**SUMMARY**

This bill would have required consumers of newsprint to use paper that has a specified percentage of post-consumer recycled content. This requirement would have been phased in over time. The objective of the bill was to create a demand for recycled newsprint in order to assure a long-term market for municipal newspaper recycling programs. The bill included several waiver mechanisms to lessen negative economic impacts on newsprint consumers.

**SUMMARY**

This bill would have required the Maine Bureau of Forestry to establish a certification process to ensure that wood chips used by small power producers and cogenerators to produce electric power are composed of at least 50% mill wastewood. The bill would have also required a lower rate to be paid by electric utilities for power produced from non-certified wood chips.

**SUMMARY**

This resolve establishes the Commission on Maine Lakes to examine current and future threats to Maine lakes.

The committee amendment (S-503) removes enforcement issues and boating laws from the charge of the commission and consequently removes participation from representatives of the Joint Standing Committee on Fisheries and Wildlife. It also adds 3 public members to be appointed by the Governor. The use of lakes for public water supplies is added to the issues to be addressed by the commission.

The Senate amendment (S-727) funds the Commission on Maine Lakes through a deallocation from the Lake Environmental Protection Fund.
