SUMMARY

This bill would have repealed the schedule of increases in the allowable minimum lobster size in effect on January 1, 1990 and enacted a minimum lobster size of 3 3/16 inches. The bill provided for a schedule of annual lobster minimum size increases to become effective if the Attorney General certified by January 1, 1992 that the Canadian and United States governments had implemented minimum lobster size standards that were at least as restrictive as those set forth in this bill. If the Attorney General certified that this action had occurred, the minimum lobster size would have increased by 1/32 of an inch each year for 4 years beginning on January 1, 1992.

SUMMARY

The original bill was the unanimous report of the Subcommittee to Study Salmon Aquaculture in Maine of the Joint Standing Committee on Marine Resources authorized under Joint Rule 19. The bill, as amended, implements the statutory recommendations of the study subcommittee.

The bill, as amended by committee amendment "A" (H-373), requires aquaculture leases for all finfish and suspension aquaculture and coordinates the leasing programs of the Department of Marine Resources and the Bureau of Public Lands.

The amended bill also prohibits the importation of live salmon or salmon eggs (exclusive of rainbow trout) from Icelandic and European waters and from any area west of the north american continental divide. Aquaculturalists with these stocks already in the State are given until 1995 to use their existing stocks.

The amended bill authorizes a permit-by-rule program within the Department of Marine Resources to reduce
