**LD 398     An Act To Require Transmission Lines To Be Placed Underground near  
Certain Facilities**

**DIED ON  
ADJOURNMENT**

<u>Sponsor(s)</u>	<u>Committee Report</u>	<u>Amendments Adopted</u>
VALENTINO	ONTP MAJ RE-REF MIN	

This bill requires that high-voltage transmission lines capable of operating at 115 kilovolts or more that are constructed, rebuilt or relocated on or after October 1, 2007 near areas that are frequently used by children, including residential areas, public playgrounds, schools, child care facilities and children's camps, be placed underground. The bill directs the Public Utilities Commission to adopt rules regarding this requirement, and it provides an exemption from the requirement if a transmission and distribution utility can demonstrate to the Public Utilities Commission that it is technologically infeasible to place the transmission line underground.

**ONTP**

<u>Sponsor(s)</u>	<u>Committee Report</u>	<u>Amendments Adopted</u>
BLISS	ONTP	

This bill allows the Public Utilities Commission to order the transfer or divestiture of a transmission and distribution utility's transmission or transmission-related assets if the commission finds it will lower costs of electricity to consumers in the State, will not have a negative impact on the operation of the transmission system and is in the public interest, or if the commission finds that the utility constructed a transmission line without approval from the commission, that is, without obtaining a certificate of public convenience and necessity.

The bill provides that if the commission orders such a transfer or divestiture, it may order that the transmission assets be sold or transferred to an independent transmission company. The terms of the transfer or divestiture must be approved by the commission and provide fair compensation, and the transfer or divestiture must occur within 12 months of the order.
