Benefit Payment Experience* |
|------|------------------------|------------------|-------|---------------|-----------------------------|
