121st Maine Legislature First Regular Session

Summary Of Legislation Before The Joint Standing Committees

Enclosed please find a summary of all bills, resolves, joint study orders, joint resolutions and Constitutional resolutions that were considered by the joint standing and joint select committees of the Maine Legislature this past session. The document is a compilation of bill summaries which describe each bill and relevant amendments, as well as the final action taken. Also included are statistical summaries of bill activity this session for the Legislature and each of its joint standing committees.

The document is organized for convenient reference to information on bills considered by the committees. It is arranged alphabetically by committee name and within committees by bill (LD) number. The committee report(s), prime sponsor for each bill and the lead co-sponsor(s), if designated, are listed below each bill title. All adopted amendments are listed by paper number. Two indices, a subject index and a numerical index by LD number are provided for easy reference to bills. They are located at the back of the document. A separate publication, History and Final Disposition of Legislative Documents, may also be helpful in providing information on the disposition of bills. These bill summaries also are available at the Law and Legislative Reference Library and on the Internet (www.state.me.us/legis/opla).

Joint Standing Committee on Natural Resources

recommendation of the Department of Environmental Protection include provisionally adopted rules and instead proposed that the recommendations may include draft rules.

House Amendment "A" to Committee Amendment "A" (H-368) proposed to prohibit a deposit of materials on the banks of Class A waters that makes the negligent transfer of pollutants into the waters imminent. This amendment was not adopted.

Enacted Law Summary

Public Law 2003, chapter 318 amends Maine's storm water management law to extend the review period for applicants proposing to meet the standards by using structural means from 60 to 90 days. It allows the discharge of storm water to waters having a drainage area of less than 10 square miles if the discharge is in conformance with state and local requirements. It provides that certain discharge limitations do not apply to the discharge of storm water. It provides that storm water discharges to Class A waters must be in compliance with state and local requirements. It clarifies that material may not be deposited on the banks of Class A waters in any manner that makes transfer of pollutants into the waters likely.

Chapter 318 requires the Department of Environmental Protection to report to the Joint Standing Committee on Natural Resources by February 1, 2004. The report must include recommendations for improving the effectiveness of storm water management in this State and may include draft rules that regulate storm water discharges to impaired waters from existing development where necessary to allow restoration of water quality and from new development both during and after construction. The department shall consult with state and federal agencies and environmental and business interest groups when considering recommendations. The Joint Standing Committee on Natural Resources may report out legislation related to storm water management to the Second Regular Session of the 121st Legislature.

Public Law 2003, chapter 318 was enacted as an emergency measure effective May 27, 2003.

KOFFMAN MARTIN		

LD 1617 proposes to prohibit subdivisions that convert the primary use of the land from timberland to nontimberland use in situations when the land being subdivided has changed ownership in the 5 years preceding the subdivision application and when the subdivision exceeds 100 acres alone or in conjunction with other similar divisions created within 5 years out of the same parcel of land that resulted in conversion of the primary use of those subdivisions from timberland to nontimberland use.
