SUMMARY

New Draft Of LD 2199

The original bill directs the Department of Agriculture, Food and Rural Resources to apply for a registered certification trademark, including a seal and associated words, for agricultural products produced in the State that meet state quality standards. This bill also authorizes \$196,700 in funds for administration and promotion of the use of this state trademark.

This new draft eliminates sardines from the program; eliminates the 90% Maine product requirement and allows the Commissioner to determine the minimum for each commodity group, requires the Commissioner to grant a waiver from the minimum when emergency market conditions dictate; adds a provision that the Commissioner shall contract for the promotion of the trademark; and takes some money from the promotion appropriation and adds it to the capital expenditures appropriation to fund activities and other travel expenses for the produce inspectors.

SUMMARY

This bill would establish a permit program under which commercial dairy farms selling milk to milk dealers are required to have a permit issued by the Department Agriculture, Food and Rural Resources.

Three purposes are served by the establishment of such a program. First, if a particular farm does not meet sanitation or other regulatory standards, a permit program allows regulatory action to be taken with respect to that farm. Second, farmers will be protected from arbitrary actions by their dealers, as well as by regulators thru the permits. Third it should help in the achievement of the department's and industry's long-sought goal of interstate reciprocity in farm inspections and in other requirements related to interstate milk shipment and handling.
