SUMMARY

This bill implements some of the recommendations of the Public Health Resource Group's study of medical malpractice liability. The aim of the bill is to provide stronger regulatory oversight of those companies providing greater than 10% of the medical malpractice insurance in Maine. The bill rejects the "file and use" rating system allowed for most insurance products and institutes a mandatory hearing process for rate filings in this area. It also directs the Superintendent of Insurance to consider the cost-efficiency and investment income of those insurance companies in determining maximum rates. The superintendent is also required to develop an investment income model, the projections of which must be substantially met by the insurance company before a filing may be approved. Finally, the superintendent is directed to develop and conduct a study of closed claims in this area so that a sufficient data base of information will be available for future review of insurance costs and investment and reserving practices.

COMMITTEE AMENDMENT "A" (S-186) is the minority report of the committee and replaces the original bill. The amendment directs the Superintendent of Insurance to develop and conduct a study of closed claims for medical malpractice in the State. The amendment also adds an allocation section and a fiscal note. Committee Amendment "A" was not adopted.
