SUMMARY

The bill originally sought to make two adjustments for the Certificate of Need Development Account. The first adjustment, \$2,800,000, would be made in the 3rd payment year for those major projects approvable but deferred as of October 1, 1987. The 2nd adjustment, \$7,200,000, made in the 4th payment year would be a temporary one-time adjustment to the Account.

The bill as finally enacted provided a temporary adjustment to the 4th payment year of \$7,800,000. It also required the Department of Human Services to contract with a northern Maine hospital to conduct a hospital-based psychiatric demonstration project. Other amendments, which were not enacted, sought 2 dialysis machines for a mid-coast hospital.

An alternate proposal would have established a procedure for the Department of Human Services to recommend an interim adjustment to the amount debited to the Hospital Development Account to allow projects of urgent need or compelling benefit to be approved without waiting for a later review cycle. It was also rejected.

SUMMARY

The original resolve sought to establish the Commission to Study the Status of the Nursing and Health Care Professions in Maine, with particular emphasis on the current staffing crisis. The commission will be charged with identifying the conditions and practices which contribute to the shortage of health care professionals and assess its impact on the quality of health care delivery in urban, suburban and rural areas of Maine. The commission will submit its report to the First Regular Session of the 114th Legislature, along with recommendations to enhance Maine's ability to recruit, attract and reintegrate nursing and health professions to the industry.

The Committee Amendment (S-454) refocused the study solely on nursing professions and amended other technical details of the mechanics of the study. The Senate Amendment (S-534) changed the reporting requirements and reduced the appropriation for fiscal year 1988-89.
