COMMITTEE REPORT
OTP-AM

AMENDMENTS ADOPTED
H-518

SUMMARY

This bill proposed to amend the State's recycling laws to include industrial boiler combustion of waste paper as contributing to meeting municipal waste recycling goals if the waste would otherwise be landfilled and if the solid waste is incinerated as a substitute for traditional fuels such as oil, gas or biomass, which are ordinarily the primary fuels combusted in the boiler. This bill also proposed to permit the incineration of office paper and corrugated cardboard under the same circumstances. This bill also would have amended the definitions in the solid waste laws to provide that combustion in industrial boilers of solid waste generated on site for the generation of heat, steam or electricity constitutes recycling and reduction of that waste.

Committee amendment "A" (H-518) exempts industrial boilers that burn waste paper from the definition of a solid waste facility. The owners of industrial boilers that burn waste paper under the provisions of this amendment are required to report annually to the Department of Environmental Protection on the amount of waste paper burned and the amount of waste paper recycled by the facility. The exemption from the definition of a solid waste facility is repealed on July 1, 1993. This amendment also adds a fiscal note to the bill.
