AMENDMENTS ADOPTED

SUMMARY

This bill would make uniform throughout Maine's system of long-term care procedures for assessing the needs of individual clients and tailoring programs to meet their needs. It would also provide the individualized treatment planning process with a set of articulated standards which ensure to each person in the system the least restrictive alternative for long term care and maximum feasible restoration of functional capacity. Finally, the bill addresses the need of Maine's long-term care system to have available to it data which identifies the needed services which are currently unavailable to long-term care clients.

The issues identified in this bill were included among the issues to be addressed by the study proposed in LD 747.
