ONE HUNDRED AND FIFTEENTH LEGISLATURE FIRST REGULAR SESSION AND FIRST SPECIAL SESSION

JOINT STANDING COMMITTEE BILL SUMMARIES

AUGUST 1991

This document is a compilation of the bill summaries prepared by this office for the Joint Standing Committees and Joint Select Committees of the Maine Legislature. The volume is organized alphabetically by committee; within each committee, the summaries are arranged by LD number. A subject index is provided at the beginning of each committee's summaries.

All adopted amendments are listed, by paper number (e.g., H - 584 or S - 222), together with the sponsor for floor amendments. Final action on each bill is listed to the right of the title. Various types of final action are abbreviated as follows:

PUBLIC XXX Chapter # of enacted Public Law P&S XXX Chapter # of enacted Private & Special Law RESOLVE XXX Chapter # of enacted Resolve CON RES XXX Chapter # of Constitutional Resolution passed by both Houses **EMERGENCY** Enacted law takes effect sooner than 90 days CARRIED OVER Bill carried over to 2nd Session FAILED EMERGENCY ENACTMENT Bill failed to get 2/3 vote **ONTP** Ought Not to Pass report accepted **LVWD** Leave to Withdraw report accepted INDEF PP Bill Indefinitely Postponed **DIED BETWEEN BODIES** House & Senate disagree; bill died Legislature failed to override Governor's Veto **VETO SUSTAINED** Not signed by Governor within 10 days UNSIGNED DIED ON ADJOURNMENT Action incomplete when 1st session ended

These summaries were prepared by the analyst or analysts assigned to the committee. But, this document was produced by the efforts of all the office staff, including secretaries: Charlene Raymond and Valarie Parlin, and especially Laurette Knox who coordinated preparation of the overall document.

If you have any suggestions or comments on these summaries, please let us know.

their use in aquaculture operations. In addition, written public notice was to be required before antibiotics were applied in aquaculture operations. The bill also proposed to prohibit the importation or introduction of any species exotic to the Gulf of Maine. Similar notice and import provisions were included in LD 76.

This bill would also have required additional information in aquaculture lease applications to be provided to the Department of Marine Resources and would have required the Commissioner of Marine Resources to distribute copies of the lease application to relevant state and federal agencies as well as fishing industry groups prior to the public hearing of any lease application.

This bill also proposed to establish 3 classes of aquaculture production and to require the Department of Environmental Protection to establish rules for site characterization, baseline surveys and annual monitoring of net-pen aquaculture sites for water quality certification.

This bill would also have established information obtained by the permitting agencies as public records, except for information that is proprietary in nature.

SUMMARY

This bill gives the Department of Marine Resources authority to survey coastal areas to identify sources of pollution. Training in sampling techniques is mandated for shellfish conservation wardens. The department may direct the wardens to assist in the detection of pollution. The Department of Environmental Protection is directed to establish an interdepartmental task force to coordinate the continuing activities of the Marine Environmental Monitoring Program.

Committee amendment "A" (H—162) makes the bill an emergency and clarifies the limited authority granted to the Commissioner of Marine Resources in the original bill to enter private property to carry out the statutory responsibility of the Department of Marine Resources to inspect coastal waters and intertidal zones for pollution sources. The amendment permits the commissioner to inspect privately owned land at reasonable times with the owner's permission and to enter and inspect privately owned buildings only with the owner's permission and only in the presence of the owner. If permission to inspect land is denied, the commissioner is authorized to seek a search warrant to inspect the land for pollution sources. The commissioner is prohibited from requesting a warrant to search any privately owned building for sources of pollution.

The amendment adds a new section to the bill that permits a person to deposit oyster shell cultch in coastal rivers, harbors and intertidal zones solely to promote the growth of oysters and only with the written permission of the Commissioner of Marine Resources.

The amendment also clarifies in section 2 of the bill that the commissioner is not required to conduct pollutant or contamination testing on samples that were not requested by the commissioner.

House Amendment "A" (H-263) makes technical clarifications to the committee amendment.
