AMENDMENTS ADOPTED

H-391

SUMMARY

This bill expanded markets for recycled materials by expanding government procurement of recycled and composted materials. The original bill would have created a purchase preference by the State for paper or paper products with recycled content that have not been bleached with chlorine. It would also, in the event of a tie bid, have established a system for awarding bids to the material containing the highest post-consumer content and the product that has not been bleached.

Committee Amendment (H-391) deleted the purchase preference by the State for paper or paper products with recycled content that have not been bleached with chlorine. It also deleted the provision that would, in the event of a tie bid, award the bid to the material containing the highest post-consumer content and the product that has not been bleached. The amendment added a fiscal note indicating that all costs associated with the bill can be absorbed within existing resources of the Department of Administration and other state agencies. The amendment also:

1. Extended the requirement to use composted materials to all state agencies;
2. Included the use in land maintenance activities of composted and recycled organic materials and reclaimed soil and residuals; and
3. Extended the requirement that those materials be used in all construction activities paid for by public funds and all land maintenance and construction activities that are awarded through grant-in-aid programs to municipalities.
