Chair's Message

As public demand for online information and services continues to grow, it becomes more and more challenging for State and Local Governments to meet these demands. Established in 1999, InforME is the State of Maine's primary resource for providing user-friendly eGovernment services, a consistently award-winning Maine.gov website and a variety of enterprise solutions. With the mission of providing, enhancing, and promoting electronic access to public information and government services, InforME and Maine.gov have become an integral part of the state's delivery of services to the public.

The efficiencies that online services create for both citizens and government are vital in this time of continued economic recovery. InforME, Maine's eGovernment initiative has grown to offer more than 450 online services and has partnerships with nearly every state agency, over 200 municipalities, and the University of Maine System. The Maine.gov portal provides access to a depth of information from across Maine government. With over 300,000 pages of state government content, Maine.gov helps users find information, complete tasks, and stay informed. As broadband and mobile service access become more widely available throughout the state, Maine.gov usage will continue to grow. This success can be attributed in part to the high priority the State of Maine places on accessibility for all citizens and measures taken to ensure the security of online services.

In 2013 the portal received several national recognition awards including a 5th Place ranking in the Center for Digital Government's Best of the Web Awards. This recognition is a testament to Maine's commitment to eGovernment. Maine continues to be a leader through its easily accessible websites and services.

In the past year, InforME added and expanded several interactive online services on Maine.gov. New services included the Maine Open Checkbook Transparency Website, the Department of Public Safety Liquor Industry Portal, and the Bureau of Motor Vehicles Title Lien Release Service. In addition to new applications, InforME also expanded existing service offerings such as the MyMaine Connection Benefits

Portal, The Professional and Financial Regulation Licensing Service, and Maine PayPort. Several major website redesign projects were also completed including The Governor's Office, ConnectME Authority, the Department of Inland Fisheries and Wildlife, and the Department of Agriculture, Conservation, and Forestry.

Greg McNeal,
Chief Technology Officer

As we look forward to 2014, we expect to see increased mobile usage and even more new device types being introduced into the marketplace, which will require access to Maine.gov and its services. All of which make it imperative that InforME continue to develop new applications, websites and upgrade existing applications in the State of Maine responsive website and application design templates. Responsive design templates allow Maine.gov, agency websites and online services to render web pages and content dynamically based on the user's screen resolution.

Although the economy is on the rebound, government agencies are still facing state budget pressures and an increasing number of retirees, leaving unfilled positions and knowledge gaps across all levels of government. Therefore, it is increasingly important for agencies to identify electronic services to help bridge that gap and create internal efficiencies.

In the coming year, InforME will continue to be a valued partner for Maine Government. Through its vision and commitment the InforME Board will assist the portal in planning and prioritizing projects that will lead to continued growth of efficient online services and increased information access for the public. As the Chair of the InforME Board, I am pleased with the work that had been accomplished in 2013 and look forward to the exciting initiatives we will be undertaking in 2014. I would like to thank all of the people that contribute to eGovernment success including the InforME Board members, portal staff, participating government employees and especially online service users.

InforME: Access Anywhere

Maine.gov, developed by InforME, is a gateway to State of Maine information and resources including one-stop services, convenient notification options, and excellent customer service. Maine.gov does not simply rely on flashy aesthetics; its content, usability and support for its visitors are what make it a truly great website. InforME and its partners have consistently delivered high quality, innovative, online resources for the general public, and 2013 was no different.

Local Government Expansion: Every year InforME focuses on its municipal partners, marketing existing online services and developing new ways for communities to meet the needs of their citizens in an efficient and cost-effective manner. In 2013 municipal services continued to show strong growth; Rapid Renewal processed over 130,000 vehicle registration renewals and is available to citizens in 176 municipalities. 51 new towns joined Maine PayPort, which is now available in 126 municipalities.

InforME also launched Online Property Tax and Utility Payments, a convenient way for citizens to make their property tax and utility payments online.

Website Redesigns: All InforME redesigned sites are mobile friendly, using the Maine.gov responsive design template; this is important as the mobile usage base and mobile-device capabilities have greatly expanded and increased.

In 2013, ConnectME, Maine's Authority on facilitating universal broadband to all Mainers, launched a redesigned website (<http://www.maine.gov/connectme>) focused on informing communities and businesses about broadband services in their area. The website offers valuable resources including, a connection speed test, an availability and provider listing, and a grant application guide.

The Maine Department of Inland Fisheries and Wildlife (<http://www.maine.gov/IFW/>) also underwent major website changes, unveiling a sleek new homepage that displays quick links to many popular topics such as licenses, laws and rules, safety courses, hunting season dates, the Maine Fishing Guide and the Maine Wildlife Park.

Other website redesigns in 2013 include the University of Maine System, Department of Education's homepage, and the Department of Agriculture, Conservation and Forestry, and Governor's website.

State Government Transparency: With a renewed focus on public transparency, Maine Open Checkbook was launched, providing easy to understand information regarding state finances and government spending. Through the application, individuals are able to research the details of state expenditures, including vendor payments and employee compensation.

Industry and Business Improvements: In 2013 InforME launched a number of business and industry specific applications and services.

The Business Answers website was updated to include 104 different business types detailing the specific forms, licenses, permits and information required for completion before a business can begin to operate.

Motor Vehicle Title Lien Release is another new service in 2013, providing lending institutions with the ability to release their liens on motor vehicle title records. The service sends email notifications to users and stores previous transaction history offering the ability to search by title number, VIN, confirmation number, lien date or a selected date range.

The Bureau of Alcoholic Beverages and Lottery Operations unveiled a new Liquor Industry Portal. The portal allows for the addition of new labels, as well as the ability to manage existing labels and brands. A connection with a federal repository of label images eliminates the need for businesses to submit paper copies to complete their registration.

The My Maine Connection online service continued to grow in 2013 reaching record highs for the number of applications submitted and the number of pre-screenings and re-certifications completed. The rise in application numbers was due to increased marketing by the Department of Health and Human Services, as well as the introduction of kiosks at regional offices. In the Fall of 2013, the service was enhanced to make adjustments for the newly ratified Affordable Care Act.

Looking Forward 2014: 2014 will focus on multiple demographics, creating new applications that instill efficiencies while enhancing legacy services to meet the needs for both agency partners and citizens.

Strategic Plan Update

The InforME Board's Strategic Plan sets the key goals and direction for InforME, to ensure that InforME continues to achieve its vision for serving both government and the public.

The strategic planning process includes a retreat where InforME Board members and network management staff discuss key issues and opportunities. As a result of these discussions, the guiding principles for the next two years are developed and supporting functions are identified.

2013 – 2015 Strategic Plan Goals

1. Promote the benefits of Maine eGovernment services to both citizens and businesses.
2. Continue the long-term financial stability and viability of InforME.
3. Provide continued marketing and education to position InforME as the primary resource for online solutions for State and Local government.
4. Promote innovative collaborative solutions that maximize state and local government's efficiencies and responsiveness.

1) Promote the benefits of Maine eGovernment services to both citizens and businesses.

InforME has partnerships with many state and municipal agencies that bring convenience and efficiencies to citizens, businesses and government. In order to have the most significant impact, citizens and businesses must be made aware of the benefits and diversity of Maine.gov online services.

New citizen services in 2013 include Maine Open Checkbook, which provides easy to understand information regarding state finances and government spending; and, property and utility payments which allows citizens in

participating municipalities to make utility and property tax payments online. New business services in 2013 include a liquor label reporting portal, which offers the ability for suppliers to register labels for wines and malt beverages that they intend to distribute within the State of Maine; and, the motor vehicle title lien release service, which allows lending institutions to release the liens they hold on Maine motor vehicle titles.

InforME has also completed several significant enhancements or upgrades in 2013 including to Campground Reservations, Business Answers Licensing Assistant, Maine Sex Offender Registry, and Professional Licensing expanding the service to licensees overseen by the Maine Board of Osteopathic Licensure.

In 2013, InforME completed several large website redesign projects including the Department of Inland Fisheries and Wildlife and the Department of Agriculture, Conservation and Forestry.

Participation by municipalities has increased to 176 for Rapid Renewal and 126 for PayPort. Several service enhancements were completed recently which allow greater efficiencies for town offices that participate in InforME services including a TRIO integration which allows for automatic payment tracking. Additional development is scheduled in 2014 which will remove more manual processes from InforME services for municipal participants.

Creating new eGovernment services online is an obvious step; however, the gains for both the user and the state are recognized only through service adoption. In order to ensure this, users must be made aware of the services and given appropriate incentive to use them. In 2013, several marketing initiatives were put in place to promote the benefits of Maine's eGovernment services including Rapid Renewal reminder cards and social media posts on the Maine.gov feed about recent service launches, enhancements, and service

"The Internet has become a primary source of news and communication for many individuals with access. The number of people who look to the Web for resources and information will continue to expand in the future. Maine citizens can be proud that their state Web site is consistently recognized as one of the best."

Governor LePage

Strategic Plan Update

deadlines. Additionally, InforME developed a comprehensive marketing plan for 2013 with strategies for marketing the Maine.gov brand to the public, strategies for marketing individual online services to user groups, and strategies for marketing InforME as a resource to state and municipal entities. The result of these marketing efforts is proven as adoption rates for online services continue to grow.

2) Continue the long-term financial stability and viability of InforME.

Public demand for eGovernment continues to grow along with an increased awareness of InforME. InforME remains a unique, cost-effective service provider to assist agencies in doing more with less, and there is a high demand for InforME services. Defined in statute as a self-funded entity, InforME provides a variety of flexible funding options. A transaction-fee based funding option continues to be the primary funding model for InforME. InforME is exploring new ways to make the transaction-fee model more affordable to agencies including implementing a tiered structure, whereby agencies will pay less per transaction as service adoption rates increase.

In addition, InforME has a streamlined process for contracting on services being funded through the time and materials option. These funding options allow InforME to meet a broad set of agency needs for eGovernment services including web application development, website design, mobile services, maintenance and other services.

While the development of new online services is an obvious step, long-term sustainability also requires increasing the usage of existing services and managing the maintenance of legacy applications. In order to ensure a high level of service adoption, public users need to be aware of the services. To that end, InforME has developed a comprehensive marketing plan targeting key applications with room to grow, such as the Rapid Renewal service and the professional licensing service.

3) Provide continued marketing and education to position InforME as the primary resource for online solutions for State and Local government.

InforME continues to place a high priority on the success of the Maine.gov portal as a critical element of Maine's eGovernment initiative. Each year, Maine.gov serves more public, government, and municipal users as the demand for online government services grows.

InforME regularly evaluates and enhances the portal to remain innovative, to meet the needs of the user community and to market other eGovernment services offered by InforME. Several significant enhancements were completed this year including the redesign of the Department of Inland Fisheries and Wildlife and the Department of Agriculture, Conservation and Forestry websites into the Maine.gov responsive design template, a new government transparency website which allows the public to track government spending, and an expansion of local government services such as PayPort and online property tax and utility payments.

Maine.gov received national recognition in 2013 for innovation, design, service delivery and cost-efficiency. The recognition includes a Best of Web award from the Center for Digital Government, ranking fifth in the nation.

In addition to maintaining a high-quality portal, InforME has continued its focus on serving Maine agencies and municipalities, providing our eGovernment expertise for planning and program implementation. InforME facilitates eGovernment for Maine government entities through cost-effective service development, customer support, webmaster support, enterprise software and participation in state initiatives and policy development.

4) Promote innovative collaborative solutions that maximize State and Local government's efficiencies and responsiveness.

InforME has been in operation for fourteen years. Over that time, the landscape of eGovernment has changed dramatically; eGovernment is a collaborative and innovative process involving participation from InforME, government representatives, increasingly connected citizens and other state governments.

With over 450 online services, InforME has a history of developing innovative and collaborative solutions. Over the next two years, InforME is conducting an analysis of its services to determine any enhancements, marketing efforts, or features that need to be completed in order to increase service efficiency and responsiveness. This will be based upon several factors including the findings from the 2013 InforME user needs analysis, service adoption and user feedback.

In addition to learning more about the demographics of the user community and how existing services can be modified or marketed to better meet their needs, InforME

continues to find collaborative and innovative solutions by reaching out to other state's eGovernment representatives. This allows Maine government a unique opportunity to find what works best for others and for InforME to deliver solutions quickly and efficiently. In 2013, InforME worked with the State of Utah to provide an online government spending tracking service and launched the product of that collaboration, Maine Open Checkbook, in record time. Over the next two years, InforME will continue to work closely

with other states to realize the benefits of their eGovernment initiatives here in Maine.

The InforME Strategic Plan presents important goals for InforME to achieve over the next two years. With the strategies outlined by the Board, InforME has a clear direction on how to meet and attain these goals while continuing the legacy of delivering effective and focused eGovernment solutions.

“Maine has embraced innovation, by being one of the first states to institute a responsive design template for the website. We are also committed to being accessible; Maine’s standards-compliant coding ensures that the site works well across the broadest possible range of browsers and versions.”

Awards 2013

Maine.gov awarded Fifth Place in Annual Best of Web Competition

The Center for Digital Government has named Maine.gov one of top five best state government sites in the nation. Maine.gov was awarded fifth place in the 2013 Best of the Web national competition for state government Web portals. The competition evaluates portals on the basis of online services, innovative technology, efficiency, and attention to ease-of-use, accessibility to the disabled, privacy and security.

Maine.gov awarded Silver Communicator Award of Distinction for Government Websites

The International Academy of Visual Arts has named Maine.gov one of the best government websites. Maine.gov was awarded a Silver Communicator Award in the 19th annual competition for government websites. The award honors excellence in marketing and communications.

Maine.gov awarded Government Standard of Excellence Award

The Web Marketing Association awarded Maine.gov a Government Standard of Excellence Award in its 17th annual WebAwards competition. This international competition judges entries on design, innovation, content, technology, interactivity, copywriting, and ease of use.

Maine.gov awarded a Summit Creative Bronze Award

Summit International awarded Maine.gov a Summit Creative Bronze award in its 19th annual award competition. This international competition, which received more than 5,000 submissions from 25 countries, recognizes and celebrates the creative achievements for websites, print and broadcast, and social media.

Maine.gov Portal received a Silver Davey Award

With nearly 4,000 entries from across the US and around the world, the Davey Awards honors the finest creative work from the best small firms, agencies and companies worldwide. The Davey Awards is judged and overseen by the International Academy of the Visual Arts (IAVA), a 600+ member organization of leading professionals from various disciplines of the visual arts dedicated to embracing progress and the evolving nature of traditional and interactive media.

Current and Future eGovernment Services

New Services and Updates

The following interactive applications were developed or rewritten in 2013. These applications allow users to complete State or Local Government business, including making electronic payments when applicable.

Liquor Industry Portal: Offers the ability for suppliers to register labels for wines and malt beverages that they intend to distribute within the State of Maine. Various Fees. *February 2013.*

Maine State Sex Offender Registry: Provides additional information, as well as map plotting the offender's addresses and a subscription feature so users can be notified if an offender moves into a certain geographic area. No fee. *February 2013.*

Maine Open Checkbook: Provides Maine citizens with access to information regarding state finances and government spending. No fee. *February 2013.*

Maine Motor Vehicle Title Lien Release: Allows lending institutions to release the liens they hold on Maine motor vehicle titles. No Fee. *March 2013.*

Osteopathic Board of Licensure Online Licensing: Allows users overseen by the Osteopathic Board of Licensure to complete their professional licensing transactions online. Various Fees. *April 2013.*

Fire Marshal's Office License Renewal: The online license renewal service was updated to streamline the license renewal process and modify the pricing structure of license renewals. Various Fees. *May 2013.*

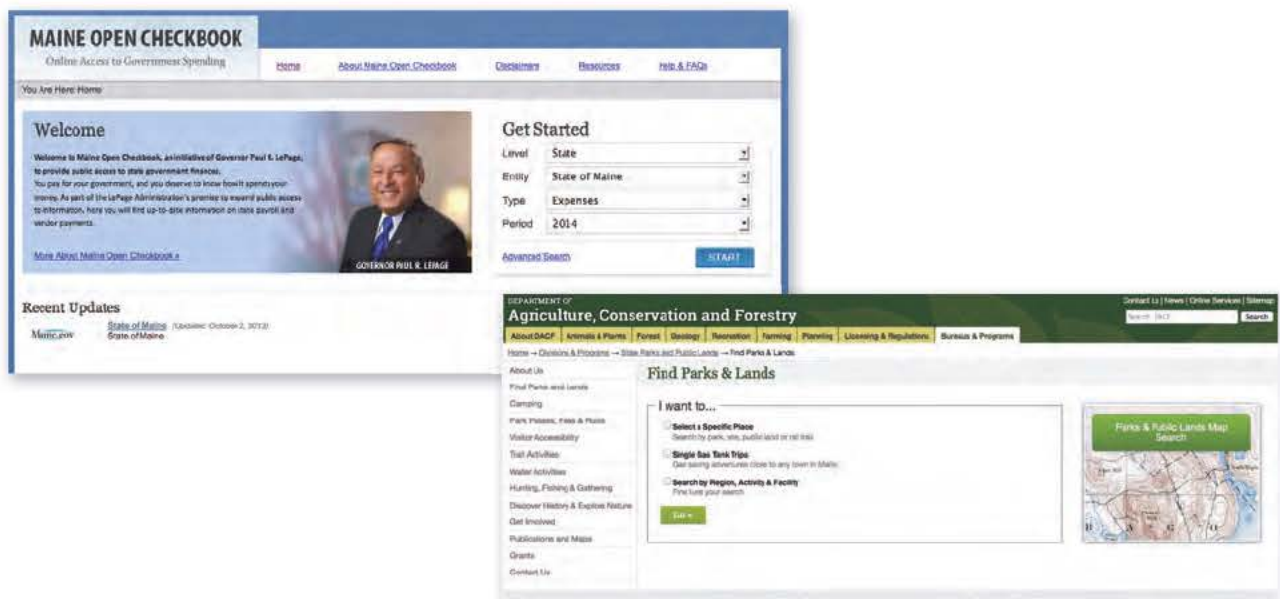

Business One Stop Licensing Assistant: Provides users a decision tree and information on starting one of 104 different business types in Maine. Users have the ability to save the information provided in an account for future use. No Fee. *July 2013.*

Municipal Property and Utility Tax Payments: Allows citizens in participating municipalities to make their property and utility tax payments online. Various Fees. *August 2013.*

UCC Search and Filing: Allows users to file a UCC-1, UCC-3, or UCC-5 filing online as well as search for UCC liens against debtors held with the Maine Secretary of State's Filing Office. The original service launched in 2002 and was completely rewritten in 2013. Various Fees. *October 2013.*

Parks and Lands Search: Enhanced in 2013, the search provides users details about Maine parks, public lands and historic sites. No Fee. *November 2013.*

My Maine Connection: Enhanced in 2013 to make adjustments for the Affordable Care Act. No Fee. *October 2013, December 2013.*

Online Transit Plates	Secretary of State, Bureau of Motor Vehicles
Trapping and Guide License Renewal	Department of Inland Fisheries and Wildlife

Maine Liquor Label Reporting Portal

“The original paper process for submitting label information was becoming cumbersome and time consuming for both the industry and our department staff. Allowing the industry to submit their product information through an online application was the perfect solution to a growing problem.”

Lt. Scott Ireland
Maine State Police

Business One Stop Licensing Assistant

“Imagine only having to provide information once, and that information is then used to fill out a variety of forms and applications needed to satisfy the state requirements. And imagine only having to make one payment for a number of different permits and licenses. That is where ‘Business Answers’ is going. We have just begun.”

George Gervais
Department of Economic and Community Development Commissioner
