Summary Of Legislation Before The Joint Standing Committees
May 1998

We are pleased to provide this summary of bills that were considered by the Joint Standing Committees of the Maine Legislature. The document is a compilation of bill summaries which describe each bill and relevant amendments, as well as the final action taken. Also included are statistical summaries of bill activity this Session for the Legislature and each of its joint standing committees.

The document is organized for convenient reference to information on bills handled by the joint standing committees. It is organized by committees and within committees by bill (LD) number. The committee report(s), prime sponsor for each bill and the lead co-sponsor(s), if designated, are listed below each bill title. All adopted amendments are listed by paper number. Two indices, a subject index and a numerical index by LD number are provided for easy reference to bills. They are located at the back of the document. A separate publication, History and Final Disposition of Legislative Documents, may also be helpful in providing information on the disposition of bills. These bill summaries also are available at the Law and Legislative Reference Library and on the Internet (www.state.me.us/legis/opla).

LD 1935**An Act Regarding Electric Utilities****PUBLIC 710**Sponsor(s)
KONTOSCommittee Report
OTP-AMAmendments Adopted
H-984

LD 1935 proposed to provide express authorization for investor-owned electric utilities to transfer, in accordance with the divestiture requirements of the electric industry restructuring law, good title to generation assets acquired pursuant to state law.

Committee Amendment "A" (H-984) proposed to replace the bill. This amendment proposed to create a definition of "excluded electric plant" which in turn would result in a change in the definition of "electric utility". Under this amendment, ownership of excluded electric plant would not cause an entity to be considered an electric utility or to be subject to regulation as an electric utility under the Maine Revised Statutes, Title 35-A. Prior to March 1, 2000, "excluded electric plant" would include generators used to produce energy sold at wholesale, small power producers, cogenerators, electric generation enterprises and self generators. After February 29, 2000, "excluded electric plant" would include all generation assets, other than assets held by an electric utility, thereby largely deregulating generation service.

The amendment proposed to grant a limited authorization to electric utilities to transfer certain rights, privileges or immunities that have been granted by law to the electric utilities. The amendment proposed to limit the authorization as follows.

1. No authorization would be given if there were an express provision in law denying authorization to transfer the rights, privileges or immunities.
2. If by law the rights, privileges or immunities may only be transferred upon condition, the condition would have to be met.
3. The authorization would include only those rights, privileges and immunities that are generation assets or that are necessary to the ownership or operation of generation assets required by law to be divested.
