Summary of Legislation Considered by the Joint Standing Committees
August 2005

Enclosed please find a summary of all bills, resolves, joint study orders, joint resolutions and Constitutional resolutions that were considered by the joint standing select committees of the Maine Legislature this past session. The document is a compilation of bill summaries which describe each bill and relevant amendments, as well as the final action taken. Also included are statistical summaries of bill activity this session for the Legislature and each of its joint standing committees.

The document is organized for convenient reference to information on bills considered by the committees. It is organized by committees and within committees by bill (LD) number. The committee report(s), prime sponsor for each bill and the lead co-sponsor(s), if designated, are listed below each bill title. All adopted amendments are listed by paper number. A subject index for each committee is included immediately before the bill summaries for that committee, and a numerical index by LD number is included at the back of the document. A separate publication, History and Final Disposition of Legislative Documents, may also be helpful in providing information on the disposition of bills. These bill summaries also are available at the Law and Legislative Reference Library and on the Internet (www.state.me.us/legis/opla).

Joint Standing Committee on Utilities and Energy

2. Add a Tier 2 requirement for which only a subset of Tier 1 renewable resources would qualify: hydroelectric, biomass and municipal solid waste facilities would be excluded from Tier 2 resources. It proposed to establish as an initial requirement that 1% of a competitive electricity provider’s portfolio be met with Tier 2 resources; the percentage would increase 1/2 % each year to 5% in 2014;
3. Establish an alternative compliance payment of \$35/megawatt-hour for unmet Tier 2 requirements and provide that funds collected be used by the Public Utilities Commission to provide “per-megawatt-hour support payments” to resources eligible for Tier 2; and
4. Require the Public Utilities Commission to allow Tier 2 requirements to be met using renewable credits if it finds a reliable system of credit trading exists.

The committee, by letter, requested that a stakeholder group be formed to examine mechanisms to achieve the goals of this legislation.

This bill relates to the same matter as LD 1434.

This bill was carried over by H.P. 1203 to the next special or regular session of the 122nd Legislature.

LD 1098 proposed to require the Public Utilities Commission to study energy standards for existing and new construction of residential rental properties and report to Joint Standing Committee on Utilities and Energy by January 1, 2006.
