Summary Of Legislation Before The Joint Standing Committees
August 2001

Enclosed please find a summary of all bills, resolves, joint study orders, joint resolutions and Constitutional resolutions that were considered by the joint standing select committees of the Maine Legislature this past session. The document is a compilation of bill summaries which describe each bill and relevant amendments, as well as the final action taken. Also included are statistical summaries of bill activity this session for the Legislature and each of its joint standing committees.

The document is organized for convenient reference to information on bills considered by the committees. It is organized by committees and within committees by bill (LD) number. The committee report(s), prime sponsor for each bill and the lead co-sponsor(s), if designated, are listed below each bill title. All adopted amendments are listed by paper number. Two indices, a subject index and a numerical index by LD number are provided for easy reference to bills. They are located at the back of the document. A separate publication, History and Final Disposition of Legislative Documents, may also be helpful in providing information on the disposition of bills. These bill summaries also are available at the Law and Legislative Reference Library and on the Internet (www.state.me.us/legis/opla).

Joint Standing Committee on Natural Resources

Enacted law summary

Public Law 2001, chapter 418 requires the Department of Environmental Protection to establish and periodically revise interim discharge limits for mercury in order to reduce the discharge of mercury over time. Discharge limits established by the department may not be less stringent than an interim limit established by the department pursuant to its rules effective February 5, 2000. A facility discharging mercury must comply with the interim limit unless the department establishes a new interim limit. A facility in compliance with an interim discharge limit or remediation plan, order or license established by the department is not in violation of any of the ambient water quality criteria for mercury.

The law also prohibits discharges of mercury to a publicly owned treatment facility that contributes to the failure of the treatment facility to comply with interim effluent limits or applicable ambient water quality criteria for mercury. The law allows the owner of the publicly owned treatment facility to require a user, other than a residential user, to institute measures needed to abate the discharge of mercury to the facility and establish reasonable time schedules for completion of the measures.

The law also establishes specific ambient water quality criteria for mercury for aquatic life and human health and requires the Department of Environmental Protection to establish by rule wildlife protection criteria. The law also authorizes the department to establish a site-specific bioaccumulation factor for mercury protective of human health and wildlife and requires the department to adopt major substantive rules establishing a statewide bioaccumulation factor protective of 95% of the State's water bodies.

The law also requires the department to report to the joint standing committee of the Legislature having jurisdiction over natural resources matters by January 15, 2005 and every 5 years thereafter on the status of mercury discharges; progress in implementing pollution prevention plans; and progress toward attaining ambient water quality criteria for mercury. The report may include any necessary implementing legislation.

Chapter 418 was enacted as an emergency measure effective June 15, 2001.
