**COMMITTEE REPORT**

**AMENDMENTS ADOPTED**

**SUMMARY**

This bill proposes to amend the ground water protection laws to conform with the Maine ground water management strategy, to implement the Maine Wellhead Protection Program as required by the 1986 Amendments to the federal Safe Drinking Water Act and to modify the current ground water classification system.

The Maine Wellhead Protection Program would delineate recharge areas of public water system wellheads, identify potential threats to ground water within the delineated areas, create local management programs for those potential threats and develop contingency plans for emergencies and for future needs. The ground water classification system would classify public and significant private community ground water supplies and provide for appropriate protection.
