AMENDMENTS ADOPTED

SUMMARY

LD 42 proposed to bring closer coordination and cooperation between Maine's public and private higher educational institutions and state agencies with respect to economic development and international trade.

To achieve this purpose, the bill placed responsibility with the Chancellor of the University of Maine System to develop and oversee a central information and response system. This system would serve as a central clearinghouse of information with respect to the expertise and resources of Maine's public and private higher educational institutions available in the area of economic development which includes product and technology development and international trade.

LD 42 also provided that a directory be published to serve as a guide to the expertise and resources of these institutions. In addition, ongoing research in the field of economic development will also be included in the directory.

In order to enable public and private higher educational institutions to work more closely with state agencies in the field of economic development which includes international trade, the bill authorizes these institutions to undertake analyses and studies of economic development issues pertinent to the State.
