LD 766 **An Act to Allow the Submetering of Electric Rates in Campgrounds** PUBLIC 129

SPONSOR(S) **COMMITTEE REPORT** **AMENDMENTS ADOPTED**
TAYLOR OTP-AM H-160

SUMMARY

This bill permits the submetering of electric service to campgrounds under specified conditions. It proposed to require the Public Utilities Commission to adopt rules related to campground submetering.

COMMITTEE AMENDMENT "A" (H-160) preserves the intent of the original bill but clarifies certain provisions. Under this amendment, a campground owner or operator may submeter electric service to sites in the campground provided that no submeter user is provided service on a long-term basis of more than 6 months. The campground owner or operator may not charge more for electric service than the campground is charged by the utility. This amendment also clarifies that submetering at campgrounds does not constitute resale of electricity.

This amendment removes the provision of the bill that would have required the Public Utilities Commission to oversee disputes arising from use of submeters.

SUMMARY

This bill proposes to establish a new state policy to promote public access to new telecommunications technologies and information networks. This bill proposes to require the Public Utilities Commission to develop library access plans to promote affordable public access to advanced telecommunications technologies and networks. The commission would be required to consider a variety of options, including:

1. Reduced telephone rates for qualified public libraries;
2. Reduced service and equipment charges for installation of telephone lines and other equipment installed by a telephone utility for qualified public libraries;
3. Option plans which allow qualified public libraries to purchase blocks of time or to enter into other payment arrangements with a telephone utility; and
