Maine DWP Budget Projection	Appendix A

Introduction

The Annual Report of the Maine Public Drinking Water Commission (MPDWC) is prepared for the Commissioner of the Department of Health and Human Services, pursuant to 22 M.R.S. § 2660-C (4). The purpose of the report is to provide the Commissioner with an understanding of the issues the MPDWC and the Maine CDC's Drinking Water Program (DWP) faced during the last year, as well as outline the goals and work for the upcoming year. This report contains information about the DWP and its operations, with reports from the DWP Director and the Compliance and Enforcement, Field Inspection, Water Resources, Information Management and Subsurface Wastewater Teams, as well as the Laboratory Certification Program. Background information about the regulated public water systems is also provided, along with the current fee structure in place and an explanation of the Drinking Water State Revolving Fund. Copies of this Annual Report are also submitted to the members of the Health and Human Services Committee of the Maine Legislature.

Enabling Legislation

Legislation relating to the MPDWC is found in 22 M.R.S. §§ 2660-B - 2660-G. The statutes were first established in 1993(c.410) and have been modified five times since (1995.c.581: 1995.c.21: 1997.c.705: 2001.c.232 and 2003.c.601).

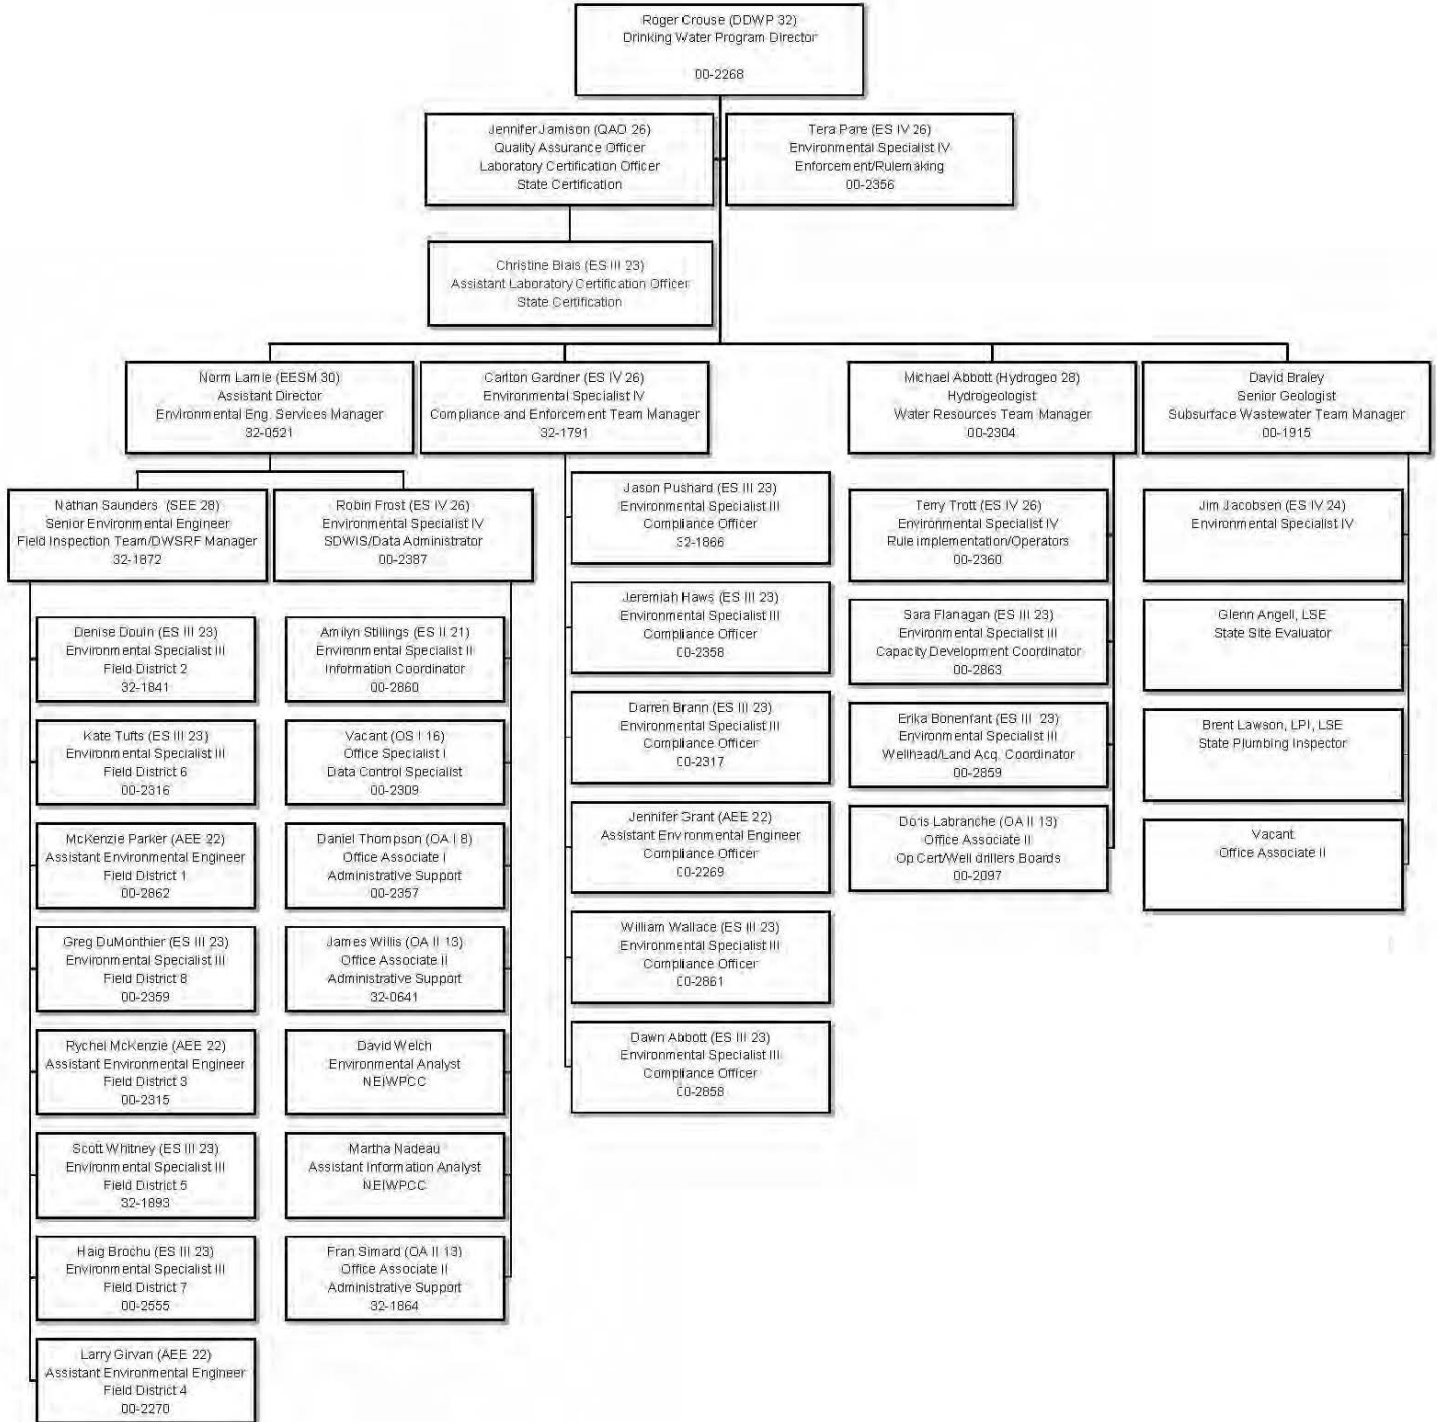

The legislation includes Definitions, Membership Requirements, Chair Responsibilities, Duties, Compensation, an annual work plan submission to the DHHS Commissioner, the Authority to impose an annual public water system (PWS) operation fee, and how enforcement works.

Members of the Maine Public Drinking Water Commission

Name, Address, E-Mail	Seat # & Expiration Date	Statutory Provisions for Seat
Roger L. Crouse Director, Drinking Water Program 11 State House, Station Augusta, ME 04333-0011 287-5684 FAX 287-4172 E-mail: roger.crouse@maine.gov	<u>Seat 1</u> Until Replaced	Commissioner of Health and Human Services or the Commissioner's designee
Rebecca Laliberte The Meadows PO Box 629 Greene, ME 04236 946-3007 E-mail: RLalib3967@aol.com	<u>Seat 2</u> August 31, 2015	Represent the water purveying community and be associated with a public water system serving a population of not more than 1,000.
Thomas J. Brennan, C.G. Nestle Waters North America – Poland Springs 123 Preservation Way Poland Spring, Maine 04274 998-6350 ext. 6350 FAX: 998-5181 E-mail: thomas.brennan@waters.nestle.com	<u>Seat 3</u> August 31, 2017	Must represent the drinking water public
Robert N. MacKinnon, Jr. Yarmouth Water District, Superintendent PO Box 419, 14 Smith Street Yarmouth, ME 04096 846-5821 FAX 846-1240 E-mail: ywdbob@maine.rr.com	<u>Seat 4</u> August 31, 2015	Represent the water purveying community and be associated with a public water system serving a population of at least 1001, but not more than 10,000.
Jeffrey D. LaCasse, <u>Chairperson</u> Kennebec Water District, General Manager PO Box 356, 6 Cool St Waterville, Maine 04901 (207) 872-2763, FAX 861-8964 E-mail: jlacasse@kennebecwater.org	<u>Seat 5</u> August 31, 2017	Represent the water purveying community and be associated with a public water system serving a population greater than 10,000.
Ben C. Worcester, III Smugglers Den Campground PO Box 787 Southwest Harbor, ME 04679-0787 (207)460-9033 E-mail: bcw@smugglersdencampground.com	<u>Seat 6</u> August 31, 2013	Must be a user of a transient, non-community water system
Harvey A. Chesley, Jr. Pine Tree Camp 25 Hill Crest Drive Clinton, ME 04927 397-2141 FAX 397-5324 E-mail: hchesley@pinetreesociety.org	<u>Seat 7</u> August 31, 2016	Must be a user of a non-transient, non-community water system
George Dugovic PO Box 603 Alfred, ME 04002 324-0180 E-mail: dugovics@roadrunner.com	<u>Seat 8</u> August 31, 2015	Must represent the drinking water public
John Storer Superintendent, Auburn Water District PO Box 414 Auburn, ME 04212-0414 (207) 784-6469, FAX (207)784-6460 E-mail: jstorer@awsd.org	<u>Seat 9</u> August 31, 2017	Must represent the drinking water public

Drinking Water Program Organizational Chart

DRINKING WATER PROGRAM, DIVISION OF ENVIRONMENTAL HEALTH, MAINE CDC
 ORGANIZATIONAL CHART
 July 22, 2014

Performance Review of the Drinking Water Program

The MPDWC gets regular updates from the DWP, and assesses the performance of this State agency. The Director and the staff of the program are performing extremely well, given the ongoing budget and staffing constraints. Regulations and reporting requirements for drinking water systems continue to evolve and increase under the direction of the EPA, and the DWP continues to handle these increased responsibilities, although not without its challenges. In addition, the DWP has done an excellent job in continuing to work with the regulated community to creatively navigate through challenges in securing federal matching dollars for the State Revolving Fund. Organizational changes made within the program over the past few years continue to improve service to Maine's water systems and allowed greater field work to insure the safety and reliability of our Maine water systems.

MPDWC Objectives for the Coming Year

The MPDWC will continue to support and guide the DWP, as needed, and to continue to prudently oversee the alternative funding mechanism established to fund a portion of the program's budget. However, staffing and funding will continue to be large, and growing, issues for the program. To that, the Commission in the upcoming year will:

- ◆ Continue to support and work for the appropriate funding for the State match of the Drinking Water State Revolving Fund
- ◆ Be a resource and an advocate for the DWP, its director and its staff
- ◆ Review DWP performance measures to evaluate the operations and effectiveness of the DWP

Acknowledgements

The MPDWC would like to once again acknowledge the hard work and dedication of all employees of the DWP. There is clearly a culture of Teamwork within the organization that is a testament to the leadership of Roger Crouse, the Director. As water issues continue to escalate nationally, statewide and locally, the stretched staff of this program quietly and efficiently do everything they can to protect the safety and reliability of Maine's almost 1,900 water systems as they *Work Together for Safe Drinking Water*.

Alternative Funding Mechanism Fee

In 1993, the Legislature created legislation enabling the DWP to assess a fee on all public water systems. This fee is deposited in the Public Drinking Water Fund for the purpose of supporting the DWP. The fee, also known as the Alternative Funding Mechanism (AFM) Fee, is calculated by using a formula with a base rate and a population multiplier.

The AFM fee pays the costs of five full-time employees. Each year, the MPDWC reviews the formula, the base fee, the per capita fee and the DWP budget to determine if any changes need to be made to the formula or fee rates. Revenues derived from the collection of these fees are used to retain primacy, or maintaining state control of the DWP, including funding five DWP staff positions.

For all water systems except bottled water and vending machines, the fee is equal to the minimum fee plus the per capita rate, multiplied by the population capacity of the system, minus the exempt population.

A summary of the rate structure for these types of water systems can be found in Table 1 below.

Table 1 – SFY 2014 Rate Structure for all Public Water Systems except Bottled Water and Water Vending Machines	
Description	Rate
Per capita rate (above base population)	\$0.45
Base fee	\$50
Base population	100

A separate formula and rate structure exists for bottled water facilities and water vending machines. A summary of the rates for these facilities can be found in Table 2 below.

Table 2 – SFY 2014 Rate Structure Bottled Water Facilities & Water Vending			
System Type	Description	# of Systems	Rate
In-State Small	Small (up to 250,000 gallons)	14	\$75
In-State Medium	Medium (>250,000 to 20 Million gallons)	7	\$225
In-State Large	Large (>20 Million gallons)	6	\$2,900
Water Vending Machine	Per Water Vending Machine	44	Minimum \$50, \$10 per machine up to \$150 maximum

During the May 1, 2013 Commission meeting, the MPDWC voted unanimously not to increase the fees for State Fiscal Year 2014, as projected revenues using the current fee structure should be adequate to cover all costs during the State Fiscal Year 2014.

Types of Public Water Systems Regulated by the DWP

Fee Billings and Collections

State Fiscal Year 2014

Summary of AFM Fee Billings

Data as of June 2014

Types of PWS	Number of Public Water Systems	% of total Public Water Systems	Population Served	Calculated Revenue	% of Total Calculated Revenue
Community	377	19%	663,900	\$303,641.90	67%
Non-Transient, Non-Community	371	19%	65,376	\$35,019.55	8%
Transient, Non-Community	1,125	58%	179,531	\$97,421.45	21%
Bottled Water / Vending Machines	71	4%	N/A	\$20,545.00	4%
Totals	1,944	100%	908,807	\$456,627.90	100%

Drinking Water State Revolving Fund

The Drinking Water State Revolving Fund (DWSRF) provides financial assistance to public water systems in Maine for infrastructure improvements. From 1997 through 2013, the DWSRF has provided over \$200 million in loans and grants to public water systems throughout Maine for more than 300 projects in 155 locations throughout Maine. Since 1997, Maine has provided approximately \$30 million in State Match funds to access \$171 million in federal funds

The annual federal grant has varied from a low of \$7.1 million to a high of \$13.5 million with an average annual grant of \$8.5 million. In 2014 FFY a federal grant of \$8.845 Million (up from \$8.4 million in the previous year) is available on condition that a 20% State Match is provided. The State of Maine Legislature approved a Referendum question to be placed before Maine voters in November 2014 for providing the State Match for FFY 2014 and 2015 via a General Fund Bond Issue. The State of Maine Legislature also approved an allocation of \$500,000 in the Supplemental Budget to be used as a portion of the 2014 DWSRF State Match. We intend to draw down \$2,500,000 of the federal funds utilizing the \$500,000 allocation upon approval of our 2014 Grant application. The balance of the grant, or \$6,345,000, will be drawn upon acquisition of the balance of the State Match.

For 2014, the DWP received more than \$24 million worth of requests for funding 48 qualified projects, with a total \$18.1 million in funding available. The following communities will benefit from the FFY 2014 DWSRF: Alfred, Andover, Bangor, Bethel, Boothbay, Bridgton, Caribou, Guildford-Sangerville, Hampden, Kennebunk, Mexico, Biddeford, Saco, Eastport, Old Town, Orono, Veazie, Presque Isle, Portland, Rangeley, Winter harbor, and Yarmouth. Of the 34 approved projects, 6 projects (*or 14% of the total funds*) involved water treatment improvements, 8 projects (*or 35% of the total funds*)

involved storage, source, or pumping improvements, and 20 projects (*or 51% of total funds*) involved aging water main replacement projects.

In addition to funding construction projects, the DWSRF also funds many other activities approved by the U.S. Environmental Protection Agency including well head protection grants, technical assistance providers, operator training, land acquisition loans, source water protection resources, and 17 staff positions at the DWP.

Providing a stable funding source significantly benefits the drinking water industry in Maine by reducing the annual uncertainty regarding the timing of when the money will be available as well as reducing the time and effort associated with advocacy.

A change in the FFY 2014 DWSRF Fees took place. All new DWSRF loans will include a 1% DWP Project Management Fee. This fee replaces a 1% MMBB Loan Origination Fee that has been in place since the inception of the program. The 1% DWP project Management Fee is charged to cover costs incurred by the Drinking Water Program to administer the DWSRF program. This Fee can be included in the total amount to be borrowed. This Fee applies to all construction loans.

Interest rates for loans to Disadvantaged Communities have also been adjusted for new 2014 loans. All loans for the financing of Projects will be at an interest rate of two percent below the MMBB cost of tax-exempt funds with a minimum interest rate of 1% for all loans. This discount rate may be further discounted, but not lower than 0.5%, to compensate for any fees charged the water system to administer the project loan.

Annual Staff Meeting and Annual Staff Merit Award

The Drinking Water Program annual staff meeting was held on July 16, 2014 at Camden Hills State Park in Camden. Kate Carnes from the Staff Education and Training Unit at the Maine Department of Health and Human Services continued our training on the Myers Briggs Type Indicator (MTBI). Drinking Water Program Staff took the MBTI test this spring and attended a follow-up workshop in June to learn about the tool and where each staff member fell in the scale. The intent of MTBI is to understand our preferences, and thus approach our own work in a manner that best suits our style, including time management, problem solving, decision making, and dealing with stress. The MBTI training is also designed to help staff understand teamwork and problem solving in a group setting and the different personalities and preferences that group work can bring. The training that Kate provided on our July staff day focused on understanding different temperaments within the group and how temperaments can influence work styles. The staff meeting also included a team building exercise consisting of a DWP Trivia challenge.

An announcement and presentation of the Annual Staff Merit Award was also made. This award, given annually by the MPDWC, recognizes an employee of the Drinking Water Program who has made a significant contribution in the past year to the goals and mission of the program. Nominations are solicited and received from the drinking water “community” in Maine, including the DWP staff, other Maine water industry associations,

and public water systems. This year, the Commission presented the award to Jason Pushard, Compliance Officer for the Central Maine region.

Drinking Water Program Accomplishments and Goals

Director's Report

Responsibilities

- ◆ Provide program direction and leadership.
- ◆ Develop staffing and budgetary needs to meet primacy requirements.
- ◆ Provide DWP Staff with the resources to effectively perform their work.
- ◆ Set priorities for staff time and resources.
- ◆ Adopt drinking water regulations that are no less stringent than the federal regulations.
- ◆ Adopt and implement adequate procedures for the enforcement of State regulations.
- ◆ Provide technical assistance to PWS to assure compliance with the SDWA.
- ◆ Work with state and federal entities to ensure adequate funding of the DWP.
- ◆ Advocate for Safe Drinking Water.
- ◆ Ensure the state lab's ability to perform analytical measurements of all National Primary Drinking Water Regulations.
- ◆ Work with Department Leadership to maintain and, when possible, increase support for the DWP.
- ◆ Respond as needed to all proposed legislation that affects the ability of public water systems to provide safe and reliable drinking water.

Accomplishments

- ◆ In May 2014 the Drinking Water Program along with other partners hosted a celebration of reaching the \$200 million investment mark with the Drinking Water State Revolving Fund.
- ◆ Applied for 2014 DWSRF grant (\$8,845,000). Award anticipated by the end of July 2014.
- ◆ Published the fourth annual DWSRF Construction Project Report.
- ◆ Received annual Public Water System Supervision Grant (\$960,000).
- ◆ Created a new "Assistant Laboratory Certification Officer" position to ensure adequate staffing exists to accomplish the laboratory certification work and to ensure program depth in this critical area.
- ◆ Maintained a strong, committed workforce.
 - Filled five positions vacated in the past year. New employees include:
 - Christine Blais, Assistant Laboratory Certification Officer
 - Jeremiah Haws, Compliance Officer
 - William Wallace, Compliance Officer
 - Rychel McKenzie, Field Inspector
 - Michael Abbott, Water Resources Team Leader and Hydrogeologist
 - Held an all staff meeting on March 24, 2014

- ◆ Continued to foster strong relationships with EPA, state agencies, water utilities, water associations, and non-profit agencies.
- ◆ Maintained compliance with federal primacy requirements.
- ◆ Worked with other Programs in the Division of Environmental Health to find efficiencies and provide better customer service. Continued to refine the Health Inspection Program License application process to integrate the requirements for public water systems and on-site septic systems. This has streamlined the process for applicants as well as the internal process for handling applications.

Goals

- ◆ Adopt revisions to the Rules Relating to Bottled Water to reflect the terms of the Memorandum of Understanding created in 2012 with the Department of Agriculture, Food and Rural Resources.
- ◆ Continue to implement the Safe Drinking Water Act. The DWP will continue to be creative and efficient. DWP will prioritize federal requirements to ensure staff resources are spent on the highest priority work.
- ◆ Continue to work with Division of Environmental Health management team to find efficiencies through inspection and administrative staff.
- ◆ Work with contractors and other water industry partners to improve outreach and technical assistance to public water systems.
- ◆ Work with the MPDWC to support initiatives of the DWP.
- ◆ Maintain and promote good staff morale.
- ◆ Provide staff with the necessary resources and support so they can accomplish their work.
- ◆ Provide excellent customer service.
- ◆ Maintain and foster strong alliances and working relationships which further DWP goals.
- ◆ Strive for Continuous Program Improvement.
- ◆ Refine existing and consider new DWP performance measurements to improve operational and performance assessments and implement performance improvements.
- ◆ Continue to shape state and national drinking water policy.

Compliance and Enforcement Team

Responsibilities

- ◆ Administer and enforce all State and Federal safe drinking water rules and regulations promulgated from the Safe Drinking Water Act and Maine Water for Human Consumption Act, including the Maine Rules Relating to Drinking Water (10-144 CMR 231) and the National Primary Drinking Water Regulations (40 CFR 141, 142, and 143).
- ◆ Adopt New EPA Regulations and File the necessary Primacy Packages.
- ◆ Administer and Enforce the State of Maine Rules Relating to Bottled Water, Bulk Water, and Water Vending Machines.
- ◆ Identify any rule violations, input appropriate violation data, and notify public water systems of such violation(s) through notices of violation, notices of

noncompliance, consent orders, compliance orders and notices of penalty assessments.

- ◆ Create and change monitoring schedules for public water systems.
- ◆ Train public water system owners and operators on new, existing, or upcoming rules and procedures.
- ◆ Review water quality and monitoring data from public water systems and bottled water producers and sellers, to determine contaminant levels, appropriate collection and analysis times, as well as sampling methods.
- ◆ Review submitted reports, such as monthly operating reports and consumer confidence reports.
- ◆ Issue and Remove Boil Water Orders, Boil Water Advisories, Do Not Drink Orders, and Do Not Use Orders.
- ◆ Track water quality results for new source/system approval.
- ◆ Conduct watershed inspections and review watershed reports.
- ◆ Communicate and collaborate, internally and externally, with DWP staff and state and federal agencies and stakeholders regarding any relevant compliance and enforcement information associated with public water system issues, applications, or reviews.
- ◆ Review and approve or deny treatment installation plans affecting water quality.
- ◆ Review and approve or deny sampling plans
- ◆ Review and approve or deny synthetic organic compound waivers applications, which can save public water systems hundreds of dollars in testing costs.
- ◆ Enforcement staff draft, negotiate, revise, issue and maintain formal enforcement actions.
- ◆ Enforcement staff work directly with public water systems and other state agencies to explain and resolve formal enforcement actions related to drinking water violations, collect AFM fees, assist with posting public notification and negotiate terms for returning to compliance.
- ◆ Enforcement staff refer any recalcitrant public water systems to the Maine Attorneys General and provide testimony, background, and technical expertise for administrative and civil hearings.
- ◆ Enforcement & Rulemaking Coordinator oversees and ushers all proposed rule changes within the Division of Environmental Health through approval, advertising, public hearing, and the adoption process.
- ◆ Enforcement & Rulemaking Coordinator oversees all public requests for information and ensures compliance with Maine's Freedom of Access Act.
- ◆ Enforcement staff report to EPA the compliance status of any public water systems scored as nationally significant on the Enforcement Targeting Tool (ETT).
- ◆ Enforcement staff works to prioritize and address those systems identified as needing formal enforcement actions.

Accomplishments

- ◆ Enforcement staff provided input on EPA's Enforcement Targeting Tool (ETT), designed to prioritize unaddressed public water systems with health-based violations.
- ◆ Compliance staff participated in a series of trainings to assist public water systems, boards, organizations and agencies within Maine on drinking water regulations,

including, but not limited to, sampling requirements and Opening for the Season seminars for seasonal transient water systems.

- ◆ Compliance staff adeptly responded to a number of drinking water emergency calls and events, resulting from weather disasters, lack of water, acute contamination and treatment failures.
- ◆ Revised the *Rules Relating to Drinking Water* (10-144 CMR 231) to prepare for formal rulemaking.
- ◆ Compliance and enforcement staff provided thoughtful feedback and input on all proposed policies and procedures proposed by DWP staff and the Health Inspection Program staff. In particular, staff worked on the Drinking Water Orders SOP, the HIP Application Policy, the Blending Policy, Treatment of Ocean Water with Reverse Osmosis, Point of Use Policy, Treatment Review SOP and Checklist, Unregulated Contaminates Policy, Non-Powered Supply Policy, and the Reregulation Policy.
- ◆ Communicated to certified laboratories regarding reporting analyses correctly and timely. Continued to improve the process of receiving information from public water systems, communicating that information to all appropriate staff, and storing it in an easily retrievable format, when necessary.
- ◆ Improved communication and working relationship with the Health Inspection Program, to present a clear and consistent message to public water systems that are licensed by HIP. This improvement included completing a unified application for new systems and systems changing ownership.
- ◆ Continued to protect public health by working with Health Inspection and Liquor Enforcement Programs, Maine Manufactured Housing Board, DHHS Daycare Licensing Agency and Department of Agriculture, Conservation and Forestry to administer their enforcement remedies (including the revocation of liquor license or suspension of health inspection license renewals for public water systems in formal DWP enforcement).
- ◆ Provided refresher training for existing compliance staff on regulations and SDWIS, as well as provided training for new compliance staff.
- ◆ Acquired 2 new compliance officers and are currently training them. Improved the review process of compliance reports, which strengthened data quality for compliance.
- ◆ Met regularly as an Ideas Team to discuss issues/ opportunities for improvement, and completed over 20 that arose.
- ◆ Enforcement staff met its annual goal set by EPA, which required Maine to address or resolve 37 nationally significant public water systems appearing on the ETT.
- ◆ Rulemaking Coordinator facilitated the adoption of the Maine Food Code and the Maine Lead Poisoning Prevention Fee Rules
- ◆ Worked with the Information Management Team to develop stronger tracking efforts in compliance follow-up, including, but not limited to, resolving monitoring violations within SDWIS when samples are reported, in a more timely fashion.
- ◆ Strategized with Management and Information Management Teams, to develop a better way of addressing priority public water systems on the ETT. Worked on identifying potential future high-scorers before they appear on the list, and address them earlier. Offer feedback and determine which public water systems require action first.

- ◆ Worked with Information Management Team to improve tracking of Monthly Operating Reports, develop a treatment template letter, and improve tracking of compliance schedules for formal enforcement actions.
- ◆ Compliance Officers now assume the role of Project Managers of treatment reviews and approvals, resulting from MCL or other violations.

Goals

- ◆ Improve methods of assuring that public water systems licensed by the Health Inspection Program are submitting adequate water quality reports each year, by coordinating with HIP and checking DWP data, prior to license renewal.
- ◆ Continue efforts to collaborate with other agencies and businesses to offer a more cohesive message to public water systems and avoid confusion. Specific emphasis will be placed on day care and seasonal facilities.
- ◆ Continue to work with data and administrative staff at the DWP, on issues that directly affect compliance, in order to maintain data integrity and secure the highest accuracy of Rule compliance.
- ◆ Update the Enforcement Strategy to clarify formal enforcement procedures, as well as roles and responsibilities, establish a specific penalty matrix, and set clear priorities for enforcement actions.
- ◆ Continue to update any formal rulemaking, policies or procedures relating to drinking water compliance. Currently on the agenda are reviews of several internal standard operating procedures, and the Laboratory Certification Rules.
- ◆ Continue working with all certified laboratories to foster a stronger relationship between labs and the DWP.
- ◆ Keep apprised and participate in proposed and finalized changes to EPA regulations, such as Revisions to the Total Coliform Rule and the Lead/Copper Rule, Long Term Revisions, Unregulated Contaminant Monitoring Rule, the Consumer Confidence Report Rule, the Perchlorate Rule, and amendments to the Safe Drinking Water Act (regarding low-lead fixtures).
- ◆ The Rulemaking Coordinator's goal is to facilitate the adoption of the Drinking Water Program's Rules Relating to Bottled Water, Bulk Water and Water Vending Machines, Rules Relating to Drinking Water, Subsurface Wastewater Rules and Laboratory Certification Rules.
- ◆ Compliance officers will add the responsibility of managing bottled water compliance within their respective districts.

Field Inspection Team

Responsibilities:

- ◆ Conduct sanitary surveys and field investigations.
- ◆ Oversee new system and new well approval projects for public water supply wells.
- ◆ Work with public water systems to complete the process for obtaining a general operations permit.
- ◆ Review proposed septic system variances that could impact public water supply sources
- ◆ Provide follow up inspections and field technical assistance to PWSs with violations.

- ◆ Provide on-site advice and assistance to PWSs regarding operation, maintenance, treatment, quality control, testing waivers and testing requirements.
- ◆ Investigate water quality complaints made by the public.
- ◆ Provide technical advice to PWSs in emergency situations.
- ◆ Provide waterborne disease investigation.
- ◆ Investigate requests for deregulation and authorize deregulation of water system as warranted.
- ◆ Maintain a Sanitary Survey Priority List.
- ◆ Draft, issue, and track Engineering Orders.
- ◆ Inform and interact with all other pertinent DWP teams regarding field conditions of PWSs.
- ◆ Provide field assistance on the placement and removal of all Boil Water Orders.
- ◆ Inspect the construction of PWS facilities, both DWSRF and non-DWSRF funded.
- ◆ Conduct watershed inspections.
- ◆ Evaluate operator classification for water systems.
- ◆ Ensure PWS compliance to rules pertaining to licensed operators.
- ◆ Review and provide comments on preliminary plans and engineering reports for PWSs.
- ◆ Review and approve final plans and specifications for new or modified water facilities.
- ◆ Provide engineering assistance and guidance to PWSs.
- ◆ Provide assistance and guidance on optimization of treatment processes.
- ◆ Review and approve applications for treatment change, addition, or removal.
- ◆ Review and approve all requests for waivers of main separation requirements and tank painting/coating.
- ◆ Review and approve all requests for waivers to the 300 foot setback requirement between a PWS well and septic leach field.
- ◆ Review and provide input on the approval of requests for waivers to the 1000 foot setback requirement between a PWS well and Underground Storage Tanks (USTs).
- ◆ Develop and maintain controlled documentation of pertinent policies and standard operating procedures, all of which is available electronically in the Electronic Field Manual.
- ◆ Conduct facility reviews and evaluate the ability of systems, both engineered and non-engineered, to provide safe and reliable drinking water to the public. Facility evaluations include sanitary surveys; new system and new well approval projects from preliminary approval through final system approval; records, data, performance reviews; and engineering inspections.
- ◆ Engineering enforcement actions are initiated and tracked as necessary.
- ◆ Conduct routine inspections of public water systems throughout fiscal year.
- ◆ Conduct additional inspections in response to violations, customer complaints, known health threats, siting and approving new public water supply wells and their water systems, or at the request of the system.
- ◆ Field Engineers oversee DWSRF projects as they proceed through the construction phase, starting with a preconstruction meeting and contract signing. During the construction phase, projects are inspected monthly in conjunction with pay requisition meetings. At the end of a project, an inspection is done to verify substantial completion and final pay requisitions.

- ◆ Review and evaluate new and emerging technologies, preliminary and final water system plans and specifications, engineering studies, engineering orders and pilot projects.
- ◆ Provide technical assistance to consulting engineers and public water systems regarding engineering issues. Inspect all facilities construction in a timely manner.

Accomplishments

- ◆ The Field Inspection Team completed 95% of sanitary surveys within the 3 or 5 year planned frequency depending on the system type (Community or Non-Community), and trends show that this percentage is increasing. Individual sanitary survey goals have been given to each inspector and results are reviewed on a quarterly basis.
- ◆ Approximately 366 sanitary surveys of public water systems were completed along with 909 other field visits relating to various activities including new system or well approval projects, sample rechecks, construction inspections, boil water orders, and miscellaneous events.
- ◆ Emergency responses, investigations, water system inspections, follow up inspections for Total Coliform Rule violations and the issuance of engineering orders were performed.
- ◆ Maintained the Electronic Field Manual which includes all pertinent policies and procedures related to field inspection activities. The manual is controlled and available for downloading onto electronic equipment brought into the field.
- ◆ Participated in the development or revision of several DWP policies. Two very large works created during this year include the Large System Sanitary Survey Procedure and the Treatment Review and Approval Policy and Procedure, both of which were team efforts taking place over many months.
- ◆ Field Inspectors oversaw the issuance of General Operations Permits for Community and Non Community-Non Transient public water systems that are new or have substantially changed their operation after October 1st, 1999.
- ◆ During sanitary surveys, field inspectors verified that public water systems have designated operators with licenses that are commensurate with the operational class of the water system.
- ◆ During the 2013 fiscal year, four field inspectors worked as project managers to oversee DWSRF projects to ensure that projects were constructed to safe drinking water standards and to verify that funds were spent appropriately for these projects. These projects involve: new sources or source modification, new storage facilities, new treatment or treatment modifications, and major transmission and distribution main work.
- ◆ Completed the plan review process for numerous water system projects.
- ◆ Completed watershed inspections on the State's water systems that have filtration avoidance approvals.
- ◆ The DWP's computer database records were updated to include information gained as a result of sanitary surveys and other inspections.
- ◆ Technical assistance activities continued to be enhanced through the use of documented policies and procedures. These have allowed the field staff to consistently and efficiently administer SDWA rules and State of Maine Rules Relating to Drinking Water.

Goals

- ◆ Continue to perform sanitary surveys on regulated water systems based on a three-year and five-year rotation plan, depending on water system type.
- ◆ Continue to monitor data on sanitary survey completion.
- ◆ Provide review and approval of new public water supply wells and water systems.
- ◆ Review septic setback waiver requests to ensure public health is protected.
- ◆ Review UST setback waiver requests to ensure public health is protected.
- ◆ Perform annual inspections of all surface water source systems with filtration waivers.
- ◆ Provide on-site technical assistance to small water systems.
- ◆ Provide on-site training to small water system operators.
- ◆ Complete construction inspections on all projects submitted for review.
- ◆ Respond to emergency situations including drinking water orders.
- ◆ Conduct rechecks sampling for routine coliform bacteria positive samples.
- ◆ Complete plan reviews within 30 days of receipt of all necessary review information.
- ◆ Oversee the issuance of General Operations Permits.
- ◆ Oversee and review the application of the Cross Connection Rules.
- ◆ Incorporate future EPA regulations into the review process.
- ◆ Ensure compliance with DWP rules regarding requirements of final plans and specifications submission and approval prior to the initiation of construction of water facilities by PWSs.
- ◆ Complete inspection forms for all construction inspections on DWSRF funded and non-DWSRF projects.
- ◆ Continue New System Approval work on Manufactured Housing Communities.
- ◆ Review, update, and modify, as necessary, all databases.
- ◆ Continue to document Field Inspection and DWSRF Project Management related SOPs that describe the details of our work.
- ◆ Continue to use documentation control best practices with DWP policies and SOPs.
- ◆ Continue development of the DWP staff of eight field inspectors for both new system/well approval and field inspection work.
- ◆ With help from other DWP teams, implement GPS measurement of wells and treatment facilities into routine survey activities.

Water Resources Team

The Water Resources Team provides technical assistance, outreach and training for DWP staff, Public Water Systems, and the public. Areas where we focus that assistance include Water Operator and Well Driller licensing, System Capacity Development assessment and improvement, Security, Source Protection, and new regulations.

Responsibilities

- ◆ Participate in Maine's Board of Licensure of Water Treatment Plant Operators. This includes reviewing training courses for relevancy and assuring operators receive required training for license renewal.
- ◆ Provide DWP support to the Board of Licensure of Water Treatment Plant Operators for license renewal, tracking of required training and examination process (see annual Operator Certification Report for details).

- ◆ Organize and conduct training for PWS owners, operators, and supervisors.
- ◆ Ensure that DWP personnel receive appropriate training related to their current and anticipated duties.
- ◆ Assist Field Inspection Team in evaluating water systems classification.
- ◆ Assist Field Inspection Team in assessing water system compliance with licensed operator requirements.
- ◆ Provide hydrogeologic review for New Well Approval applications;
- ◆ Provide guidance and direction to MRWA's Water Quality Specialists for the technical assistance programs. Administer charges to DWSRF 2% Technical Assistance account.
- ◆ Perform Environmental Review for DWSRF funded projects and prepare an Environmental Assessment.
- ◆ Review DWSRF recipient systems' technical, financial and managerial procedures to address system capacity
- ◆ Inform PWS management of methods to improve capacity development.
- ◆ Disseminate *Emergency Action Plans* to assist systems in the development of plans for water system emergencies.
- ◆ Represent the DWP on the WARN Steering Committee as an associate member.
- ◆ Manage the Sanitary Seal Well Cap Program.
- ◆ Continue to implement a Source Water Assessment and Protection Program for Maine.
- ◆ Operate and maintain the DWP Geographic Information System.
- ◆ Make source water protection and security information available in appropriate forums, including the Internet.
- ◆ Provide maps depicting source water protection areas and water resource features to utilities, all affected municipalities, consultants, and others.
- ◆ Encourage and facilitate source water protection activities of public water systems.
- ◆ Market and administer the Land Acquisition Loan Program
- ◆ Administer Maine's Wellhead and Source Water Protection Grant Programs.
- ◆ Administer the Capacity Development Grant Program.
- ◆ Coordinate the DWP education and outreach program, including publishing a quarterly newsletter and maintaining the DWP website.
- ◆ Develop and Provide Educational Materials as requested and needed for public water systems, DWP staff, and other interested parties

Accomplishments

- ◆ Achieved 96.2 percent compliance rate for the 824 PWS required to be operated by a licensed operator. This is a shared task between Field Inspection Team and Operator Certification program.
- ◆ Operator training credit tracking process in-place.
- ◆ Continued to provide opportunities for operator preparatory and continuing education training classes through the Capacity Development Training Reimbursement Fund.
- ◆ Assisted EPA funded training organizations to provide 72 hours of training and technical assistance in underserved areas of the State.
- ◆ Instituted computer based water operator exams in Portland and Holden.
- ◆ Conducted 16 capacity reviews for DWSRF loan applicants.

- ◆ Reimbursed 11 systems for projects through Capacity Development Grants; 40 projects are ongoing.
- ◆ Developed Collaborative Capacity Development Program targeting 4 areas of the state to improve collaboration between public water systems in the same geographical areas to increase capacity and enhance source water protection at water systems within each area.
- ◆ Provided technical support for the general operations permitting process and operator compliance to the Field Inspection Team.
- ◆ Completed 27 environmental reviews in SFY 2014.
- ◆ Updated Emergency Action Plans for small and large water systems and Maine DWP Emergency Preparedness Handbook.
- ◆ Approved \$74,500 in Wellhead Protection Grants
- ◆ Approved \$25,000 in Source Water Protection Grants
- ◆ Distributed the *Service Connection* newsletter quarterly to more than 4,000 readers
- ◆ Continued the process of transitioning the DWP's quarterly newsletter, the *Service Connection*, to an electronic transmission to enable improved and upgraded design capabilities and save resources.
- ◆ Completed the overhaul and re-organization of DWP website to make the site more user-friendly, easier to navigate, and more comprehensive to include up-to-date information on rules, policies, news, technical assistance, education, training, resources, and procedure of the DWP.
- ◆ Provided regular monthly oversight and direction to MRWA Water Quality Specialists (WQS) funded by the DWSRF technical assistance set-aside. With closer targeting and oversight, the WQS conducted 871 site visits. The site visits help water systems with violations, operator licensing, trouble-shooting, installing, and operating treatment systems.
- ◆ Worked with public water suppliers, Maine Rural Water Association, Maine Water Utilities Association, The Wells National Estuarine Research Reserve, , as well as other state agencies to facilitate the implementation of the recommendations resulting from the source water assessments. WRT also worked with the DACF Land Use Planning Team to provide source protection education and information to municipal officials.
- ◆ Served on several Association of State Drinking Water Administrators (ASDWA) committees that work with other states, EPA, and professional organizations to develop guidance, build comments and perform studies for small system operations, security initiatives, water resource vulnerabilities Staff represents EPA Region I on the Groundwater Protection Council's National Board.
- ◆ Continued working with the Salmon Falls Watershed Collaborative, an interstate group working to protect drinking water and other water resources along the Maine-New Hampshire border. The Collaborative was awarded a 2012 US Water Prize for its work in bringing together disparate groups to protect drinking water.
- ◆ Negotiated a memorandum of understanding with the Maine Department of Agriculture to simplify the regulation of bottled water facilities, and initiated rulemaking to implement the new procedures.
- ◆ Continued to participate in the Kennebec Woodland Partnership to assist in development and maintenance of the forest economy to protect drinking water quality.

- ◆ Developed, organized, and published the Annual DWSRF Project report to highlight the importance and value of the DWSRF to public water systems in Maine
- ◆ Reimbursed 16 water systems for the installation of sanitary seal well caps.
- ◆ Worked with DHHS Staff Education and Training Unit to provide training to Program on Myers Briggs Type Indicator.
- ◆ Updated the Business Owners Handbook for transient public water systems.
- ◆ Helped organize and participated in the Southern Maine Water Resources Network planning process, initiated by The Nature Conservancy, to bring together groups working in Piscataqua-Salmon Falls, Saco, and Casco Bay watersheds to facilitate information exchange, catalyze innovation, and coordinate action.
- ◆ Developed several fact sheets and guidance documents to improve communication with systems and public.
- ◆ Worked with surface water systems to review need for control of algae populations affecting water quality and with potential human health effects. Participated in multi-agency review of pesticide permit applications.
- ◆ Developed and participated in the CDC Ideas Team process as part of CDC Public Health Agency Accreditation.
- ◆ Participated on the Maine CDC Quality Improvement Council as the representative from the Division of Environmental Health.
- ◆ Revived the Program's database to store Potential Sources of Contamination (PSCs) inventory data for public water systems and created a report enabling DWP staff to easily retrieve this data for a given public water system.
- ◆ Worked with IMT to develop SOPs and train Field Inspectors to use Field GPS units to collection GIS data for PWS sources.
- ◆ Worked with Maine DEP, NHDES, MEMA and other agencies to develop inventory maps showing locations of Above Ground Storage Tank (AST) facilities upstream from PWS surface water intakes.

Goals

- ◆ Continue to maintain DWP data in the DEP's Google Earth/Google Maps application, providing downloadable GIS data to suppliers, municipalities, and the general public with appropriate security screening.
- ◆ Continue to implement the Trust for Public Land recommendations for improving the fabric of water supply protection in Maine.
- ◆ Develop additional alliances with land conservation groups and regional planners to encourage good land use planning leading to more effective source protection.
- ◆ Continue and expand education and outreach efforts to assist both water suppliers and municipalities in making good land use decisions in source water protection areas.
- ◆ Provide support and coordination with DEP, Land Use Planning Commission, and other state agencies to assure that source water protection issues are considered in their permitting processes.
- ◆ Emphasize the need for active management plans in wellhead protection areas in source approval, waiver review, and consultation with systems.
- ◆ Continue to use the Capacity Development Strategy Implementation Plan.
- ◆ Continue to streamline the environmental review process while maintaining a high level of integrity.

- ◆ Support the Board of Licensure of Water System Operators in their actions to maintain the professionalism of the water operator license.
- ◆ Assist training organizations in the development and approval of relevant training for water system personnel.
- ◆ Develop outreach programs with DWP staff to increase operator knowledge concerning regulatory requirements.
- ◆ Provide DWP staff members with training pertinent to their job performance and relationship to water system operations.
- ◆ Involve the Water Operator Board to make improvements to clarify operator responsibility in system compliance matters.
- ◆ Continue to aid community and non-transient, non-community systems in retaining appropriately licensed operators.
- ◆ Ensure systems requiring licensed operators have satisfactory coverage.
- ◆ Continue oversight of MRWA Circuit Rider program.
- ◆ Continue to improve and streamline the Grant administration process.
- ◆ Continue conducting DWSRF capacity reviews for capital projects.
- ◆ Continue conducting capacity reviews of those systems identified as particularly needing TFM capacity development improvements.
- ◆ Continue to provide capacity development grant money to assist systems in maintaining or improving TFM capacity.
- ◆ Work cooperatively with the PWS and the DWP compliance section to bring non-compliant systems into compliance.
- ◆ Enhance the capacity review documentation to address differences in system types and needs.
- ◆ Continue to balance the improvement of the human environment through safe and adequate water systems with the protection of natural, historical and cultural features.
- ◆ Finalize a procedure to address historical Significant Non-compliers through capacity development.
- ◆ Provide technical assistance in the form of operator training and directed workgroups.
- ◆ Work with the Board of Licensure of Water System Operators and water system professional organizations to improve success for water operator examinations.
- ◆ Support industry efforts to address water operator workforce sustainability.
- ◆ Continue to collaborate with professional organizations and State agencies that concentrate on post-secondary job training and workforce development.
- ◆ Continue a presence on MWUA, NEWWA, JETCC, and other professional organization committees to enhance training opportunities and capacity development awareness.
- ◆ Continue working with PWSs to improve their emergency preparedness through interactive exercises.
- ◆ Participate in the development of the Maine WARN and an Interstate WARN.
- ◆ Raise awareness of emergency response procedures to all PWS.
- ◆ Continue to develop inventory of Above-Ground Storage Tank facilities upstream from river intakes.
- ◆ Provide outreach to encourage inspection, SPCC measures and emergency communication protocol AST storage facilities.

- ◆ Hold Table Top Training Exercises for Water Utilities, AST Facilities and local emergency responders to prepare for spill scenario in rivers used for public water supply.
- ◆ Continue system outreach to assist systems in developing Emergency Action Plans, partner with the Department of Education to disseminate information to schools for inclusion in their all hazard plans.
- ◆ Continue to implement the electronic publication of DWP's quarterly newsletter, the *Service Connection*.
- ◆ Implement a pilot program to test integrated outreach for small community systems, combining source protection, capacity, and emergency preparedness into one implementable package.
- ◆ Continue to develop, organize, publish, and improve the Annual DWSRF Project report to highlight the importance and value of the DWSRF to public water systems in Maine
- ◆ Continue to provide funding to water systems for the installation of sanitary seal well caps.
- ◆ Continue to develop, refine, and deliver outreach materials and messages related to DWP's core message to public water systems
- ◆ Continue to input data into the Potential Sources of Contamination (PSCs) inventory database, and encourage and train DWP staff on how to retrieve and utilize the data.
- ◆ Work with EPA to develop and deliver two Source Water Protection Works in Northern Maine

Subsurface Wastewater Disposal Team

The Subsurface Wastewater Disposal Team oversees the statewide administration and enforcement of the rules for designing and installing subsurface wastewater disposal systems, licenses the Site Evaluators that design disposal systems, and provides training and oversight of municipal LPI's. The Team is also responsible for the daily operations of the Maine Well Drillers Commission.

Responsibilities

- ◆ Manage and administer the Water Well Drillers and Pump Installers Commission.
- ◆ Update and maintain the Well Drillers and Pump Installers Rules to provide protection of groundwater, protect public health, and ensure customers receive a properly constructed water or geothermal well.
- ◆ Investigate complaints of improper construction or location of water and/or geothermal wells.
- ◆ Update and maintain the Subsurface Wastewater Rules to provide protection for public health and groundwater quality.
- ◆ Investigate complaints of improper waste disposal system designs.
- ◆ Investigate complaints of improper conduct of licensed site evaluators.
- ◆ Investigate complaints of malfunctioning waste disposal systems.
- ◆ Participate with DEP and DMR to identify malfunctioning waste disposal systems that may be contributing to shellfish closures and oversee corrective action to facilitate the reopening of closed shellfish areas.
- ◆ Oversee the appropriate administration of the Subsurface Wastewater Disposal rules by local municipalities.

- ◆ Manage the licensure of Site Evaluators.
- ◆ Coordinate and conduct training for Local Plumbing Inspectors, Code Enforcement Officers, and Licensed Site Evaluators with the State Planning Office.
- ◆ Provide support for and review of municipal programs for internal and external plumbing permits.
- ◆ Provide technical assistance, training, and interpretation of rules for municipalities.
- ◆ Provide technical assistance and plan reviews for the Health Inspection Program.
- ◆ Provide technical assistance to private well owners, including understanding the results of their water quality analysis and available treatment options.

Accomplishments

- ◆ Continued to work with the Well Drillers Commission to regulate drinking water and geothermal well installations, pump installations and well/pump repairs.
- ◆ Participated in the monthly meetings of the Well Drillers Commission.
- ◆ Provided clerical staffing for the monthly meetings of the Well Drillers Commission.
- ◆ Completed annual license renewals for both well drillers and Site Evaluators.
- ◆ Processed consumer complaints, unlicensed practice investigations, and examinations of new well drillers for the Well Drillers Commission.
- ◆ Worked closely with the DWP on the installation of proposed public water supply wells.
- ◆ Processed complaints regarding waste disposal system designs and malfunctions.
- ◆ Participated on the Maine Association of Site Evaluators (MASE) board of directors.
- ◆ Worked with MASE to hold the annual field exam for site evaluators.
- ◆ Administered written exams for Site Evaluators and well drillers.
- ◆ Worked with HIP to improve data accessibility and document retention procedures.

Goals

- ◆ Provide staff and logistical assistance to the Well Drillers and Pump Installers Commission, administering the examination, licensing, complaint, and discipline process.
- ◆ To update the Seasonal Conversion Rules to include criteria encouraging the use of new advanced technology and for consistency with the Subsurface Wastewater Disposal Rules.
- ◆ Continue to administer the Well Drillers and Pump Installers Rules and the Subsurface Wastewater Disposal Rules.
- ◆ Continue to work with MASE and the Maine Groundwater Association (MGWA) on rule improvement and development.
- ◆ Continue to ensure that malfunctioning waste disposal systems are replaced or repaired as required.
- ◆ Continue to cooperate with DEP and DMR to remove malfunctioning waste disposal systems from shellfish closure areas.
- ◆ Continue to work with LPI's to improve local administration and enforcement of the Subsurface Wastewater Disposal Rules.
- ◆ Continue to work with HIP to ensure licensed establishments have appropriate waste disposal systems.
- ◆ Continue to provide training required for recertification/licensure of LPI's and Site Evaluators.
- ◆ Continue to provide technical assistance to private well owners.

Information Management Team

Responsibilities

- ◆ Manage data flow into the DWP, both electronically and by hard copy - this includes incoming and outgoing mail, sample data, MOR data, GIS data, AFM payments, etc.
- ◆ Manage and maintain Document Imaging system.
- ◆ Create and maintain database and GIS applications to support all functions of the DWP.
- ◆ Run Compliance Reports for the Compliance Team and provide first level of research on violations.
- ◆ Manage financial aspects of the DWP.
- ◆ Manage QA/QC processes of all DWP data.
- ◆ Manage New Source Approval / New Well Approval processes, including tracking and coordination between DWP personnel and other State agencies.
- ◆ Provide quarterly data to EPA.
- ◆ Run queries and provide data to EPA contractors, Maine CDC, other State agencies and for FOIA requests.
- ◆ Create maps as requested by PWSs and towns.
- ◆ Provide technical support and training to DWP staff for SDWIS, GPS units, and other technology.

Accomplishments

- ◆ Continued Implementation of Document Imaging/Management system (Kofax /Orbit) to replace paper files, with 100% of Transients, 100% of NTNCs, 100% of Bottled Water, and 66% of Community system folders completed.
- ◆ Supported staff with SDWIS Web application. Trained new staff in use of SDWIS.
- ◆ Maintaining production database on the enterprise server.
- ◆ Continued cross training to IMT staff for better coverage of all IMT duties.
- ◆ Expanded on existing training and guidance documents to staff (mostly FIT/CET) for SDWIS Web use.
- ◆ Worked closely with the Health Inspection Program and Department of Agriculture, Conservation and Forestry to identify PWSs that are under their regulation.
- ◆ Maintained quarterly EPA reporting.
- ◆ Worked with the State Health and Environmental Testing Lab (HETL) staff to refine PWS sample kit shipping and sample data transfer processes.
- ◆ Assisted CET with adjusting sampling schedule for Stage 2 DBP Rule.
- ◆ Worked with CET and FIT teams and DWP's vendor to update Drinking Water Watch for each of the team's unique needs.
- ◆ Provided private and utility labs with files and guidance documents to assist them in implementing electronic sample data transfer. We are now receiving nearly all bacteria samples electronically, and are working with labs toward electronic submittal of chemical samples. Several labs are now submitting all samples through electronic means.
- ◆ Worked with one new lab to begin submitting samples electronically.
- ◆ In conjunction with WRT, completed an update and enhancement of the Drinking Water Program website.

- ◆ Continued running Compliance Reports as support to Compliance Staff. As part of this process, IMT staff also does preliminary data investigation on the Compliance Reports.
- ◆ Continued a temporary contract position within the Information Management Team to increase the support provided to the Compliance and Enforcement Team.
Because we cannot create any new State positions, we have created a new contract position called an "Assistant Information Analyst."
- ◆ Continued to increase QA /QC of DWP data in all applications, including SDWIS. QA /QC of Legal Entities data has led to a significant decrease in returned mail on mass mailings.
- ◆ Provided training and support to FIT and CET groups in a variety of areas, including use of SDWIS.
- ◆ Provided Enforcement and Compliance staff with Access tool to more easily review systems violations in order to determine if they can be returned to compliance.
- ◆ Completed testing of SDWIS 3.2 in development and requested upgrade to production.
- ◆ IMT staff participated in several EPA workgroups, giving input on SDWIS Prime development.
- ◆ Provided weekly updates for all DWSRF projects
- ◆ Revised the DWSRF Loan Fees that replaced the 1% MMBB Loan Origination Fee with a 1% DWP Project Management Fee.
- ◆ Provided all Community Systems with data for their Consumer Confidence Reports.
- ◆ Developed and participated in the CDC Ideas Team process as part of CDC Public Health Agency Accreditation

Goals

- ◆ Maintain or increase the same level of service to the program, recognizing changes in staff and added responsibilities. Identify creative and more efficient ways to manage/QC/enter data to reduce overall staff time. Use contract labor as necessary to manage workload.
- ◆ Prepare for next SDWIS upgrade in Fall 2014 to implement the GWR changes and SDWIS updates. Work with OIT to resolve server issues that are preventing the upgrade. Provide training to staff in added SDWIS functionality for the GWR and the Stage 2 DBP Rule.
- ◆ Continue working with HETL to reduce the amount of rejected samples from electronic sample data transfer.
- ◆ Complete imaging the backlog (old) files in the file room with a goal of getting all Community PWS files into the Orbit Imaging Viewer by December 31, 2014.
- ◆ Make improvements to all DWP supporting applications (including the Shipping File process, HETL sample data import, AFM, Field Data, SRF, etc.).
- ◆ Continue cross training of IMT staff for better coverage of all functions.
- ◆ Create and maintain SOP documents for all IMT functions.
- ◆ Continue assistance to private labs for electronic sample data transfer, with a goal of 100% of instate labs submitting chemical samples electronically by June 2015.
- ◆ Maintain/increase QA/QC of all DWP data, including lab samples (units of measure, correct sample points), Inventory data, electronic document imaging, and Legal Entity data.
- ◆ Put in place a process for maintaining routine GIS updates.

- ◆ Improve timeliness of Federal Violations Reporting.
- ◆ Continue to provide support and training to DWP staff, including training for SDWIS Web 3.2 GWR functionality.
- ◆ Work with EPA and their SDWIS contractor, through conference calls, workgroups and webinars, to provide input for SDWIS Prime functionality.
- ◆ Document interfacing applications and begin researching upgrades or replacements in preparation for move to SDWIS Prime.

Laboratory Certification and Capability

Responsibilities

- ◆ Issues laboratory certificates that clearly reflect the analytical capabilities of participating laboratories.
- ◆ Provides technical assistance that result in improved quality and defensibility of analytical data generated by laboratories for use in the DWP.
- ◆ Develops, reviews, and revises State rules and regulations for laboratory certification to clearly reflect consistency with the *“Manual of Certification of Laboratories Analyzing Drinking Water”* and recognized national standards on laboratory quality management systems.
- ◆ Evaluates laboratory PT results to determine compliance with rule requirements.
- ◆ Maintains the electronic files which contain applications, certificates, audit reports, PT results and correspondence for all laboratories.
- ◆ Participates actively in the development of a national laboratory standard.

Accomplishments

- ◆ Provided training and technical support to laboratories and the DWP on laboratory issues.
- ◆ Processed applications for certification and generated initial, renewal and replacement certificates for regulated laboratories.
- ◆ Tracked laboratory results of PT samples and removed certification for specific analytes when PT results demonstrated two consecutive failures.
- ◆ Maintained the computer database of certified laboratories, including a web posting of a certified laboratories list on the DWP web site.
- ◆ Maintained the central files which contain applications, certificates, audit reports and correspondence for all laboratories.
- ◆ Provided individual training sessions for labs seeking new laboratory certification.
- ◆ Created checklists to aid in onsite review of regulated laboratories.
- ◆ Maintained Standard Operating Procedures for Laboratory Certification.
- ◆ Hired an Assistant Laboratory Certification Officer, Christine Blais, to help provide support for the Program’s continued growth.

Goals

- ◆ To continue all ongoing operational details as mentioned above.
- ◆ To write the new rule to be submitted for approval in 2014.
- ◆ To update database for better integration of information and to provide better automation of the system.

Maine Drinking Water Program Alternative Funding Mechanism Five Year Budget Projection

Position / Expense Category	Actual	Actual	Actual	Actual	Actual	Actual	Actual	Actual	Estimate	Estimate	Estimate	Estimate	Estimate
	SFY2006	SFY2007	SFY2008	SFY2009	SFY2010	SFY2011	SFY2013	SFY2014	SFY2015	SFY2016	SFY2017	SFY2018	SFY2019
