## *Joint Standing Committee on Utilities and Energy*

**LD 743**

**An Act To Allow Transmission and Distribution Utilities To Generate and Sell Power**

ONTP

<u>Sponsor(s)</u>	<u>Committee Report</u>	<u>Amendments Adopted</u>
TUTTLE SMITH D	ONTP	

This bill removes the provisions in current law that prohibit investor-owned transmission and distribution utilities from owning and operating electric generation facilities and from selling electric energy to consumers at retail, including those provisions that require such utilities to divest generation assets and generation-related business activity. The bill requires the Public Utilities Commission to adopt rules to govern the ownership of generation assets, generation of electricity and retail sale of electricity by investor-owned transmission and distribution utilities.

**LD 759**

**An Act To Increase the Percentage of Renewable Power in Systems of Very Large Investor-owned Transmission and Distribution Utilities**

ONTP

<u>Sponsor(s)</u>	<u>Committee Report</u>	<u>Amendments Adopted</u>
MACDONALD	ONTP	

This bill requires that, beginning in 2008, a competitive electricity provider selling electricity to the public in an area served by an investor-owned transmission and distribution utility that serves more than 500,000 customers in the State must increase the percentage of its portfolio of supply sources provided by renewable resources. Specifically, such a competitive electricity provider must increase the percentage of its supply portfolio provided by eligible resources, including renewable and efficient resources, by one percentage point per year, beginning at the current requirement of 30% and increasing from 31% to 40% in the years 2008 through 2017.

**LD 764**

**An Act To Clarify Standards for Issuance of a Certificate of Public Convenience and Necessity**

ONTP

<u>Sponsor(s)</u>	<u>Committee Report</u>	<u>Amendments Adopted</u>
FAIRCLOTH	ONTP	

This bill applies to the construction of transmission lines capable of operating at more than 138 kilovolts and occupying the submerged lands of the State. The bill prohibits the Bureau of Parks and Lands from leasing submerged lands for such a transmission line, unless the Public Utilities Commission determines that the transmission line will reduce the cost of electricity to Maine consumers. The bill also prohibits the Public Utilities Commission from granting a certificate of public convenience and necessity for such a transmission line, unless the commission finds that the transmission line will reduce the cost of electricity to Maine consumers.

**LD 765**
