LD  
1580

AN ACT TO IMPROVE THE EFFECTIVENESS OF EXISTING  
STATE LAND USE LAWS AND TO PROMOTE CONSISTENCY  
AMONG THEM.

ONTP

Sponsor: COLLINS, Anderson, Hanley  
Committee Report: ONTP

SUMMARY: This bill was proposed by the Governor for the purpose of consolidating four existing land use laws, the Great Ponds Program, Alteration of Coastal Wetlands, Alteration of Rivers, Streams and Brooks, and the Freshwater Wetlands Act. The intent of consolidating these statutes was to provide a single source of regulation and a single set of standards for state permitting in natural resource areas important to the state. The first four sections of the bill repeal the current statutes; section five enacts 38 MRSA c. 22, Natural Resource Protection. Achieving consistency among statutes resulted in some changes in definitions and standards from current statutes. Other provisions deal with cumulative impacts, delegation to municipalities of permit-granting authority, the elimination of exemptions for agricultural and forestry activities in freshwater wetlands, and the adoption of performance and use standards by the BEP. The State Planning Office proposed an amendment to the bill that added a findings and purpose section and some technical corrections.
