Chair's Message

Paul Sandlin,
Associate Chief Information Officer

With over 53,000,000 page-views each year, the visibility and significance of Maine.gov and its services continues to grow. As the State's eGovernment portal provider, InforME not only builds upon established services and websites, but also looks ahead to develop new and innovative applications. As chair of the InforME Board, I want to thank all agency and local government partners for helping the State expand its web presence in 2016, proving that Maine remains focused on delivering high quality services and information to the public.

Over the past year InforME launched several new online services and websites, expanding the availability of the State's online resources for both citizens and businesses. These additions included a completely redesigned website for the Bureau of Veterans' Services. The site now offers a centralized location for veterans and their family members to receive information about resources and services available to them and provides a number of unique features to make interaction with the Bureau easy and efficient.

Other notable launches include the Board of Licensure in Medicine's Training and Jurisprudence Exam, Municipal Parking Ticket Payments, and a General Assistance Tracking and Reporting portal for municipalities.

Additionally, a number of existing services were reviewed and enhanced in 2016. The Department of Inland Fisheries and Wildlife had several services updated and re-launched. Hunting and Fishing Licenses and Boat Registration both added new features to improve the convenience and efficiencies of the services for consumers and agency staff.

InforME worked with the Bureau of Motor Vehicles to enhance its driver license and I.D renewal application allowing citizens to change their address online. Thousands of these address changes are completed each year and the creation of this functionality will benefit all parties, offer-

ing a new utility to the user that simplifies compliance with State law.

In addition to those updates, several other applications underwent enhancements as well; Online Vehicle Registration Renewal, Professional Licensing, Corrections Money Deposit, Qualifying Contributions for Clean Elections, My Maine Connection, and Attorney Registration were updated based upon analysis gathered from user and agency feedback.

The Maine.gov website as a whole received several updates as well, including the deployment of a new search engine and a redesign of the help center. The legacy search engine, provided by Google, was retired in June and replaced with a more robust search platform using Bing. The new search is more efficient, and provides better results for users as it removes previous page indexing limitations. The help center was enhanced to group common questions and answers by specific subject improving the pages' navigation for visitors.

The InforME Board, through its vision and oversight, will continue to focus on improving the way citizens and businesses interact with government by helping introduce valuable services and tools. Having a strong state web presence truly benefits everyone. The public benefits by having access to government services when it fits into their schedule and the State benefits from an increase in constituent communication and satisfaction as well as the efficiencies created via online government. As we move forward I know that Maine's eGovernment initiative has an exciting future ahead of it.

Strategic Plan Update

After seventeen years as the State's eGovernment portal, InforME has reached a new stage of maturity with more than 175 unique online services, a consistently award-winning Maine.gov website and a variety of enterprise solutions. This maturity, along with changes to the landscape of the Internet, presents both challenges and opportunities. New strategies need to be developed in order to ensure that InforME continues to achieve its vision for serving both state government and the public.

During the bi-annual strategic planning retreat in 2015, InforME Board members, portal staff and OIT/eGovernment Services staff discussed the key issues facing InforME over the next two years.

The group agreed that over the next two years, InforME should find ways to:

- Strengthen the message of InforME's benefits to state agencies and the public;
- Identify barriers to online service usage;
- Evaluate existing pricing models, service costs and revise accordingly to remain viable and self-sustaining;
- Improve feedback collection methods from agencies and the public;
- Create case studies of eGovernment success stories and present those to government leaders;
- Utilize data to help government become transparent and to drive decision-making;
- Determine the long-term technical infrastructure for the portal; and,
- Manage complex security concerns.

The following five goals provide the basis for InforME's two year Strategic Plan. InforME staff and the Board must work together to:

1. Promote the benefits of Maine eGovernment services to both citizens and businesses.

2. Continue the long-term financial stability and viability of InforME.
3. Provide continued marketing and education to position InforME as the primary resource for online solutions for State and Local government.
4. Promote innovative collaborative solutions that maximize State and Local government efficiencies and responsiveness.
5. Position InforME to proactively respond to the ever-changing landscape of Internet security threats.

The completion of these goals will further position InforME as Maine's premiere eGovernment services provider.

"The website is designed to meet the needs of our state's nearly 130,000 veterans, as well as our Guard and Reserve members, spouses, children, caregivers, and community advocates. The site has many features that have never before existed in Maine and some that can't be found anywhere else in the country."

Governor Paul R. LePage
Regarding the Bureau of
Veterans' Services Website

Current and Future eGovernment Services

Current Fee Services

Interactive applications with full online transactions of agency business that have launched since the portal began.

"This service creates efficiencies for our agency, the participating municipality, and the customer. We want to make this service as accessible as we can, and now that we are seeing more than 50% of web traffic coming from a mobile device or tablet, this was necessary to help us accomplish that goal."
