ONE HUNDRED EIGHTEENTH LEGISLATURE
FIRST REGULAR AND FIRST SPECIAL SESSIONS

Summary Of Legislation Before The Joint Standing Committees
August 1997

We are pleased to provide this summary of bills that were considered by the 15 Joint Standing Committees of the Maine Legislature staffed by this office. The document is a compilation of bill summaries which describe each bill, committee amendments and other relevant amendments, as well as the final action taken on the bill. Also included are statistical summaries of bill activity this Session for the Legislature and each of its joint standing committees.

The document is organized for convenient reference to information on bills handled by the joint standing committees. It is organized alphabetically by committees and within committees by bill (LD) number. The committee report(s), prime sponsor for each bill and the lead co-sponsor(s), if designated, are listed below each bill title. All adopted amendments are listed by paper number. Two indices, a subject index and a numerical index by LD number are provided for easy reference to bills. They are located at the back of the document. A separate publication, History and Final Disposition of Legislative Documents, may also be helpful in providing information on the disposition of bills. These bill summaries also are available at the Law and Legislative Reference Library and on the Internet (www.state.me.us/legis/opla).

OTP-AMAmendments Adopted
S-214

Current law provides that public works departments may engage in construction without using a registered professional engineer as long as the contemplated cost for the project does not exceed \$5,000. LD 813 proposed to change the law to permit public works departments, without using a registered professional engineer, to engage in maintenance, construction and repair of roads and sidewalks and other routine construction whose costs do not exceed a value of 100 times the State's average weekly wage.

Committee Amendment "A" (S-214) proposed to replace the bill. Current law provides that state or local public works departments may undertake public works projects without engaging the services of a registered professional engineer as long as the contemplated cost for the project does not exceed \$5,000. The amendment proposed to change the law to permit public works departments to undertake projects without engaging the services of a registered professional engineer, provided the contemplated cost for the project does not exceed \$100,000 and the work does not create an undue risk to public safety or welfare, or a State agency does not require the services of a registered professional engineer to meet any provision of law or rule.

Enacted law summary

Public Law 1997, chapter 304 permits public works departments to undertake projects without engaging the services of a registered professional engineer, provided the contemplated cost for the project does not exceed
