Administrative Procedures Act are not relevant to LURC zoning requirements. The bill amends the provisions of the Commission's statute relating to zoning to streamline the administration of the 25 to 30 zoning petitions received by the Commission each year.

The bill also modifies the current provision that specifies a 60-day deadline for processing subdivision applications. The 60-day deadline is retained while clarifying that the deadline applies to applications completed and ready for processing and applications for subdivisions where the proposal is located in a zone in which subdivisions are a permitted use. Most proposals for subdivisions currently require an area to be rezoned as a development district and a subdivision cannot be approved until that zone change has been approved. This provision allows the Commission to handle the zoning petitions and subdivisions in a coordinated manner, without having to decide a subdivision application prematurely to meet the statutory deadline.

The committee amendment (H-990) incorporates changes to the section of law amended in this bill made this session in other legislation (PL 1989, ch. 624).
