unnecessary regulatory overhead on very small finfish aquaculture operations so long as all existing environmental standards are met. The amended bill also provides an exemption from the minimum size provisions of Atlantic salmon laws for salmon aquaculturalists. The amended bill also establishes a public notice requirement for the use of antibiotics at aquaculture lease sites.

The bill establishes an environmental data collection program coordinated by the Department of Marine Resources. One additional staff person is provided for the aquaculture siting and monitoring program within the Department of Marine Resources and provides funds for environmental research and monitoring related to salmon aquaculture. Funding is provided by a one penny per pound production fee levied on whole fish aquaculture production.
