- VIII. Gaming Jurisdictions Tax Definitions
- IX. City of Bangor Resolve
- X. Committee Membership Information

Purpose:

Examine the current structure of taxation on gaming revenues and to consider potential adjustments to enhance the effectiveness and stability of taxation and revenue sharing in a way that would be simpler and revenue neutral, and would provide a greater degree of predictability and stability for what is currently Maine's largest economic development project.

Facts:

Maine has one licensed slot machine operator – Bangor Historic Racetrack, Inc., which is currently operating in a temporary facility. To date, Hollywood Slots has generated over \$40 million in taxes to the state, and over \$3 million the city of Bangor. Construction of a permanent facility, "Hollywood Slots Hotel and Raceway," is scheduled to be completed this summer, bringing Penn National Gaming's total investment in Maine to \$200 million. The facility will provide full time jobs with competitive salaries and full benefits to more than 500 local area employees.

Current Law: Current allocation of racino funds has a two-tier tax and allocation structure

<u>First Tier</u> – slot operator pays 1% of "gross slot machine income" (GSMI) to the General Fund for administrative expenses for the Gambling Control Board (GCB). This tax on "coin in" (before winnings are paid) results in an effective tax rate of more than 10% on slot revenue. There is no other gaming jurisdiction in the country that is taxes coin in.

<u>Second Tier</u> – slot operator distributes 39% of "net slot machine income" (NSMI) to the GCB for distribution to the statutory beneficiary accounts. This tax is applied on money after winnings have been paid out (commonly referred to as gross gaming revenue, or GGR). The GGR is further reduced by the 1% tax, then the 39% is applied to this net amount. Again, this tax structure is unique to Maine.

Unlike all other businesses in Maine that are taxed on net income, gaming taxes are paid "off the top," on revenue before any expenses, such as salaries, are paid and therefore the tax base should not be referred to as income.

Proposal: <u>Majority report proposes to revise the current two-tier tax structure</u>:

- 1. Tier 1 tax base replace base of GSMI to Gross Gaming Revenue (GGR)
- 2. Tier 1 tax rate replace 1% with 12.9%
- 3. Tier 2 tax base replace base of NSMI with base of Adjusted Gross Gaming Revenue
- 4. Tier 2 tax rate replace rate of 39% with rate of 39.25%; and Replace tier 2 General Fund rate of 3% with rate of 3.25%

The Majority Report:

Provides simplification of tax code

- Tax based on one number slot revenue not two numbers
- Eliminates the misunderstood phrase "income" (usually means after expenses paid)
- Eliminates the need to predict slot payback %
- Moves Maine tax code closer to universal gaming tax definition of other jurisdictions

Provides for stabilization

- Shows more clearly the tax rate on revenue and how proposed changes will impact the tax
- Eliminates the misunderstanding of total tax paid GSM = 1% of "coin in" or "handle" = 10 % on slot revenue
- Clearly shows the actual revenue of slot operator without distortions of amount wagered

Definitions for current slot operations:

GSMI = Gross Slot Machine Income

8 MRSA § 1001(21)

"the total value of money, tokens, credits or similar objects of value used to actually play a slot machine before payback is distributed to a player."

NSMI = Net Slot Machine Income

8 MRSA § 1001(29-A)

"money, tokens, credits or similar objects or things of value used to play a slot machine minus money, credits or prizes paid out to winners and amounts paid pursuant to section 1036, subsection 1."

Other key factors:

Payback Percentage – the amount that is won by (paid back to) the slot machine players divided by the "coin-in", amount wagered, including electronic credits won but not redeemed by the players on any given machine over an extended period of time.

Payback Percentage for an entire slot machine facility per month is affected by statistical probability, the mix of machines on the gaming floor that are played, as well as the number of slot machines available for play.

The fewer the number of machines available for play – the more likely the actual monthly payback % will vary from the set or theoretical payback %.

The current slot operations have less than 500 machines. The permanent facility will provide a gaming floor with around 1500 machines. A larger population tends to smooth out variations and provide more stability. There should be less variation between actual payback % and the set payback % in the new facility.

Questions and Answers for Proposed Changes to Gaming Statute:

1. What is the current tax base from which the slot operator is taxed?

Maine has a two tier tax system on gaming:

The first tier tax is 1% off-the-top on "Gross Slot Machine Income", which is more commonly referred to in the gaming industry as "coin in." This represents all money inserted into the machine and does not take into account any monies paid out. This type of gaming tax is unique to Maine where approximately 90% of all money inserted into the machine is returned to patrons in the form of winnings. Every other jurisdiction imposes taxes on revenues remaining after winnings have been paid out.

The second tier tax is based on "Net Slot Machine Income" which is slot revenue reduced by the amount of the 1% tax, then taxed at 39%.

2. Why are the proposed changes necessary?

This is a simple but very important "housekeeping" change to the tax structure. This change will ensure that everyone knows what the true revenue is for the slot operator and what the true tax percentages are on that revenue.

It in no way extends a tax break to the slot operator. The dollar amount for Gross Slot Machine Income is being published by many organizations including state agencies as the slot operator's revenue. This is a serious inaccuracy as the operator's revenue is much less than this number. It gives the perception that the slot operator is making significantly more money than they are which makes them an easy target for tax increases, anti gambling interests, etc.

3. Does the change really simplify the tax structure?

Yes, in several important ways. It reduces the tax base from two different tax bases to one tax base - the slot operator's revenue. It eliminates the pay back percentage's influence on one of the tax bases. It simplifies and streamlines the budgeting process for tax revenue. A one tier system is preferred, but the two tier calculation had to be maintained so the beneficiaries would not be impacted.

4. How do other states tax the gaming revenues?

All other states with legalized gambling have a one tier tax system that taxes the slot operator's revenue which is usually referred to as Gross Gaming Revenue (GGR). See spreadsheet on Gaming Supplier Fees by Jurisdiction.

5. What is the impact to the State's General Fund?

The revised tax structure is positive to the general fund. It is estimated that in fiscal 2008, it will produce approximately \$150,000 in additional revenue and in fiscal 2009, approximately \$160,000.

Questions and Answers for Proposed Changes to Gaming Statute: Page 2 Continued

6. Do the proposed changes impact the racino revenue beneficiaries?

No.

7. What assurance does the State have that the payback percentage will not be raised?

A review of the pay back percentages in several states shows that the pay back percentage goes down over time. This would make sense in that it is the only method the slot operator has to "raise" prices to deal with increases in operating costs such as health care, utilities, insurance and other goods and services.

8. What drives the payback percentage changes? Why the difference between 89% and 92%?

Each jurisdiction stipulates by regulation what the minimum pay back% may be. At 89%, Maine's is the highest. Per the gaming regulations, the slot operator may not have an aggregate payback percentage of less than 89% measured on a weekly basis. Because the payback % fluctuates due to luck, statistical probability, the types of slot machines played that week and so on, there is a limit to how close to the 89% the slot operator can get without violating the regulation.

Typically, the payback % is based on competition.

9. Should there be a penalty or tax consequence for the payback percentage to change – either with an increase or decrease?

As long as the slot operator stays within the regulated minimum payback %, this "pricing" should be at the discretion of the slot operator.

10. How do the payback percentage changes impact the revenue projections for the state?

Under the current tax structure where there is a 1% tax on coin-in (Gross Slot Machine Income), increasing the payback % would generally result in an increase in the 1% tax. However, it may have a negative effect on the amount of tax revenue generated by the 39% tax on Net Slot Machine Income due to the slot operator receiving lower revenue because the slot pay out is too generous.

Changing the tax basis to Gross Gaming Revenue (Slot Revenue) eliminates this conundrum. As the slot operator optimizes revenue, the state's tax revenue is also optimized.

Glossary

Handle: The gross amount wagered at any form of gambling. Gross wagering, betting, gross betting or gross amount bet, money staked, turnover and lottery sales are in various systems of accounting synonyms for handle.

Drop: In casino revenue accounting, cash and cash equivalents exchanged for chips and (if played) risked against the casino; players' bankroll.

Drop and handle are often confused, but there is an important distinction in the two statistics. Handle is the total amount wagered, or bet: a chip may be wagered many times before the game goes to a decision and the chip is won or lost. Casinos generally report handle for slot operations, and in slot revenue accounting the percentage of win to handle ("takeout percentage") is accurately known. Handle at table games is not accounted. In default of handle statistics, revenue accounting for these games starts with drop.

Hold percentages for table games are ratios of win to drop. Table games typically win (hold) 12% to 20% of drop (and as high as 25% in market monopolies; the early days of Atlantic City or Foxwoods, for example), depending on the kind of game, odds and conditions of play, and player choice in games where different propositions have different house advantages, as in craps, or where conditions of play, as for example the number of decks used to deal twenty-one, vary in ways that materially affect outcomes.

Hold percentages should not be confused with percentages used to express house or casino advantages (or expected values) for table games. Casino advantages or expected values for table games are stated as percentages of handle, not as percentages of drop. For example, the expected value of Nevada and Atlantic City roulette is 5.26% (except for one bet on the layout with an expected value of 7.89%), the "Don't Pass" line at craps 1,402%, approximately 1% to 1.2% for baccarat and so forth.

The relationship of handle, drop, and win may be summarized in the following example: a player buys 100 \$1 chips and wagers them one at a time at a table game with a casino advantage (expected value) of 1%. Our player will win some bets (or trials of the game's randomizing device) and lose others, and will, if he is statistically average; generate a handle of \$10,000 before his entire \$100 bankroll (or \$100 drop) is lost and results in a \$100 win. Our average player probably won't keep gambling until his bankroll is entirely lost, however; as noted, table games typically win from 12% to 20% of drop or player bankrolls (and more, perhaps as much as 25%, in monopoly situations).

Gross gambling revenue (GGR): Handle less payouts or prizes or winnings returned to players.

From the operator's point of view, gross revenue is money extracted from players collectively and transferred to the operator(s) of a commercial game; GGR is thus the source of gambling industry revenues and government gambling tax receipts.

From the consumer's point of view, gross gambling revenue is the consumer price of playing a commercial game.

Win, takeout, retention, and net receipts are in various systems of accounting synonyms for gross gambling revenue. By whatever name, gross gambling revenues are useful statistics. Unlike handles, which are measures of wagering volumes and thus partial functions of the velocity of dollars (or cycle times) through gambling games, gross gambling revenues are measures of the economic value of gambling: its cost to consumers, and its worth to operators. Gross gambling revenues, NOT handles, are the statistics through which one form of gambling may be compared to another, to other businesses, other industries, other forms of consumption, and to the general economy.

Current Tax Structure

^{*} This structure will bring into the General Fund additional tax revenues of more than \$150,000 beginning in FYE 2009 and increasing each year thereafter.

Department of Administrative and Financial Services Rebecca M. Wyke, Commissioner

Bureau of Alcoholic Beverages and Lottery Operations Dan A. Gwadosky, Director

10 Year Evaluation Report November, 2007

J. Emerging Issues

Competition.

Competition for gaming dollars exists in Maine, as it does in many states. Various forms of competition existed prior to or have come into existence since the initial authorization for the Bureau to operate lottery games. Other gaming venues, both in-state and out-of-state, which vie for players from the Maine market, include parl-mutuel gaming, cruise ship gaming, Indian tribal gaming and casino gaming. Internet gaming is another recent competitive factor and is the subject of court cases examining the legalities of the use of the internet to provide gaming opportunities. Although the Bureau does not currently consider all of these other gaming opportunities to be a serious competitive threat, and has successfully competed with them, it can give no assurance that future competition will not adversely affect lottery sales and financial performances.

In November 2003, Maine's voters approved a referendum that permitted the authorization of 1500 video lottery terminals at a Racino located at Bangor Historic Raceway. The Racino opened it's doors in November of 2005. Initally instant ticket sales were strongly impacted. While area instant tickets lottery sales have rebounded somewhat, they are still down approximately 4.6% in Penonbscot County. The state Revenue Forecasting Commission RFC has acknowledged this by lowering the Lottery's annual General Fund transfer by \$500,000 for fiscal years '08 and '09 respectively. RFC's projected annual General Fund transfer for each of those years is now \$49.8 million.

It is important to note that while the Maine State Lottery and Racino have both been adopted by citizens referedum their net profit payback to the state are very different. Last year the Maine Lottery had total gross sales of \$230 million and after expenses transferred \$50.6 million to the state's General Fund. In it is first full year of operation the Racino's gross sales were \$564 million and transferred only \$5.6 million or a little less than 1% to the state General Fund. If additional Racino/Casino types of gaming with similar payouts are subsequently approved, they will likely further negatively impact the Lottery's annual State General Fund transfer. It is in the state's financial interest to carefully monitor any new expansion of gaming in Maine.

Slot Machine Revenue 2007

During 2007, Hollywood Slots at Bangor was opened for 363 days (closed on Christmas and Easter). The total amount wagered at the Bangor Facility, "Gross Slot Machine Income" as defined by 8 M.R.S.A. §1001(20), was \$609,733,721,24%

Credits Disbursed 2007

The amount of money or credits paid back to the players by Hollywood Slots of Bangor was \$56,648,175.15. This was computed by subtracting the Net Slot Machine Income from the Gross Slot machine income for 2007.

SLOT PAYOUT %

The percentages represent the average percent of each stot wager that is returned to the players in jackpots. Progressive and video poker payouts are included in the percentages listed for each denomination. "Other" indicates denominations other than those listed (for example, 10-cent or \$2 slots). The higher the percentage, the better for the players. For example, a 90-percent payout yields 90 cents for every \$2 invested. Weep in mind that this doesn't mean you'll get 90 cents back for every dollar you bot—the numbers reflect all play on the machines. Some players win big, others tose big, others come out even.

How should slot enthusiasts use this char? We recommend that players look for long-term trends and start saving issues of Strictly Slots to uncover those trends. No malter where you play in the country, comparing the payout percentages for at least a three-month period will give you a good idea where the most generous slots can be found.

Slot players often ask why we don't report percentages from jurisdictions not listed on the chart. White we always try to present our readers with the most information possible, some information is not available from the regulatory agencies. For example, Indian casinos are governed by this regulators who are under no obligation to make this information public. Strictly Slots is making every effort to obtain data from more states, and oven some tribal casinos which are proud of their loose slots.

Statutory Gaming Definitions

Coin-in & Handle

Coin-in or handle is not income or revenue

Maine - http://maine.gov/dps/GambBoard/

Gross slot machine income. "Gross slot machine income" means the total value of money, tokens, credits or similar objects or things of value used to actually play a slot machine.

Nevada - http://gaming.nv.gov/

Coin-in. "Coin-in" that accumulates the total value of all wagers, whether the wagered amount results from the insertion of coins, tokens, currency, deduction from a credit meter or any other means.

New Jersey - http://www.nj.gov/casinos/home/gamelink/index.html/

"Handle" means the total value of coins, slot tokens, including foreign slot tokens, currency, coupons, gaming vouchers and electronic credits invested by a patron to activate the play of a slot machine.

Mississippi - http://www.mgc.state.ms.us/

Coin-in. "Coin-in" that accumulates the total value of all wagers, whether the wagered amount results from the insertion of coins, tokens, currency, deduction from a credit meter or any other means.

Assigned to Councilor Blanchette

February 11, 2008

CITY OF BANGOR

- **(TITLE.) Resolve,** Supporting the Recommendations of the Committee to Review the Taxation of Slot Machine Revenues.
- WHEREAS, on June 1, 2007, Governor John E. Baldacci signed an Executive Order creating the Committee to Review the Taxation of Slot Machine Revenues; and
- WHEREAS, this order charged the Committee to examine the current structure of taxation and revenue sharing with respect to the slot machine operator and to consider potential adjustments to enhance the effectiveness and stability of taxation and revenue sharing in a way that would be both simpler and revenue neutral; and
- WHEREAS, the Committee has submitted a report outlining a series of findings and recommendations; and
- WHEREAS, the Committee has recommended that the Tier 1 tax, currently based on Gross Slot Machine Income, be replaced with a base of Gross Gaming Revenue and the tax rate be increased from 1% to 12.9%; and
- WHEREAS, it has also recommended that the Tier 2 tax, based on Net Slot Machine Income, be replaced with a base of Adjusted Gross Gaming Revenues and the tax rate be increased from 39% to 39.25%; and
- WHEREAS, these changes will better reflect the actual revenues retained by Hollywood Slots; and
- WHEREAS, they are also largely revenue neutral, producing approximately \$160,000 more in taxes in each of the next two state fiscal years; and
- WHEREAS, these recommendations have been supported by Bangor Historic Track, Inc., the operator of Hollywood Slots in Bangor;

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF BANGOR THAT

We support the recommendations of the Committee to Review the Taxation of Slot Machine Revenues and call upon the Legislature of the State of Maine to adopt these recommendations as presented.

IN CITY COUNCIL February 11, 2008

Passed

A True Copy, Attest:

SUSON M. Mitchell
DEPUTY CITY CLERK

Committee to Review the Taxation of Slot Machine Revenues
